JEREMY DIBBLE

Stanford University. University in Palo Alto, California, USA, near San Francisco. It has a strong music programme and holds an important music collection. *See* SAN FRANCISCO, §§1 and 5.

Stanislav, Josef (*b* Hamburg, 22 Jan 1897; *d* Prague, 5 Aug 1971). Czech composer, pianist and administrator. The son of an orchestral player at various European opera houses, Stanislav began his studies in Prague, with Jeremiáš and Foerster for composition and with Mikeš and Veselý for the piano. He graduated from the Prague Conservatory masterclasses as a pupil of Novák (composition, 1922) and Hoffmeister (piano, 1929). At Prague University he was a pupil of Zdeněk Nejedlý. In the inter-war period he was a leading figure in the organization of Prague musical life. He wrote incidental music for Prague performances of plays by Russian and left-wing German writers. He was also active in the Přítomnost contemporary music society, and a representative of revolutionary proletarian art at home and abroad. In 1933 he was a delegate to the Olympiad of Workers' Theatre and Music (MORT) in Moscow, and he took part in cultural activities associated with the formation of a popular anti-fascist front in Czechoslovakia (1935). His works were banned during the German occupation. After 1945 he helped to re-establish Czech musical life: he participated in the formation of the Union of Czechoslovak Composers and his mass political songs were widely disseminated. In 1948 he was appointed professor of popular creative arts at the Prague Academy, and in 1953 he became director of the Institute for Ethnography and Folklore of the Czechoslovak Academy of Sciences. He received several state awards for his artistic and public work.

JIŘÍ MACEK

Stanislavsky [Alekseyev], **Konstantin Sergeyevich** (*b* Moscow, 5/17 Jan 1863; *d* Moscow, 7 Aug 1938). Russian theatre and opera director, actor and theorist. He directed and performed in operettas in his family's private theatre and prepared for an opera career with the tenor Fyodor Komissarzhevsky, turning to drama only because his voice proved unsuitable for opera. In 1898 he and VLADIMIR IVANOVICH NEMIROVICH-DANCHENKO founded the Moscow Art Theatre, where they encouraged new playwrights such as Chekhov and Gorky and experimented with naturalistic staging. Out of this distinguished ensemble developed the Stanislavsky system, the theatre's most widespread approach to acting and directing. According to the system actors prepare their roles from within instead of concentrating on external presentation; they determine their character's psychological and social background, even extending beyond the specific dramatic situation. Combined with the actor's self-awareness and 'emotion memory', this leads to complete identification with the character, in turn resulting in an intensely realistic performance. Stanislavsky approached setting, costume, movement, light and sound with similarly studied concern for detail and accuracy. His early musical training and Chaliapin's influence made him especially sensitive to tempo and rhythm, and he proposed classes in music for his actors. He was among the first producers to 'orchestrate' serious dramatic scenes with music and sound effects to support underlying moods and ideas. He believed that dramatic art was moving towards 'the synthesis of music and drama, of words and sound'.

Stanislavsky's last 20 years were devoted more to opera than to theatre. In 1918 he organized the Bol′shoy Theatre Opera Studio whose aims were to set up a laboratory for research in the art of lyric drama; to renovate archaic traditions of opera production; to apply the system to opera acting; and to fuse in performance music, singing, words and movement. He maintained that the score, not the libretto, must be the point of departure in producing opera, and he depended upon the music to supply his motivation and truth, as well as tempo and rhythm. Immediately successful and ultimately influential, his studio productions were noted for narrative clarity and

consistency, convincing acting and unmannered singing. By 1926 the studio, detached from the Bol'shoy, was renamed the Stanislavsky Opera Theatre Studio. Illness prevented Stanislavsky from taking sole responsibility for productions after 1928, but he continued planning and supervising opera until his death. His studio productions included: *Yevgeny Onegin*, 1919 (Act 1), 1922 (complete); *Werther*, 1921; *Il matrimonio segreto*, 1925; *The Tsar's Bride*, 1926; *La bohème*, 1927; *May Night*, 1928; *Boris Godunov*, 1929; *The Queen of Spades*, 1930; *The Golden Cockerel*, 1932; *Il barbiere di Siviglia*, 1933; *Carmen*, 1935; *Don Pasquale*, 1936; *Madama Butterfly*, 1938; and, posthumously produced, *Rigoletto*, 1939.

PAUL SHEREN

Stanković, Kornelije (*b* Buda, 18/30 August 1831; *d* Buda, 5/17 April 1865). Serbian composer and folksong collector. He studied in Vienna with Simon Sechter (harmony and counterpoint) and Rudolf Willmers (piano), and was directly influenced by the Slovene circle of intellectuals in Vienna at that time. In Serbia church chant and folk singing, the basic forms of musical practice, survived hitherto mainly through oral tradition, and while still a student Stanković began to write down and harmonize secular music. He published his first adaptations of Serbian folksongs for voice and piano or four-part choir in Vienna between 1851 and 1854. Shortly afterwards he published a further four collections of folksongs and a series of virtuoso piano miniatures and variations. Three collections of church chant were dedicated to the 'Serb nation'. Stanković's collected Serbian folk melodies were used by Rimsky-Korsakov, Tchaikovsky and others in their compositions.

Stanković spent time in Sremski Karlovci, the centre of the Karlovci Metropolitanate, and also in the monasteries of Fruška Gora (1855–61). There he worked on recording Serbian church chant and on harmonizing the melodies for four-part chorus. The product of his work were three books of Serbian Orthodox chant, published in Vienna between 1862 and 1864. Stanković also contributed valuable forewords to his published collections of Serbian music. His copious handwritten legacy (approximately 100 pages of one-part melodies and 17 notebooks including 1500 pages of four-part Serbian church chant) is preserved in the archive of the Serbian Academy of Sciences and Arts, Belgrade.

Stanković performed as a pianist in Austria and in Serbian cities, was the conductor of the oldest Belgrade singing society (1863), composed music for the theatre, and was involved in the founding of a music school in Belgrade. With the Vienna opera choir he gave the first concert performances of Serbian church music, in the hall of the Musikverein in Vienna in 1855 and 1861.

DANICA PETROVIĆ

Stankovych, Yevhen Fedorovych (*b* Svaliava, Zakarpattya region, Ukraine, 19 Sept 1942). Ukrainian composer. He studied at the Kiev Conservatory under Lyatoshyns'ky and then Skoryk, graduating in 1970 and, since then, has received several major awards including the Shevchenko Prize (1986, Ukraine) and one from UNESCO (1985). Stankovych's works have been heard across Europe and the former Soviet Union, in the USA and in Asia. In 1996 he was composer-in-residence of the canton of Berne, Switzerland.

Along with such figures as Hrabovs'ky and Sil'vestrov, Stankovych developed the avant garde in Ukrainian music and contributed to its integration into the mainstream of the European tradition. Stankovych's music, marked by a strikingly dramatic temperament and unfettered emotion, is supported by a full command of modernist techniques without allowing any one of these to predominate; and while the style is definably one of the late 20th century, folk themes of Ukraine's various cultural groups have paramount importance in the substance of his language. His uniqueness may be said to lie in his pronounced affinity with the vernacular and his ability to integrate it into orchestral formats. While his elaborate polyphonic textures and meditative lyricism are reminiscent of

Baroque instrumental music (the First Symphony, '*Sinfonia larga*'), the full-bodied, expressive melodies display a clear post-Romanticism. Many of his larger works have been written in reaction to tragic events in Ukraine's history. *Dictum* (1987) is a monumental symphony in 11 movements for chamber ensemble and commemorates the Chernobyl disaster: monologues of bitter confession are placed among images of universal catastrophe and episodes of prayers and repentance. As the Soviet Union collapsed, this trend became more pronounced: *Kaddish-Requiem 'Babyn Yar'* was composed in memory of the Nazi murder of Jews in Kiev in 1941, *Requiem for Those who Died of Famine* is a memorial to the seven million victims of the Ukrainian famine (1932–3), and with *Black Elegy* Stankovych returned to the subject of Chernobyl.

VIRKO BALEY

Stanley, John (*b* London, 17 Jan 1712; *d* London, 19 May 1786). English composer, organist and violinist. He became blind as the result of a domestic accident at the age of two, and began to study music as a diversion when he was seven. Little progress was made under his first teacher, John Reading (ii), but he got on so well under Maurice Greene at St Paul's Cathedral that before he was 12 he was appointed organist at the nearby church of All Hallows Bread Street. In 1726 he was elected to a similar post at St Andrew's, Holborn, 'in preference to a great number of candidates' (Burney), and in 1734 he was made organist to the Honourable Society of the Inner Temple, having resigned from All Hallows in 1727. According to his pupil John Alcock (i), Stanley's playing of voluntaries at the Temple and St Andrew's attracted musicians from all over London, including Handel. He was also an excellent violinist and for several years directed the subscription concerts at the Swan Tavern, Cornhill, and the Castle, Paternoster Row. In 1729 he became the youngest person to gain a BMus degree from Oxford University.

Stanley was married in 1738 to Sarah, the elder daughter of Captain Edward Arlond of the East India Company, who brought him a dowry of £7000. In the same year the couple took up residence in Walbrook, where Sarah's sister Ann joined them and later acted as Stanley's amanuensis. Shortly after his marriage he became friendly with the future music historian John Hawkins, who supplied Stanley with texts for solo cantatas and who later lived across the road from the Stanleys following their move to Hatton Garden in 1751. Thanks largely to his remarkable memory, Stanley was able to enjoy a comfortable living as an organist and teacher and to join in music-making and card-playing with a large circle of friends. He was also able to direct several Handel oratorios during the 1750s, and after Handel's death in 1759 he assumed responsibility for the annual Lenten oratorio seasons at Covent Garden (later at Drury Lane), first with J.C. Smith and from 1776 with Thomas Linley (i). His own oratorios *Zimri* (Covent Garden, 12 March 1760) and *The Fall of Egypt* (Drury Lane, 23 March 1774) were modelled closely on Handel's, but were apparently unsuccessful. In 1770 he was elected a governor of the Foundling Hospital and until his death took a keen interest in its musical affairs, directing the annual *Messiah* performances in 1775–7, and selecting and composing music for the chapel services. He also took part in charitable performances at the Magdalen Hospital. In 1779 he succeeded Boyce as Master of the King's Band of Musicians, in which capacity he composed 15 New Year and birthday odes. His collection of music, books and instruments was auctioned at Christie's in June 1786.

Stanley is chiefly remembered for his three sets of organ voluntaries, which, though published between 1748 and 1754, include pieces dating from the late 1720s and the 1730s. They are mostly in the two-movement form

John Stanley: engraving by Mary Ann Scott after Thomas Gainsborough

established by his teachers Reading and Greene, consisting of a slow introduction for diapasons and a quick movement featuring a solo stop, such as the cornet or trumpet. Each volume ends with three or four preludes and fugues for full organ. Even more interesting, however, are the concertos and cantatas, which illustrate the part played by Stanley in the transition from the Handelian Baroque to the *galant* style associated in England with J.C. Bach. The six op.2 concertos are among the finest English string concertos in the Corelli–Handel tradition, and were popular enough to be reissued in arrangements for organ and as solos for violin, flute or harpsichord. No.6 (with one movement omitted) reappeared as the third piece of op.10, published 33 years later, but with the op.10 version leaning significantly towards the newer, pre-Classical style. In these later concertos Stanley abandoned fugues in favour of ritornello-based movements and elegant, symmetrical dances, and the keyboard writing seems to have been designed more for the emerging fortepiano than for the more established organ or harpsichord.

A similar, though perhaps less radical, change of style can be seen in the two sets of solo cantatas opp.3 and 8. The first shows a command of da capo technique rare among Stanley's English contemporaries; each cantata includes at least one example of the form. In the later set there are none at all, most of the arias being in binary form with the two vocal sections often separated by short instrumental symphonies. (Binary form also features prominently in the opp.1 and 4 flute solos.) *Arcadia, or The Shepherd's Wedding*, composed to celebrate George III's marriage to Queen Charlotte, is the only extant example of Stanley's theatre music; it was revived and broadcast on BBC Radio 3 to mark the wedding of the Duke and Duchess of York in 1986. Stanley may also be credited with the composition of a full-length opera, *Teraminta*, attributed to him in the only surviving score.

WORKS

STAGE

Incid music to Oroonoko (J. Hawkesworth, after T. Southerne), London, Drury Lane, 1 Dec 1759, lost
The Tears and Triumphs of Parnassus (masque, R. Lloyd and A. Murphy), London, Drury Lane, 17 Nov 1760, lost
Arcadia, or The Shepherd's Wedding (dramatic pastoral, 1, Lloyd), London, Drury Lane, 26 Oct 1761, *GB-Lcm*
Teraminta (opera, 3, H. Carey), unperf., *Lcm*

ORATORIOS

Jephtha (J. Free), ?1751–2, *D-Hs, GB-Lcm*
Zimri (Hawkesworth) (London, 1760)
The Fall of Egypt (Hawkesworth)), 1774, *Lcm*

COURT ODES

music lost and texts by W. Whitehead unless otherwise stated

Let Gallia mourn! th' insulting foe, birthday, 1779; And dares insulting France pretend, New Year, 1780; Still o'er the deep does Britain reign, birthday, 1780; Ask round the world, from age to age, New Year, 1781; Still does the rage of war prevail?, birthday, 1781; O wond'rous power of inborn worth, New Year, 1782, S, S, A, T, B, B, SATB, 2 ob, 2 vn, va, bc, *GB-WCc*; Still does reluctant Peace refuse, birthday, 1782; At length the troubled waters rest, birthday, 1783; Ye nation, hear th' important tale, New Year, 1783; Enough of arms, to happier ends, New Year, 1784; Hail to the day, whose beams again, birthday, 1784; Amid the thunder of war (True Glory seems the pride of war) (T. Warton), birthday, 1785; Delusive is the poet's dream, New Year, 1785; Dear to Jove, a genial isle (Warton), New Year, 1786; When Freedom nurs'd her native fire (Warton), birthday, 1786

MALCOLM BOYD/GLYN WILLIAMS

Stannar, William. English composer, possibly identifiable with WILLIAM STONARD.

Stansby, William (*d* 1638). English music printer. He was apprenticed to John Windet in 1591 and made free of the Stationers' Company in 1597. He succeeded to Windet's business in 1611, and in 1628 he acquired some of the music copyrights of Thomas Snodham. In this way Stansby inherited two of the most important music printing businesses in 17th-century London, yet he made little use of them, printing only nine music volumes in his relatively long career. Stansby's press was astonishingly variable in the standard of its printing. Whereas Thomas Leighton's *Teares or Lamentacions of a Sorrowful Soule*, published over Stansby's imprint in 1614, is an elaborate, almost virtuoso piece of printing, his other publications appear slapdash and untidy. In fact, Stansby was severely taken to task by the Stationers' Company over the low standard of his work, and his relations with the company deteriorated so badly, over his unruly behaviour as much as his printing, that in 1627 his share of the English stock was sequestered and he was banned from entering Stationers' Hall. Stansby cannot be described as either a distinguished or an enthusiastic music printer, yet the importance of his output is such that it seems likely he was the only printer in London who had the requisite materials to print music at that time. In 1629, for example, he printed *French Court-Aires*, a volume of songs by Pierre Guédron and Antoine Boësset, originally published in Paris by Pierre Ballard, but appearing in England *with their Ditties Englished … Collected, Translated, Published by Ed. Filmer*. This volume marks the first appearance of a slur in English music printing, and his publication of Martin Peerson's *Motets* of 1630 has the first figured bass to appear in a printed volume in England. The year after he died his widow assigned his business to Richard Bishop. At the beginning of his career Stansby appears to have worked at the Cross Keys, St Paul's Wharf, which was Windet's address; he later moved to his own shop in St Dunstan's Churchyard, Fleet Street.

MIRIAM MILLER

Stantipes (Lat.). *See* ESTAMPIE.

Stappen, Crispin [Crispiaenen, Crispijne] **van** [van der, de] (*b* *c*1465; *d* Cambrai, 10 March 1532). Composer and tenor, probably of South Netherlandish birth. He was paid as a *cotidiane* singer from 30 September 1485 to 25 March 1488 and *tenor* teaching choirboys in 1486–7 at the church of St Nicolas, Brussels. On 18 August 1492 he left the Ste Chapelle in Paris, probably for Padua, where he is documented (perhaps in absentia) on 22 May 1492. On 7 October 1492 he was appointed *maestro di cappella* of Padua Cathedral for five years, although he served only three months. The next year he joined the papal chapel, remaining until 1507, except for six months from August 1498, spent in his old post at Padua. On 23 August 1504 he became non-resident canon of Cambrai Cathedral, where he is documented in December of that year. In 1506–7 he joined the Marian confraternity of the church of St Jan in 's-Hertogenbosch, but he was back in Rome by September 1507. From July 1509 until his death he stayed at Cambrai except for a recruiting expedition for the papal chapel in 1509, a pilgrimage to Rome, Padua and Loreto in 1521 and a brief appointment in 1524–5 as *maestro di cappella* at the Santa Casa in Loreto, where he became honorary canon on 5 May 1525. He returned on 26 February 1526 to Cambrai Cathedral, where he bequeathed money to repair the altar of the chapel of St Anne.

Stappen's few extant compositions appear in sources completed by 1508, and to judge from their style, may date from the years 1485–95. *Beati pacifici* takes the antiphon opening as an ostinato in the top voice over the tenor of *De tous biens plaine*. The tenor of *Gentil galans* is a monophonic song (ed. G. Paris and A. Gevaert, *Chansons du XVe siècle publiées d'après le manuscrit de la Bibliothèque Nationale de Paris*, Paris, 1875, no.126) which refers directly to the Breton uprising of 1488 and was presumably composed before he left Paris in 1492. The strict strambotto *Vale vale de Padoa*, with its personal farewell to Padua, ends the beautifully illuminated strambotto manuscript copied in Padua in 1496, so it must have been composed for his departure in 1493. Also in this source is his *Ave verum corpus*, in standard lauda style; this, too, was surely composed in Italy.

STANLEY BOORMAN/BARBARA H. HAGGH

Stara Zagora. Bulgarian city. Situated on the crossroads from Western Europe, the East and Russia, the city was at first visited by foreign companies. In 1897 the Kaval music society was founded, which staged its first full-scale performance, Georgi Atanasov's *Gergana*, in 1925. The Southern Bulgarian Regional Opera was formed in 1931. In 1933–4 the opera house came under the administration of the city; it became state run in 1946, opening as the Narodna Opera Stara Zagora (Stara Zagora National Opera) on 19 June with *Il barbiere di Siviglia*. Leading figures have included the music director Romeo Raychev, Zlatan Stanchev and the conductors Dobri Khristov, Yosif Yosifov and Dimitar Dimitrov. Since the early 1970s Stara Zagora has hosted the only festival especially for opera and ballet in Bulgaria. The first purpose-built opera house in Bulgaria (seating 700) opened with Lyubomir Pipkov's *Momchil* in 1972. During the 1980s the repertory was orientated towards large-scale operas such as *Boris Godunov*, *Der fliegende Höllander*, *Norma* and Marin Goleminov's *Trakiyski idoli* ('Thracian Idols'). Until the theatre burnt down in 1991, there were 150 performances each year including five premières, one of which was an operetta or musical; opera and drama were performed on alternate days.

MAGDALENA MANOLOVA

Starck, Ingeborg. *See* BRONSART, INGEBORG VON.

Stardust, Ziggy. *See* BOWIE, DAVID.

Stárek, Jiří (*b* Močovice, 25 March 1928). Czech conductor. He studied the violin, clarinet, piano and conducting at the Prague Conservatory to 1950. In 1953 he became conductor of the Czech RSO, a post he held for 15 years; during this time he was also principal conductor of the Prague Musical Theatre, 1961–2, director of the Collegium Musicum Pragense, 1963–8, and principal conductor of the Prague RSO, 1964–8. He appeared at the 1967 ISCM festival in Prague and the 1968 Salzburg Festival. In 1969 he began a regular association with the Trondheim SO and in 1973 with the Stuttgart RSO and the orchestra of Radio Sender Freies, Berlin. He was appointed a professor and conductor at the Musikhochschule in Frankfurt in 1973, and frequently conducted the Frankfurt RSO. From 1976–80 he was artistic director of the RIAS Sinfonietta, Berlin, and from 1981–4 chief conductor of the Trondheim SO. In 1990 he conducted in Czechoslovakia for the first time since 1968, and in 1996 was appointed chief conductor of the Prague National Theatre. Stárek's repertory contains much Romantic music and Czech music, particularly Dvořák; partly because of the Mozart tradition in Prague, he is also a fine conductor of Classical works. His conducting is notable for attention to detail and a fresh, lively approach. He has made a number of recordings, mainly of Czech music.

KARI MICHELSEN

Starer, Robert (*b* Vienna, 8 Jan 1924). American composer of Austrian birth. Piano studies began when he was four and continued at the Vienna State Academy in 1937. After Germany invaded Austria, he was given a scholarship by Emil Hauser to the Jerusalem Conservatory from 1938 to 1943. He studied piano and composition with Josef Tal, as well as composition with Solomon Rosowsky and Oedeon Partos. From 1943 to 1946 he served in the British RAF, often touring as a pianist. In 1947 under a scholarship to the Juilliard School, he continued composition studies with Frederick Jacobi, and received a postgraduate diploma in 1949. In the summer of 1948 he was a pupil of Copland at the Berkshire Music Center. He became a US citizen in 1957. Her served on the faculty of Juilliard from 1949 to 1974. In 1963 he joined the staff of Brooklyn College CUNY, where he was promoted to full professor in 1966, distinguished professor in 1986, and retired in 1991. He received an award from the American Academy of Arts and Letters in 1979 and became a member in 1994. The Austrian Medal of Honour was awarded to him in 1995. Numerous commissions include four ballets for Martha Graham and a Violin Concerto by Itzhak Perlman, which Perlman premiered in 1981 and later recorded with Seiji Ozawa and the Boston SO. Another premiere of note was his Cello Concerto in 1988 by Janos Starker. Starer recorded it for CRI in 1991. Starer is the author of *Rhythmic Training* (New York, 1969), *Basic Rhythmic Training* (New York, 1986) and an autobiography, *Continuo: a Life in Music* (New York, 1987).

Starer's music is characterized by chromaticism, modality and driving rhythms. His style reflects his training at the Jerusalem Conservatory in the 20th-century Viennese tradition, the complex counterpoint of Taneyev, the Arabic scales and rhythms which he learned in the region, and later, jazz in the US. There are frequent quotations. Tertian harmonies of the 1950s gave way later to a preference for a more dissonant idiom, stressing 2nds and their inversions, as he was influenced by the avant-garde movement of the 1960s. He published four serial works from 1963 to 1967 (one, the *Trio* for piano, clarinet and cello) then abandoned this technique as too limiting. He retained certain note-row procedures, however, such as 'chromatic completion' which is a withholding of one or more notes of a chromatic scale to repeat them later, creating a dramatic resolution. His melodies frequently have a plaintive, poignant lyricism, with small intervals and motivic repetitions. At other times they are jagged and wedge-like. He is skilled at creating mood changes while using the same material. An early form of Starer's was the rondo; it became the basis for the collage-like structures he wrote later. These were inspired by the literary work of Gail Godwin, whom he met at Yaddo in 1972 and who became his frequent collaborator as lyricist-librettist. In the choral works, which are accessible to performers and listeners alike, he sometimes mingles song and speech. His settings of Hebrew texts (e.g. *Psalms of Woe and Joy*) have been highly acclaimed.

DOROTHY LEWIS-GRIFFITH (with BRUCE ARCHIBALD)

Staricius, Johann [Johannes] (*b* Schkeuditz, nr Leipzig; *fl* 1609). German ?composer, poet and organist. His place of birth and the only other known facts about him – that he was a Poet Laureate and an organist at Frankfurt – are given in his only publication: *Newer teutscher weltlicher Lieder nach Art der welschen Madrigalen neben etzlichen teutschen Tänzen* (RISM 1609[29]); the first six pieces are for five voices, the remaining 17 for four. He himself certainly wrote the texts, which include words in the Saxon dialect and are prefaced by Latin mottoes. The pieces include canzonas, canzonets, ballettos, madrigals and allemandes, though none is labelled as such. Bohn established that for no.2 Staricius borrowed no.7 of Morley's book of five-part balletts of 1595, and that nos.7–13 are identical with nos.7–9, 12 (which he used twice), 13 and 1 respectively of Morley's four-part madrigals of 1594. This unacknowledged borrowing encourages the assumption that he took other foreign pieces, perhaps including further English ones, as the basis of the other numbers and raises doubts as to whether he was a composer at all. Certain maladroit features of the texts suggest that he found it difficult to fit his words to the pre-existing music. He was probably a friend of Valentin Haussmann, whom he addressed in no.11 as 'the composer to whom the gods are so closely related' and who, significantly, brought out at Nuremberg in 1609 a German edition of Morley's balletts of 1595, properly attributed.

FRIEDRICH BASER

Stark. Bohemian family of organ builders. Abraham Stark (*b* Loket, Bohemia, 1659; *d* Loket, 18 March 1709) was trained by his father Andreas, and probably served his apprenticeship with Franz Michael Kannhäuser (1634–1701) in Sokolov and in Prague. On his return to Bohemia he founded his own business in Loket, which after his death was carried on by his brother Wenzel Stark (*b* Loket, 23 Sept 1670; *d* Loket, 16 Sept 1757). Abraham Stark built the organ at the monastery church, Plasy (1690), the organs of the Cistercian abbey at Zlatá Koruna (1699) and St Francis (1688), Prague, both of which still exist, two organs at Sedlec (1690), the organ at St James, Prague (1702), where only the case exists and the organ at Staré Brno (1697), which is now housed in Snčžné. Wenzel Stark built two organs in the town church in Most (1741), both of which exist and the parish church of Zlonice (1746). Abraham Stark (frequently known as 'Meister Abraham') influenced the other organ builders of Loket, namely Johann Leopold Burhardt (1673–1751), Johann Franz Fassmann (1697–1760), Johann Ignaz Schmidt (1727–1802) and Johann Joseph Pleyer (1728–1811). The diapason choruses more often included $1\frac{1}{3}'$ and 1′ registers, and there is often a Sesquialtera, while the Zimbel stop appears less often. The group of foundation stops is considerably enlarged; as in the neighbouring lands of Saxony and Silesia, stops such as Viola da gamba, Salicet, Fugara, Gemshorn, Quintaton

and flutes of various kinds frequently appear. The pedal Mixtur stop is often replaced by a Cornet. The character of Abraham, the organ builder in E.T.A. Hoffmann's *Kreisleriana*, was probably modelled on Abraham Stark.

HANS KLOTZ/JIŘÍ SEHNAL

Stark, John (Stillwell) (*b* Shelby Co., KY, 11 April 1841; *d* St Louis, 20 Nov 1927). American music publisher. He grew up on a farm near Gosport, Indiana, and settled in Missouri in the early 1870s. By 1882 he had moved to Sedalia, Missouri, where he opened a piano and music shop under the name of John Stark & Son. Within a few years he had entered music publishing by buying out a local competitor, J.W. Truxel, including Truxel's seven music copyrights. It is probable that Stark himself (under the pseudonyms O.B. Ligato and L.C. Wezbrew) composed some of the firm's earliest publications; others were written by his son E.J. Stark. In 1899 he issued *Maple Leaf Rag* by a local composer, Scott Joplin; a masterpiece of ragtime, it became the firm's best-selling item with half a million copies printed by 1909. In 1900 Stark moved his firm to St Louis. From 1905 to 1910 he operated editorial offices in New York while maintaining a printing plant in St Louis. From about 1908, however, after disagreements with Stark over two extended works – *The Ragtime Dance* and *Treemonisha* – Joplin left the firm and published nearly all his works elsewhere.

Stark was best known for his ragtime publications, though he issued other types of popular, parlour and teaching pieces using the imprints 'John Stark & Son', 'Stark Music Company' and 'American Music Syndicate'. He also published briefly *The Intermezzo* (*c*1905–6), a genteel music magazine to which he contributed articles on ragtime. By 1918 his business had declined considerably, but he continued to publish a few rags until 1922. A unique and pioneering figure, Stark was the most significant of all ragtime publishers. He helped Joplin establish himself, and was the primary publisher of other important writers of piano rags, notably James Scott, Joseph F. Lamb, Artie Matthews, Arthur Marshall and Scott Hayden. He apparently coined the term 'classic ragtime' for the work of these composers, and in publishing pieces by black composers generally avoided the racial stereotyping found on the title-pages of contemporary sheet music. Stark's small firm competed against the giants of Tin Pan Alley, relying on the excellence of its composers, rags and on a long series of hyperbolic advertisements, letters and articles in the music press. It published more than 100 piano rags, ranking second only to Jerome H. Remick & Co. in output of instrumental ragtime. Among Stark's works is an opera, *The Vital Question* (1913), to a libretto by E.J. Stark.

JOHN EDWARD HASSE

Starker, Janos (*b* Budapest, 5 July 1924). American cellist of Hungarian birth. He entered the Budapest Academy at the age of seven and made his début as a soloist there four years later. After graduating he was principal cellist of the Budapest Opera and PO (1945–6), but decided to leave Hungary. In 1948 he settled in the USA, where he became principal cellist of the Dallas SO (1948–9), the Metropolitan Opera Orchestra (1949–53), and the Chicago SO (1953–8). In 1958 he was appointed professor of cello at Indiana University, Bloomington, where he made his home. He has toured frequently throughout the world as a cellist of outstanding distinction, setting new standards in recordings and performances of Bach's cello suites which, though more restrained in character, were widely compared with those of Casals in intellectual grasp and command of line and technique. His extensive discography also includes concertos by Boccherini, Haydn, Schumann, Dvořák, Prokofiev and Hindemith, and much chamber music, notably the cello sonatos of Beethoven and Brahms and Kodály's Sonata for solo cello.

Starker's playing has long been admired for its silken richness of tone and an expressive purpose governed by deep musical sensibility. He was the dedicatee and first performer of concertos by Bernard Heiden (1967) and Miklos Rosza (1968), and has been active in chamber ensembles, including the Roth String Quartet (1950–53) and a piano trio with Josef Suk and Julius Katchen for two years before Katchen's death in 1969. Starker has published teaching methods for all string instruments and editions of Bach's cello suites, Beethoven's sonatas and variations for cello and Dvořák's Concerto. He owns cellos by Matteo Goffriller (Venice, 1706, known as the 'Star') and Giuseppe G.B. Guarneri (Cremona, 1707, known as the 'Nova').

NOËL GOODWIN

Starobin, David (*b* New York, 27 Sept 1951). American guitarist. He studied at the Peabody Conservatory with Aaron Shearer, and made his New York début at Carnegie Hall in 1978. Since then he has established himself as a pioneer in contemporary guitar music, with over 100 new works dedicated to him. His major first performances include Elliott Carter's *Changes* (1983), Wuorinen's setting of Psalm xxxix for baritone and guitar (1979), Barbara Kolb's *Three Lullabies* (1980), Machover's Concerto for amplified guitar and chamber ensemble (1979), Kupferman's *Phantom Rhapsody* (1980) and Crumb's *Quest* (1995). In 1984 he became a member of the contemporary music group Speculum Musicae. He has taught at Brooklyn College, CUNY (1975–8), SUNY, Purchase (1978–96), and in 1993 was appointed professor of guitar at the Manhattan School of Music. Among his

recordings are works by Henze, Wuorinen, Kolb, Bland, Del Tredici, Elliott Carter and Takemitsu, as well as early 19th-century repertory by Giuliani and Regondi.

THOMAS F. HECK

Starokadomsky, Mikhail Leonidovich (*b* Brest-Litovsk, 31 May/13 June 1901; *d* Moscow, 24 April 1954). Russian composer, organist and teacher. He graduated from the Moscow Conservatory where he studied the organ with Aleksandr Gedike and composition with Myaskovsky (1926 and 1928 respectively). He gave organ recitals, and from 1930 taught orchestration at the Moscow Conservatory (from 1947 he was acting professor). He was a member of the Association for Contemporary Music (1923–32) and in 1952 he was awarded the Stalin Prize for his children's songs.

A composer with academic inclinations, Starokadomsky was influenced by Skryabin during the 1920s and later by Rimsky-Korsakov. His works are characterized by impeccable taste and technical mastery. During the 1930s Starokadomsky's music (especially his organ concertos and orchestral works) were played abroad and received sympathetic reviews (France, Czechoslovakia and USA). During the 1930s–50s he gained enormous popularity through his children's songs: many of them – in particular *Lyubitel'–rïbolov* ('The Amateur Angler') and *Vesyolïye puteshestvenniki* ('The Merry Travellers') – became the best-selling songs of the day. Among the most respected composers of film and radio music of his day, he received numerous commissions from studios and radio editors. He was also an active critic and writer, and is remembered in particular for his works on orchestration and the history of orchestral styles in which he perpetuated the ideas and principles of Rimsky-Korsakov.

ALLA VLADIMIROVNA GRIGOR'YEVA

Starowolski [Starovolscius], **Szymon** (*b* Stara Wola, Volhynia [now Belarus], 1588; *d* Kraków, 4 or 27 April 1656). Polish historian and music theorist. He studied at Kraków Academy. From 1614 he travelled round Europe as a tutor to the sons of Polish princes, visiting and living in France, the southern Netherlands (Leuven), Germany and Italy (mainly Padua and Rome). In 1639 he took holy orders and was appointed cantor at Tarnów. In 1653 he settled at Kraków, where in 1655 he became a canon of the cathedral chapter at Wawel Castle. Music was among his many interests, and he discussed it in three of his numerous publications. His collection of biographical sketches *Scriptorum polonicorum hekatonas* includes those of two 16th-century Polish composers, Marcin Leopolita and Wacław Szamotuły, and he added notes on other composers too. He returned to them in *Monumenta sarmatorum*. These were the first indication of a conscious search for, and establishment of, a Polish musical tradition; his work includes both errors and factual historical information (stressed by Chybiński and Jachimecki respectively). His treatise *Musices practicae erotemata*, dedicated to Lilius, director of music of Kraków Cathedral, has the character of a school text-book. It leans heavily on the writings of Lossius, Ornithoparchus and Johann Spangenberg and testifies to the author's wide, but at the same time superficial, knowledge of music theory.

MIROSŁAW PERZ

Starr, Daniel Victor (*b* Boston, 8 Sept 1950). American composer, theorist and violinist. He attended Yale University (BA 1968), where he studied the violin with Broadus Earle and Syoko Aki and composition with Wyner, and Princeton University (MFA 1978, PhD 1980), where his principal teachers were Babbitt and Peter Westergaard; he also studied with Wuorinen and Perle. He won two Gaudeamus awards at Bilthoven, the Netherlands (1977, 1978), and was awarded a fellowship in composition at the Berkshire Music Center (1980). As a violinist, he has played in various ensembles at the Blossom Music Festival (1971), Yale Summer School of Music at Norfolk (1970, 1972, 1974) and elsewhere.

Starr's work as a theorist has been devoted chiefly to atonal and 12-note analysis and theory; his use of formal language and linguistics to formulate theoretical and descriptive statements and his knowledge of computer technology are essential components of his theoretical work. His most important theoretical papers include 'Sets, Invariance and Partitions' (*JMT*, ix, 1978, pp.1–41), 'Derivation and Polyphony' (*PNM*, xxiii/1, 1984, pp.180–257) and with Robert Morris, 'A General Theory of Combinatoriality and the Aggregate' (*PNM*, xvi, 1977–8, no.1, pp.3–35, no.2, pp.50–84). Starr's compositions reflect his theoretical interests in partitioning and aggregates: *Bouquet*, for example, transforms jazz-derived elements into abstract representations of jazz ensemble sounds by employing them within aggregate-derived polyphonic contexts.

RICHARD SWIFT

Starting transient. The initial sound produced when one vibrating system begins to drive another (e.g. string and soundboard, or reed and pipe). Although the time between the initiation and the emergence of a regular vibration may be very short, the starting transient produced in that time is one of the important characteristics distinguishing the sound of one type of musical instrument from that of another. *See also* SOUND, §6 and TRANSIENT.

MURRAY CAMPBELL

Starý, Emanuel (*b* Pardubice, 27 July 1843; *d* Prague, 1 Aug 1906). Czech music publisher. In 1867 he founded a lithographic works with Antonín Vítek in Prague, taking sole charge in November 1870. He was on friendly terms with several leading Czech composers and published a number of works by Smetana, Dvořák, Bendl, Fibich, Foerster and others. His collection of male choruses, *Hlahol*, was important in the development of Czech choral songs. He published *Dalibor* (1873–5) and *Hudební a divadelní věstník* ('Music and theatre bulletin', 1877–8). After his death his son Emanuel (*b* Prague, 18 Jan 1874; *d* Prague, 20 April 1928) took over the firm. In 1908 he reorganized it and introduced engraving and music printing on the Leipzig (Röder) pattern. Apart from choral and solo vocal compositions, he published a number of instrumental works, particularly by Foerster and Ostrčil. After his death his widow, Růžena Stará, née Meruňková, ran the firm until it was nationalized in 1949. In addition to Foerster's Cello Concerto and Second Violin Concerto, she brought out a series of Foerster's choral works and reprints of earlier publications of choral music. (*ČSHS*)

ZDENĚK CULKA/NIGEL SIMEONE

Starzer, Joseph (Johann Michael) (bap. Vienna, 5 Jan 1728; *d* Vienna, 22 April 1787). Austrian composer and violinist. In collaboration with choreographer Franz Hilverding he helped to lay the foundations for the Viennese reform of ballet by Gluck and Gasparo Angiolini (Hilverding's pupil) and thus to some extent also for the Gluckian reform of opera. Starzer followed Hilverding to the Russian court early in 1759; Hilverding returned to Vienna in 1765 and Starzer only in 1767, after which he created several large-scale pantomime ballet scores to choreography by Jean-Georges Noverre and Angiolini. Late in life he was active in the newly founded Tonkünstler-Societät, both administratively and as a composer and director.

1. LIFE. He was the son of Thomas Starzer, a horn player originally from Bavaria, and Anna Maria Wimmer; the brass instrument maker Johann Leichnamschneider stood as godfather. Thomas served in the Kapelle of Count Johann Julius von Hardegg, and as a watchman at court, before entering the orchestra of Vienna's German (Kärntnertor) theatre around 1752; another of Thomas's sons, Carl (*b c*1733; *d* Vienna, 30 Dec 1789), played horn in the French (Burg) theatre from 1757, and after Lent 1760 partnered his father in the Kärntnertortheater until its destruction by fire in November 1761.

No details of Joseph Starzer's musical training are known, but it has been surmised that he studied with court composer Giuseppe Bonno, the teacher of his sister Catharina (a gifted contralto); another possibility is the violinist Giuseppe Trani, who like Bonno was employed in the Kapelle of Field Marshal Joseph Friedrich, Prince of Sachsen-Hildburghausen. (Much later, in 1772, Burney called him 'an excellent player' on the violin, and noted that he 'played the *Adagios* with uncommon feeling and expression'.) Court payment records from March 1754 list Starzer as a violinist and composer in the French theatre, at an annual salary of 720 florins; presumably he had fulfilled both functions since the 1752 reorganization of court spectacles. For the 1755–6 season his compositional duties are said to be in both theatres, with his salary increased to 1000 florins. The following year music for ballets is specified, possibly representing a slight narrowing of his duties.

The peregrinations of dancers, and a concerted publicity effort by Giacomo Durazzo, the court's director of spectacles, soon spread the works and fame of Hilverding and Starzer abroad. Flattering accounts of Hilverding's ballets in the internationally circulating *Journal encyclopédique* and in a retrospective *Répertoire* (1757) of Viennese theatrical offerings specifically mentioned Starzer's contributions (at a time when much ballet music was produced anonymously), and helped to increase the prestige of pantomime ballet. Hilverding was called to the Russian court in late 1758 and Starzer followed after the end of the 1758–9 season. (During the interim he collaborated with several choreographers, among them Hilverding's successor in the French theatre, Angiolini.) In Russia Starzer and Hilverding restaged some of their Viennese works, and created a number of new, mainly allegorical, ballets and collaborated on ballets for Italian operas. In a report from this period, J.A. Hiller credited Starzer with introducing the works of German composers to Russian audiences (in contrast to the usual diet of Italian music). Starzer worked with other choreographers besides Hilverding, including his successor Pierre Granger, before returning to Vienna in 1767. (The 1765 contract by which Hilverding assumed responsibility for the running of the Kärntnertortheater required him to honour existing contracts with Starzer and others, which suggests that the court viewed his absence from Vienna as temporary. A 1763 collaboration with Angiolini in Vienna on dances for Giuseppe Scarlatti's *Artaserse*, attested to in the work's libretto, may have been by correspondence. There seems to have been a similar collaboration by post

on an 'American' ballet, 'di J.S.', given on the occasion of Archduke Joseph's wedding in October 1760.)

On his return Starzer became a preferred collaborator of the famed choreographer Jean-Georges Noverre, then in the first year of his engagement in Vienna. Those of his scenarios that Starzer set were mainly on *galant* and 'grotesque' subjects, but also included the heroic. Noverre was followed in Vienna in 1774 by his arch-rival Angiolini, with whom Starzer created multi-act ballets (*Le Cid*, *Teseo in Creta*) on a scale similar to Noverre's, though in a different taste choreographically. In 1771 Starzer entered a new sphere of activity, helping to found the Viennese Tonkünstler-Societät (a concert-giving charitable organization for musicians); he took over its leadership in 1772 after the death of co-founder Gassmann. Starzer's works were well represented in the society's programmes: notably, a symphony of his at the start of the inaugural concert, and a setting of Metastasio's oratorio *La passione di Gesù Cristo* in 1778, the double orchestra of which reflected the large forces typically assembled on such occasions. His arrangement of Handel's *Judas Maccabaeus* for the society's 1779 concerts, at the instigation of Baron van Swieten, helped establish a vogue that would ultimately result in Haydn's Handelian-style oratorios *Die Schöpfung* and *Die Jahreszeiten*. Starzer retired as a violinist in the orchestra in 1779, due to poor eyesight and ill health, but retained directing duties until 1783 and some administrative functions (as 'Assessor senior') until 1785.

With the advent in 1776 of Joseph II's Nationaltheater, and the dismissal of the court's ballet troupe, Starzer (described along with Salieri in court payment records as 'extra personnel', with an annual salary of 2000 florins) was called upon to compose music for German plays, the music of which seems not to survive. One Singspiel, *Die drei Pächter* (not to be confused with a work of the same name by W.G. Becker, after Monvel and Dezède, given in 1785) seems also to date from this period; significantly, its second-act finale ends with an 'Invitation to the Dance'. During the early 1780s Starzer was among the musicians participating in van Swieten's Sunday afternoon musical exercises devoted largely to the music of Bach, Handel and other composers in the strict style. Here Starzer played for the baron along with the lutenist Kohaut and (singing tenor) helped van Swieten, Mozart and others try out various choral works. He was chosen by van Swieten to arrange works of Handel and lead performances for the concerts of the Gesellschaft der associierten Kavaliere, these functions being taken over by Mozart following his death in 1787.

2. Works. Most of the works of Hilverding and Starzer prior to 1758 lack printed descriptions and attribution of the music is often dependent on payment books or other archival records, most manuscript sources (principally consisting of rehearsal partbooks among Durazzo materials at Turin, and sets of orchestral parts at the former Schwarzenberg archive at Český Krumlov) being preserved anonymously. Systematic evaluation of Starzer's early ballets is still at an early stage, but his highly gestural, pictorial music unquestionably seconded Hilverding's efforts at integrating pantomime and dance. Most of their Viennese ballets (apart from divertissements linked to operas or plays) were independent works given between the spoken or sung pieces in the two theatres' programmes, and lasted some 20 to 30 minutes. Though in his early works (usually comprising some ten to two dozen movements) he relied heavily on binary dances, Starzer ensured continuity through repetition of movements and tonal concatenation of numbers (techniques exploited by Gluck in such works as *Don Juan* and *Orfeo ed Euridice*), and for some ballets he composed long, through-composed finales. Simple sonata forms are not uncommon, particularly in *sinfonie*, and Starzer's melodic writing is assured and modern, for example in his use of octave doublings. Starzer's music frequently shows a strong folk element (including actual borrowings of French *vaudevilles*) and a varied and imaginative instrumental palette, for example chalumeaux depicting sirens' voices in *Ulisse et Circé* (1756–7), and janissary music in *Le turc généreux* (1758). Probably at the instigation of Durazzo (who boasted of providing most subjects and even plans for ballets presented in Vienna's theatres), Hilverding and Starzer occasionally blurred generic distinctions, as in *La guirlande enchantée* (1757), which includes instrumental recitative, and in their dances for Durazzo and Wagenseil's *Le cacciatrici amanti* (1755), which La Borde termed a true opéra-ballet in the French manner.

During the early 1770s Starzer accommodated Noverre's preferences with longer scores, and a clearer distinction between music meant for pantomime (through-composed and gestural) and for dancing *per se*. Individual movements, too, are generally longer and borrow numerous stylistic or formal features from opera. When these ballets were revived or adapted in Italy by Noverre's pupils, Starzer's scores impressed audiences with their sophisticated harmony and rich writing for winds. Mozart's souvenir sketches of one of the ballets given with his Milanese opera *Lucio Silla* (1772–3), choreographed by Noverre's pupil Le Picq, show the propagation of Starzer's music in Italy, as they contain numerous borrowings from his ballets *Les jalousies du sérail* and *Les cinque soltanes*.

The prominence of counterpoint in Starzer's chamber music has prompted comparisons with Haydn, and no doubt contributed to the esteem in which he was held by van Swieten. Some of his orchestral works — and not just those written for the Tonkünstler-Societät — feature uncommonly rich scoring, an indication that he was not limited by his specialization in violin playing.

WORKS

WB – *Vienna, Burgtheater*
WK – *Vienna, Kärntnertortheater*

BRUCE ALAN BROWN

Stasov, Vladimir Vasil'yevich (*b* St Petersburg, 2/14 Jan 1824; *d* St Petersburg, 10/23 Oct 1906). Russian critic of art and music. The son of an eminent architect, he studied at the School of Jurisprudence in St Petersburg from 1836 to 1843; Serov and Tchaikovsky were also pupils there, the former for part of Stasov's time when they formed a close friendship. Stasov thereafter entered the civil service, remaining until he was appointed secretary to Prince A.N. Demidov, an undemanding post which enabled him to spend 30 months from 1851 to 1854 abroad, mainly in Florence. His consuming interest in the visual arts and music was fostered during this period. On his return to Russia he found employment at the Imperial Public Library from 1856; from 1872 until his death he was in charge of the department of Fine Arts, preferring to remain in that post rather than accept the restrictions on his freedom that promotion would have brought. The library provided an ideal environment for Stasov's own researches, which resulted in a prodigious output of writing; he was also an inveterate writer of letters.

Although knowledgeable about the arts of many nations and eras, Stasov was best known for his championship of Russian artists, whom he considered as capable of producing work of the first importance as any others whose secular national traditions were longer established. Particularly in the earlier part of his career, Russian art required vigorous promotion to overcome the public preference for Western culture.

Like the literary critic Belinsky (1811–48) whose work he admired, Stasov wrote in a style which reflected his determination to infect readers with his own enthusiasm, and his style is pugnacious and partisan. He discussed music more often in general terms than in technical detail. The terms 'nationality' and 'realism' denoted qualities which he prized most highly throughout his career. While he was in the vanguard in the first decades of his career, he failed to appreciate the new artistic ideals of the *fin-de-siècle*, as Diaghilev pointed out in 1898; with the promulgation of socialist realism in the 1930s, however, it was not difficult for Stasov to be regarded as its precursor, though the attempt distorted his opinions. While Stasov lent encouragement to Gor'ky, Chaliapin and Skryabin, he had been more in tune with the currents represented by the Balakirev circle; he was especially associated with Musorgsky, the painters Repin, Kramskoy and Vereshchagin and the sculptor Antokol'sky, to all of whom he offered personal encouragement, support in the press and ideas for works, whether for subject matter or in more detailed ways. His suggestions played a role in the creation of Cui's *Andzhelo*, Borodin's *Prince Igor*, Musorgsky's *Boris Godunov*, Rimsky-Korsakov's *The Tale of Tsar Saltan*, *Sadko* (both the 'musical picture' and the opera) and *The Maid of Pskov*, and Tchaikovsky's *The Tempest* and *Manfred*. Stasov was also the first to write biographical essays incorporating reminiscences of artists he had known; such posthumous tributes were paid to Glinka (1857), Dargomïzhsky (1875), Musorgsky (1881) and Borodin (1889).

Beginning his career as a writer on music in 1847, Stasov contributed energetically to the musical controversies of the 1860s, acting as a champion of Russianness, vitality and originality unfettered by 'German rules'. He was a tireless supporter of Glinka (whom he first met in 1842 when Liszt was in Russia) and the composers who from 1856 gathered round Balakirev (who met Stasov in

that year), attacking the conservatory party (centred on Anton Rubinstein) and Serov, from the late 1850s Stasov's deadly enemy. In 1867 he coined the phrase *Moguchaya kuchka*, often rendered as 'the mighty handful', which came to be applied to the Balakirev group (though initially used in reference to the diverse group of Russian composers represented at a celebration of Slavdom held in that year). He was more consistent in his support for them than was Cui, the circle's other spokesman. When another circle including Rimsky-Korsakov, Glazunov and Lyadov emerged around the patron Belyayev in the early 1880s, Stasov lent them his weight; Cui on the other hand considered that the younger generation of that decade, though indeed the heirs of the giants of the 1860s and 70s, were also too much their imitators.

Dmitry Stasov (1828–1918), the lawyer and radical who played a part in musical life, was the brother and intimate of Vladimir.

STUART CAMPBELL

Šť'astný [Stiasny, Stiastny], **Bernard (Václav)** (*b* Prague, *c*1760; *d* Prague, *c*1835). Czech composer, cellist and teacher, son of Jan Šť'astný (*b* Klatovy, Bohemia; *d* Prague, *c*1779). He studied music with his father, an oboist of the Prague theatre orchestra, and later music theory with Josef Seger. As early as 1789 his and his younger brother's names were entered in the *Schematismus für das Königreich Böheim* among the public performers on the cello. In 1800 he was referred to by the *Allgemeine musikalische Zeitung* (ii, 506) as Prague's foremost cellist. He was a member of the Prague theatre orchestra from about 1778, played in various Prague churches and taught the cello at the Prague Conservatory from its opening (1811) to 1822. His works reveal a predilection for contrapuntal procedures. Both he and his brother Jan Šť'astný were outstanding cellists and teachers. Their compositions are for the most part instructive and were highly appreciated for their pedagogical value combined with musicality.

WORKS

Il maestro ed il scolare, 8 imitazioni e 6 pezzi con fughe, 2 vc (Bonn, *c*1814)
6 sonates progressives et instructives, 2 vc (Prague, n.d.)
Violoncell-Schule (Mainz, n.d.)
Sonata, vc, b, *D-Bsb**

For bibliography *see* ŠŤ'ASTNÝ, JAN.

MILAN POŠTOLKA

Šť'astný, (František) Jan [Johann] (*b* Prague, *c*1764; *d* after 1826). Czech composer and cellist, brother of Bernard Šť'astný. Like his elder brother, he was a member of the Prague theatre orchestra; later he was active as a cellist at Mainz (1789–97) and Frankfurt (in the second decade of

the 19th century), then as music director at Nuremberg, leaving there for Mannheim in 1826. He probably also visited Paris and London. He was renowned as a cellist and teacher. His op.3 (written while he was at Frankfurt) is dedicated to the students at the Paris Conservatoire; opp.7, 8, 10 and 13 have English dedicatees.

WORKS

op.	
—	?Sammlung einiger Lieder für die Jugend bei Industrialarbeiten (Prague, 1789)
1	Six duos, 2 vc (Offenbach, n.d.)
2	Deux Sonates, vc solo, vc (Bonn, *c*1806–7)
3	Divertimento, vc solo, va, b (Mainz, n.d.)
4	XII pièces faciles et progressives, vc, b (Bonn, *c*1814)
5	Six pièces faciles, vc, b (Bonn, *c*1815)
6	Trois duos, 2 vc (Bonn, *c*1816–17)
7	Concertino, vc solo, fl, 2 va, vc, db (Bonn, *c*1817–18)
8	Trois duos, 2 vc (Bonn, *c*1819–20)
9	Six pièces faciles, vc, b (Leipzig, *c*1821)
10	Andante with variations, vc solo, fl, 2 vn, va, vc (Bonn, n.d.)
11	Six solos, vc, b (Mainz, *c*1821), possibly by B.V. Šťastný
12	Rondo et variations, vc solo, 2 vn, va, vc (Leipzig, *c*1821)
13	Grand Trio, vc solo, va, vc (London, n.d.)

MILAN POŠTOLKA

Šťastný-Pokorný, Jaroslav. *See* GRAHAM, PETER.

Statham, Heathcote D(icken) (*b* London, 7 Dec 1889; *d* Norwich, 29 Oct 1973). English organist, conductor and composer. The son of Henry Heathcote Statham (1839–1924), an architect who wrote *The Organ and its Position in Musical Art* (London, 1909), he was a chorister of St Michael's College, Tenbury, and studied at Cambridge and under Parratt at the RCM. After a spell as organist at Calcutta Cathedral (1912–18), he returned to St Michael's as organist from 1920 to 1925, took the Cambridge MusD degree in 1923, and was subsequently organist of St Mary's, Southampton (1926–8), and Norwich Cathedral (1928–66). He shared in the conducting of the Norwich Triennial festivals, 1936–61, and between 1943 and 1946 conducted a number of LSO concerts. He edited a series entitled 'Fourteen Full Anthems by John Blow' (London, 1925). Of his own compositions the most important are Rhapsody on a Ground and Rhapsody in C, both for organ, and his church music includes a *Te Deum* for the centenary of St Michael's College, an Evening Service in E minor and a set of responses. He was made a CBE in 1967.

WATKINS SHAW

Statham, H(enry) Heathcote (*b* Everton, Liverpool, 11 Jan 1839; *d* Torquay, 29 May 1924). English architect, amateur organist and writer, father of Heathcote D. Statham. He studied the organ at Liverpool Collegiate Institution and practised architecture in Liverpool for several years before moving in 1869 to London, where he increasingly devoted time to journalism and writing. For several years during the late 1870s he gave a series of Sunday afternoon organ recitals at the Royal Albert Hall, but held no regular organist's post beyond an honorary one at St Jude's, Whitechapel. From 1883 to 1910 his principal occupation was as editor of the journal *The Builder*, and he wrote several standard works on architectural history.

A thoughtful and intelligent critic, Statham combined his knowledge of architecture and music in his writings on concert hall design, arguing that recently built large halls, such as the Royal Albert Hall and St George's Hall, Liverpool, were constructed solely as places of spectacle in defiance of the basic principles of acoustics. His *My Thoughts on Music and Musicians* included a contentious analysis of what he saw as Schubert's squandering of his exceptional gifts. He was also an outspoken critic of Wagner, and championed the music of William Sterndale Bennett at a time when it was passing out of fashion.

ROSEMARY WILLIAMSON

Statkowski, Roman (*b* Szczypiórno, nr Kalisz, 24 Dec 1859; *d* Warsaw, 12 Nov 1925). Polish composer and teacher. After law studies at Warsaw University he studied under Żeleński at the Warsaw Music Institute and under Solov'yov and Rubinstein at the St Petersburg Conservatory, where he graduated in 1890. For some time he taught in Kiev, then in 1903 he won first prize in the London International Opera Competition with his *Filenis*. In 1904 he returned to Warsaw as professor at the conservatory, proving an outstanding teacher. He was a founder-editor in 1911 of the *Kwartalnik muzyczny*. Statkowski was influenced by Russian music, particularly that of Musorgsky, and by contemporary German music: Strauss's symphonic poems and Pfitzner's operas. Lyrical and richly melodic, his work represents a link between the post-Moniuszko composers and the generation of Szymanowski.

WORKS

TERESA CHYLIŃSKA

Staubinger, Mathias. *See* STABINGHER, MATTIA.

Staudigl, Joseph (i) (*b* Wöllersdorf, 14 April 1807; *d* Michaelbeueangrund, nr Vienna, 28 March 1861). Austrian bass. In 1816 he entered the Wiener Neustadt Gymnasium, where he was noted as a boy soprano. From 1823 he attended the Krems philosophical college and in 1825 entered Melk Abbey to begin his novitiate. Moving to Vienna in September 1827 as a medical student, he ran short of money and joined the chorus of the Kärntnertortheater. He was soon singing small roles and in 1836 took over Pietro in *La muette de Portici*. In 1841 he sang Caspar (*Der Freischütz*), Lysiart (*Euryanthe*) and Sarastro at Drury Lane; the following year he sang Marcel in the British première of *Les Huguenots* at Covent Garden, where in 1843 he sang Oroveso (*Norma*). In 1846 he created Stadinger in Lortzing's *Der Waffenschmied* at the Theater an der Wien, and the part of Elijah in Mendelssohn's oratorio at the Birmingham Festival. He returned to London in 1847 to sing Bertram in *Robert le diable* at Her Majesty's Theatre. From 1848 to 1851 he was a member of the Vienna Hofoper. Equally gifted in opera, oratorio and church music, he was particularly associated with the Vienna Tonkünstler-Societät, singing in 80 of their concerts. His performances of Schubert songs were especially admired.

DAVID CHARLTON/ELIZABETH FORBES

Staudigl, Joseph (ii) (*b* Vienna, 18 March 1850; *d* Karlsruhe, April 1916). Austrian bass-baritone, youngest son of JOSEPH STAUDIGL (I). He studied with Victor von Rokitansky at the Vienna Conservatory and made his stage début in 1874 at the Karlsruhe Court Theatre as Jacob in Méhul's *Joseph*. He sang in Karlsruhe for a decade, then in 1884 was engaged at the Metropolitan, New York, singing Don Giovanni, the Dutchman, Wolfram, Wotan, Don Pizarro, Escamillo and in 1886 Pogner in the American première of *Die Meistersinger*. That year he also sang Leporello in Salzburg, at a performance of *Don Giovanni* conducted by Hans Richter. In 1887 he moved to Berlin and sang there and in Hamburg, mainly in concert. In 1885 Staudigl married the contralto Gisela Koppmayer (*d* 1929).

DAVID CHARLTON/ELIZABETH FORBES

Staudt, Johann Bernhard (*b* Wiener Neustadt, 23 Oct 1654; *d* Vienna, 6/7 Nov 1712). Austrian composer and teacher. From 1666 to 1670 he was a boarder at the Jesuit college in Vienna, and during the academic year 1667–8 he also attended lectures at the university. Nothing is known of him between 1670 and 1684, since the college archives were destroyed after the dissolution of the order in 1773. From 1684 until his death he was *regens chori* at the Jesuit monastic house in Vienna. He was much respected, as is indicated by his being made a freeman of the city. He was responsible for the musical education of the pupils at the Jesuit college. In accordance with the educational ideal of the Jesuit order, the ceremonial organization of grand occasions was central to this work. For them he had to compose both secular and sacred music and was responsible for its rehearsal. These occasions traditionally centred on dramatic performances and were the chief social events of the city, usually attended by the emperor and empress.

Staudt composed music for 39 plays performed between 1684 and 1707, most of which were by the Jesuit Johann Baptist Adolph (1657–1708), who spent most of his life in Vienna and whose plays are often considered the culmination of Jesuit dramatic art as a Baroque display of pomp and power. All show the main features of school theatre about 1700: a moral as all-embracing as possible, the demonstration of the achievements of both the pupils and the Society of Jesus as a whole, and last but not least the strengthening and confirmation of faith. This was usually connected with homage to the sovereign, as, for example, the epilogue to *Ferdinandus quintus* (1684) shows; it is an encomium of the Habsburgs and Emperor Leopold I, whom personifications of the crown lands come forward to praise as conqueror of the Turks and defender of the West and the Catholic Church. Other than in this piece, where the music played a much larger role than usual, Staudt is, in Kramer's words, 'the technically well-trained writer, prolific but deadened by routine', though one ought not to forget that these works were written primarily for didactic purposes. The choruses and the usually short ritornellos (which Wellesz misleadingly described as 'stylized dance forms' – see Kramer) are simply constructed. Roulades are frequently found in the arias, however, and strophic songs and pieces in a single section are built up into da capo forms with ritornellos. Kramer is justified in his criticism of the structure of the recitative. The instrumentation is clearly modelled on that of Kerll's Jesuit play *Pia et fortis mulier in S. Natalia* (1677).

In addition to his music for school plays, Staudt was required to compose liturgical works, but only a few survive and have so far not been examined.

WALTER PASS

Stave. *See* STAFF.

Stavenhagen, Bernhard (*b* Greiz, 24 Nov 1862; *d* Geneva, 25 Dec 1914). German pianist, conductor and composer. Following early instruction in Greiz under Wilhelm Urban, he moved with his family to Berlin at the age of 12; there he took lessons at the Hochschule für Musik with Ernst Rudorff and studied theory and composition with Friedrich Kiel. In 1880 he was awarded the Mendelssohn Prize. Following successful concert appearances in several German cities, Stavenhagen travelled to Weimar in the summer of 1885, becoming a favourite pupil of Liszt, who attended his acclaimed London début at the Crystal Palace on 10 April 1886, at which he played Liszt's First Concerto. From 1887 Stavenhagen toured throughout central Europe and in Russia and North America, creating a powerful impression wherever he appeared and being recognized as one of the foremost virtuosos of his age. After becoming court pianist to the Grand Duke of Weimar in 1890, he was awarded the Order of the White Falcon in 1892 and was appointed Kapellmeister of the Hofoper in 1895. His tenure was notable for his championship of works by contemporary composers such as Strauss, Mahler and Dvořák. This brought him into conflict with the reactionary attitudes of some court officials and at the end of the 1897–8 season he resigned his post. In 1898 he became court Kapellmeister in Munich, where he remained until 1902. Stavenhagen was also active in the pedagogical field: his students included Ernest Hutcheson and Edouard Risler, and as director of the Akademie der Tonkunst in Munich (1901–4) he conducted masterclasses and carried out an extensive reorganization of the academy, overseeing the modernization of its syllabus. His success in this field led to his being appointed director of the masterclass for piano at the Geneva Conservatoire in 1907. In Geneva he also became director and conductor of the municipal orchestra's subscription concert series, remaining there until his death.

On the evidence of his few piano roll recordings, Stavenhagen's playing was, like that of many of Liszt's later students, notable for its rhetorical breadth rather than simply virtuoso display. Hanslick praised the subtlety of his tonal palette and his variety of touch, and his sensitivity and restraint made him an especially persuasive Chopin player. He was also highly regarded as an interpreter of Beethoven. His repertory was, however, dominated by the works of Liszt, whose compositional style, in particular his development of one-movement cyclic form and thematic metamorphosis, had a profound impact on Stavenhagen's own works, as may be seen from the structure of his Concerto in B minor op.4. This was the first of three, of which one was lost, the other remaining in manuscript in the form of a piano reduction. His three sets of lieder reveal a lyrical intensity and a lush harmonic language that betrays the influence not only of Liszt, Mahler and Strauss but also contextualizes his advocacy of contemporaries such as Debussy, Ravel and Dukas.

CHARLES HOPKINS

Stax. American record company. It was started in 1957 in Memphis as Satellite Records by Jim Stewart, Neil Herbert and Fred Byler. Herbert and Byler soon left, to be replaced by Stewart's sister, Estelle Axton. It at first concentrated on country, pop and rockabilly music, but switched to rhythm and blues in 1960 with a recording by Rufus and Carla Thomas. This was distributed nationally by Atlantic who retained distribution rights for all future recordings until 1968. When an instrumental record by the Mar-Keys entitled *Last Night* became a hit, the firm was forced to change its name by a Californian company of the same name and became Stax Records ('St' from Stewart, 'Ax' from Axton).

In late 1961 a subsidiary label, Volt, was inaugurated and soon Stax developed an identifiable sound through the use of a house band consisting of Booker T. and the MGs (at times augmented by Isaac Hayes after 1963) and the Mar-Key (later the Memphis) Horns. The 'Stax sound' effectively became the model for southern soul music in the 1960s, when the company also achieved substantial success with releases by Otis Redding, Sam and Dave, Albert King, William Bell, Eddie Floyd and Johnnie Taylor (1938–2000).

In 1968 Al Bell was given 10% of the company, which was then sold to Gulf & Western. The following year Axton was displaced and Bell and Stewart became equal partners, although Bell then assumed control over most of the company's activities. In 1970 Bell and Stewart bought the company back and enjoyed unprecedented success with a more diversified roster of artists including Hayes, the Staple Singers, the Emotions and the Dramatics. Bell initiated subsidiary labels including Hip, Chalice, Enterprise, Gospel Truth, Partee, Respect and Truth and expanded the company's catalogue to include pop, country, jazz, gospel, comedy and spoken word releases. He also established a film division; Stax was instrumental in pioneering the black film score and shifting the dominant item of commerce in black music from singles to albums. In 1975 Stax was forced into bankruptcy as a result of a takeover attempt by CBS Records. By the late 1990s, the influence of Stax was ubiquitous: it was the most reissued independent label of any in North America. Stax recordings are regularly sampled by rap artists and featured in commercials; movies and cover versions of songs. (R. Bowman: *Soulsville U.S.A.: the Story of Stax Records*, New York, 1997)

ROB BOWMAN

Staynov, Petko (*b* Kazanlŭk, 1 Dec 1896; *d* Sofia, 25 June 1977). Bulgarian composer. Having lost his sight when he was five, Staynov took up a musical career rather than follow the family traditions in commerce. He studied at the Sofia Institute for the Blind and was then active for five years as a pianist in his native town. From 1920 to 1924 he studied composition with Wolf and the piano with E. Münch in Brunswick and Berlin. On his return to Bulgaria he became very active in Bulgarian cultural life

from 1927: he was a piano teacher at the Institute for the Blind until 1941, president of the Bulgarian Choral Union and of the Contemporary Music Union and director of the Sofia National Opera (1941–4). In 1941 he was made a member of the Bulgarian Academy of Sciences. After the Revolution of 1944 he held important positions as the first music adviser to the Ministry of Culture, and as director of the Institute for Music (founded in 1948) of the Bulgarian Academy of Sciences. Staynov's works are almost exclusively orchestral and choral. Of the Bulgarian composers of his generation, he stands closest to such predecessors as Khristov with regards technique, form and folk music colouring. His works are monumental in conception, richly and densely orchestrated and readily comprehensible through their clear construction; his music often shows affinities with Bulgarian verse.

LADA BRASHOVANOVA

Stea, Vicente (*b* Gioia del Colle, 19 April 1884; *d* Lima, 10 July 1943). Peruvian composer of Italian origin. He studied at the S Pietro a Majella conservatory in Naples with Achille Longo (piano), Camillo de Nardis (harmony) and Serrao (composition) and graduated in 1906. On his arrival in Lima in 1917, he took up posts as an opera and orchestral conductor. He became director of the National Music Academy in 1929. His composition output, although quite small, reveals a thorough academic training. The *Sinfonía autóctona* (1934) stands out as an example of Stea's attempt to relate to local aesthetic concerns with its use of exclusively pentatonic themes; it won him first prize in a competition held to commemorate the fourth centenary of the city of Lima. He orchestrated a number of pieces by Peruvian composers, including, in 1940, Alomía Robles's *El resurgimiento de los Andes*.

Stebbins, George C(oles) (*b* East Carlton, NY, 26 Feb 1846; *d* Catskill, NY, 6 Oct 1945). American evangelistic musician, composer of gospel hymns and hymnbook compiler. He attended singing schools and learned to play the piano before moving to Rochester, New York, where he studied singing and joined a church choir as the tenor of its solo quartet. After a period in Chicago he moved to Boston in 1874, and in 1876 accepted Dwight L. Moody's invitation to work with him as an evangelistic singer. He was paired with numerous evangelists under Moody's general auspices, including George Needham, George Pentecost and Daniel Whittle, and compiled song collections for their meetings, often composing the tunes himself. In 1877 Stebbins became joint editor, with Sankey and McGranahan, of the successful series *Gospel Hymns and Sacred Songs*, collaborating with them on volumes 3 to 6 (1878–91, repr. in *Gospel Hymns nos.1–6 Complete*, 1894/*R*). His most popular hymn tunes include 'Jesus is tenderly calling today', 'Out of my bondage' (1883), 'Jesus I come' (1887), 'Take time to be holy' (1890), 'Saved by Grace' ('Someday the silver chord will break', 1894) and 'Have thine own way, Lord' (1907). He often wrote under the pen name George Coles.

Stebbins's son George Waring Stebbins (1869–1930) was a composer and founder of the American Guild of Organists.

MEL R. WILHOIT, HARRY ESKEW

Steber, Eleanor (*b* Wheeling, WV, 17 July 1916; *d* Langhorne, PA, 3 Oct 1990). American soprano. After studying privately with Paul Althouse and William Whitney, and appearing in Boston in 1936, she won the 1940 Metropolitan Opera Auditions of the Air. This led to her début on 7 December as Sophie, and she remained a leading soprano with the Metropolitan until 1963. As her voice matured, its silvery sheen gave way to greater warmth and breadth, and she began to undertake heavier roles such as the Marschallin, Elsa, Desdemona, Tosca and Donna Anna. She was particularly noted for the suavity and poise of her Mozart heroines – the Countess Almaviva, Fiordiligi, Pamina, Donna Elvira and Konstanze, which she sang at the Metropolitan première of *Die Entführung* in 1946. She also created the title role in Barber's *Vanessa* (1958), sang the title role in the

American première of *Arabella* (Metropolitan, 1955), and Marie in the first Metropolitan *Wozzeck* (1959). She appeared at the Edinburgh Festival, Bayreuth, Vienna and Florence as well as with numerous American companies; she sang Miss Wingrave in the American première of Britten's opera (1973, Santa Fe).

An admired concert singer and recitalist, Steber commissioned and gave the first performance of Barber's *Knoxville: Summer of 1915* (1948), which she later recorded; in 1964 she gave three recitals at the Wigmore Hall in London. She was head of the voice department at the Cleveland Institute, 1963–72, and was appointed to the Juilliard School in 1971; in 1975 she established the Eleanor Steber Music Foundation to aid young singers. She made many recordings, including the roles of Countess Almaviva (Metropolitan, 1943), a deeply eloquent Elsa (Bayreuth, 1953) and the title role of Barber's *Vanessa*. She wrote *Eleanor Steber: an Autobiography* (Ridgewood, NJ, 1992).

MARTIN BERNHEIMER/ALAN BLYTH

Stecker, Karel (*b* Kosmonosy, nr Mladá Boleslav, 22 Jan 1861; *d* Mladá Boleslav, 13 March 1918). Czech theorist, composer and teacher. Having studied law and aesthetics at Prague University, and at the Organ School, he turned at first to music criticism. In 1885 he was appointed teacher at the Organ School, and in 1889, after the school was joined to the conservatory, he became professor of composition, organ, theory and history of music. He tended in his compositions mostly to church music, in strict ecclesiastical style, which also attracted his interest as a theorist. Stecker was a very intelligent musician with scientific aspirations. He published the first Czech textbook on musical forms and their history, and he was the first Czech theorist to apply the analysis of musical form in practice as a teacher.

MIROSLAV K. ČERNÝ

Steckler, Anne-Marie. *See* KRUMPHOLTZ family, (3).

Štědroň. Czech family of composers and musicologists.

(1) **Vladimír Štědroň** (*b* Vyškov, 30 March 1900; *d* Brno, 12 Dec 1982). Composer. His father, a choirmaster, music teacher and bandmaster, was the leader of local musical life. After studying at the town Gymnasium in 1919 the young Štědroň left for Prague, where he studied law at the university and composition under Foerster at the conservatory. He was then a masterclass pupil of Novák, and of Suk, under whom he completed his composition studies with the *Variační fantasie na lidovou píseň* ('Variation Fantasy on a Folksong') for string quartet (1923). Starting on a legal career, he went to Brno, where he attended Helfert's musicology lectures and became active as a conductor and organizer. He was later transferred to smaller towns and only in 1950 did he return to Prague; between 1951 and 1960 he taught at the academy of music, the university and the conservatory. His music took its origin from that of Suk, whose subjective expression he greatly admired. But he never lost contact with his Moravian background, the source of his music's modality and volubility (which sometimes disturbed the classical formal structure of his work). He composed irregularly, sometimes with breaks of several years, and his output is not large; but, particularly in the compositions of the 1920s and 30s, he showed unusual talent, inventiveness and technical command.

(2) **Bohumir Štědroň** (*b* Vyškov, 30 Oct 1905; *d* Brno, 24 Nov 1982). Musicologist, brother of (1) Vladimír Štědroň. His early musical training in a large family of musicians was supplemented by theory lessons with Josef Blatný (1925–8) and piano lessons from Vilém Kurz (1926–8). Later he appeared as a pianist in chamber music with his brothers and ensembles such as the Moravian Quartet; he also conducted a number of choirs. While studying history and geography at the University of Brno (1925–9) he attended Helfert's lectures in musicology and later became Helfert's unpaid assistant (1932–8), concurrently teaching music education at a teacher-training college (1931–9). After a study trip to Italy in 1931 he obtained the doctorate in Brno in 1934 with a dissertation on Bassani's sacred cantatas. He taught music history at Brno Conservatory (1939–45, 1950–52) and in 1945 joined the arts faculty of Brno University, becoming assistant lecturer (1950), lecturer (1955) and professor (1963); he also taught as professor and director

of the music education department in the education faculty (1946–51).

Štědroň worked briefly (1939–40) on the incomplete *Pazdírkův hudební slovník* [Pazdírek's musical dictionary] and was editor, with Černušák and Zdenko Nováček, of the *Československý hudební slovník* ('Czechoslovak music dictionary of places and institutions', 1963–5), for which he wrote many articles himself. The author of many regional studies, Štědroň is best known for his work on Janáček. His collection of reminiscences and letters, *Leoš Janáček ve vzpomínkách a dopisech* (1945), became well known in its German and English translations (1955). He wrote historical introductions to many individual works and zealously sought out materials, particularly letters, which he published in his valuable documentary studies. His catalogue of Janáček's compositions (1959) remained standard for 40 years. A particular interest was Janáček's speech-melody theory and the genesis of *Jenůfa*, mostly incorporated in his book on the opera (1968), for which he was awarded the DSc in 1969.

(3) Milo Štědroň (*b* Brno, 9 Feb 1942). Composer and musicologist, nephew of (1) Vladimír Štědroň and (2) Bohumir Štědroň. He read musicology and Czech at Brno University (1959–64, taking the doctorate in 1967), where his teachers included Racek and his uncle Bohumir. From 1965 to 1970 he studied composition and music theory under Piňos, Ištvan, Kohoutek and Kapr at the Brno Academy, after which he completed a postgraduate course in electronic music. He began his teaching career, in the 1970s, in the arts and pedagogical faculties at Brno University (he took the CSc in 1985 with a dissertation on 20th-century music and the works of Janáček), and at the Brno Academy; he was appointed lecturer in 1991 and university professor in 1994. With Parsch, Piňos, Faltus, Růžička and Medek he has engaged in collective composition, a principle stemming from experimental Czech music of the late 1960s.

His musicological work has focussed on early music history, in particular the Renaissance and Baroque, music of the 20th century and a special study of the works of Janáček; he is co-editor of a critical edition of the complete works and the author of numerous monographs and studies on Janáček. Together with the composer and music theorist Leoš Faltus, he has reconstructed and

prepared for performance several of Janáček's works, among them the Violin Concerto and the symphonic poem *Dunaj* ('The Danube'). He has also co-produced (and completed, in the case of the operatic fragment *Johannes Doktor Faustus*) stage works by his friend Josef Berg, who died prematurely at the age of 43. As a composer, Štědroň's work encompasses various genres, among them incidental music, film music and folk-influenced musicals and operas, the fruit of his collaboration with the avant-garde theatre Goose on the String. His concert music often draws on folklore and early music, especially that of the Renaissance, and yet also reveals an in-depth knowledge of techniques associated with new music of the 1960s and jazz.

WORKS

(*selective list*)

DRAMATIC

Aparát [Machinery] (chbr op, 1, Štědroň, after F. Kafka), 1967–9, concert perf. Brno, 1970

Balada pro banditu [Ballad for a Brigand] (musical, M. Uhde), 1975, Brno, 1979

Pohádka máje [May Fairy Tale] (musical, Uhde), 1976

JOSEF BEK (1), JOHN TYRRELL (2), KAREL STEINMETZ (3)

Steel. In guitar playing, a 'steel' is a steel bar held in the player's left hand to stop the strings above the fingerboard rather than fret them in the usual way with the fingers. It is principally used for playing the steel guitar and pedal steel guitar in country music. 'Steel' is also an abbreviation commonly used to denote either of these instruments. *See also* SLIDE, (4).

TONY BACON

Steel, (Charles) Christopher (*b* London, 31 Dec 1938; *d* Cheltenham, 31 Dec 1991). English composer and teacher. He studied composition at the RAM (1957–61) with John Gardner and Murdoch. After further study in Munich (1961–2) with Hindemith's protégé Genzmer, he returned to England and a life of composition and teaching. Three years at Cheltenham Junior College preceded a move to Bradfield College in 1966 where, apart from a spell (1977–8) instructing at North Hennepin College, Minnesota, he remained (from 1968 as director of music) until 1981, when an Arts Council of Great Britain bursary and some private teaching facilitated his escape from academe into full-time composition.

His first acknowledged works, such as the Sonatinas for piano and clarinet, dating from 1960, display a clean, uncluttered personality soon outgrowing Hindemith's vicarious influence, increasingly relishing larger forces and forms. His mature style combines sometimes pungent lyricism and a genuinely Romantic vision with a high level of thematic and harmonic integration. The periodic use of serial processes, for example in *A Shakespeare Symphony* (no.3), was a natural development of Steel's abiding concern for order and control. Essentially intervallic, such serial thinking brought finesse and direction to his deeply melodic instincts and suggested extended tonality always alive to rhythmic inflection.

Steel's progress from prominence to obscurity reflects no dimming of creative powers but an innate modesty, a refusal to compromise a then unfashionable language, and a sympathy with Shostakovich's wish for 'a peaceful life and a happy one' – something he was partly denied by ill-health. He wrote what and when he wanted, often without commission, publisher or prospect of performance. The result is a large, varied catalogue of increasingly consistent quality, particularly the larger, later scores such as the Cello Concerto (1988). He always made a distinction between pieces for professional performance – lucidly complex, tightly organized – and the overtly accessible, immediate style of the educational, amateur and light music scores (such as *6 Turner Paintings*, 1974), embracing a major contribution to church music. His late works found him exploring a vein of affectionate neo-classicism, as in *Serenata concertante* (1990), with that mixture of crafted passionate intellect and lack of pretension that characterized the man and his work.

WORKS
(selective list)

Stage: How Many Miles (nativity play, O. Markham), 1962; Odysseus (music drama, 3, Steel), op.53, 1970, inc.; The Rescue (chbr op, Steel), 1974; The Selfish Giant (M. Valencia, after O. Wilde), op.64, 1980; The Angry River (music drama, 1, Valencia), 1989; incid music

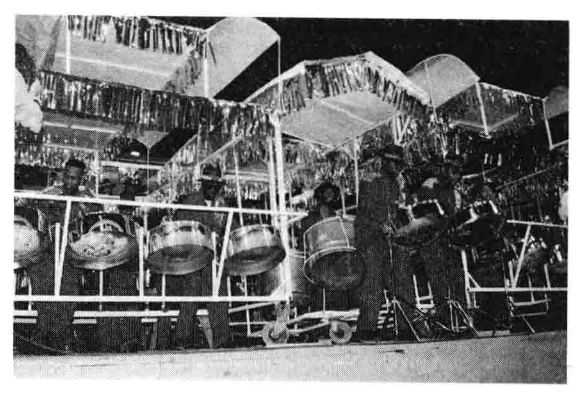
GILES EASTERBROOK

Steeland [Stielant, Stienllant, Sieland, Stellant, Estelant], **Josse** [Josquin] **van** (*fl* 1493–1514). Netherlandish singer. *See* JOSQUIN DES PREZ.



Steel band. An ensemble of tuned idiophones called 'pans' (also 'steel pans' or 'steel drums') that originated in the late 1930s on the island of Trinidad as accompaniment to carnival masquerade. The modern steel band consists of a variety of chromatically tuned instruments made from 55-gallon oildrums, played with rubber-tipped mallets, as well as an 'engine room' comprising drum kit, congas, irons (motor vehicle brake drums) and other percussion. Although steel bands are stylistically versatile, the most common steel band conventions of melodic phrasing and rhythmic structure are related to CALYPSO music.

To make a pan, the bottom of an oildrum is first pounded into a bowl, then shaped and tuned with hammers to form distinct resonating surfaces. Pans vary from the high-pitched 'tenor' with a range of approximately two-and-a-half octaves (beginning at *c′* or *d′*) to the low basses, more than two octaves below the tenor. The tenor is made from a single drum, while other pans are designed in sets of two to 12 separate drums, depending on register (lower notes need more surface area). Although certain standard patterns of note placement have gained wide use, many bands in Trinidad and Tobago still use idiosyncratic patterns that date from the 1950s and 60s when intense rivalry discouraged the sharing of tuners (pan makers) between bands.

The steel band developed directly out of bamboo stamping tube ensembles (tamboo bamboo) which provided carnival music for lower class blacks in Port of Spain after an 1884 British colonial law restricted the use of drums with heads of skin. The first steel bands, which substituted various metal containers for bamboo instruments, provided percussive accompaniment to call-and-response singing. Around 1940, practitioners developed techniques of hammering the surface of a paint can or other metal container to produce different pitches and by 1950, steel bands in Trinidad performed an eclectic repertory that included calypsos, mambos and other Latin American dance music, film songs and European art music.

Chromatic tuning and the sustained bell-like timbre of modern pans were developed to facilitate this repertory and during the 1940s and 50s the tuner was often the most important individual in a steel band. One figure of particular symbolic importance in Trinidad is the late Winston 'Spree' Simon of the John John steel band (now known as Destination Tokyo), popularly credited with making the first pan. A more well-documented accomplishment was his band's 1946 performance of popular tunes such as *Ave Maria* and *God Save the King* for an audience that included the British governor. Other legendary tuner-bandleaders of the early years include Neville Jules of the All Stars, Ellie Mannette of the Invaders and Anthony Williams of the North Stars.

In the late 1960s steel bands faced significant competition from amplified brass bands and recorded music during the carnival season and devoted more and more time to the 'Panorama' competition, with profound consequences for repertory, style and musical training. Today in Trinidad and Tobago each steel band focuses most of its efforts during the carnival season on one highly complex arrangement of a calypso, learned by rote for Panorama by the 100 or so players. As a consequence, the arranger has become the most important individual in most steel bands. Anthony Williams, for example, whose North Stars won the first two Panoramas in 1963 and

The Amoco Renegades performing in the Panorama competition, Port of Spain, 1993

1964, set a precedent by his use of theme and variation arrangements with multiple key areas. Clive Bradley, hired by the Desperadoes in the mid-1960s, infused steel band arrangements with techniques he had learned in dance and jazz bands. Ray Holman (Starlift) and Len 'Boogsie' Sharpe (Phase II Pan Groove) pioneered the arrangement of original compositions ('own tunes') for Panorama, instead of popular calypsos. Jit Samaroo led the Renegades to victory in almost half the Panorama competitions during the 1980s and 90s. In contrast to the exclusive loyalties of early steel band musicians, arrangers in Trinidad and Tobago today often work for several steel bands simultaneously, as do virtually all tuners and even some players.

The steel band's musical development has been affected by its role as Trinidad and Tobago's national instrument. This designation was made official in 1992, but the notion dates from the 1940s and 50s, when the steel band's musical transformation was driven not only by fierce competition between neighbourhood bands, but also by the efforts of progressive middle-class individuals to promote what they saw as an indigenous art form unjustly maligned by colonial cultural standards. With their help, the Trinidad All Steel Percussion Orchestra (TASPO) was formed to represent the island at the Festival of Britain in 1951. In the following year a steel band category was created in Trinidad and Tobago's biennial music festival, providing an important venue for the performance of symphonic music by steel bands; this continues as a separate steel band event ('Pan is Beautiful'). At the first carnival following Trinidad and Tobago's 1962 independence from Britain, the Panorama competition was instituted as a government-sponsored showcase for steel bands.

Although Trinidad and Tobago continues to be the centre of steel band activity, the art form has taken hold in other Caribbean islands as well: Antigua's vibrant steel band tradition, for example, began in the late 1940s. Steel bands are plentiful in Caribbean diaspora communities (such as those in London, New York and Toronto) and have also become popular in non-Caribbean communities all over the world: Sweden and Switzerland, for example, are hubs of steel band activity in Europe and bands are also gaining popularity in East Asian countries and regions such as Japan and Taiwan. Steel bands have also been incorporated into school and university music programmes in Britain and the USA.

Steel drum (Fr. *tambour d'acier*; Ger. *Trinidad-Gongtrommel*; It. *tambour d'acciaio*). A tuned idiophone usually made from an oil drum, which is played in a STEEL BAND. The steel drum developed in Trinidad in the 1930s and 1940s; *see also* TRINIDAD AND TOBAGO, §3 (iii).

Steele, (Hubert) John (*b* Wellington, 13 April 1929). New Zealand musicologist. After taking his BA at the Victoria University of Wellington, and his MA at the University of Otago (1953), he was awarded the first New Zealand government bursary in musicology and became a research student under Thurston Dart at Jesus College, Cambridge, where he took his PhD in 1959. He was appointed lecturer in music at the University of Sydney in 1959. In 1962 he became lecturer in music at the University of Otago, where he was associate professor (1969–82), holding a personal chair until his retirement in 1994, since then becoming professor emeritus. He has specialized in early English keyboard music, the motets and madrigals of Peter Philips and madrigals of Marenzio, and in Italian Baroque church music (his special interests being Monteverdi and A. Scarlatti). His editions are used internationally. He has been associated with the New Zealand Musicological Society since its inception in 1983 (Hon. member 1997), the Music Federation of New Zealand Executive (1974–7 and 1980–8) and the New Zealand String Quartet Trust Board (1988–93). The Festschrift *Liber Amicorum John Steele: a Musicological Tribute*, ed. W. Drake (Stuyvesant, NY, 1997), was published to mark his retirement from the University of Otago.

J.M. THOMSON

Steele, Joshua (*b* Ireland, 1700; *d* Barbados, 1791). Irish music theorist and writer. He is remembered by linguists chiefly for his analysis of the suprasegmentals (voice-pitch, length and stress) that enabled him to formulate a system of notation permitting accurate transcription of these features of speech; he is remembered by prosodic theorists for advancing an equal-time theory, based on the bar–foot analogy, that developed into romantic accentualism, and he should be remembered by music theorists because his analysis, prosodic theory and system of notation were modelled on music-theoretic concepts. Against the classical division of music and speech into 'tune and time', Steele proposed a fivefold division into 'accent' (pitch variation), 'pause' (rest), 'quantity' (relative duration), 'force' (loudness) and 'emphasis' (absolute duration). Although he subdivided emphasis into heavy and light 'poise' (stress), he believed the 'essence' of emphasis was 'the instinctive sense and idea of dividing the duration of all sounds and motions, by an equal periodical pulsation, like the oscillations or swings of a pendulum'. Bar-lines were the graphic representations of these isochronous pulsations for music as well as speech.

Steele attributed the origin of our instinct for rhythm to the throbbing of the blood set in motion by pulsations of the heart. In making the rhythmic sense innate, he converted an observed tendency towards periodicity into a principle from which music and speech were believed not to deviate. This principle, while creating a problem for prosodic and music theory, did not affect the practical application of his system of notation, which consisted of a staff with clef and various symbols for representing speech 'in score'. The types for the symbols were made by Joseph Jackson, and their use continued after Steele's death, when his invention was incorporated in the elocutionary systems taught by Jonathan Odell, John Thelwall, James Chapman and Richard Roe. The last-named teacher focussed exclusively on rhythm, improving Steele's system by recourse to the music theory of A.F.C. Kollmann.

In 1756 Steele was elected a member, and in 1779 vice-president, of the Society of Arts, Manufactures and Commerce. In 1780 he removed from London to his estates in Barbados; and on 1 February 1787 his library was sold at auction in London.

JAMIE C. KASSLER

Steele, Tommy [Hicks, Thomas] (*b* London, 17 Dec 1936). English pop and musical theatre singer. Initally a merchant seaman, he made his name in skiffle and the early rock and roll clubs of London's Soho. His first hit record was *Rock with the caveman* (1956) whose tongue-in-cheek lyrics by Lionel Bart he sang with boyish gusto. This led to a stream of further successes including Melvyn Endsley's *Singing the Blues*, Bob Merrill's *Nairobi* and *Little White Bull* by Bart, Steele and Mike Pratt. In the latter song Steele adopted an exagerated cockney accent as he did for his recording of R.P. Weston's comic music hall number *What a Mouth*. He starred as Kipps, H.G. Wells's jaunty cockney shop assistant, in the highly successful stage musical (1963) and film (1967) of *Half a Sixpence*, by David Heneker and Beverley Cross. His later West End stage appearances included the title role in Frank Loesser's *Hans Christian Andersen* (1974) and a stage version of the film musical *Singin' in the Rain* (1983) which he also directed. His musical films also included *The Tommy Steele Story* (1957), *The Duke Wore Jeans* (1958), *The Happiest Millionaire* (1967) and *Finian's Rainbow* (1968). He was made an OBE in 1979.

DAVE LAING

Steele-Perkins, Crispian (*b* Exeter, 18 Dec 1944). English trumpeter. After studying at the GSM with Bernard Brown, and privately with Ernest Hall, he began his career as an orchestral trumpeter in London, with Sadler's Wells Opera (later ENO) and the RPO. He also taught at the GSM and developed a keen interest in the instruments and performances of earlier repertory, stimulated by the evangelism of David Munrow. He has restored to playing condition a large collection of natural and early mechanical trumpets, performing on them with many leading ensembles, including the Academy of Ancient Music, the English Baroque Soloists, Tafelmusik, the Taverner Players and the King's Consort. Among many recordings, his brilliant contribution to the complete odes and welcome songs of Purcell (Hyperion) and his solo albums such as *Shore's Trumpet* (EMI) reflect his interest in the rediscovery of neglected and lost repertory. He promotes this further in lecture-recitals and publications of performing editions. Steele-Perkins has appeared throughout the world as a concerto soloist, and was prominent in the concerts televised from Westminster Abbey to inaugurate the celebration of the tercentenary of Handel's birth (1985) and the Purcell tercentenary a decade later.

GEORGE PRATT

Steeleye Span. British folk-rock group. Founded in London in 1969, it was named after a character in the Lincolnshire song *Horkstow Grange*, collected in 1906 by Percy Grainger. The initial concept was to make contemporary arrangements of traditional songs using rock music instrumentation. Its founding members were ASHLEY HUTCHINGS (*b* London, 26 Jan 1945; bass, formerly with Fairport Convention) and two folk club duos, MADDY PRIOR (*b* Blackpool, 14 Aug 1947; vocals) and Tim Hart (*b* Lincoln, 9 Jan 1948; vocals and guitar) from England and Gay and Terry Woods from Ireland (vocals and concertina, and vocals, guitar and mandolin respectively). This quintet recorded the album *Hark! The Village Wait* (RCA, 1970) before the Woods left the group. MARTIN CARTHY (*b* Hatfield, 21 May 1941; vocals and guitar) next joined the group, but after his and Hutchings's departure the most renowned line-up was assembled, comprising Peter Knight (violin), Rick Kemp (bass), Bob Gibson (electric guitar) and Nigel Pegrum (drums) alongside Prior and Hart. During the mid-1970s, the heavy rock sound and Prior's keening vocals successfully dramatized such ballads as *Long Lankin* and *Little Sir Hugh* for mass audiences in Europe and North America. For a while a version of the mumming plays was included in the stage act. The group recorded such hit albums as *Now We Are Six* (Chrysalis, 1974) and *All Around My Hat* (Chrysalis, 1975) and even had a hit single with an *a cappella* arrangement of the Latin carol *Gaudete* in 1973. After the dissolution of this version of the group, there were several reunions involving at various times Carthy, John Kirkpatrick (concertina) and Gay Woods who took on the role of lead vocalist after Prior left in 1996.

DAVE LAING

Steel guitar. *See* HAWAIIAN GUITAR; *see also* PEDAL STEEL GUITAR.

Steely Dan. American rock group. College friends and former members of the band Jay and the Americans, the songwriting team of Donald Fagen (*b* New York, 10 Jan 1948; keyboards and vocals) and Walter Becker (*b* New York, 20 Feb 1950; guitar and bass) led what began in 1972 as a six-piece band, and soon became a studio project featuring many élite session players including Larry Carlton, Chuck Rainey, Wayne Shorter, Steve Gadd and Steve Khan. The skills of producer Gary Katz and engineer Roger Nichols were equally as important in achieving the minutely crafted sound of the group. Their music blended rock with rich jazz harmonies, making large use of major seventh and ninth chords and ornate passing modulations, a common device being to modulate chord by chord, moving in step and using different scales, as in *Don't Take Me Alive* or *Green Earrings*. Adding meticulously sculpted backing vocals and virtuosic yet sensitive solos they created very lush songs with strong grooves and catchy choruses.

The often vague lyrics usually form short stories, ranging from the predicament of the survivor of a nuclear attack in *King of the World*, to the fictitious Stock Market crash of *Black Friday*. Common themes throughout the songs include imbalanced relationships facing problems or failing due to the influence of something or someone

external on one party (*Reelin' in the Years*, *Gaucho* and *Peg*), and people in desperate situations, or who have fallen foul of life in some manner (*Do it Again*, *Kid Charlemagne* and *Charlie Freak*). The juxtaposition of often bitter histories with lush harmonic backing for ironic purpose is itself a common theme in their songwriting. After releasing seven albums with ABC, including *Can't Buy a Thrill* (1972), *Countdown to Ecstasy* (1973), *Pretzel Logic* (1974) and *Aja* (1977), the partnership of Brecker and Fagen was dissolved in 1980, although Steely Dan was subsequently reformed in 1993 for an American tour.

GEORGE DOUBLE

Steenbergen, Jan (*b* Heerde, 1676; *d* Amsterdam, *c*1730). Dutch woodwind instrument maker. His grandfather, and possibly his father, worked in the paper-mill at Hoorn, near Heerde. The mill's activities necessitated regular contact with Amsterdam, and Steenbergen was apprenticed there to Richard Haka, studying with him for eight years. He set up in business for himself about 1700, by which time he was a master flute maker. According to an advertisement in the *Amsterdamsche Courant* of 10 June 1700, 'Jan Steenbergen, master flute maker, presently residing in the Kerkstraat in Amsterdam, opposite the Amstelkerk, makes and sells various kinds of wind instruments for a fair price, to be paid only if satisfaction is provided; the said J. Steenbergen worked with the widely celebrated master Richard Haka for eight consecutive years and since that time has practised his profession as a master'. He lived and worked at the Kerkstraat address until about 1730. A number of his recorders and oboes are extant. (*Waterhouse-LangwillI*)

ROB VAN ACHT

Steenwick, Gisbert [Gijsbert] **(van)** (bap. Arnhem, 6 Jan 1642; bur. Kampen, 20 Aug 1679). Dutch composer, organist and carillonneur. He was a member of the collegium musicum 'Caecilia' at Arnhem in 1663 and played the organ at St Eusebiuskerk there from January 1665, being appointed municipal organist on 22 October 1665. In 1674 he left to become organist and carillonneur at the Bovenkerk, Kampen, where he was appointed on 6 June; there he played the new organ by Jan Slegel. He is known today only by some keyboard pieces in a volume that he compiled before 1674 for Anna Maria van Eyl, the daughter of a patrician in Arnhem (*NL-At*; ed. in MMN, ii, 1959). The manuscript contains 33 keyboard pieces, folksongs and dances, all of them displaying sophisticated variation techniques. Nine pieces are signed by Steenwick, but others may be attributed to him on stylistic grounds. Most of these are similar in style to Sweelinck, but some show the influence of more contemporary North German developments. (F.R. Noske: 'Nadere gegerens over het Klavierboek Anna Maria van Eyl', *TVNM*, xix (1961), 94–100)

RANDALL H. TOLLEFSEN/JAN TEN BOKUM

Steere [Steer], **John Wesley** (*b* Southwick, MA, 10 April 1825; *d* Springfield, MA, 11 Dec 1900). American organ builder. He was apprenticed to William A. Johnson, eventually becoming a voicer. In 1867 he began his own business in Westfield, Massachusetts, with another former Johnson man, George W. Turner (1829–1908). Turner left in 1892 and Steere's sons John S. Steere (1847–98) and Frank J. Steere entered the firm, which then moved its factory to Springfield, under the name of J.W. Steere & Sons. At this time the firm rose to prominence through its pioneering work with tubular pneumatic action. After J.W. Steere's death the firm was reorganized, and continued until 1920, when it was bought by Ernest Skinner; Frank Steere worked as an installer for Austin organs thereafter. The firm's most important installations include those in Christ Church (1885) and the Municipal Auditorium (1915), both in Springfield, and Baptist Temple, Brooklyn, NY (1918).

Stefan [Stefan-Grünfeldt], **Paul** (*b* Brno, 25 Nov 1879; *d* New York, 12 Nov 1943). Austrian writer on music. From 1898 he lived in Vienna, where he studied law, philosophy and art history, taking a doctorate in law in 1904, and concurrently studying music theory with Hermann Grädener and Schoenberg. He became a critic and freelance writer on music in Vienna, and as a staunch champion of modern music played a leading part in the Ansorge-Verein, founded in 1903 for the propagation of new music. From 1921 to 1938 he was editor of and a major contributor to *Musikblätter des Anbruch*. In 1938 he emigrated by way of Switzerland, France and Portugal to the USA; for many years he wrote for daily newspapers (e.g. *Neue Zürcher Zeitung*) and periodicals (e.g. *Musical America*). He was a founder-member (1922) of the ISCM. His many biographical books on composers and performers (see *MGG1* for detailed list of writings) are compiled from secondary sources but contain his own aesthetic assessments; many ran to several editions. They include one on Max Reinhardt and another on Hugo von Hofmannsthal, and his editorial activities likewise extended to non-musical subjects.

RUDOLF KLEIN

Stefani, Agostino. *See* STEFFANI, AGOSTINO.

Stefani, Andrea (*fl* Florence, *c*1400). Italian composer, poet and singer. He is known not only as the composer of two ballatas and one madrigal in *I-La* 184 (nos.61, 72, 73), but also as the poet and composer of three-voice *laude* of which the music has not survived. In 1399 he served as leader and singer in the processions of the Bianchi Gesuati in Florence. Stylistically Stefani made use of both the Florentine technique of writing for two voices and the influence of the French style in his three-voice ballata with supporting tenor and contratenor. The first three lines of the text of his madrigal are taken from Petrarch's *Amor, se vuo' chi'i' torni al giogo antico.*

WORKS

Editions: *The Music of Fourteenth-Century Italy*, ed. N. Pirrotta, CMM, viii/5 (1964) [P]

KURT VON FISCHER/GIANLUCA D'AGOSTINO

Stefani, Giovanni (*fl* 1618–26). Italian music editor. His three extant anthologies of Italian strophic songs with accompanying continuo and Spanish guitar *alfabeto* were extremely popular, the first volume alone being reprinted four times. The five identifiable sources (two by J.H. Kapsberger and one each by Nicolò Borboni, Jacopo Peri and Francesco Monteverdi) show that the compiler relied on Roman, Florentine and Venetian repertories in assembling his anthologies. While numerous textual concordances exist between Stefani's volumes and the collections of Remigio Romano, their work is so nearly contemporaneous that it is impossible to know whether one compiler relied on the anthologies of the other or whether they both derived material from a common source. In all, Stefani's volumes contain 87 Italian songs, four Sicilian dialect songs and six Spanish songs. Stefani was not a very competent music editor. In many songs his unidiomatic guitar accompaniment includes lengthy successions of stepwise harmonies transliterated directly from the continuo line, and occasionally his *alfabeto* renders the chords indicated by the continuo and vocal line in the opposite mode. In a few cases the *alfabeto* is printed in an entirely different key from the notated music. Most of the songs are simple strophic pieces, melodious and rhythmically interesting; a few use standard formulae such as the romanesca, the chaconne and the folia. Other more complex songs incorporate changes of metre, recitative idioms and contrasts between recitative and triple-time aria styles.

WORKS

Affetti amorosi: canzonette, 1v, bc (Venice, 1618, 5/1626); ed. (except for 3 songs) in Biblioteca di rarità musicali, iii (Milan, 1886)
Scherzi amorosi: canzonette, 1v, bc (Venice, 1619 [lost], 3/1622) [2 by Kapsberger, 1 by Peri]
Concerti amorosi: terza parte delle canzonette in musica, 1v, bc (Venice, ?1623, 2/1623) [1 by F. Monteverdi, 1 by Borboni]
Ariette amorose (Venice, 1626), lost; according to *FétisB* (the 1649 catalogue of the Venetian publisher Vincenti lists a Quarto libro, presumably identical with the volume mentioned in *FétisB*)

ROARK MILLER

Stefani, Jan (*b* Prague, 1746; *d* Warsaw, 24 Feb 1829). Polish composer, conductor and violinist of Bohemian origin. After elementary education in Prague, he studied music in Italy and about 1765 became a violinist in the court orchestras of Count G. Kinsky and Joseph II in Vienna. In February 1779 he and eight other Bohemian musicians moved to Poland, where they were employed at the court of King Stanisław August Poniatowski. Stefani was appointed Kapellmeister at the cathedral about the same time and later sporadically conducted the choirs of various Warsaw churches. He occasionally conducted opera performances at the National Theatre in Warsaw in the mid-1790s, and from 1799 to 1818 was first violinist there. Stefani's operas date from the period of his contact with the theatre, and for the most part are like Singspiele, simple in texture, with arias replaced by songs and with choruses that are mainly homophonic. He is principally remembered as the composer of *Cud mniemany* ('The Supposed Miracle'), the best Polish opera of the 18th century and the only one by him to have survived intact. It became the most popular opera in Poland in the first half of the 19th century (and is still in the repertory); indeed, at the time it was regarded as the most nationalistic, its libretto describing Polish folk customs and hinting at the contemporary political situation, and its music using both national dance and folk rhythms. Stefani also wrote cantatas, masses, songs, chamber works and orchestral polonaises; his use of the polonaise gave rise to the sentimental style and character of Polish music before Chopin.

Several of Stefani's children were musicians, including Kazimierz (1791–1811) and Jan (1797–1826), violinists in the opera orchestra, Karolina (1784–1803) and Eleonora (1802–31), both opera singers, and JÓZEF STEFANI.

WORKS

STAGE

all first performed at the National Theatre, Warsaw

Miłość każdemu wiekowi właściwa [Love Becomes Every Age] (ballet), 4 Nov 1785
Król w kraju roakoszy [The King in Cockaigne] (3, F. Zabłocki, after M.-A. Legrand: *Le roi de Cocaigne*), 3 Feb 1787
Winnica miłości [The Vineyard of Love] (ballet), 1789
Armida i Rajnold [Armida and Rajnold] (ballet), 1790, collab. A. Hart
Cud mniemany, czyli Krakowiacy i górale [The Supposed Miracle, or Kracovians and Highlanders] (4, W. Bogusławski, after A.-A.-H. Poinsinet: *Le sorcier*), 1 March 1794 (Kraków, 1856), ed. W. Raczkowski (Kraków, 1956)
Drzewo zaczarowane [The Magic Tree] (Spl, Zabłocki, after P.L. Moline), 17 April 1796
Wdzięczni poddani panu, czyli Wesele wiejskie [Thankful Serfs, or The Country Wedding] (Spl, 3, J. Drozdowski), 24 July 1796
Frozyna, czyli Siedem razy jedna [Frozine, or Seven Times Dressed Up] (Spl, 1, J. Adamczewski, after J.B. Radet), 21 Feb 1806
Rotmistrz Górecki, czyli Oswobodzenie [Captain Górecki, or The Liberation] (3, W. Pękalski, after J. Lipiński), 3 April 1807
Polka, czyli Oblężenie Trembowli [The Polish Woman, or The Siege of Trembowla] (3, J. Wybicki), 22 May 1807
Stary myśliwy [The Old Huntsman] (3, Pękalski, after Francis and Tournay), 31 Jan 1808
Kochankowie przemienieni [The Lovers Transformed], 11 March 1808

Papirus (Papirius), czyli Ciekawość dawnych kobiet [Papyrus, or The Curiosity of Women in Ancient Times] (oc, 1, Adamczewski, after N. Gersin and P.A. Vieillard), 15 May 1808

OTHER WORKS

Large vocal: Niechaj wiekom wiek podawa [May this Age Survive in History] (cant., J. Wybicki), 25 Nov 1791, *PL-Wtm*, ed. in J. Prosnak: *Kultura muzyczna Warszawy XVIII wieku*, appx (Kraków, 1955); Na uroczystość obchodu instalacji arcybiskupa Kajetana Kickiego [For the Installation of Archbishop Kajetan Kicki] (cant., W. Bogusławski), Lwów, 12 March 1798, lost; Wesoło bracia strokani [Merry, Distressed Brothers] (Freemason cant.), 1v, chorus, pf, *Kz*; masses, offs, lost

Other vocal: 3 songs (K. Kniaźnin), 1v, pf, in *Wybór pięknych dzieł muzycznych i pieśni polskich* (Warsaw, 1803–5); 1 freemason song in J. Elsner *Muzyka do pieśni wolnomularskich* (Warsaw, 1811); song, *PL-Kz*

Wind inst: 6 parties, 2 cl, bn, 2 hn, op.1 (Berlin, 1786), listed in Hummel cat.1787, ed. J. Morawski (Krakow, 1993), incl. Partita (op.1 no.6), *CZ-OS*; 2 Harmonie, *D-SWl*, ed. D.J. Rhodes (as J.A. Steffan [Stepan]: Girvan, 1993); Serenata, *CZ-Pnm*, ed. D.J. Rhodes (as J.A. Steffan [Stepan]: Girvan, 1997); 6 partite, Br.cat, 1785–7, lost; 6 duos/trios, op.2, listed in Hummel cat. 1792, lost

Other inst: 7 polonaises, Łowicz Regional Museum (frag.); Conc., 2 vn, orch, lost; dances, orch

ZOFIA CHECHLIŃSKA

Stefani, Józef (*b* Warsaw, 16 April 1800; *d* Warsaw, 19 March 1876). Polish composer, violinist and teacher, son of JAN STEFANI. He studied music with his father, then with Elsner. At the age of 13 he began to sing in the chorus of the National (later Wielki) Theatre in Warsaw, and later played in its orchestra. Between 1827 and 1858 he conducted ballet performances as well as teaching singing there. He also conducted orchestras and choruses in several churches in Warsaw and taught music in schools. Operas, ballets and choral works form the main part of his output. His works are generally simple and designed to have a wide appeal. His operas are close in form and style to operetta and Singspiel. Solos, which predominate, are modelled on popular song and are devoid of virtuosity, while the rare choruses tend to be homophonic; Polish folkdance rhythms, especially those of the mazurka and polonaise, are widely used. This is also true of the ballets, most of which are preserved in fragments only. His religious works are mainly homophonic; polyphonic fragments are short and subordinate to eight-bar units. Stefani's works enjoyed considerable success in their day, but are now of only historical interest.

WORKS

most MSS in PL-Wtm

STAGE

all first produced in Warsaw

Dawne czasy [Old Times] (op, K. Godebski), National, 26 April 1826, collab. J. Damse, 1 aria *Wtm*

Lekcja botaniki [The Botany Lesson] (operetta, 2, F. Szymanowski), National, 15 March 1829, excerpts, vs (Warsaw, 1829)

Figle panien [Young Girls' Frolics] (Spl, 1, F. Skarbek), Rozmaitości, 6 Aug 1832

Jest temu lat szesnaście [16 Years Ago] (op, 3, W. Olechowski, after V.H.J. Ducange), Poznań, 26 July 1838

Talizman [Talisman] (Spl, 5, B. Gwozdecki, after J. Nestroy), Rozmaitości, 7 Dec 1849

Żyd, wieczny tułacz [The Wandering Jew] (op, 5, J.T.S. Jasiński, after E. Sue), Wielki, 1 Jan 1850

Piorun [Thunderbolt] (Spl, B. Halpert, after Clairville), Rozmaitości, 21 May 1856, frags. *Wtm*

Trwoga wieczorna [Evening Fear] (operetta, 1), Letni, 25 July 1872, *Wtm*

Unperf.: Nowy dziedzic [A New Squire] (op, 1, J.N. Kamiński), *Kj*; Oj, zoneczka [Oh, Wife!] (Spl), *Wtm*; Trzy grzechy [Three Sins] (Spl, 1), *Wtm*

ZOFIA CHECHLIŃSKA

Stefanini, Giovanni Battista (*b* Modena, bap. 8 July 1574; *d* Rome, 1630). Italian composer. He was a singer at Modena Cathedral from 1593 until 1602 under Orazio Vecchi and wrote several mascheratas (which have not survived) for the Modenese court between 1599 and 1602. He was *maestro di cappella* of Turin Cathedral from 1602 to at least 1604, of S Maria della Scala, Milan, in 1606 and 1608 and of S Maria della Consolazione, Rome, in 1614. From 7 January 1615 he was back in Modena as *maestro* at the cathedral, although he maintained contacts with Rome to the extent of outstaying leave from Modena in 1619, for which he was suspended until an apology was forthcoming; he may have had some connection with Ancona. He finally returned to Rome in 1625. His output is of sacred music, mainly motets, showing a preference for the fuller textures of the conventional polyphonic or double-choir styles rather than for the new concertato idiom. In this he was typical of Roman composers, with whom he seems to have identified himself, and he designated his 1618 collection 'all'uso di Roma'. He was one of the first motet composers to experiment with triple-time refrains as a means of structural design.

WORKS

Motetti, liber I, 6–7vv (Venice, 1604)

Motetti, libro I, 2–3vv (Milan, 1606)

Il secondo libro de motetti, et le lettanie della Beata Vergine … 5–8vv, bc (org) (Venice, 1608)

Concerti ecclesiastici, cioè motetti, messa, salmi, Magnificat, con le letanie della Beata Vergine, libro III, 8vv, bc (org) (Rome, 1614)
Motetti concertati all'uso di Roma, con le letanie della Beata Vergine, libro IV, 8–9vv, bc (org), op.6 (Venice, 1618)
Motetti concertati, libro I, 2–5vv, bc (org), op.7 (Rome, 1626)

11 motets, 1607[7], 1611[1], 1612[3], 1613[2], 1621[2]; 1 work, 1610[1]

JEROME ROCHE/ELIZABETH ROCHE

Stefanis, Gaetano de (*b* Chieti; *d* after 1710). Italian composer. Information about him derives from his surviving works. A minorite, he was *maestro di cappella* of the cathedral at Split, Dalmatia, between 1698 and 1700. He then worked at Bologna (1701) and Ferrara (1702), and in Forlì Cathedral in 1710. He published *Messe a quattro voci* op.1 (Venice, 1700) and *Salmi pieni per tutto l'anno a otto voci con violini ad lib. brevi e facili, con litanie della B. V.* op.3 (Bologna, 1710). There is no trace of his op.2 but a 19th-century manuscript copy of a *Tantum ergo*, for tenor and bass, by a 'sig.r De Stefanis' survives in the Biblioteca Marciana, Venice. In the four masses of op.1 both concertato and *a cappella* styles are displayed, and some of the compositional procedures bear similarities with the work of the composers at the S Petronio School, Bologna. The 18 psalms in op.3 are for two four-part choruses, with two optional violin parts and continuo, and are rather conservative in style.

GIANLUCA D'AGOSTINO

Stefanović, Dimitrije (*b* Pančevo, 25 Nov 1929). Serbian musicologist. He studied English literature at the University of Belgrade and musicology at the Academy of Music in Belgrade. Having developed an interest in the study of Byzantine notation, he went in 1958 to Lincoln College, Oxford, to study with Egon Wellesz and in 1960 obtained the BLitt. He then worked at the Musicological Institute of the Serbian Academy of Arts and Sciences in Belgrade until 1964, when he returned to Oxford, taking the DPhil in 1967 with a dissertation on the tradition of the Sticheraria manuscripts. Since then he has again been an associate of the Musicological Institute in Belgrade. In the year 1970–71 he was a research Fellow at Lincoln College. He was elected a corresponding member of the Serbian Academy of Arts and Sciences in 1976 and a full member in 1985, member of the Yugoslav (now Croatian) Academy of Sciences in 1986, and member of the Slovenian Academy in Ljubljana in 1987. He has been director of the Musicological Institute in Belgrade since 1979.

Although Slav philologists, Serbian music historians and leading Byzantine scholars, especially Egon Wellesz, have long stressed the importance of the Serbian medieval liturgical chant, it had been studied by Yugoslav scholars only sporadically and often superficially. Stefanović was the first to study it in detail and throw light on its relationship to the main body of Byzantine chant. In his research he paid attention not only to the historical sources, but also to the living chant tradition and its importance in the liturgical services of the Orthodox church. He has often performed and recorded Orthodox church music in Yugoslavia and abroad, first with the Belgrade Madrigal Choir and since 1969 with the Belgrade Study Choir.

BOJAN BUJIĆ/DANICA PETROVIĆ

Stefanović, Ivana (*b* Belgrade, 14 Sept 1948). Serbian composer. She studied composition with Josif at the Belgrade Academy of Music and later with Amy in Paris; she also undertook research at IRCAM. In 1976 she began an association with Radio Belgrade where she has worked as an editor, founded the Sound Workshop (1985) and become head of music production on the First Programme (1990). Her works show an extraordinary variety of compositional techniques, ranging from the manipulation of different sound sources – electronic, *concrète*, environmental as well as traditional instrumental – to the application of mathematical proportions. Almost all her works are designed for varied and unconventional ensembles, and most of the compositions that include the voice employ a range of vocables.

WORKS
(*selective list*)

Hommage à François Villon, vv, early insts, 1978; Fragment mogućeg reda [Fragment of a Possible Order], 2 pf, hpd, org, cel, accdn, 1979; Kuda sa pticom na dlanu [Where to with the Bird on the Palm of the Hand], perc, tape, 1980; Tumačenje sna [Interpretation of a Dream], fl, 2 spkrs, tape, 1984; Lingua/Phonia/Patria, experimental radiophonic work, 1988–9; I niotkudu pomošti [When Cometh No Succour] (trad.), ancient insts, str, perc, 1989; Psalam [Psalm], Mez, mixed vv, 1990; Isidora (ballet), tape, 1992; The Metropolis of Silence (Ancient Ras), radiophonic poem, 1992; Lacrimosa, tape, 1993; Drvo života [Tree of Life], str, 1997

MELITA MILIN

Stefánsson, Fjölnir (*b* Reykjavík, 9 Oct 1930). Icelandic composer and teacher. He took cello lessons at the Reykjavík College of Music before studying theory and composition there with Jón Thórarinsson, graduating in 1954. He continued his studies in England with Mátyás Seiber (1954–8). After teaching at the Reykjavík College of Music (1958–68) he was appointed principal of the Kópavogur Music School, a position he held until his retirement in 2000. He was one of the founders of the organization Musica Nova created in 1959 to promote music by young Icelandic composers. He has served on the boards of STEF, the Icelandic performing rights society (1974–88), and the Iceland Music Information Centre (1968–84).

His not extensive output is dominated by solo vocal works and choral pieces, many of them arrangements of Icelandic folksongs. His vocal pieces are generally in a traditional style, often drawing on the modality of the old church songs, whereas his instrumental works are serial in tendency. His *Thrjú sönglög* ('Three Songs') for soprano and piano, to texts by Steinn Steinarr, were first performed at the ISCM in Vienna (1961).

WORKS
(*selective list*)

Sonata, vn, pf, 1954; 5 skissur [5 Sketches], pf, 1958; 3 sönglög [3 songs], S, pf, 1958–60, arr. 1967, S, orch, as Tíminn og vatnið [Time and the Water]; Duo, ob, cl, 1974; Koplon, orch, 1979; Sextet, fl, cl, bn, hn, vn, vc, 1983; Tónaleikur [Tone Play], fl, cl, bn, vn, va, vc, 1998; Jólasnjór [Christmans Snow] (Th. Valdimarsson), mixed chorus, 1999

MAREK PODHAJSKI

Stefan the Serb (*fl* ?*c*1450). Serbian composer and *domestikos* (precentor). He composed several chants for the Byzantine liturgy. One is a setting, in the mode 2 plagal, of the Proper Cheroubikon for the Liturgy of the Presanctified, 'Now the powers of heaven', with both Slavonic and Greek texts; the second is a setting, in the 1st mode, of the corresponding *koinōnikon*, 'O taste and see', also in both languages. The two appeared in *YU-Bn* 93, but this mid-15th-century manuscript was destroyed during World War II; the Greek *koinōnikon* alone is to be found in the bilingual manuscript anthology *GR-An* 928. In the Belgrade version, the bilingual *koinōnikon* contains yet a third Greek text, 'Praise the Lord from the heavens', which is the normal Sunday communion hymn. Two further settings, a mode 3 plagal Sunday communion and a mode 1 plagal Easter communion, have been located in 16th-century Moldavian manuscripts, indicating that Stefan's work was popular even outside Serbia.

If 'Stefan prōtopsaltēs, the Serb', composer of two hymns (a mode 3 plagal Pentecost *koinōnikon* in Greek, and a mode 2 *kathisma* for Monday) in *GR-ATSgreat lavra* ε 108 is the same person as the *domestikos* Stefan, the latter's sphere of activity would extend back to the last quarter of the 14th century.

DIMITRI CONOMOS

Steffan, Joseph Anton. *See* ŠTĚPÁN, JOSEF ANTONÍN.

Steffani [Staffani, Stefani, Stephani], **Agostino** (*b* Castelfranco, nr Venice, 25 July 1654; *d* Frankfurt, 12 Feb 1728). Italian composer, churchman and diplomat. He made a major contribution to opera in northern Germany, where he spent most of his life, and his celebrated chamber duets for two voices and continuo represent an important stage in the development of Italian secular vocal music between Carissimi and Handel.

1. LIFE. The Steffani family can be traced back to mid-16th-century Venice, but Agostino's immediate ancestors originated in Padua and moved to Castelfranco in about

1570. He was the fifth of seven children. His only brother to survive infancy was the librettist Ventura Terzago (*b* 2 Jan 1648), who took his name from the maternal uncle who adopted him. Steffani's early musical education and experiences centred on singing. From October 1664 to July 1667 he was employed as a soprano at Il Santo in Padua; he probably received musical instruction from the *maestro di cappella*, Antonio dalla Tavola, and possibly from Carlo Pallavicino, who was one of the organists. During the same period he frequently sang elsewhere (e.g. in Ferrara, Vicenza and Monselice); he appeared in Venice in a Pallavicino opera (probably *Demetrio* at the Teatro S Moisè) in Carnival 1666 (at the age of 11) and in another Venetian opera the following year.

Steffani's exceptional ability as a musician is probably the reason why he was taken to Munich, in July 1667, by the Elector Ferdinand Maria of Bavaria. He remained there for 21 years. An entry in the court accounts for 1668 suggests that he sang in *Le pretensioni del sole* (November 1667) by the Kapellmeister, J.C. Kerll. In July 1668 Kerll was given custody of the 'Camer: und Hof *Musico Augustino Steffani*' and instructed to give him organ lessons; this may be a sign that Steffani's voice was breaking. He did not pursue a singing career but nevertheless allowed himself to be heard on various occasions later in life, including, apparently, at one of Cardinal Ottoboni's concerts in Rome in winter 1708–9.

Steffani first went to Rome in October 1672. Having had three years with Kerll and one with a *valet de chambre* and treasury official named Augustin Sayler, he studied composition for nearly two years with Ercole Bernabei, *maestro di cappella* at S Pietro. After little more than a year he published his *Psalmodia vespertina*, which contains two-choir settings of 13 vesper psalms and the *Magnificat*; other, more ambitious, pieces composed between 1673 and 1674, but not published, survive in what is probably an autograph manuscript (in *GB-Cfm*). In Rome he also wrote his secular solo cantata *Occhi miei, lo miraste*, the manuscript of which (in *D-HVs*) suggests that he was acquainted with similar works by Ercole and Giuseppe Antonio Bernabei, Stradella, Tenaglia, Alessandro Melani, Masini and Lonati. It is not known whether Steffani composed any of his chamber duets in Rome, but it seems likely that he did.

In July 1674 he returned to Munich with Bernabei, who had been appointed Kapellmeister after Kerll's departure the previous year. Some time after his return he was appointed court organist. The earliest reference to the 'Hof und Camer *Organisten Augustino Steffani*' is in a decree of 4 July 1678, but the appointment may have been made immediately, for on 1 March 1675 he was granted an increase in salary backdated to the previous July. No accounts of his organ playing survive, but impressions presumably of his harpsichord playing are found in the dispatches of the Bavarian resident at Turin, J.B. Schalck. Between 1678 and 1679 Steffani visited Paris and Turin. In Paris he played before the king, became acquainted with the music of Lully (he probably heard the first performance of *Bellérophon*) and probably met the actress and poet Brigida Bianchi, some of whose verse he set to music; in Turin his '*habileté* unnd *addresse*' and 'zierliches unnd *delicates* spillen' were much admired.

While he was away, the Elector of Bavaria died. With the accession of his son, the young Maximilian II Emanuel, Steffani's career developed rapidly. On 1 January 1681 he was appointed director of chamber music, a post created specially for him, and later that month his first opera, *Marco Aurelio*, to a libretto by his brother, Ventura Terzago (in Munich from 1677), was staged at the court; the score reveals the impression that Lully's music had made on him. Under Max Emanuel, Steffani also gained his first notable experience of secret diplomacy when he was asked to explore the possibility of a marriage between the elector and Princess Sophie Charlotte of Hanover. His negotiations (1682–4) brought him into contact with the courts of Hanover, Düsseldorf and Vienna, and with Ortensio Mauro, his future librettist.

Steffani composed four more operas for Munich (1685–8; no new operas were performed there between 1682 and 1684). Two of the librettos were by Terzago and the other two by Luigi Orlandi. *Servio Tullio* (Terzago, 1686) was written to celebrate the marriage of the elector to Maria Antonia, Archduchess of Austria. Steffani's other Munich works include a serenata 'alla maniera d'Italia' (1682; words and music lost) for the marriage of Countess M.A.T. von Preysing; a tourney, *Audacia e rispetto* (Terzago, 1685; music lost); a collection of motets, *Sacer Ianus quadrifrons*; and chamber duets and cantatas.

In summer 1688 he entered the service of Duke Ernst August of Hanover. His main reason for leaving Munich seems to have been that he had no immediate prospect of becoming Kapellmeister there; Ercole Bernabei was succeeded in January 1688 by his son, Giuseppe Antonio (vice-Kapellmeister since 1677), and by May Steffani had made arrangements to leave. He spent 15 years at Hanover (1688–1703). The first half of this period was devoted largely to musical activities, the second mainly to diplomatic. His arrival coincided with the establishment of the first permanent Italian opera company there. Ernst August built a magnificent new theatre, imported leading Italian singers and appointed Steffani as Kapellmeister; the orchestra was led by J.-B. Farinel. The opera lasted only eight years (1689–97; the duke died in 1698), but was known throughout the Continent. Of the ten works performed, Steffani probably composed eight, all to librettos by Ortensio Mauro. *Briseide*, given in Carnival 1696, may well be by Pietro Torri, who was engaged as Kapellmeister for the occasion; *La costanza nelle selve* (1697) is by Luigi Mancia.

In the 1690s Steffani became increasingly involved in diplomatic affairs. He was sent to Vienna in 1691 to help negotiate the elevation of Hanover to an electorate, a development achieved in 1692. In 1693 he was appointed Hanoverian envoy extraordinary to the Bavarian court at Brussels (the Elector Maximilian had been made Imperial Lieutenant of the Spanish Netherlands in 1691 and moved to Brussels the following year); his mission was to secure recognition of Hanover's electoral status. Steffani spent most of 1695 in Brussels and lived there from 1696. He also played an active part in the manoeuvres preceding the War of the Spanish Succession; his main concern was to persuade Max Emanuel to support the emperor rather than Louis XIV. He failed, however, returned to Hanover in July 1702, exhausted and dejected, and sought consolation in music. That autumn he began to revise and prepare a new complete manuscript collection of his chamber duets (now in *GB-Lbl*), but he appears to have broken off work by spring 1703 and the copying was completed by scribes.

In March 1703 Steffani entered the service of the Elector Palatine, Johann Wilhelm, at Düsseldorf. At the same time he virtually gave up music; from 1709, at the very latest, his works circulated under the name of one of his copyists, Gregorio Piva. Of the three operas performed at Düsseldorf and attributed to Steffani, only one, *Tassilone* (1709), is certainly a new composition. *Arminio* (1707) is a pasticcio assembled from most of his earlier operas; it is not certain that he had any hand in it. *Amor vien dal destino* (1709) appears to have been composed at Hanover for performance in 1694 or 1698, but no new opera was produced there in either year, perhaps on account of the Königsmark affair (1694) or the death of Ernst August. Apart from a few chamber duets, Steffani composed little else until his very last years.

His duties at Düsseldorf, where he remained for six years (1703–9), were mainly political. He was appointed initially as privy councillor and president of the Spiritual Council for the Palatinate and the duchies of Jülich and Berg. Late in 1703 he was made general president of the Palatine Government, and from 1703 to 1705 he was at first *rector magnificus* and then a curator of Heidelberg University. At Düsseldorf he also reached the apex of his career as a churchman. This career had begun many years earlier at Munich: he was ordained a priest in 1680, and in 1683 was appointed Abbot of Löpsingen, a sinecure in the Protestant earldom of Oettingen-Wallerstein, halfway between Augsburg and Nuremberg. By 1695 he was an apostolic prothonotary (the date of this appointment is not known; the information appears in the sub-title of his short dissertation on the nature and origins of music, *Quanta certezza*). In September 1706 he was elected Bishop of Spiga *in partibus infidelium* (Asia Minor). He was in Rome from November 1708 to April 1709 to mediate in the conflict between the pope and the emperor; the pope showed his gratitude for the success of his negotiations by making him a Domestic Prelate and Assistant to the Throne.

Steffani's most important ecclesiastical appointment, Apostolic Vicar in northern Germany, came in April 1709. Like earlier vicars, he chose Hanover as his base. He returned there in November 1709 and, apart from a short period in Italy, remained there for the rest of his life. He continued to act as minister and Grand Almoner to the Elector Johann Wilhelm, however, a title he had held since 1706. As Apostolic Vicar he was responsible primarily for founding and maintaining missions in Brunswick, the Palatinate and Prussia – a vast area; but he also built new churches in Brunswick (1712) and Hanover (1718) and from September 1714 to December 1718 was suffragan bishop of Münster (fig.1). He was constantly frustrated by shortage of funds. Apart from Löpsingen, he had three sources of income – a stipend from the Sacra Congregatio de Propaganda Fide in Rome, the abbacy of San Stefano in Carrara, near Padua, and a provostship in the Rhenish town of Seltz. The stipend was small, his agent in Padua was a swindler, and most of the revenue from Seltz was seized by French Jesuits at Strasbourg. His difficulties were aggravated between 1714 and 1718 by the loss of several people who had given him material and psychological support: Duke Anton Ulrich of Brunswick-Wolfenbüttel (*d* 1714), the Elector Georg Ludwig of Hanover (moved to England 1714), the Elector Johann Wilhelm (*d* 1716), the philosopher Gottfried Leibniz, a friend since at least 1688 (*d* 1716), and Franz

1. Agostino Steffani as suffragan bishop of Münster: portrait by Gerhard Kapper, 1714

Arnold von Wolf-Metternich, Prince-Bishop of Münster and Paderborn (*d* 1718). In summer 1722 he retired to Padua, but in summer 1725 he yielded to pressure from Rome and returned to Hanover that October.

From 1720, when he began corresponding with Giuseppe Riva, the Modenese resident in London, Steffani was again concerned with music. It was suggested that the Royal Academy should stage his *Tassilone*, but this proved impractical. Steffani was behind the appearance of Benedetta Sorosina in London in 1725 and also recommended the alto Angelo Maria Poli. In 1726 he learned of the Academy of Vocal Music (later known as the Academy of Ancient Music), of which he was elected president on 1 June 1727. He sent the academy copies of earlier works and of new pieces composed for them – the madrigal *Gettano i re dal soglio* (by 31 December 1726), the motet *Qui diligit Mariam* (by 7 July 1727), possibly the trio *Al rigor d'un bel sembiante* and his *Stabat mater*, which he described as his last and greatest work.

But his fortunes did not improve. From November 1727 he was based mainly in Frankfurt, where he tried to raise funds by selling possessions. During the winter his health deteriorated, and on 12 February 1728 he died of apoplexy; he was buried two days later in the cathedral of St Bartholomäus. Two chests of papers concerning his diplomatic and ecclesiastical activities found their way into the archives of the Propaganda Fide (Fondo Spiga), but a third containing musical documents went to his next of kin and is lost. The papers he left in Hanover are now in the Niedersächsisches Hauptstaatsarchiv (Registratur des Bischofs von Spiga).

2. WORKS. The key to an understanding of Steffani's music is the fact that he was an excellent singer and linguist. All his surviving works are for voices, and all are informed by a strong sense of 'vocality' that must have become second-nature to him. His writing for voices may

be well known for its virtuosity, but it also displays, in recitative and aria, an acute sensitivity to words, an exceptional capacity to express emotion and, in his operas, a striking ability to delineate and distinguish between characters. Mattheson said that Steffani thought long and hard about his opera librettos before composing any of the music. His works represent one of the high points of the bel canto style of the late 17th and early 18th centuries.

The cornerstone of Steffani's output is his chamber duets. They cover most of his creative career, and their supple melody, elegant counterpoint and perfect formal balance epitomize his style, which may be compared (not unfavourably) with that of Stradella, Corelli, Alessandro Scarlatti and the young Handel. Steffani composed most of his duets by late 1702, when he began to revise them, but at least two are later. Four were written for Sophie Charlotte, one to a text of her own (*Crudo Amor, morir mi sento*); other poets include Bartolomeo d'Ariberti, Brigida Bianchi (fig.2), Anastasio Guidi, 'Abbate Paglia', Francesco Palmieri and, most important, Ortensio Mauro. The texts are concerned principally with unrequited love and seem typical of the Arcadian verse of the contemporary Italian chamber cantata.

The duets are for various pairs of voices, of which the commonest are SA, ST and SB, with continuo. They may have up to six movements, solos as well as duets. Over half of the works are in closed forms (e.g. da capo, rondo and strophic-rondo) typical of the 17th-century cantata; the remainder are in open forms (e.g. *AB*, *ABC*, *ABCD* etc.) that seem closer to the Renaissance madrigal. Paradoxically, these are generally later in date: a growing preference for open forms is evident in Steffani's revisions. The most obvious type of revision affecting form is the omission of movements and sections, especially repeats and solos. These omissions allowed Steffani to expand the remaining duet movements, and this he did by exploring more thoroughly the contrapuntal potential of the material (often modifying it for the purpose). The forms of the revised versions are a direct result of his use of double counterpoint, stretto and other fugal procedures, of which he demonstrates an effortless mastery.

This mastery is evident also in his sacred music, a category that includes his earliest datable compositions. *Psalmodia vespertina* (1674) is scored for antiphonal choirs and is mainly homophonic in texture, but the contemporary pieces in Cambridge (*Cfm*, Mu MS94) are far more varied in scoring, form and technique: *Sperate in Deo* (SSATB and organ), for example, includes duets for two sopranos and recitatives for tenor and bass, and ends with a five-part fugue. The motets of 1685 are for various trios of voices (SSB, SAT, SAB, STB, ATB) with continuo but may also be performed as duets, any voice being omitted; since they are predominantly imitative in texture, this represents a considerable tour de force. *Qui diligit Mariam* (1727) earned an enthusiastic critique from J.E. Galliard (in a letter to Riva), and Steffani's *Stabat mater* is a masterly expression of his religious fervour.

2. *Autograph manuscript of the opening of Steffani's chamber duet 'E perchè non m'uccidete' (GB-Lbl R.M.23.k.14, f.43v), based on a poem by Brigida Bianchi*

The operas indicate most clearly the extent to which he assimilated the French style. Most of his overtures are French, and most of his operas had ballets as entr'actes (devised, in Munich, by Melchior d'Ardespin and François Rodier). Dance metres such as the minuet and gavotte are frequently used for arias. The basic orchestral requirements are four-part (sometimes five-part) strings, two 'flutes' (i.e. recorders), two oboes, bassoon and continuo, with the occasional addition of trumpets and drums. *Alarico il Baltha* requires two piffari and *Niobe* four viols; *Amor vien dal destino* includes an ensemble for four chalumeaux, two bassoons and two theorbos, and an obbligato for lute. A high proportion of the arias – about half – are accompanied by instruments, the remainder by continuo alone; some scenes have strings (one has trumpets and drums) without continuo.

Both types of aria exhibit Steffani's predilection for duet textures: in continuo arias the bass often imitates the voice, while in orchestral arias obbligatos are often for pairs of instruments. Although binary and *ABB′* structures are common, the majority of his arias are in ternary or da capo form; ostinato basses, numerous in his earlier works, recede as his career progresses. His full-length Hanover operas also include an exceptionally high proportion of vocal duets, apart from sextets (*La superbia d'Alessandro*) and a quartet (*Le rivali concordi*). These six works provided an important stimulus for the development of opera in northern Germany. They were translated into German by Gottlieb Fiedler and staged in Hamburg between 1695 and 1699; performances elsewhere followed, and overture-suites from them were published (as *sonate da camera*) by Roger in Amsterdam. It seems fitting that no fewer than four of Steffani's operas (*Alarico*, *Henrico Leone*, *Arminio* and *Tassilone*) should be based not on standard classical or mythological subjects but on episodes from German history.

Despite the widespread influence of his operas, Steffani's reputation rests largely on his chamber duets. Handel 'borrowed' from his operas and duets (of which he owned a book in 1706/7), and from his other works. But Steffani's duets, like Corelli's trio sonatas, were also taken as models by other composers (e.g. Keiser, Schürmann and Telemann), used as *solfeggi* by leading opera singers and praised by such figures as Mattheson, Hawkins, Burney, Padre Martini and E.T.A. Hoffmann; in England his works were given sacred English words and used as anthems. By these and other means Steffani's influence extended throughout the 18th century and beyond.

WORKS

Edition: *Agostino Steffani: Ausgewählte Werke*, i–iii, ed. A. Einstein, A. Sandberger and H. Riemann, DTB, xi, Jg.vi/2 (1905/*R*); xxi, Jg.xi/2 (1911/*R*); xxiii, Jg.xii/2 (1912/*R*) [DTB]

OPERAS

Marco Aurelio (drama per musica, 3, V. Terzago, after Aelius Spartianus and Julius Capitolinus in *Scriptores historiae Augustae*), Munich, Hof, Jan 1681, *GB-Lbl**, excerpts in DTB xxiii

Solone (drama per musica, 3, Terzago, after M.C.H. Desjardins: *Les amours des grands hommes*), Munich, Hof, carn. 1685, lost

Audacia e rispetto (torneo, Terzago), Munich, Hof, carn. 1685, lost

Servio Tullio (drama per musica, prol., 3, Terzago, after Livy: *Ab urbe condita libri*), Munich, Hof, Jan 1686, *A-Wn*, excerpts in DTB xxiii; ?rev., Wiemar, 1697

Alarico il Baltha, cioè L'audace re de' gothi (drama per musica, 3, L. Orlandi, after P. Orosius, Paul the Deacon, Jornandes, St Augustine, Procopius and E. Tesauro), Munich, Hof, 18 Jan 1687, *Wn*, *D-SWl*, in DTB xxi

Niobe, regina di Tebe (drama per musica, 3, Orlandi, after Ovid: *Metamorphoses*), Munich, Hof, carn. 1688, *A-Wn**, *D-SWl*, excerpts in DTB xxiii

Henrico Leone (dramma, 3, O. Mauro, after H. Göding and H. Meibom), Hanover, Schloss, 30 Jan 1689, *Bsb*, *SWl*, *GB-Lbl**, excerpts in DTB xxiii; Ger. trans., Hamburg, 1696; as Mechtilde, Stuttgart, 1701; rev. G.C. Schürmann, Brunswick, 2 Feb 1716, *D-SWl*, ed. in Musikalische Denkwürdigkeiten, i (Hanover, 1926)

La lotta d'Hercole con Acheloo (divertimento drammatico, 1, Mauro, after Ovid: *Metamorphoses*), Hanover, Schloss, sum. 1689, *Bsb*, *Mbs*, *GB-Lbl* (facs. in HS, ix, 1986), excerpts in DTB xxiii

La superbia d'Alessandro (drama, prol., 3, Mauro), Hanover, Schloss, Feb 1690; rev. as Il zelo di Leonato, Hanover, Feb 1691, *Lbl**, excerpts in DTB xxiii; Ger. trans., Hamburg, 1695

Orlando generoso (drama, 3, Mauro, after L. Ariosto: *Orlando furioso*), Hanover, Schloss, Feb 1691, *D-HVs*, *GB-Lbl**; arias (Lübeck, 1699; Amsterdam, *c*1704–5), excerpts in DTB xxiii; Ger. trans., Hamburg, 1696

Le rivali concordi (drama, 3, Mauro), Hanover, Schloss, Feb 1692, *A-Wn*, *GB-Lbl**; facs. in IOB, xiv (1978), excerpts in DTB xxiii; Ger. trans. as Die vereinigten Mit-Buhler, oder Die siegende Atalanta, Hamburg, 1698

La libertà contenta (drama, 3, Mauro, ? after Plutarch), Hanover, Schloss, 3 Feb 1693, *D-Dl*, *GB-Lbl**, excerpts in DTB xxiii; Ger. trans. as Der in seiner Freyheit vergnügte Alcibiades, Hamburg, 1697

Il Turno, 1693–7 (dramma, 3, Mauro, after Virgil: *Aeneid*), Düsseldorf, Jan 1709 as Amor vien dal destino, *D-HVl*, *GB-Lbl**, excerpts in DTB xxiii

I trionfi del fato (drama, 3, Mauro, after Virgil: *Aeneid* and Livy: *Ab urbe condita libri*), Hanover, Schloss, Feb 1695; rev. during opening run as I trionfi del fato, o Le glorie d'Enea; *D-Dl*, *Hs*, *GB-Lbl**, excerpts in DTB xxiii; Ger. trans., Hamburg, 25 Nov 1699; rev. Schürmann as Enea in Italia, Brunswick, 1716

Baccanali ([divertimento], 1, Mauro), Hanover, 'picciolo teatro elettorale', Feb 1695, *Lbl*; rev. Schürmann as Doppia festa d'Himeneo, Salzthal (Brunswick), 12 Sept 1718; as La festa di Minerva, Wolfenbüttel, 15 May 1719

Arminio (tragedia per musica, 5, S.B. Pallavicino, ? after Tacitus), Düsseldorf, carn. 1707, *D-WD*, *GB-Lbl* [pasticcio]

Tassilone (tragedia per musica, 5, Pallavicino), Düsseldorf, 17 Jan 1709, *D-Bsb*, *E-Mn*, *GB-Lbl*; ed. in Denkmäler rheinischer Musik, viii (Düsseldorf, 1958), excerpts in DTB xxiii

COLIN TIMMS

Steffani, Giuseppe Antonio. *See* ŠTĚPÁN, JOSEF ANTONÍN.

Steffen, Wolfgang (*b* Neuhaldensleben, 28 April 1923; *d* Berlin, 6 Dec 1993). German composer. He studied composition with Tiessen and conducting with Ahlendorf at the Municipal Conservatory and the Hochschule für Musik in Berlin. At the same time he attended seminars in musicology and drama at the Free University of Berlin. From 1947 to 1959 he worked as a choirmaster and conductor, and in 1974 he was appointed to teach music theory at the Hochschule für Musik, Berlin. He was also active in that city as chairman of the German Composers' League, head of the Studio for New Music and panel member of the Council of Culture. Composers as diverse as Hindemith, Bartók, Schoenberg, Ives and Cage inspired his work, yet Steffan's personal style avoids eclecticism. Traditional structures support most of his works, and in his occasional ventures beyond conventional technical conceptions he does not abandon creative textures and an innate sense of form. Steffan's emphasis on certain tone colours as well as his concept of dynamics in a broader sense reveal a great spectrum of continued tension and dramatic climax.

WORKS
(*selective list*)

Stage: Aus dem Lebensbuch eines Tänzers, op.13a, 1955, also orch suite
Orch: Serenade im alten Stil, op.4, fl, str, 1948; Sinfonietta, op.5, str, 1949; Intrada seria, op.10, 1953; Pf Conc., op.16, 1956; Vn Conc., op.32, 1966; Polychromie, op.38, pf, 10 insts, 1970, arr. pf, orch, 1971; Klangsegmente, op.41, cimb, hpd, hp, orch, 1973; Sinfonia da camera, op.46, 1976; Konzert für 6 Flöten, op.49, 1 player, orch, 1979–83; Sym. poem 'Goslar', op.73, 1991

Numerous chbr works and *c*35 songs

ALFRED GRANT GOODMAN

Steffens [Stephan, Stephani], **Johann** [Johannes] (*b* Itzehoe, Holstein, *c*1560; *d* Lüneburg, summer 1616). German composer and organist. His father, a member of Itzehoe town council, early encouraged his musical gifts and (according to a letter of recommendation dated 1589) had him trained by, among others, an organ builder, who may have been Hans Scherer (i). In 1592 he was engaged as assistant to Jost Funcke, the aged organist of the Johanniskirche, Lüneburg. When Funcke died in 1593, Steffens was appointed to succeed him, at first provisionally, and then officially from Easter 1595, after which he held the post for 20 years. His reputation seems to have grown quickly beyond Lüneburg: in 1596 he took part in the famous organ trial at Gröningen, near Halberstadt, where as one of 53 organ experts he played and assessed the new instrument. At Lüneburg he gave organ lessons and temporarily looked after the organ at St Spiritus. His close collaboration with the town musician Johann Sommer led to the publication of some instrumental pieces (in RISM 1609[30]). The collection of his madrigals and dance-songs that his son Heinrich published posthumously in 1619 shows the unmistakable influence of Hans Leo Hassler.

WORKS

Newe teutsche Gesäng nach Art der Madrigalien, 4–8vv (Nuremberg, 1599); lost, cited in G. Draudius: *Bibliotheca … classica* (Frankfurt, 1611), ed. K. Ameln, in *Verzeichnisse deutscher musikalischer Bücher 1611 und 1625* (Bonn, 1957); 1 repr. in 1609[28]

HORST WALTER

Steffkin [Steffkins, Stefkins, Steiffkin, Stephkins], **Theodore** [Dietrich] [Stoeffken, Ditrich] (*b* early 17th century; *d* Cologne, ?Dec 1673). German viol player and composer. In 1622 he was at the Danish Court, probably in the viol consort led by William Brade, with whom he may have moved to the ducal court at Gottorf. By midsummer 1628 he was in England as a musician to Charles I's consort Henrietta Maria; in 1636 he succeeded Maurice Webster as a 'musician for the consort in ordinary' to the king. Shortly before the Civil War he left England, and on 17 May 1642 he was appointed a viol player to Friedrich Wilhelm, Elector of Brandenburg. During the period 1647–8 he was seconded to the service of the stadtholder of the United Provinces in The Hague, where Constantijn Huygens became a devoted admirer and friend. Soon after 1652 he moved to Hamburg, where Robert Bargrave and Cromwell's ambassador Bulstrode Whitelocke heard him play in February 1653 and June 1654 respectively. In 1654 he performed for Archduke Leopold Wilhelm in Regensburg, and in 1659 he was in Rome. At the Restoration he became a member of Charles II's Private Musick and resumed his service to Henrietta Maria; he was also among the 'Musitians that doe service in the Chapel Royall'. Pepys heard him on 17 July 1663 and found him a 'temperate sober man'. In 1673 he accompanied the king's ambassadors to the Council of Cologne; his death there is recorded in a probate administration of February 1674.

Steffkin was one of the most admired viol players of his day and his compositions reflect the brilliance of solo playing at its zenith. The discovery of four manuscripts of Dutch provenance has brought to light many previously unlisted pieces by him. Huygens wrote to Mersenne (26 November 1646) of 'the marvellous Stiphkins, who performs more wonders on the viola da gamba than any man yet', and several letters from Steffkin to Huygens survive (*GB-Lbl*, *NL-Lu*). North wrote of a 'particular freindship cultivated' in later years between him and Jenkins, who 'often sent him kind tokens, which were pieces of fresh musick'. Steffkin's sons Frederick William (1646–1709) and Christian Leopold (*d* 1714) also became 'eminent violists' in the Private Musick. Frederick was granted a place jointly with his father in 1662, and served until November 1705; some lessons by him for bass viol survive (*GB-DRc*). Christian was appointed in 1689. A granddaughter, Ebenezar, married Gasparo Visconti in 1704. On 3 July 1705 Frederick and Christian, together with Visconti, took part in a demonstration organized by Thomas Salmon for the Royal Society, performing on two viols 'Mathematically set out, with a particular Fret for each String, that every Stop might be in a perfect exactness' (see Miller and Cohen).

WORKS

Allemande, 2 b viols, *GB-Ob* (inc.)
2 sets of divisions on a ground, b viol, bc, *A-ETgoëss*, *GB-DRc*, *Ob*

CHRISTOPHER D.S. FIELD

Steg (Ger.). *See* BRIDGE.

Stegereif (Ger.). A TRIANGLE resembling a medieval stirrup.

Steggall, Charles (*b* London, 3 June 1826; *d* London, 7 June 1905). English organist and composer. The son of a businessman, he was educated at the RAM (1847–51), where he studied piano and composition under William Sterndale Bennett. In 1848 he became organist of Christ Church Chapel, Maida Hill, and in 1851 professor of harmony and organ at the RAM and took the degrees of MusB and MusD at Cambridge. In 1855 he was appointed organist of the new Christ Church, Lancaster Gate, and in 1864 organist of Lincoln's Inn Chapel. In 1884 he was elected to the board of directors of the RAM. His pupils there included Joseph Barnby, F.G. Edwards and Edwin Lemare; he retired in 1903. Steggall was a founder of the Royal College of Organists and delivered the inaugural lecture on 18 October 1864. He was secretary of the Bach Society from its foundation by Bennett in 1849 to its dissolution in 1870. For the Society he produced an edition of J.S. Bach's Motets BWV 225–30 (1851).

Steggall's compositions included anthems, service music, hymn tunes, carols, chants and short organ compositions. He worked diligently for reform in congregational singing, calling for an authorised standard selection of metrical psalm and hymn tunes and favouring 16th- and 17th-century psalm tunes. He attempted to put his beliefs into practice in his two collections, *Church Psalmody* (1849) and *Hymns for the Church of England* (1865, 2/1875); in the preface to the former he criticized the preponderance of ill-trained choirs and silent congregations. He wrote a popular *Instruction Book for the Organ* (1875) and in 1887 joined the committee of *Hymns Ancient and Modern*.

His youngest son, (William) Reginald Steggall (1867–1938), was also an organist and composer who studied and became a teacher at the RAM, and on his father's death succeeded him as organist at Lincoln's Inn Chapel.

ROSEMARY WILLIAMSON

Steglich, Rudolf (*b* Rats-Damnitz, Pomerania, 18 Feb 1886; *d* Scheinfeld, nr Nuremberg, 8 July 1976). German musicologist. After studying in Dresden under Liszt's pupil Bertrand Roth (1900–06) he attended courses in musicology for one term at Munich University with Sandberger and for one term at Berlin University with Wolf (to whom he owed the subject of his dissertation); he completed his degree with Riemann at Leipzig University, where he took the doctorate in 1911 with a study of the *Quaestiones in musica*. Between 1919 and 1929 he was music correspondent for the *Hannoverscher Anzeiger* and from 1925 he taught at the Hanover Conservatory. In 1930 he completed the *Habilitation* in musicology at Erlangen University with a dissertation on musical rhythm. He then taught there as head of the musicology department and was appointed supernumerary professor in 1934. From 1935 to 1944 he was also a lecturer at the Nuremberg Conservatory and at the Nuremberg Wirtschaftshochschule. He was editor of the *Händel-Jahrbuch* (1928–33), *Archiv für Musikforschung* (1936–40) and, with Max Schneider, of the Hallische Händel-Ausgabe (from 1955). He retired in 1956.

Steglich specialized in the music of the 18th and 19th centuries, laying particular emphasis on Bach and his sons, Handel, Mozart, Beethoven and Schumann. His research into musical rhythm and its standardization, and the bearing this has on the natural ebb and flow of the pulse, tempo and dynamics, and into the acoustic properties of historical instruments, went hand in hand with his insistence that music should be properly performed and listened to. He was a leading figure in the German Handel revival of the 1920s, and took a great interest in the potential of the Nazi state to fulfil the musical goals of Germany. His numerous articles, discussions of operatic productions and book reviews for periodicals (particularly in the *Zeitschrift für Musik* from 1922 and in *Musica* from 1948) exerted a considerable influence on musical scholarship.

HANS HEINRICH EGGEBRECHT/PAMELA M. POTTER

Stegmann, Carl David (*b* Staucha, nr Meissen, 1751; *d* Bonn, 27 May 1826). German tenor, harpsichordist, conductor and composer. He received his initial musical training from the local organist at Staucha, then studied in Dresden with J.F. Zillich (from 1760), at the Kreuzschule (1766–70) and later under Homilius and the violinist H.F. Weisse. Thereafter he rose rapidly as singer, actor and harpsichordist; he went to Breslau in 1772 (with the Wäser theatre company), Königsberg in 1773, Heilsberg (now Lidzbark Warmiński) in 1774 (as court harpsichordist to the Bishop of Ermeland), Danzig in 1775, Königsberg again in 1776 (with the Schuch company) and later appeared in Gotha (at the court theatre). From 1778 to 1783 he made the first of two extended visits to Hamburg, winning particular renown as a harpsichordist. By that time five of his operas and Singspiele, first produced earlier in Königsberg and Danzig, were attracting performances elsewhere in northern Germany. In 1783 he left Hamburg to join the Grossmann company in Bonn. He then became attached to the court theatre at Mainz in association with which he made highly acclaimed guest appearances in Frankfurt. He sang in the first German-language *Don Giovanni* (Mainz, 13 March 1789), produced or conducted other operas by Mozart, Salieri, Gluck and Gassmann, composed incidental music (e.g. to Bürger's version of *Macbeth*, 30 August 1785) and acted in dramas by Lessing and Schiller.

The summit of Stegmann's activities in Frankfurt was the production of his allegorical coronation opera *Heinrich der Löwe* (15 July 1792) to celebrate the coronation of Emperor Franz II. By the time of his return to Hamburg in November 1792, he was much esteemed as a leading operatic producer and adapter, which compensated for the declining vocal prowess that forced him to restrict his

appearances to comic roles (*AMZ*, i, 1798–9, col.713). In 1798 he joined the directorate of the Hamburg theatre, remaining there until 1811; thereafter he attracted attention mainly as a composer of incidental music and a series of instrumental works (*AMZ*, iv, 1801–2, col.261), including keyboard and multiple concertos. His earlier close acquaintance with the operas of Gluck and Mozart, and his later keyboard arrangements (published by his friend Simrock) of Haydn's symphonies, Mozart's string quintets and Beethoven's Trios op.9, enabled him to produce instrumental music notable for contrapuntal and textural ingenuity, combined with an imaginative, if sometimes overladen, instrumentation.

As a composer for the theatre, Stegmann has attracted attention for his harmonic and tonal organization and for using antecedent forms of the leitmotif, showing an early interest in dramatic and psychological continuity.

WORKS

STAGE

Der Kaufmann von Smyrna (komische Oper, 1, C.F. Schwan, after N.-S. de Champfort), Königsberg, 1773, *B-Bc*; vs (Leipzig and Königsberg, 1773)
Die herrschaftliche Küche (ballet), Danzig, 1775, lost
Das redende Gemählde (komische Oper, 2, J. Anseaume), Königsberg, 1775; vs (Mitau and Hasenboth, 1775)
Die Rekruten auf dem Lande (komische Oper, 3), Danzig and Königsberg, 1775, *D-Dl**
Erwin and Elmire (Schauspiel mit Gesang, 2, J.W. von Goethe), Königsberg, Kreutzenplatz, 1776, vs (Königsberg and Leipzig, 1776)
Philemon und Baucis (Spl, Echof), Gotha, 1777, lost
Clarisse, oder Das unbekannte Dienstmädchen (komische Operette, 3, J.C. Bock), Hamburg, Gänsemarkt, Nov 1778
Montgolfier (opera-ballet), Bonn, 1788
Sultan Wampum oder Die Wünsche (op, 3, after A. von Kotzebue), Mainz, National, 7 March 1791
Heinrich der Löwe (coronation op, 2, H.G. Schmieder), Frankfurt, National, 15 July 1792, ov. (Vienna, 1792)
Der Triumph der Liebe, oder Das kühne Abentheuer (op, 4, O. Jester), Hamburg, Gänsemarkt, 27 Feb 1796, *Bsb*; vs, arr. Stegmann (Könisberg, 1796); rev. as Die Roseninsel (op, 3, K.L. Costenoble), Hamburg, 24 Nov 1806, *Dl*

Other works: Apollo unter den Hirten (prelude with songs), Königsberg, 1776 (Könisberg and Leipzig, 1776); Achmet und Zenide (songs, choruses), Hamburg, 1792, cited in Gerber, lost; Furcht und Hoffnung (prelude with songs), Hamburg, 1798; Moses (ov., choruses etc), Hamburg, 1807 (Bonn, *c*1812); incidental music to: Macbeth (Bürger, after W. Shakespeare), 1784, Die Jungfrau von Orleans (F. von Schiller), Maria Stuart (Schiller); adaptations of other ops, including P. Wranitzky: Oberon, N.-M. Dalayrac: Raoul, sire de Créqui, Mozart: Così fan tutte (in Ger.); single vocal pieces from stage works (Hamburg, n.d.); further stage works and ovs., entr'actes and marches cited in Gerber

ANDREW D. McCREDIE

Stegmayer, Matthäus (*b* Vienna, 29 April 1771; *d* Vienna, 10 May 1820). Austrian composer, dramatist and singer. A powerful treble choirboy in Vienna, he went on to tour the provinces with itinerant theatre troupes after completing his secondary education. In 1792–3 he joined the Theater in der Josefstadt, where he took leading parts and composed Singspiele and occasional music. In 1796 he moved to Schikaneder's Freihaus-Theater auf der Wieden, first appearing as composer there with a score for Gieseke's *Die zwölf schlafenden Jungfrauen*. Before the year was out he had also written two plays for the company. During the next 25 years he wrote many original plays, adaptations and much theatre music, frequently sharing the latter task with Seyfried, Henneberg and other composers (as with his own *Holga die Göttin des Kristallengebirges*, 1800). He gradually gave up composition (his work also includes some church compositions) but continued to write plays. Although he is reported to have left Schikaneder for the court theatre in 1800 he continued to supply works for the former. He was also chorus director and producer at the court theatre, ran the Hoftheater–Musikverlag and started a music copying and hire business. In 1804 he joined the Theater an der Wien as actor and chorus master, and continued to provide many plays and librettos, including the popular *Idas und Marpissa* (1807), with music by Seyfried. His greatest success was the quodlibet *Rochus Pumpernickel* (after Molière's *Monsieur de Pourceaugnac*, in collaboration with Haibel and Seyfried). This work proved one of the most popular products of the Viennese theatre – it was given innumerable performances all over German-speaking lands and ran to several editions and at least three sequels.

Stegmayer's son Ferdinand (*b* Vienna, 25 Aug 1803; *d* Vienna, 6 May 1863) was a pianist, conductor and composer who at 22 was appointed music director at the Königstädtisches Theater, Berlin. After serving as Kapellmeister in Prague and Leipzig he returned to Vienna in 1852, where he founded the Singakademie (1858).

PETER BRANSCOMBE

Stehle, Adelina (*b* Graz, 30 June 1860; *d* Milan, 24 Dec 1945). Austrian, later Italian, soprano. She studied in Milan and made her début as Amina at Broni in 1881. In the following years she sang in many of the leading Italian houses before going to La Scala in 1890, where she appeared in several world premières, most notably those of *La Wally* and *Falstaff*, both in 1892; in the latter, she sang Nannetta to the Fenton of her husband, Edoardo Garbin. In 1892 at the Teatro Dal Verme she was the first Nedda in *Pagliacci*, and in 1895 at La Scala she took the leading soprano roles in two Mascagni premières, *Guglielmo Ratcliff* and *Silvano*. In 1902 she toured South America and in 1905 was a member of the distinguished Sonzogno company at the Théâtre Sarah Bernhardt in Paris; she also sang in St Petersburg, Berlin and Vienna. Her voice, originally that of a light lyric and coloratura soprano (with Ophelia and Gilda among her roles), developed into a more dramatic instrument, and she was admired as a leading exponent of *verismo* roles such as Adriana Lecouvreur and Giordano's Fedora. On retirement she became a teacher, her best-known pupil being Giannina Arangi-Lombardi.

J.B. STEANE

Stehle, Johann Gustav Eduard (*b* Steinhausen, Württemberg, 17 Feb 1839; *d* St Gallen, Switzerland, 21 June 1915). Swiss-German composer, organist and conductor. He received his first lessons in organ and theory from his father. From 1853 he studied at the teachers' training colleges in Weingarten and Schwäbisch-Gmünd. He qualified in 1856, then taught in Schussenried (1857–64) and in Kanzach bei Saulgau (1864–9). Sympathizing with the aims of the Cecilian movement, he decided to become a full-time musician and in 1867 entered a composition competition organized by Franz Xaver Witt; he won first prize with his *Missa 'Salve regina'*. In 1869 he became organist and choirmaster at St Kolumban, Rorschach, where in the following year he helped found the first Cecilian organization in Switzerland. Over the next few years he accompanied Witt on his Swiss lecture tours and in 1874 was invited to become cathedral organist and choirmaster at St Gallen; his duties there included teaching at the Catholic Realschule. The same year, when the Gymnasium choir ceased to be attached to the cathedral, Stehle had to form a mixed civic choir for the cathedral services. In 1877 the choir formed the nucleus of the new Cecilian organization in St Gallen. Stehle also directed two other choirs in the town (1876–95).

Stehle published *Chorphotographien* (Regensburg, 1874), and his creation of the journal *Der Chorwächter* in 1876 provided him with a vehicle for disseminating his ideas for the reform of church music (articles published included 'Kirchliche und unkirchliche Musik', 1876; 'Die lateinische Kirchensprache', 1879; 'Leichte Kirchenmusik', 1881; and 'Moderne Kirchenmusik', 1894). There was opposition to his ideas and he was accused of neglecting the Classical Viennese composers, whose masses he described as lightweight and unecclesiastical. The style of Stehle's own compositions (especially after the death of Witt), became increasingly closer to that of Liszt, attracting criticism from the orthodox Cecilians such as F.X. Haberl. Stehle's article in *Der Chorwächter* 'Das Chroma in der Kirchenmusik' (1882) and his championing of Rheinberger's Mass in F minor, op.159, led to a permanent rift between him and Haberl. A polemic against Richard Strauss (Koch) shows that Stehle had rejected further advances in church music. There was also dissension among the members of the cathedral choir. On the positive side at this time, Stehle gained the PhD from Fribourg University. He resigned his cathedral post in 1913.

WORKS
(*selective list*)
detailed list in Koch

VOCAL

Orats, cants.: Legende der heiligen Cäcilia (W. Edelmann), solo vv, chorus, orch, op.43, vs (Leipzig, 1887); Fritjofs Heimkehr (E. Tegnèr), solo vv, chorus, orch, op.64 (St Gallen, 1888); Lumen de coelo, solo vv, chorus, orch, op.55/58 (Leipzig, 1890); Oybin, contralto solo, male chorus, orch, ?op.63 (Leipzig, 1890); Absalom, chorus, orch, op.70, 1896 [also incidental music]; Die Nonnen von Compiègne, female chorus, male chorus, orch, 1909

Masses (for chorus, org): Salve regina, 1869; De spiritu sancto (Einsiedeln, 1874); Jesu rex admirabilis, op.33, 1874; In honorem S Sacramenti, op.33a (Stuttgart, 1874); Laetentur coeli, op.37, ?1875; Exultate deo, op.38; Ad dulcissimum cor Jesu (Ravensburg, 1876); Jubilaei solemnis, op.42 (Einsiedeln, 1879); Alma redemptoris mater, op.51, 1883; Pro defunctis, op.52 (Augsburg, 1884); Regina coeli, op.56, 1888; Jubliaei solemnis, op.46 (Einsiedeln, 1891); Missa solemnis, op.67, 1894; De beata Magdalena Sophia Barat, 1910; De angelis (Estavayer-le-lac, 1911); De beata Julia Billiart, 1913

Many short liturgical works, choruses, songs

INSTRUMENTAL

Org: 4 Praeludien, 1869; Phantasie über O sanctissima, ded. F. Liszt (Leipzig, 1872); Tu es Petrus, Trauer und Trost, Beim toten Liebling, op.44 (Zürich, 1874); Saul (Leipzig, 1878), arr. for orch, 1888; Concert Fantasie (Zürich, 1880); Praeludia organi (Regensburg, 1892); Pro gloria et patria (Leipzig, 1892); Fantasie über Zwyssigs Schweizerpsalm (St Gallen, 1904); 5 Orgelstücke, op.70 (Brussels, 1906); Fantasie über Te Deum, 1909

arrs., incl. R. Wagner: Einzug der Gäste (Tannhäuser), 1876, and Trauermarsch (Götterdämmerung) (Mainz, 1909); F. Mendelssohn: Hochzeitsmarsch (Sommernachtstraum), ed. (Leipzig, 1983)

CLYTUS GOTTWALD

Stehman, Jacques (*b* Brussels, 8 July 1912; *d* Knokke-Heist, 20 May 1975). Belgian composer and critic. He studied the piano and theory at the Brussels Conservatory, where Absil was his most important teacher. Then he played an important part in Brussels musical life as music reporter for Radio Télévision Belge and critic of the daily paper *Le soir*. He returned to the conservatory as professor of practical harmony (1954) and of music history (1968), also teaching at the Chapelle Musicale Reine Elisabeth. A fluent composer, he could express deep tragedy, as in the *Chant funèbre*, but more frequently his music is designed to divert. The piano pieces (e.g. *Tombeau de Ravel*, 1948)

and songs (e.g. *Rimes enfantines*, 1949) are within the French tradition; more developed works employ impressionist detail within conventional forms – for example, the Suite for strings takes the form (and also recaptures the spirit) of an 18th-century suite. The *Symphonie de poche* (1950) is also built on Classical lines, although on reduced proportions, with oppositions between soloists and groups. Some of Stehman's works, such as the *Trois rythmes* (1955), display the rhythmic influence of jazz. He is the author of a *Histoire de la musique européenne* (Verviers, 1964). His music is published by CeBeDeM, which holds his MSS, and Schott (Brussels).

HENRI VANHULST

Steibelt, Daniel (Gottlieb) (*b* Berlin, 22 Oct 1765; *d* St Petersburg, 20 Sept/2 Oct 1823). French composer and pianist of German birth. His father was an officer in the Prussian army and later a maker of harpsichords and pianos; his mother was from a Huguenot family that fled France. At an early age Steibelt attracted the attention of the crown prince (later Friedrich Wilhelm II of Prussia), who sent him to study with Kirnberger. Steibelt's first published composition, a song of eight bars, appeared in a song collection in 1782. Steibelt's father forced him to join the Prussian army some time before 1784, for in that year Steibelt deserted and fled the country. Two more songs appeared in 1784 in the weekly *Neue Blumenlese für Klavier-Liebhaber*. Steibelt's spent some of the next six years travelling as a pianist. In 1788 he was in Munich, where his first four sonatas opp.1–4 were published by Goetz; in 1789 he gave concerts in Saxony and Hanover; and in 1790 he took up permanent residence in Paris, which he had probably visited in the years immediately before, as his reputation was already well established there. His contest at court with David Hermann (1764–1852) also indicates that Steibelt had been in Paris before the Revolution. Each contributed a movement to the sonata *La coquette*: Hermann the first and Steibelt the rondo, and the fashionable Steibelt was adjudged the winner.

By 1793 Steibelt had completed his first opera, *Roméo et Juliette*, to a libretto by his patron Vicomte Alexandre de Ségur, and submitted it to the Académie Royale de Musique. Lacking the financial resources to stage new works because of the Académie's association with the *ancien régime*, they rejected it. When Steibelt replaced the sung recitative with spoken dialogue, the work was finally performed as an *opéra comique* at the Théâtre Feydeau on 9 October 1793. Its success brought Steibelt much acclaim, and he was subsequently much sought after as a composer and teacher.

For the next 15 years Steibelt divided his time between Paris and London, performing extensively in those cities. He also toured in most of the major European capitals. It appears that fraudulent dealings with the publisher Boyer brought Steibelt into bad repute, and he left Paris towards the end of 1796, making his way to London by way of Holland. By this time, Steibelt had published 20 opuses, mostly for piano, as well as the string quartets op.17.

An appearance at Salomon's benefit concert on 1 May 1797 may have been Steibelt's first concert in London. Two weeks later he played one of his own concertos at an opera concert, and it was probably at Salomon's concert on 19 March 1798 that he first played his celebrated Third Piano Concerto ('L'orage'), the finale of which, a rondo pastoral 'in which is introduced an imitation of a storm', achieved enormous popularity. Field may have based his own Piano Concerto no.5, 'L'incendie par l'orage', on this work. On 11 December 1798 *Albert and Adelaide, or The Victim of Constancy* was produced at Covent Garden. This opera was a pasticcio, both verbally and musically well adapted to the English taste. Steibelt, though nominally the composer, included many borrowings, including the quintet from Cherubini's *Lodoïska*, and some of the 'original' music was composed by Thomas Attwood (see the *Morning Chronicle*, 22 January 1799). It is unclear how much of the music Steibelt actually contributed.

While in London, Steibelt married an Englishwoman (only her first name, Catharine, is known), who was a pianist and performer on the tambourine, a fact that occasioned him to add tambourine or triangle obbligato parts to many of his later compositions.

Late in 1799 Steibelt began a year-long European tour, appearing in Hamburg on 9 October 1799, the same month his father obtained an official pardon for his desertion from the army 15 years earlier. Steibelt also performed in Dresden on 4 February 1800 and visited Prague, Berlin and Vienna, where, at the home of Count Fries, he entered into the contest with Beethoven described by Ries in his *Biographische Notizen über L. v. Beethoven* (Koblenz, 1838), in which Steibelt was decisively worsted, and his success in Vienna impaired. Steibelt returned to Paris in August 1800, bringing with him a score of Haydn's *Creation*, which he performed in Napoleon's presence at the Opéra on 24 December, in a translation by Ségur and with musical alterations and additions of his own that caused much offence. His ballet *Le retour de Zéphire* was given successfully at the Opéra on 3 March 1802, and he left for London 19 days later, where he remained for three years. Two ballets, *Le jugement de berger Paris* and *La belle laitière*, were produced at the King's Theatre. He returned to Paris in the spring of 1805. In 1806 his festival intermezzo *La fête de Mars*, composed in honour of Napoleon's victory at Austerlitz, was staged at the Opéra. During this time, Steibelt composed much of his piano music, including the Fourth and Fifth Concertos; the *Méthode* (Paris, 1805), in which he claimed to have invented the signs for the pedals adopted by Clementi, Cramer and Dussek; and his most enduring work, the Etude op.78. He also wrote a method for the tambourine. A three-act opera, *La princesse de Babylone*, was in active preparation at the Opéra in the autumn of 1808, when Steibelt left Paris, perhaps to avoid imprisonment because of mounting debts. However, a concert tour begun at this time seems to have been planned well in advance of his departure, and *La princesse de Babylone* was later given its première in St Petersburg, with Steibelt conducting. His tour of late 1808 took him from Paris to Frankfurt, Leipzig, Breslau, Warsaw, Wilna (where he conducted a Polish translation of Haydn's *Creation*), Rīga and St Petersburg, where he arrived in the spring of 1809.

Steibelt was one of many European musicians lured to Russia by generous offers from the government of Alexander I in the first decade of the 19th century. He spent the rest of his life there, managing and composing for the French Opera, teaching and composing for the

Title-page of Steibelt's 'Six sonates' op.27 (Paris: Imbault, c1810)

piano. In St Petersburg he met John Field, who became one of his few real friends. In 1809 he brought out his ballet *La fête de l'Empereur* and possibly another opera, *Paul et Virginie*, while beginning work on *Cendrillon*, first staged in October 1810. He was named director of the imperial French theatre before the end of that year, succeeding Boieldieu, and soon after this appointment completed another three-act opera, *Sargines*, and a pasticcio, *Les folies amoureuses*. When Napoleon entered Moscow in 1812, Steibelt composed a piano fantasy, *L'incendie de Moscou*. Another opera, *Phèdre*, reportedly received its première in 1818 in St Petersburg. On 16 March 1820 Steibelt gave the first performance of his Eighth Concerto, which includes a choral ('Bacchanalian Rondo') finale. His final opera, *Le jugement de Midas*, was begun some time after 1820 but was never completed, as he had by then developed a painful and protracted illness to which he finally succumbed in 1823. Steibelt was given a semi-public funeral. The military governor of St Petersburg organized a concert to benefit Steibelt's family, who, despite the composer's fabulous earnings, had been left in comparative poverty.

Steibelt appears to have been extraordinarily vain, arrogant, discourteous, recklessly extravagant and even dishonest. Tomasek described him as 'enveloped in a veil of self-conceit'. He fobbed off old works as new, disguising them with minor alterations and the addition of unnecessary ad libitum parts. Meissner, in his *Rococo-Bilder* (pp. 209ff) recorded that Steibelt sold three piano sonatas to the harp maker and music publisher Nadermann for 500 francs; Nadermann later realized that the sonatas which Steibelt had left were not the ones which the composer had played, but three quite insignificant ones. As a musician, Steibelt has often been dismissed as a charlatan, to some degree unjustly. His powers as a pianist must have been considerable, even though he was reputed to have laboured under the disadvantage of a poor left-hand technique and to have been unable to produce singing tone in slow, sustained passages.

Steibelt's most significant works were undoubtedly his operas, in which dramatic requirements always took precedence over musical considerations. His reputation in this field, though based solely on *Roméo et Juliette* (his only real opera known outside Russia), was not inconsiderable. The rather full scoring of some of the accompaniments possibly prompted the description of the work in the *Moniteur* of 23 September 1793 as 'learned, but laboured and ugly'. Berlioz cited *Roméo* as the best of the five settings of the Shakespeare play in existence and was obviously influenced by Steibelt's innovative orchestration, harmonies and individual writing for chorus, which included unison passages in a choral-recitative style and the use of the chorus as another 'instrument' in the orchestra.

Steibelt's scoring in this work could indeed be a model of delicacy. A passage near the beginning of the overture is remarkable for varied and sensitive doubling of woodwind instruments and the use of a solo horn to conjure up a romantic atmosphere. *Roméo et Juliette* held the stage for at least 30 years after its première and was translated into four languages and performed in opera houses from New Orleans to Moscow. Steibelt's only other published opera, *Cendrillon*, also an *opéra comique*, has never been performed outside Russia. It too has a striking and bold dramatic style that is coupled with characteristic instrumentation and form.

Steibelt's piano concertos generally have first movements in classical Mozartian ('double exposition') form, slow movements with much decorative writing for the piano and final rondos in a popular vein. The descriptive titles of the third concerto ('L'orage'), fifth ('A la chasse'), sixth ('Le voyage au Mont St Bernard') and seventh ('Grand Military Concerto, dans le genre des Grecs'), together with the variable number of movements and the lack of improvised cadenzas in several of the works, reveal Steibelt's awareness of more romantic approaches to the genre.

Steibelt published hundreds of works for piano solo and piano with the accompaniment of flute, violin, cello, harp, tambourine or other instruments. Many of these were titled 'sonata' (see illustration), and range from small pieces to expansive works. Many are in two movements (Allegro and Rondo). Slow movements, when they appear, are generally perfunctory, often based on popular national airs, as are many of the rondos. The other piano works consist of preludes, marches, waltzes, bacchanals, potpourris and programmatic pieces. Steibelt also wrote a set of string quartets, a piano quartet, some piano quintets, and numerous vocal works. The three quintets for piano and strings op.28 are more substantial, as are the 50 studies of the Etude op.78, some of which anticipate the style of Mendelssohn and all of which are admirably designed for their purpose.

WORKS
(*selective list*)

works published unless otherwise stated, mostly in Paris, but also in Leipzig, London, Offenbach, St Petersburg and Vienna

For detailed list of the 110 op. nos. and many unnumbered works see Mee and Pazdírek.

STAGE

Roméo et Juliette (op, 3, A.-J.-P. de Ségur, after W. Shakespeare), Paris, Feydeau, 9 Oct 1793 (Paris, 1793); restored (orig.) version, St Petersburg, 1817, *D-Bsb*
Albert and Adelaide, or The Victim of Constancy (grand heroic romance, 3, S. Birch, after B.J. Marsollier des Vivetières and J.M. Boutet de Monvel), London, CG, 11 Dec 1798, pf score of ov. pubd, collab. Attwood, ? incl. music by Cherubini
Le retour de Zéphire (La valee de Tempe) (ballet, 1), Paris, Opéra, 3 March 1802, *F-Po*, vs pubd; incl. music by T. Winter
Le jugement de berger Paris (ballet, 3), London, King's, 24 May 1804, vs pubd
La belle laitière, ou Blanche, reine de Castille (ballet), London, King's, 26 Jan 1805, vs pubd
La fête de Mars (int, J.A. d'Esmenard), Paris, Opéra, 4 March 1806, *F-Po*
La princesse de Babylone (op, 3), St Petersburg, *c*1812, not pubd; originally composed *c*1808 for Paris Opéra
La fête de l'Empereur (ballet), St Petersburg, 1809, not pubd
Paul et Virginie (op), St Petersburg, 1809
Der blöde Ritter (ballet), St Petersburg, *c*1810, not pubd
Sargines (op, 3), St Petersburg, *c*1810, not pubd
Cendrillon (op, 3, C.G. Etienne), St Petersburg, 14/26 Oct 1810, ed. in Hagberg (1976)
Les folies amoureuses (pasticcio op), St Petersburg, *c*1810, fs pubd
Le jugement de Midas (op), *c*1823, not pubd; unfinished but apparently performed at St Petersburg
Phèdre (op), St Petersburg, 1818
Le jugement de Midas, *c*1823, inc., ?St Petersburg

ORCHESTRAL AND CHAMBER

Overture en symphonie (1796); several waltzes, orch, tambourine, triangle, not pubd
8 pf concs.: no.1, C (1796); no.2, e, vn/orch acc. (*c*1796); no.3, E, 'L'orage', op.33 (1799); no.4, E♭ (*c*1800); no.5, E♭, 'A la chasse', op.64 (1802); no.6, g, 'Le voyage au Mont St Bernard' (*c*1816); no.7, e, 'Grand Military Concerto, dans le genre des Grecs', with 2 orchs (*c*1816); no.8, E♭, with Bacchanalian Rondo, acc. chorus, 1820, not pubd
6 string quartets (1790s)
1 trio; 1 qt; 3 qnts, op.28: all pf, str (1790s)
Harp concerto (1807)

PIANO AND HARP

All numbers are approximate, as Steibelt published identical works under different op. nos. and different works under identical op. nos. Many works were also published both with and without obbligato or ad lib accompaniments.
*c*160 sonatas and sonatinas, pf; *c*180 sonatas, pf, inst acc.
16 sonatas, pf 4 hands; 7 sonatas, 2 pf; 5 duos, pf, harp
1 sonata, harp; 9 sonatas, harp, inst acc.
20 potpourris, pf, incl. 1 also arr. for pf, orch acc.
36 waltzes, 36 bacchanals, 12 divertissements, pf, tambourine and triangle ad lib
6 waltzes, pf 3 hands
Numerous divertissements, variations, preludes, caprices, rondos, fantasias, serenades, marches and descriptive pieces, pf, and pf, inst acc.
Etude, pf, op.78 (1805)
Méthode de pianoforte (1805)

SONGS

Mélanges d'airs et chansons en forme de scène [30 songs], op.10 (1794)
6 romances (1798)
[5] Airs d'Estelle (1798)
Several songs in contemporary anthologies, 1782–4

FRANK DAWES, KAREN A. HAGBERG, STEPHAN D. LINDEMAN

Steier, Sylvester (*fl* Liebenthal, Bohemia, 1571–94). German poet and composer. He subjoined to his name the word *Leovalla*, indicating that he came from Liebenthal in Bohemia, a fact confirmed by other indications in the prefaces to his works, for instance the words *in praedio nostro Sindenhofio* and *Oegra* (Eger). At the suggestion of Johann Knod of Amberg, Chancellor of the Palatinate, his brother Martin had begun work on a rhyming translation of George Buchanan's Latin tragedy *Jephtes*, but handed it over to Sylvester in 1571. The translation appeared in Nuremberg.

Steier's major work, on which he laboured for twenty years, is the *Historia genealogiae domini nostri Jesu Christi* (Frankfurt, 1594). He dedicated this three-volume work, copiously illustrated with woodcuts, to Emperor Rudolf II. In it he mentioned a number of Bohemian friends and patrons, including the famous theologian Leonhard Krenzheim (1532–98), whom he described as his brother-in-law and who was for a time superintendent of Liegnitz (now Legnica) in Silesia. He was also a friend of the theologian Abraham Buchholtzer (1539–84), whose *Isagoge chronologica ab initio mundi* provided the model for the *Historia genealogica*.

Steier's contribution to music is his *Hymnorum oeconomicorum in octavas heptadum classes distributorum libri duo … Christliche Hausshymni … in zwei Büchern, und jedes in acht sibenfache Classes unterschieden* (Nuremberg, 1583; two melodies in Zahn, i, no. 405, and iii, no. 4497b; one in K. Ameln, C. Mahrenholz and W. Thomas, *Handbuch der deutschen evangelischen Kirchenmusik*, III/2, Göttingen, 1935-6, p.388; and one in K. Ameln and W. Thomas, *Zu guten Nacht*, Kassel, 1930). The work is a collection of simple homophonic hymns with texts underlaid in both Latin and German.

CLYTUS GOTTWALD

Steiffkin, Theodore [Dietrich]. *See* STEFFKIN, THEODORE.

Steiger, Rand (*b* New York, 18 June 1957). American composer and performer. He studied at the Manhattan School of Music and the California Institute of the Arts, where his teachers included Earle Brown, Mel Powell,

Morton Subotnick and Stephen Mosko. In 1981 he co-founded the new-music ensemble California EAR Unit, and in 1987 and 1988 he was composer-in-residence with the Los Angeles PO, for whom he wrote several orchestral works including *The Burgess Shale*, a large score inspired by the work of paleontologist Stephen Jay Gould. He joined the music department at the University of California, San Diego, in 1987. His honours include the Prix de Rome, a National Endowment Composers Fellowship, and commissions from the Fromm Music Foundation, the Aequalis Trio, Zeitgeist and the Los Angeles Chamber Orchestra.

Steiger's compositions, which include works for both traditional performing forces and computerized electronic systems, are notable for their energy and vivid theatrical profile. His interest in computer technology has prompted a number of interdisciplinary collaborations, including the development with Miller Puckette and Vibeke Sorensen of a system for networked, real-time computer graphics and music. That system was used in *Lemma 2*, a piece for piano, percussion and electronics that was given its première in 1999 in a simultaneous performance in New York City and Hillsboro, Oregon.

JOSHUA KOSMAN

Steigleder. German family of organists and composers.

(1) **Utz Steigleder** (*d* Stuttgart, 7 or 8 Oct 1581). He is first traceable in 1534 in the service of Duke Ulrich of Württemberg in Stuttgart, where he was court and abbey organist. From 1568, when Duke Ludwig became ruler, the court chapel reached its heyday; from 1572, when Steigleder went into semi-retirement, he was assisted by Simon Lohet. His only surviving work is a six-part *Veni Sancte Spiritus* (ed. in Die Motette, no.457, Stuttgart, 1963), which has affinities with procedures in Hans Buchner's *Fundamentum*.

(2) **Adam Steigleder** (*b* Stuttgart, 19 Feb 1561; *d* Stuttgart, 8 Nov 1633). Son of (1) Utz Steigleder. He studied under Simon Lohet between 1575 and 1578 and at Duke Ludwig of Württemberg's expense in Rome with unknown teachers from 1580 to 1583. He was successively organist at the abbey church, Stuttgart (from 1583), the Michaeliskirche, Schwäbisch Hall (from October 1592), and Ulm Minster (from 1595). He retired to Stuttgart in 1625. His sole surviving works, the fruits of an Italian training seen through German eyes, are a *Passa è mezo* (a *passamezzo antico* with three variations, the last a galliard; see Schuler) and a *Toccata primi toni* based on *Veni, Redemptor gentium* (the latter in *EMDC*, II/vii, 1926, pp.1224ff, and in *ZMw*, viii, 1925–6, p.633). A *Fuga colorata* assigned to him in J. Woltz: *Nova musices organicae tabulatura* (Basle, 1617) is ascribed to Giovanni Gabrieli in other sources (*A-Wm*, *D-Bsb*, *I-Tn* Foà 3; it is anon. in *D-Mbs* Mus.4480, but is attrib. Steigleder in *EMDC*, II/vii, 1224ff).

(3) **Johann Ulrich Steigleder** (*b* Schwäbisch Hall, 22 March 1593; *d* Stuttgart, 10 Oct 1635). Son of (2) Adam Steigleder, who was his only teacher. Though lame he became organist of the Stephanskirche, Lindau, on Lake Constance, in 1613. He was organist of the abbey church, Stuttgart, from 1617 and also ducal organist from 1627. He died of plague during the Thirty Years War.

His known works comprise four isolated vocal and instrumental pieces and two published collections (ed. in CEKM, xiii/1, 1968); in addition, 15 anonymous liturgical works for organ (in *GB-Lbl*) have been attributed to him by Hirtler. The year 1624 represented a landmark in German keyboard music, for it was then that Scheidt and Steigleder, in their *Tabulatura nova* and *Ricercar tabulatura* (published at Stuttgart) respectively, adopted five-line musical notation in place of lettering. Furthermore Steigleder introduced keyboard scoring and employed engraved copper plates (crudely cut by himself) for the first time in Germany. He also took the initiative in replacing modal nomenclature (*primi toni*, etc.) by that of key. The first six ricercares are accordingly in D minor, E minor, F, G, A minor and C (though with modal implications), this cyclic sequence repeating itself in the second six.

Contrasted with the vocally orientated ricercares of his older contemporaries Hassler and Erbach, Steigleder's are definitely instrumental in character, with English virginal style a major influence – not surprising considering the strong contingent of English musicians with whom he worked at the Stuttgart court. Elements of this style apparent in the ricercares include echo effects (no.11), faburden (no.6), off-beat figuration (no.10), imitative figuration (no.2), cross-rhythms (no.10) and hocket (no.6). Another influence, shared with Froberger (whose father was Kapellmeister at Stuttgart), was the lute playing of the Englishmen John and David Morell and Andrew Borell, strikingly illustrated in Ricercare no.1 (bars 143ff). The ricercares show great diversity, befitting works avowedly written 'to please students'. Nos.3 and 9, both outstanding pieces, demonstrate an imaginative treatment of the cuckoo's call and a subtle use of diminution respectively.

Steigleder's second collection is the *Tabulatur Buch* (Strasbourg, 1627). The practical use of this didactic anthology comprising 40 variations on the chorale *Vater unser* is stressed: players finding the first fantasia overlong may substitute the shorter second and third, while voices or instruments of appropriate pitch may reinforce the chorale in the cantus firmus pieces in discant, tenor and bass, which predominate. The three-part settings have ornamental accompanying figures, the four-part ones a more polyphonic texture; nos.17 and 15, which are worthy precursors of Bach's *Orgel-Büchlein*, are good examples of the two types. The chorale undergoes a wide variety of structural treatment: it is divided phrase by phrase between discant and tenor, the remaining two parts being imitative (no.35), in strict canon between bass and discant with a middle part in ostinato style (no.29), in double counterpoint (no.12), in canon at the 4th using hocket and resembling Tallis's *Lesson: Two Parts in One* (no.24) and treated as a fugal bicinium foreshadowing

Bach's chorale-partita writing (no.22). The concluding tripartite toccata, again stylistically influenced by lute and virginal textures, shows Steigleder at his most inventive.

G.B. SHARP/DOROTHEA SCHRÖDER

Stein, Erwin (*b* Vienna, 7 Nov 1885; *d* London, 17 July 1958). Austrian writer on music and editor. He studied with Schoenberg from 1906 to 1910 and became a close friend of Berg and Webern. During World War I he was répétiteur and conductor at various German opera houses. From 1920 to 1923 he was director of performances in Schoenberg's Verein für Musikalische Privataufführungen. He edited the periodical *Pult und Taktstock* from 1924 to 1930, and was until 1938 artistic adviser to Universal Edition in Vienna, making, among other things, a vocal score of the unfinished third act of Berg's *Lulu*. In 1938 he emigrated to England where his association with Universal Edition secured him a post with its English agents, Boosey & Hawkes. Stein was an ardent champion of Schoenberg and the 12-note school in general and wrote many articles analysing and explaining the technical aspects of this music. In England he also became interested in the work of Benjamin Britten.

MOSCO CARNER

Stein, Fritz (Friedrich Wilhelm) (*b* Gerlachsheim, 17 Dec 1879; *d* Berlin, 14 Nov 1961). German musicologist, organist and conductor. He studied theology in Heidelberg but from 1902, encouraged by the church musician Philipp Wolfrum, he devoted himself entirely to music. After his studies in Leipzig under Krehl and Nikisch as well as Straube and Riemann, he became university music director and municipal organist of Jena in 1906 and took the doctorate at Heidelberg in 1912. In Jena he had taken up the cause of Reger, but was unable to succeed him as conductor in Meiningen as planned because of the outbreak of war in 1914. From 1918 to 1923 he was organist in Kiel; in 1920 he became reader in musicology at the university there, and in 1928 he was appointed professor. As conductor of the municipal symphony concerts and of the oratorio society, which he founded, he was awarded the title of Generalmusikdirektor in 1925 and was responsible for organizing music festivals devoted to Bach, Handel and contemporary composers.

Stein strongly supported the National Socialists, and once the party came to power, his career reached its peak when he took over of the directorship of the Berlin Hochschule für Musik, the most important music academy in the country at that time. As the Hochschule was forced to adopt Nazi policies, Stein invoked the rhetoric of Rosenberg's organization 'Kampfbund für deutsche Kultur', of which he was a member, to support his decisions. (He applied to become a member of the National Socialist Party in 1933, but was not accepted until 1940.) He ensured that the training at the school followed the principles of a 'National Socialist education', although he did make efforts to protect Hindemith, who finally resigned as professor of composition in 1937. Stein's emphasis on 'Gemeinschaftsmusik' ('communal music') made it possible for him to create a close link between musical and ideological ideas. Other posts held by Stein during the Third Reich included president of the Reichsbund für Evangelische Kirchenmusik, and he instructed Adolf Hitler's personal SS regiment in choral singing.

Stein published early vocal and instrumental works in practical new editions: these included cantatas by Nicolaus Bruhns, J.C. Bach symphonies and G.J. Werner's *Musicalischer Instrumental-Calender*. He always regarded the 'Jena' Symphony, which he had discovered and published (Leipzig, 1911), as an early work by Beethoven; it is now generally ascribed to Friedrich Witt. The life and works of his friend Reger were central to Stein's research and he published the standard monograph (1939) and a thematic catalogue (1953). As a conductor Stein promoted Scandinavian composers (Nielsen, Sibelius, Atterberg, L.L. Emborg, N.O. Raasted) as well as such German composers as Hindemith, J.N. David, Heinrich Kaminski, Günter Raphael and Kurt Thomas.

HELMUT WIRTH/DIETMAR SCHENK

Stein, Gertrude (*b* Allegheny, PA, 3 Feb 1874; *d* Paris, 27 July 1940). American writer. Her work consists of novels, autobiographies, portraits, poems, lectures, plays (some of which were designed as opera librettos and published in such collections as *Operas and Plays*) and explanations. A student of William James and friend of Alfred North Whitehead, she was at the centre of the philosophical and artistic revolutions of the early 20th century and became a natural emblem for modernism, both through her own writing and through her influence as a catalyst of the avant garde. So well known are Stein's associations with such writers as Sherwood Anderson and Hemingway, and with such painters as Picasso and Matisse, that it is easy to overlook her involvement with music. As a student at Radcliffe College (1893–7), she had been attracted to opera (particularly Wagner), and after settling in Paris in 1903 she became acquainted with Satie. Although her own approach to music was as idiosyncratic as her writing (she believed in playing only the white keys on a piano), several composers were drawn to her work; indeed she often found that the only way she could get her plays performed was to have their radical style tempered by more traditional musical scores.

Among the composers who have used material by Stein are Bernstein, Paul Bowles, Kotík, Kupferman, Rorem and, most notably, Virgil Thomson, whose collaboration with Stein in the operas *Four Saints in Three Acts* and *The Mother of us all* brought them both great success. The English composer Lord Berners used her text for his choral ballet *A Wedding Bouquet* and commissioned her *Faust*, though he did not write the music for the latter. While the metaphors most often employed to explain Stein's writing come from the visual arts (cubism and the cinema), her experiments with prose rhythms and her highly repetitive interweaving of themes also invite comparison with the rise, fall and repetition of musical themes, an aspect of her work explored by Sutherland (1951).

BROOKS LANDON (text), MICHAEL HOVLAND (bibliography)

Stein, Horst (*b* Elberfeld, 2 May 1928). German conductor. After studies at the Musikhochschule in Cologne and a first engagement at the municipal theatre in Wuppertal, he was appointed Kapellmeister at the Hamburg Staatsoper in 1951. He was state Kapellmeister at the Berlin Staatsoper, 1955–61, and opera director and Generalmusikdirektor in Mannheim, 1963–70; in 1970 he was appointed principal conductor at the Vienna Staatsoper. He was Generalmusikdirektor at the Hamburg Staatsoper, 1972–9, and also directed the Hamburg PO, 1973–6. He was artistic director of the Suisse Romande Orchestra, 1980–85, and was appointed principal conductor of the Bamberg SO in 1985; from 1987 to 1994 he was principal conductor of the Basle SO. A conductor of wide experience, always intent on achieving a satisfactory balance between singer and orchestra, he has been most successful with Wagner's works: he conducted *Tristan und Isolde* at the Teatro Colón in Buenos Aires, *Der fliegende Holländer* at the Sofia State Opera, *Parsifal* at the Paris Opéra, and the *Ring* at the Bayreuth Festival and the Hamburg Staatsoper. His recordings include *Die Meistersinger* and *Parsifal* (from Bayreuth), Kienzl's *Der Evangelimann* and acclaimed renditions of Bruckner symphonies.

HANS CHRISTOPH WORBS/NOËL GOODWIN

Stein, Johann (Georg) Andreas (*b* Heidelsheim, 6 May 1728; *d* Augsburg, 29 Feb 1792). German keyboard instrument maker. He was one of the most resourceful, inventive and renowned instrument maker of the 18th century. He founded the most important dynasty of piano builders in the history of the instrument. His firm continued production until 1896. His invenions contributed as much to the history of the piano as those of Cristofori.

Stein's fame as a piano maker reached mythical proportions soon after his death. His widespread reputation lived on through the work of his daughter Nannette [Maria Anna] Stein, and ubiquitously in reports throughout the 19th century. He presented instruments at the courts in Paris (1773) and Vienna (1777) with great success. Mozart declared his preference for Stein's pianos, noting their technical prowess, in 1777. Stein's notebook, which was maintained from the 1740s to about 1780, provides insight into his apprenticeship at the Silberman workshop in Strasbourg (1748–9) and into instrument building.

Stein was also highly recommended as a harpsichord maker, and built organs, including the magnificent instrument in the Barfüsserkirche in Augsburg where he was organist. He also contributed to the paper industry and to the improvement of the trumpet.

Stein's spirited inventions include the Poli-Toni-Clavichordium (1796) and the Melodika (1772). No examples of these survive, but both are described in contemporary sources. The three-manual Poli-Toni-Clavichordium, described by Stein himself (*Augsburger Intellingenzblatt*, 5 Oct 1769), combined a piano under a four-register (16′, 8′, 8′, 8′), two-manual harpsichord. The two instruments each had its own soundboard and strings but shared a baseboard. The harpsichord lid opened upwards, the piano lid downwards (underneath the instrument). The Melodika was a small pipe organ for playing melodies accompanied by the piano on which it was placed. The volume of each note could be varied by touch alone.

Johann Andreas Stein: portrait by an unknown artist, c1780

Another of Stein's inventions was the Saitenharmonika, a normal piano with a third set of strings plucked by 'a very elastic material', probably buffalo leather. This register could fill 'the gap between soft and silence'. Even though the listener still imagined a sound there remained 'just nothing'. The Museum of Fine Arts (Boston) piano may have been a Saitenharmonika.

One clavichord by Stein survives in the Gemeentemusuem, The Hague, and another, which belonged to Mozart, in the Hungarian National Museum, Budapest. Stein also made claviorgans, one of which survives in the Historiska Museum, Göteborg (1781), combining a piano with an organ, and 'vis-à-vis' instruments combining a harpsichord and piano facing each other. Two of these large rectangular instruments, in which the harpsichord and piano share a bentside rather than a baseboard, survive, one belonging to the Museo Civico di Castelvecchio, Verona (1777) and another in Naples Conservatory (1793).

13 normal pianos survive bearing an authentic Stein label or signature. These are held in the Bayerisches Nationalmuseum, Munich (1782); Germany (private collection; 1783); Ringve Museum, Trondheim (1783); Universität Leipzig (1783); Marlow A. Sigal Collection, Newton, MA (1784); Mozartmuseum, Augsburg (1785); Brussels Conservatory (1786); Germanisches Nationalmuseum, Nuremberg (1788); Wüttembergisches Landesmuseum, Stuttgart (1788); Sammlung Fritz Neumeyer, Bad Krozingen (*c*1790); Stadtmuseum, Munich (1790); Historisches Museum, Basel (1792), and Vienna (1794). The 1790 instruments were made after Nannette took on the practical supervision of the workshop when her father became too ill. The last two pianos were finished after his death.

All Stein's surviving pianos, which represented only about 3% of his original output, have or had knee-levers for lifting the dampers (also praised by Mozart in 1777), like the sustaining pedal of the modern grand. The Poli-Toni-Clavichordium description mentions such knee-levers, but for lowering the dampers, as a new invention. This is the earliest reference to a means of operating the dampers without removing the hands from the keyboard. But generally Stein avoided the delight in registers prevailing towards the end of the 18th century. The Melodika description shows that Stein held that the expressive power of the piano lay primarily in the manipulation of the sound through touch alone. Nonetheless, the vis-à-vis instruments offer rich possibilities. In the Verona instrument the harpsichordist can play the piano at the other end from a third keyboard, combine it with the harpsichord registers and has knee-levers for the piano dampers. In the Poli-Toni-Clavichord description the sound of the plucked 16′ combined with the piano and accompanied on one of the harpsichord manuals (a possibility also available on the Verona instrument), is mentioned as particularly wonderful.

In the Naples instrument the harpsichordist can also combine the piano with the three harpsichord registers and operate the piano dampers. A second knee-lever

couples the piano and harpsichord. A third silences the quilled registers (8′, 4′) leaving the *peau de buffle*, a stop derived from an invention by Taskin in Paris.

Of Stein's harpsichords only those in the vis-à-vis instruments survive. The strings of the Verona harpsichord are considerably longer than those of the piano (with which it is combined) because of the essential difference between the harpsichord and the piano. In the Naples instrument the strings of the harpsichord are as short as those of the piano, suggesting that by 1783 Stein's concept of the harpsichord had become one of a plucked piano.

18th-century sources ascribe the invention of the so-called 'German action' or *Prellmechanik* with an escapement mechanism to Stein. This supported by the transitional piano action in the 1777 vis-à-vis. The inverted wrestplank and the hammer rail look back to Silbermann's work, in turn derived from Cristofori's, while the escapement hoppers, mounted on the keys look forward to Stein's German action. By 1781 Stein hinged similar escapement hoppers to the key frame and mounted the hammers on the keys, the traditional position in the *Prellmechanik* without an escapement mechanism. The resulting German escapement action, a breakthrough in the piano's history, was later modified by Walter. The 'Viennese action' which resulted served the composers of the Classical era and was used in the pianos of the Viennese tradition throughout the 19th century. Stein's action offers the player a remarkable control of the hammers, especially when playing softly, and is astonishingly responsive to the player's touch. The earliest dated piano with this action, however, is contained in Stein's claviorgan of 1781, so there is no evidence that this was the action praised by Mozart in 1777.

Stein's pianos fall into three types. In the first, represented only by the 1777 instrument, the wooden hammers have no covering and there is double stringing throughout. In the second (1781–93), the round and hollow wooden hammers are topped with a layer of leather and the treble is triple strung. In the third, continued by the firm from 1783 to 1804, the solid hammers are leathered and the stringing is again double throughout. None of Stein's pianos has a hammer backcheck, suggesting that the touch used for playing his instrument was light.

The inner construction of the 1781 instrument reflects Stein's apprenticeship with Späth in Regensburg (1749–50) in that the inner bentside follows the double curve of the outer bentside to the cheek. By 1782 Stein used the construction called the A-frame, whereby the inner bentside continues in a straight line to the bellyrail. This construction, an invention attributable to Stein, became standard to Viennese pianos throughout the 19th century.

Of the many known makers apprenticed to Stein, Johann David Schiedmayer (1753–1805) and Stein's daughter Nannette (*b* Augsburg, 1769; *d* Vienna 1833) should be mentioned. In 1794 Nannette STREICHER, as she became, moved the workshop to Vienna where she continued the family business. In 1805 she began changing her father's design to suit the tastes of the day, partly under pressure from Beethoven, to whom she showed considerable devotion, as indeed she did to her much esteemed father.

For futher discussion and illustration of Stein's contribution to the history of the piano, particularly of his German action, *see* PIANOFORTE, §I, 3, inc. figs. 5, 6 and 7.

MICHAEL LATCHAM

Stein, Leon (*b* Chicago, 18 Sept 1910). American composer and writer on music. He studied at DePaul University (MM 1935, PhD 1949) and also took lessons in composition with Sowerby, in orchestration with Eric DeLamarter and in conducting with Frederick Stock and Hans Lange. He taught at DePaul in various capacities from 1931 to his retirement in 1978, serving as dean of the School of Music from 1966 to 1976. Between 1952 and 1959 he was also director of the Institute of Music of the College of Jewish Studies, Chicago. He received the American Composers Commission Award (1950) and other honors, and was the conductor of the DePaul University Symphony, the Chicago Sinfonietta, the City Symphony of Chicago and other community orchestras. Stein's doctoral dissertation was published in 1950 as *The Racial Thinking of Richard Wagner*; other publications include *Structure and Style: the Study and Analysis of Musical Forms* (1962, enlarged 3/1979), its companion volume, *Anthology of Musical Forms* (1962), and many articles, of which several are concerned with Jewish music.

Stein's musical style has been characterized as eclectic, representing a 'middle-ground modernism'; it has also been described as academic. His works for saxophone, commissioned by Cecil Leeson and Brian Minor, have enjoyed particular popularity. Stein's chamber music, including the five string quartets, is well represented on recordings.

MARGARETH OWENS/R

Stein, Leonard (*b* Los Angeles, 1 Dec 1916). American musicologist. He studied music theory and composition with Schoenberg at the University of Southern California (1935–6) and at the University of California at Los Angeles (BA 1939, MM 1941, MA, 1942); he was Schoenberg's teaching assistant at the latter (1939–42) and his private assistant (1942–51). In 1965 he received the DMA from the University of Southern California with the dissertation *The Performance of Twelve-tone and Serial Music for the Piano*. From 1946 he taught at institutions in California, and was adjunct professor at the School of Music at the University of Southern California in 1975. He was director of the Arnold Schoenberg Institute at the University of Southern California from 1975 until his retirement in 1991 and editor of its journal (1976–90). Besides writing articles on Schoenberg and the Second Viennese School, he has edited many of Schoenberg's collections of essays, as well as several compositions for the complete edition. He has toured the USA and Europe as a pianist and conductor.

PAULA MORGAN

Stein, Nikolaus (*b* Steinau an der Strasse; *d* Frankfurt, *c*20 Jan 1629). German music dealer and music publisher. In 1602 he and the printer Wolfgang Richter founded a printing and publishing association in Frankfurt which existed until 1615 under the name of Typographia Musica; it was one of the leading German music publishing firms before the Thirty Years War, and concentrated on Catholic church music, also publishing numerous collections of dances and lieder. Stein published, among others, works by Giulio Belli, Finetti, Getzmann, Giovannelli, Pacelli, Jacob Regnart, Jacob Reiner, Melchior Schramm, Thomas Simpson, Lodovico Viadana and Zucchini.

THEODOR WOHNHAAS

Stein, Richard Heinrich (*b* Halle, 28 Feb 1882; *d* Santa Brigida, 11 Aug 1942). German composer and writer on music. After studying at the University of Erlangen, he worked as a critic for several years before moving to Spain in 1914. Upon his return to Germany after World War I, he served as director of the Berlin-Nikolassee Conservatory (1920–22) and the Berlin Urania (1924), and as music director for Berlin radio (1925). He also taught composition and the piano privately. He later emigrated to the Canary Islands where he lived until his death.

Stein wrote numerous songs, chamber works and piano pieces, as well as larger compositions such as *Scherzo fantastico* for orchestra, a symphony for 24 solo instruments and a one-act opera. On his extensive travels, his experience of microtones in the music of non-European cultures (he published a collection of Icelandic Inuit songs in 1902) led to compositional experimentation with quarter-tones in 1906. His *Zwei Konzertstücke* op.26 for cello and piano are reputed to be the first published quarter-tone music. In the following years he constructed keyboard and wind instruments with new chromatic capabilities, including a quarter-tone clarinet in 1914.

MATTHIAS SCHMIDT

Steinbach, Emil (*b* Lengenrieden, 14 Nov 1849; *d* Mainz, 6 Dec 1919). German conductor, brother of FRITZ STEINBACH. He studied at the Leipzig Conservatory (1867–9) and continued his studies (until 1871) in Karlsruhe with Hermann Levi, who trained him as a conductor. He was appointed assistant Kapellmeister in Mannheim (1871–4) and was then briefly principal Kapellmeister in Hamburg. He was Hofkapellmeister in Darmstadt (1874–7) and, finally, civic Kapellmeister in Mainz (1877–1909). At Mainz he was also director of the Stadttheater from 1899 to 1903. He retired in 1910. Steinbach was particularly famous as a conductor of Wagner. Mainz became an outstanding centre for performances of Wagner's operas and Steinbach gave the first public performance (1877) of the *Siegfried Idyll* there. He conducted *Tristan und Isolde* and *Siegfried* at Covent Garden in 1893. Steinbach composed lieder, chamber music, symphonic poems and overtures. (*MGG1*, 'Steinbach'; I. Fellinger)

HERTA MÜLLER

Steinbach, Fritz (*b* Grünsfeld, 17 June 1855; *d* Munich, 13 Aug 1916). German conductor and composer, brother of EMIL STEINBACH. He began his musical education in

1871–3 in Mannheim, under the guidance of his brother, then studied at the Leipzig Conservatory, where he was awarded a four-year stipend by the Frankfurt Mozart-Stiftung (1874). This enabled him, on the recommendation of Brahms, to continue his studies in Vienna in 1877 with Nottebohm and Door. In 1878 he studied in Karlsruhe with Otto Dessoff and Vinzenz Lachner. In 1880 he became assistant Kapellmeister in Mainz and in 1886, on the recommendation of Hans von Bülow, was appointed to teach counterpoint and composition at the Hoch Conservatory in Frankfurt. In the same year Georg II, Duke of Sachsen-Meiningen, appointed him Kapellmeister of the Meiningen Hofkapelle, an ensemble that under Bülow (1880–85), had become one of the best orchestras in Europe. Steinbach became Generalmusikdirektor of the ensemble in 1893 and Intendant in 1896. As the friend of Brahms, he became the accepted interpreter of Brahms's orchestral music and tried to make Meiningen a centre of Brahms performance and festivals (as a foil to Bayreuth). After 1897 he went on extended, successful tours with the Hofkapelle; in London (1902), critics agreed that, 'The merit of these performances is that they have shown us a new . . . the true Brahms' (*Rheinischer Kurier*, November 1902). As guest conductor, Steinbach also promoted Brahms in Madrid, Paris, London, Moscow, St Petersburg and New York. He organized the Meiningen music festivals of 1895, 1899 and 1903, and Brahms festivals in Baden-Baden, Munich (1909), Wiesbaden (1912) and Edinburgh (1913). From 1903 he was civic Kapellmeister, director of the Gürzenich concerts and director of the conservatory in Cologne. Steinbach's period in Cologne marked a highpoint in the musical life of the city, with the extension of the conservatory and annual opera festivals held by its students. He resigned his posts in 1914, because of a heart complaint, and moved to Munich.

As a conductor, besides performing Brahms, Steinbach did a great deal to promote the instrumental works of J.S. Bach and of contemporary composers, in particular Max Reger. As a composer, Steinbach was less important. His output includes lieder, piano pieces and chamber music; music for the closing scene of Goethe's *Faust*; and orchestral arrangements of German dances by Mozart.

HERTA MÜLLER

Steinbacher, Johann Michael (*fl* 1727–40). Austrian composer. He was an organist in Graz from at least 1727, and in 1740 became parish organist, a post he held only briefly. Manuscripts of his six harpsichord concertos and eight harpsichord partitas, from the collection of the Attems family in Styria around the middle of the 18th century, are in the Studijska knjižnica, Ptuj. The oldest examples of their genre in Austria, the harpsichord concertos must have dated from earlier than those of M.G. Monn, J.A. Scheibl, J.A. Sgatberoni, G.C. Wagenseil and J.G. Zechner, and are evidently modelled on the form of the Italian solo concerto, while the partitas, both in their character and in the designation of their movements, show an affinity with the older suite (two each are in MAM, xxxv and xliii–xliv).

HELLMUT FEDERHOFER

Steinbeck, Wolfram (*b* Hagen, 5 Oct 1945). German musicologist. He studied musicology at Freiburg University with Eggebrecht, with whom he also took the doctorate in 1972 with a dissertation on the minuet in the instrumental works of Haydn. That same year he was made assistant at Kiel University, where he completed the *Habilitation* in 1979 with a study on systems of melodic analysis. Steinbeck's areas of research include the history of music and composition from the 17th to the 20th century, with particular emphasis on the musical 'Enlightenment' of the Viennese Classics, the symphony of the 19th century and issues concerning musical analysis and hermeneutics.

CHRISTIAN BERGER

Steinberg [Shteynberg], **Maximilian Oseyevich** (*b* Vilnius, 4 July 1883; *d* Leningrad, 6 Dec 1946). Russian composer and teacher. He graduated in 1907 from St Petersburg University (the natural sciences faculty) and in 1908 from the conservatory, where his teachers had been Rimsky-Korsakov (composition), Lyadov (harmony) and Glazunov (orchestration). In 1908 he began his teaching career at the conservatory, a career which lasted to the end of his life: at first he taught composition and orchestration, then he became dean of the faculty of composition (1917–31) and vice-rector (1934–9). He was awarded the degree of Doctor of Arts (honoris causa) in 1943. During the 1920s Steinberg was actively involved in the voluntary musical associations: the Society for Contemporary Music, the Leningrad branch of the Association for Contemporary Music (LASM), the Circle of Friends for Chamber Music (KDKM) and others. From the 1920s onwards he served on the administrative board and as a member of the artistic council for the Philharmonia and the opera theatre; he also served as a jury member during competitions of composers and performers. When the Union of Soviet Composers was founded in 1932 he became a member of the executive body, and also served on the administrative board of the Leningrad composers' organization. He was awarded the titles Honoured Representative of the Arts of the RSFSR (1934) and People's Artist of the Uzbek SSR (1944).

Steinberg gained the reputation of being the creative heir of Rimsky-Korsakov, his father-in-law. He edited several of Rimsky-Korsakov's works for posthumous publication: the orchestral suites from *The Legend of the Invisible City of Kitezh* and *The Golden Cockerel*, the operas *May Night* and *Boyarïnya Vera Sheloga*, the suite *Antar* and a complete collection of songs. Steinberg also prepared the 9th to 19th editions of Rimsky-Korsakov's *Prakticheskiy uchebnik garmonii* [A practical textbook of harmony] (St Petersburg/Leningrad 1912–56) and his *Osnovï orkestrovki* [The basis of orchestration] (St Petersburg, 1913). As a teacher Steinberg was thorough and flexible; his pupils included Ashrafi, Shaporin, Shostakovich, Shcherbachyov, Pashchenko, Brusilovsky, Melikyan, Dmitry Tolstoy and many others.

In Steinberg's music the attachment to Rimsky-Korsakov is evident. His early works are somewhat academic and imitative, with traditional, rather schematic forms, tonal simplicity and pedantic part writing. His orginality developed through his aim of assimilating the folk music of different peoples and extending the possibilities of timbre: both tendencies originated with Rimsky-Korsakov and were taken further by Steinberg. The first step was made in the triptych *Metamorfozï* ('Metamorphoses') after Ovid, which was presented by Diaghilev in London and Paris in 1914. The stimulus for this score was Steinberg's contact with the St Petersburg 'Mir iskusstva' [World of Art] group, with Stravinsky's early ballets and the achievements made in musical impressionism. The primitive aura of peasant music from different lands was reflected in the majority of Steinberg's works: in the choral *Strastnaya sed'mitsa* ('Holy Week') it was the old Russian cult songs to which he turned. In 1930–31 and in 1938 he made free arrangements of 24 songs from 16 different peoples of the Soviet Union, Europe and Asia. The melodies of Kazakh and Kirghiz songs, both old and contemporary, formed the basis for his Symphony no.4 'Turksib' (1933), which attempts to depict the change in the way of life of backward districts of old Russia (Turksib is an abbreviation for the Turkestan-Siberian railway constructed at the beginning of the 1930s). Steinberg spent the years of the Second World War in Tashkent. There he drew on the folklore of Armenia for the orchestral capriccio *V Armenii* ('In Armenia') (1940), and he wrote a number of works on Uzbek national themes, among them some songs and the Symphony no.5. In 1939 he edited the opera *Almast* by the Armenian composer Spendiaryan, having already in 1930 written the prologue, the epilogue and some scenes of the opera (the finale of act 2 and the finale of the opera).

The use of folk material was Steinberg's main contribution to Russian music, enriching its national character and facilitating closer contact between art and folk music cultures. However, he did not restrict himself to Russian sources: the ballet *Till Eulenspiegel* (1936) takes rhythms and tunes from Flemish and Spanish folk music. In this ballet the characters are distinctively portrayed, and the work's unity is achieved through varied transformations of the theme associated with the central figure.

WORKS
(*selective list*)

Ballets: Metamorfozï [Metamorphoses] (Bakst, Steinberg, after Ovid), 1913; Till Eulenspiegel (V. Dmitriyev, V. Vaynonen after S. de Koster), 1936; Saray Mul'k Hanum (unfinished)
5 syms.: 1906; 1909 'k pamyati Rimsky-Korsakova' [in memory of Rimsky-Korsakov]; 1928 [dedicated to Myaskovsky]; 1933 'Turksib'; 1942 [Symphony-Rhapsody on Uzbek themes]
Other orch: Prelude in memory of N.A. Rimsky-Korsakov, 1908; Nebo i zemlya [Heaven and Earth], 1909; Capriccio 'V Armenii' [In Armenia], 1940; Vn Conc., 1946
Vocal orch: Rusalka (cant., M. Yu. Lermontov), 1907; Nebi i zemlya [Heaven and earth] (V. Bel'sky, after Byron), dramatic poem, 1918 [partly based on sketches by Rimsky-Korsakov]; Pamyati A.S. Pushkina [To the memory of A.S. Pushkin] (cant., V.A. Rozhdestvensky), 1937; 24 folksongs (Y. Veysberg), 4 vols, orch, 1930–31
Vocal (with piano): Songs and romances (K.D. Bal'mont), 1905; (A.N. Apukhtin), 1906; Four songs (R. Tagore), 1924
Chbr: 2 str qts, 1907, 1925

Principal publisher: Muzgiz

GENRIKH ORLOV/LYUDMILA KOVNATSKAYA

Steinberg, (Carl) Michael (Alfred) (*b* Breslau [now Wrocław], Poland, 4 Oct 1928). American music critic. He was educated at Princeton University (AB 1949), and then studied musicology with Strunk and theory and analysis with Cone and Babbitt. He was head of the music history department at the Manhattan School of Music in New York (1954–5, 1957–64) and then became critic of the *Boston Globe*, while also teaching at various colleges and universities, including Hunter, Smith, Brandeis and the New England Conservatory. He was director of publications with the Boston SO (1976–9); later he was artistic adviser (1979–89) and publications director (1979–) to the San Francisco SO. He had a three year role as artistic adviser to the Minnesota Orchestra (1989–92) and he was also artistic director of the orchestra's Sommerfest. In 1995 he became programme annotator with the New York Philharmonic.

While a critic, his personal interest was contemporary music, and he was notably sympathetic to amateur and semi-professional performances. He constantly emphasized the value of scholarship in performance. He was active in the training of music critics, and gave seminars in connection with the Music Critics Association (1979–81). His own activities as a critic ceased in 1976 when he joined the Boston SO organization.

The Symphony: a Listener's Guide (New York, 1995)
The Concerto: a Listener's Guide (New York, 1998)

PATRICK J. SMITH/MAUREEN BUJA

Steinberg, Pinchas (*b* New York, 12 Feb 1945). Israeli conductor of American birth. After studying the violin from early childhood he studied at Tanglewood (1964) and the University of Indiana. He was leader at the Lyric Opera of Chicago from 1968 to 1970, making an unplanned conducting début in *Don Giovanni* when Ferdinand Leitner was taken ill in the second act. Further study in Berlin followed, including composition lessons with Boris Blacher. After working as a guest conductor in Europe, Steinberg served as music director in Bremen from 1985 to 1989, and was then appointed conductor of the Austrian RSO in Vienna (1989–96). He made his Salzburg début in 1990 with a concert performance of Krenek's *Orpheus und Eurydike* and has been much admired for his conducting of opera at leading German houses and in Vienna, London, San Francisco and Houston. His recordings include several discs of light music and notably fresh, dramatic readings of *Der fliegende Holländer* and Massenet's *Chérubin*.

CHARLES BARBER

Steinberg, William [Hans Wilhelm] (*b* Cologne, 1 Aug 1899; *d* New York, 16 May 1978). American conductor of German birth. As a boy he composed and conducted (at 13 directing his own setting for chorus and orchestra of passages from Ovid's *Metamorphoses*) as well as playing the piano and violin. He studied conducting with Hermann Abendroth at the Cologne Conservatory. After appointments at the Cologne Opera (as Klemperer's assistant, then as principal conductor from 1924) and Prague (1925), he moved in 1929 to Frankfurt as music director; while there he conducted the premières of Schoenberg's *Von heute auf morgen* and Antheil's *Transatlantic* and an early performance of Weill's *Mahagonny*. He also conducted regularly at the Berlin Staatsoper. After Hitler came to power, Steinberg's activities were restricted to concerts for the Jewish Culture League in Frankfurt and Berlin. He emigrated in 1936 and was co-founder with Huberman of the Palestine Orchestra (later Israel PO) and, after the inaugural concert, conducted by Toscanini, became its first conductor. At Toscanini's invitation he went to the USA in 1938 as associate conductor of the NBC SO, also appearing as a guest with many other orchestras and at the San Francisco Opera (1944–8). From 1945 to 1953 he was music director of the Buffalo PO, and from 1952 to 1976 of the Pittsburgh SO. He held several posts concurrently with Pittsburgh, being music director of the LPO (1958–60), senior guest conductor of the New York PO (1966–8) and music director of the Boston SO (1969–72). But by the time he went to Boston, as Leinsdorf's successor, he was reduced in health and strength. In his 70s he restricted his activities, and his always economical gestures became minimal.

A cultivated man and an exceedingly private personality, Steinberg embodied the probity and selflessness of Toscanini and Klemperer, the two conductors so influential in his career. In his best years his stick technique was unsurpassed in cleanness and clarity. Until the late 1960s he disfigured with cuts some of the music – Bruckner, Mahler, Elgar – for which he had the deepest sympathy: it was characteristic that relatively late in his career he would so thoroughly reconsider such an action. When young he was sympathetic to new music; later his performances of modern works rarely went beyond dutiful note-reading. He was a strong and straight conductor particularly of Beethoven (for earlier music his touch was rather heavy), Wagner, Bruckner, Elgar and, when not in too fiercely anti-neurotic a mood, Mahler. In Strauss, of whose music his performances were elegantly understated, he was unsurpassed; and his Boston performances of Verdi's Requiem on the 100th anniversary of Manzoni's death, while not fiery, were among the most honest and the most moving since Toscanini's.

MICHAEL STEINBERG/R

Steinberg, Zeev (Wolfgang) (*b* Düsseldorf, 27 Nov 1918). Israeli composer and violist. He began to play the violin and to compose at an early age; during the years 1932–5 he wrote several works indebted to Reger, an influence which remained perceptible. In 1933 he studied under Eldering at the Cologne Academy, and in 1934 he settled in Palestine, where his studies were completed under Partos (1940–42). Steinberg joined the Palestine SO (later

the Israel PO) as a violist in 1942; he has also appeared as a soloist and frequently as a chamber musician (he was a founder of the New Israel Quartet in 1957). From 1969 to 1972 he lectured on chamber music at the Tel-Aviv Academy. The Viola Sonata (1949) showed a first interest in Schoenbergian 12-note serialism, which came to dominate his work. (*CohenWE*)

WORKS

WILLIAM Y. ELIAS

Steinberger, Gábor. *See* DARVAS, GÁBOR.

Steinecke, Wolfgang (*b* Essen, 22 April 1910; *d* Darmstadt, 23 Dec 1961). German music critic and administrator. He studied music at the Hochschulen in Essen and Cologne, and musicology at the universities of Cologne and Kiel, taking the doctorate at Kiel in 1934 with a dissertation on parody in music. From 1934 to 1961 he was a music critic for the *Rheinisch-Westfälische Zeitung* (Essen), *Deutsche allgemeine Zeitung* (Berlin) and *Der Mittag* (Düsseldorf). From 1945 he was for three years cultural adviser to the town of Darmstadt, where in 1946 he started the Internationale Ferienkurse für Neue Musik and the International Music Institute, in which he played a major part in stimulating the development of avant-garde music and which he continued to run until his death.

HANSPETER KRELLMANN

Steiner, Emma Roberto (*b* ?Baltimore, 1850; *d* New York, 27 Feb 1928). American composer and conductor. Her paternal ancestors were military officers; her mother was an excellent amateur pianist. Mainly self-taught, Steiner composed from the age of seven, despite a lack of encouragement from her parents. In the early 1870s she went to Chicago to make music her career, initially as a singer in the chorus of an opera company, then – after attracting the interest of Edward Everett Rice – as a conductor in a company under Rice's direction. Over the next 30 years Steiner is said to have conducted 6000 performances of more than 50 operas and operettas, including 700 performances of *The Mikado*. She and Caroline B. Nichols were the earliest women conductors in the USA to have had a full career. Heinrich Conried, whose company she conducted before he became manager of the Metropolitan Opera in 1903, is said to have wanted to hire her for the Met, but dared not because she was a woman.

Steiner composed throughout her lifetime, chiefly light operas, overtures, songs and piano music. She also prepared orchestrations. Theodore Thomas selected four of her works for performance at the World's Columbian Exposition in Chicago, 1893. On at least five occasions she conducted concerts of her own works in New York: in 1894 in Chickering Hall, in 1918 at the Morosco Theater, in 1920 and 1925 at the Metropolitan Opera House and in 1921 at the Museum of Natural History. She published her works with Margaret MacDonald. In response to failing eyesight, Steiner emigrated to Alaska after 1900 and worked as a tin miner for ten years.

CAROL NEULS-BATES

Steiner, Gitta (Hana) (*b* Prague, 17 April 1932; *d* New York, 1 Jan 1990). American composer, pianist, teacher and poet. She studied composition at the Juilliard School (MusB 1967, MS 1969) with Persichetti, Schuller and Carter, and gained several awards. She was co-founder of the Composers' Group for International Performance (1968) and taught at Brooklyn Conservatory (1962–6 and 1983–4). Her works for percussion are particularly well known for their innovative timbres, jazz influence and long, almost vocal lines. When not setting her own acclaimed texts, she showed a strong affinity for the lyric poetry of Dickinson and Joyce. (See J. Petercsak: 'Spotlight on Gitta Steiner', *Percussive Notes*, xvi/3, 1978, p.38.)

CATHERINE PARSONS SMITH/MICHAEL MECKNA

Steiner, Johann Ludwig (*b* Zürich, 1 July 1688; *d* Zürich, 27 March 1761). Swiss composer and trumpeter. He was a member of the Paruel family, who had moved to Zürich from Stein am Rhein by 1620, and who for several generations provided one of the three city trumpeters on St Peter's Tower. Under his father's guidance, Steiner became proficient on various instruments and in thoroughbass playing. For a year he was a pupil of the organist

L. Kellersberger in Baden (Aargau). He succeeded his father as town trumpeter in 1705 and held the post for the rest of his life; at the same time he joined the company known as 'Ab dem Musik-Saal', with which he remained until old age, becoming roommaster, librarian and accountant. As a sideline, he engaged in clock-making, and was active as an inventor and maker of mechanical toys. From 1746 he was a member of the Physical Society, where he gained respect through his 'good natural understanding, and wide experience in various arts'; this membership suggests that he was able to throw off the shackles of his modest professional origins and to gain a respected position among his fellow citizens.

Steiner is known as a composer of pietistic sacred music and especially as author of the *Neues Gesangbuch*, the earliest printed song collection in Switzerland by a single composer; it did not, however, have the public success of the later collections by Bachofen and Schmidlin. The collection *Musicalisch-Italienischer Arien Crantz* (Zürich, 1724), which was edited by Steiner, shows his familiarity with Italian musical practice. With his use of thoroughbass and the Italian style of solo singing, Steiner did much to counter Switzerland's isolation in composition and performance; this development has led to his being called 'the Swiss Caccini' (Nef). Steiner expounded his pedagogical ideas in the prefaces to many of his collections, and particularly in his theoretical publication, *Kurz-leicht- und grundtliches Noten-Büchlein* (Zürich, 1728).

PETER ROSS

Steiner, Max(imilian Raoul Walter) (*b* Vienna, 10 May 1888; *d* Beverley Hills, CA, 28 Dec 1971). American composer and conductor of Austrian birth. His father was a theatrical producer and his grandfather managed the Theater an der Wien when the operettas of Jacques Offenbach and Johann Strauss were produced there. Steiner showed exceptional musical talent at an early age, publishing his first song in 1897 and composing a one-act operetta, *Die schöne Griechin*, in 1903. He received an academic training at the Vienna Conservatory, and a practical apprenticeship conducting and composing small works in the theatres of his father and of other contemporary Viennese impressari. From 1904 to 1914 he worked throughout Europe, most frequently in London, Ireland and Paris, acting as the musical director and conductor for a range of theatrical shows. He composed ballets for the Tiller Girls dance troupe, and worked on shows for George Dance and Ned Wayburn. At the outbreak of World War I he moved to New York, where he worked as a copyist and later as an arranger, orchestrator and conductor of musicals and revue shows, on and off Broadway. These shows included the Gershwins' *Lady Be Good!* (1924), Kern's *Sitting Pretty* (1924) and Youman's *Rainbow* (1928). His only Broadway show, *Peaches*, was composed during this period. He also worked extensively with Victor Herbert, arranging many of the composer's dance numbers, and acting as the musical director for a touring production of *Oui Madame* (1920). Herbert's influence can be seen in the attention to orchestration which characterizes Steiner's film scores. For musical theatre he learnt to combine small numbers of instruments to create the impression of a fuller orchestral sound, a skill which was to prove useful in the under-funded music departments of Hollywood.

Steiner's introduction to Hollywood came in 1929 when RKO Radio Pictures bought the rights to the musical *Rio Rita*. Harry Tierney, for whom Steiner had orchestrated and conducted the stage version, insisted that he be hired by the studio. He worked for RKO from 1929 to 1936, composing music for over 130 films, during a period when Hollywood was still judging the value of music in film. His first original score, *Cimarron* (1930), is striking in two ways. It was the first sound film to include non-diegetic music, the placement of which foreshadows the later widely used Hollywood technique of emphasizing emotional, unspoken elements of the narrative. Also, Steiner reuses material from the title sequence in the body of the film, establishing from the outset his thematic approach to the structuring of film scores. In his 1933 film score for *King Kong*, he provided the first of the full-length Hollywood film scores, and its rich orchestration and use of repeated motifs and themes show how quickly Steiner had established his technique of scoring. These features of his approach owe as much to his experience of musical theatre as they do to more conventional interpretations of symphonic and Wagnerian influences. Recording techniques and versatile orchestration created a symphonic illusion from the small studio ensembles, and the development of tunes and themes voiced characterization as clearly as song numbers. This latter feature is apparent throughout his scores across a wide range of genres: Philip Carey's physical and metaphorical limp in *Of Human Bondage* (1934), Gypo Nolan's traitorous deceit in the Academy Award winning score for *The Informer* (1935), ante-bellum Southern pride in the title theme, 'Tara' for *Gone with the Wind* (1939), Charlotte Vale's emotional insecurity in his Academy Award winning score for *Now Voyager* (1942), General Custer's military single-mindedness in *They Died with their Boots on* (1941).

In 1936 Steiner joined Warner Brothers from RKO, after a brief spell at Selznick International. His output of scores in the late 1930s topped ten per year as principal composer, with involvement in many more as an assistant composer, and he continued to create scores at a high rate into the 1950s when he became freelance. This rate of

output was made possible by his exceptional relationship with his orchestrators, particularly Hugo Friedhofer, who later became a successful film composer in his own right. Steiner's careful and detailed construction and annotation of the four-stave short scores made the translation to full orchestral score closer to a copyist's task than a full instrumental arrangement. Among Steiner's other notable scores are *Since You Went Away* (1944), for which he won his third and last Academy Award, *Saratoga Trunk* (1946), *The Fountainhead* (1949) and *A Summer Place* (1959), the main theme of which became a popular song in the 1960s. His last score was *Two on a Guillotine* in 1965.

Steiner's score for *Now Voyager* is a fine example of the approach to narrative interpretation which typified his, and Hollywood's film music of the period, and which has come to be regarded as a classical model for film scoring. There are five central themes, expressing each of the main characters, differentiated and connected by the use of diatonic and chromatic melodies and harmonies. There are also a further seven melodies which are used to capture less prominent features of the narrative, and a number of quotations from current popular songs. This reference to music outside cinema was typical of Steiner's idiomatic anchorage of his score to contemporary popular taste, and though it has been criticized for its lack of subtlety, it reflects the Hollywood goal of making all aspects of a film accessible to the audience. The score also employs the technique of 'mickey-mousing', the catching of physical movements on the screen in the movement of musical language in the score. Such a feature seems unsophisticated to modern audiences, but it is a further example of Steiner's belief in the power of music to emphasize and support all elements of the dramatic film narrative. A substantial collection of Steiner's film score manuscripts and other personal documentation is available in the Steiner Collection in the Harold B. Lee Library at Brigham Young University.

WORKS
(*selective list*)

FILM SCORES
names of directors are given in parentheses

Cimarron (W. Ruggles), 1930; Bird of Paradise (K. Vidor), 1932; The Most Dangerous Game (E.B. Schoedsack, I. Pichel), 1932; Sym. of Six Million (G. La Cava), 1932; King Kong (M.C. Cooper, Schoedsack), 1933; Little Women (G. Cukor), 1933; The Lost Patrol (J. Ford), 1934; Of Human Bondage (J. Cromwell), 1934; The Informer (Ford), 1935; The Three Musketeers (R.V. Lee), 1935; The Charge of the Light Brigade (M. Curtiz), 1936; The Garden of Allah (R. Boles), 1936; Little Lord Fauntleroy (Cromwell), 1936; A Star is Born (W.A. Wellman), 1937; The Life of Emile Zola (W. Dieterle), 1937; Jezebel (W. Wyler), 1938; Gone with the Wind (V. Fleming, Cukor, S. Wood), 1939; Dark Victory (E. Golding), 1939; Dodge City (Curtiz), 1939; All This and Heaven Too (A. Litvak), 1940; The Letter (Wyler), 1940; They Died with their Boots on (R. Walsh), 1941; In This Our Life (J. Huston), 1942; Now, Voyager (I. Rapper), 1942; Casablanca (Curtiz), 1943; The Adventures of Mark Twain (Rapper), 1944; Arsenic and Old Lace (F. Capra), 1944; The Conspirators (J. Negulesco), 1944; Passage to Marseilles (Curtiz), 1944; Since You Went Away (Cromwell), 1944; The Corn is Green (Rapper), 1945; Mildred Pierce (Curtiz), 1945; The Big Sleep (H. Hawks), 1946; Saratoga Trunk (Wood), 1946; Life with Father (Curtiz), 1947; Johnny Belinda (Negulesco), 1948; Key Largo (Huston), 1948; The Treasure of the Sierra Madre (Huston), 1948; Adventures of Don Juan (V. Sherman), 1949; The Fountainhead (Vidor), 1949; The Glass Menagerie (Rapper), 1950; Operation Pacific (G. Waggner), 1951; The Jazz Singer (Curtiz), 1953; This is Cinerama (documentary), 1953; The Caine Mutiny (E. Dmytryk), 1954; King Richard and the Crusaders (D. Butler), 1954; Come Next Spring (R.G. Springsteen), 1955; Helen of Troy (R. Wise), 1956; The Searchers (Ford), 1956; A Summer Place (D. Daves), 1959; The FBI Story (M. Le Roy), 1959; John Paul Jones (J. Farrow), 1959; The Dark at the Top of the Stairs (D. Mann), 1960; The Sins of Rachel Cade (G. Douglas), 1961; Rome Adventure (Daves), 1962; Spencer's Mountain (Daves), 1963; Youngblood Hawke (Daves), 1964; Two on a Guillotine (W. Conrad), 1965

KATE DAUBNEY (with JANET B. BRADFORD)

Steiner [née Piette], **Ruth** (*b* Oak Park, IL, 2 Feb 1931). American musicologist. She studied with Jan LaRue and Hubert Lamb at Wellesley College, receiving the BA in 1952. After working with Reese at the Manhattan School of Music from 1952 to 1953, she completed the MA at the University of California, Berkeley, in 1957 and in 1963 she took the doctorate at the Catholic University of America, where she joined the faculty the same year. She was made full professor in 1974. Her main area of study has been medieval liturgical music. Her articles in scholarly journals have dealt primarily with groups of chants in the Sarum and Gregorian rites, the manuscript sources for these compositions, and problems of style analysis and dating. She was also director of the CANTUS project (1987–97), originally developed at the Catholic University of America, which indexes selected chant sources; the files are available online, and printouts are issued by the Institute of Mediaeval Music, Ottawa.

PAULA MORGAN

Steiner, Sigmund Anton. Austrian music publisher. *See under* HASLINGER.

Steinert, Moritz [Morris] (*b* Scheinfeld, Bavaria, 9 March 1831; *d* New Haven, CT, 21 Jan 1912). American music dealer and collector of instruments. He moved to New Haven in 1854, and in 1856 to Savannah, Georgia. Shortly after the Civil War broke out he returned to New Haven, and his name appeared in the New Haven City Directory of 1862; by 1866 he was listed as a piano and music dealer. He formed the Mathushek Pianoforte Co. and later the M. Steinert & Sons Co., which sold pianos in Boston, Providence, New Haven and other cities. He was active in the musical life of New Haven where he was organist at St Thomas's Church, taught music and formed a quartet in which he played cello. He later formed an orchestra which was to become the nucleus around which he founded the New Haven SO in 1894. This orchestra is the fourth oldest in the USA with a continuous existence. He became interested in antique musical instruments and the problems involved in playing them, and assembled a collection of considerable importance which was exhibited in Vienna in 1892 at the International Exhibition of Music and Theatre, and in 1893 at the World's Columbian Exposition. In 1893 he published *The Catalogue of the M. Steinert Collection of Keyed and Stringed Instruments*, dedicated to his friend A.J. Hipkins. In 1900 he published his *Reminiscences*. In the same year he donated his collection to Yale University, forming the basis for what has become one of the world's important collections of musical instruments.

RICHARD REPHANN

Steingaden [Staingaden], **Constantin** (*b* Wangen, Bavaria, *c*1618; *d* Konstanz, 6 March 1675). German composer, active in Switzerland. In 1631 he entered the Jesuit College at Lucerne. By 1644 he was a Franciscan monk and was living at Engelberg, where he was recognized as an authority on organs. Later he was Kapellmeister of the Franciscan convent at Konstanz and at the cathedral there. He probably held these positions until his death; certainly at the time of his surviving publications in 1666 he was Kapellmeister of the cathedral. These publications are *Flores hyemnales prompti ex horto a 3. 4. vocibus, cum 2 violinis, motettis, missis, sonatis et vesteris* op.4 (Konstanz, 1666), and *Messe concertate* for four and five voices, with instruments (Innsbruck, 1666); there are also two masses and three motets by him for four to six voices (*S-Uu*), most of them with strings. His mass settings are unpretentious and always well conceived for their liturgical purpose. The text is never cut. Themes with a wide range and a moderate use of melismas ensure that the text can be clearly heard. The masses make modest use of instruments: some require only two violins as accompanying instruments. Stylistically they present a mixture of old and new elements. On the one hand expressive melodic lines are given broad scope, and there are many solo passages. In concertante sections Steingaden avoided over-frequent interchange between groups of performers: in those movements with long texts the disposition of the forces generally remains the same within each verse. On the other hand there are frequent traces of the old church modes.

LUISE MARRETTA-SCHÄR

Steingräber, Theodor Leberecht (*b* Neustadt an der Orla, 25 Jan 1830; *d* Leipzig, 5 April 1904). German music publisher. He acquired a reputation as a music teacher and under the pseudonym Gustav Damm published a world-famous piano tutor (1868); subsequently he founded the Steingräber publishing house in Hanover (1878), moving it to Leipzig in 1890. The central feature of the publishing programme was a series of editions of classical works (Edition Steingräber) prepared by Hans Bischoff, Hermann Keller, Franz Kullak, Henri Marteau and others. The arrangers and editors of school and teaching material included M.A. Frey, Julius Klengel and Richard Kleinmichel. A son-in-law of Steingräber, Walter Friedel, managed the firm from 1903 to 1916 and it has remained in the family's possession. After suffering severe damage in World War II it moved to Frankfurt in 1953, and to Offenbach am Main in 1956.

HANS-MARTIN PLESSKE

Steingraeber & Söhne. German firm of piano makers. One of the oldest and most notable Bavarian piano manufacturers, it was founded by Eduard Steingraeber (*b* Rudolstadt, 20 Aug 1823; *d* Bayreuth, 14 Dec 1906), who from 1840 to 1844 trained as a piano maker under his father Christian Heinrich Steingraeber and his uncle Gottlieb Steingraeber in Rudolstadt. After three years of travels, when he also met Streicher in Vienna, he returned to his father's workshops in 1848. In 1852 he founded his own

piano workshops in Bayreuth, where his sons Johann Georg Steingraeber (1858–1932) and Burkhard Steingraeber (1866–1945) became partners in 1892. Johann moved to Berlin in 1910 and became a leading maker of modern harpsichords (see also HARPSICHORD, §6(i)(b)). Burkhard's son-in-law Heinrich Hermann became head of the firm Steingraeber & Sons in 1920. From 1951 Heinrich Schmidt, Hermann's nephew, directed the firm, and was followed by his son Udo Schmidt-Steingraeber.

THEODOR WOHNHAAS

Steinitz, (Charles) Paul (Joseph) (*b* Chichester, 25 Aug 1909; *d* Old Oxted, Surrey, 2 April 1988). English conductor and teacher. After study at the RAM and privately with George Oldroyd, he became director of music at Ashford Parish Church, Kent (1933–42). In 1947 he founded a chorus, the South London (later simply London) Bach Society, and from 1949 to 1961 was organist and choirmaster at St Bartholomew-the-Great, London. His performances of the *St Matthew Passion* there, from 1952, were a precursor of the authentic performance movement, and were the first in Britain to give the work complete, in German, and with small forces. Under his direction the London Bach Society gave many broadcasts and toured in Europe and the USA, sometimes with his own Steinitz Bach Players (founded 1969). The society also commissioned new works from Tavener and Nicholas Maw, among others, and gave the first performances of works by Maxwell Davies, Maderna and Rubbra, and in 1963 gave the British première of Dallapiccola's *Canti di prigionia*. Steinitz conducted orchestras in New Zealand (1970) and Australia (1971) and recorded choral music by Bach, Handel and Schütz. He was appointed a professor at the RAM in 1945 (becoming consultant professor in 1984), and was on the teaching staff of Goldsmiths' College, University of London, from 1948 to 1976. The discipline he cultivated as a teacher and writer was reinforced in his conducting by strong personal qualities: the London Bach Society's performance (1967) of Schoenberg's *Friede auf Erden*, given with the then rarely heard supporting orchestral parts, was praised for its urgency and commitment. He published several books directed towards the study of harmony and counterpoint based on the example of great composers. He was appointed OBE in 1985 and four months before he died he completed a lifelong ambition to perform all the Bach cantatas: the performances spanned 30 years.

ARTHUR JACOBS/NOËL GOODWIN

Steinkopf, Otto (*b* Stolberg, 28 June 1904; *d* Celle, 17 Feb 1980). German woodwind instrument maker. As a boy he learnt to play many wind instruments, and after graduating from high school in Magdeburg he studied music in Berlin, and later musicology with Curt Sachs. He attended the Stern Conservatory, and thereafter was employed by the Leipzig Gewandhaus Orchestra, the Berlin PO and the Berlin RSO. From 1950 to 1953, he worked at the Berlin Instrument Collection of the Institut für Musikforschung as a restorer of woodwind instruments, and began to copy old instruments. In 1953 he performed at the Schütz Festival in Herford; the concerts included a quartet of crumhorns made by himself. In 1954 he became a performing member of and instrument maker for the Cappella Coloniensis. From 1955 Steinkopf was most active as a maker of historical woodwind instruments. In 1958 he met Günter Körber with whom he worked until 1964 when he moved to Celle where he worked in collaboration with the firm of Hermann Moeck.

Steinkopf was the first maker in the 20th century to reproduce many Renaissance and Baroque woodwind instruments. He renewed traditions of design and craftsmanship lost many generations ago. He performed on many of his instruments and made several recordings. His work was outstanding in the making of crumhorns, kortholts, rackets, dulcians, shawms, cornetts and Baroque bassoons and oboes. Seldom content to copy old instruments exactly, he frequently added keys to increase the instruments' range, or altered their design to suit his standards of intonation, pitch and tone quality.

FRIEDRICH VON HUENE

Steinmetz. *See* STAMITZ family.

Steinmetz, Johann Erhard (*fl c*1750). Oboist, probably of German extraction. He appears in the Dresden court calendars from 1747 to 1751 as a wind player in the court hunting-band. Several subsequent references identify him as a composer, probably owing to the erroneous use of the name Steinmetz on many works actually by Johann Stamitz. Breitkopf's *Verzeichniss musicalischer Werke* (i, 1761, p.51) lists without incipits 'VI. partite à 6 voci' by 'Steinmetz, musico in Dresda'; these are probably substantially identical with the 'V. partite del Sigr. Steinmetz, a 6 e 4 voci' given with incipits in the Breitkopf catalogue of 1765 (p.11). None of these works has survived. In addition, the catalogue of 1762 lists 'VI. sinfonie del Steinmetz, musico in Dresda' (p.26); however, this attribution is incorrect or doubtful for at least five of these symphonies, a fact that calls Breitkopf's reliability on the entire matter into question: two (nos.5–6) are definitely by Johann Stamitz, and three others (nos.1–2, 4) exist in one or more manuscripts with attributions to other composers. A further reference to Steinmetz as a composer occurs in Hiller's *Wöchentliche Nachrichten*, though this information could well have been taken directly from Breitkopf's listings, which Hiller would surely have known. Gerber's article on Steinmetz (1792), which maintains that about 1758 he was 'known and loved for his various instrumental works in manuscript such as symphonies, partitas, and works for harp', is apparently indebted to both Hiller and Breitkopf, and if so has little value as independent evidence. In sum, the evidence that the Dresden Steinmetz was a composer is rather unconvincing. On the other hand, study of both the sources and style of the works attributed to 'Steinmetz' in 18th-century manuscripts supports the conclusion that most if not all of them – insofar as they are correctly attributed at all – are by Johann Stamitz (Wolf).

A Steinmetz who *did* compose is the otherwise unidentified author of six manuscript 'Solos a Violoncello e Fondamento da me Steinmez' (*D-SWl*). Yet another musician referred to as Steinmetz was a horn player in various orchestras in Paris in the years 1754–7. A horn player whose name is given as both Stamitz and Stamich in Parisian listings for 1757 and 1759 is probably identical with him.

See also STAMITZ family, (1).

EUGENE K. WOLF

Steinmeyer, G.F. German firm of organ builders. It was founded by Georg Friedrich Steinmeyer (*b* Walxheim, Württemberg, 21 Oct 1819; *d* Oettingen, 22 Feb 1901) who, after a period of study with A. Thoma of Oettingen, became an assistant of E.F. Walcker of Ludwigsburg, set up on his own in Oettingen in 1847 and produced his first organ in 1848 at Frankenhofen. Under his management over 700 organs were built including the cathedral organs of Bamberg, Munich and Speyer. His son Johannes Steinmeyer (*b* Oettingen, 27 June 1857; *d* Oettingen, 22 July 1928) became a partner in 1884, and owner in 1901. He was responsible for the preservation of the Trinity organ built by K.J. Riepp at the Benedictine abbey of Ottobeuren (restored despite the abbey's plans for its reconstruction). In 1928 he built for Passau Cathedral the largest church organ in the world (at that time), with five manuals and 208 stops. His son Hans Steinmeyer (*b* Oettingen, 6 Aug 1889; *d* Oettingen, 3 Jan 1970) worked in the USA as an organ builder from 1913 to 1920 before returning to Oettingen, where he became a partner in the firm in 1924 and owner in 1928. The knowledge and skill which he had gained in the USA were applied successfully to his instruments, which included those in the Friedenskirche, Nuremberg (1929); Trondheim Cathedral (1929); the university church at Erlangen (1935); St Lorenz, Nuremberg (1937); St Mary's organ at Ottobeuren (1957); the Michaeliskirche, Hamburg (1960); the Herkulessaal at Munich (1962); and the Meistersingerhalle at Nuremberg (1963). In 1967 the firm was taken over by Hans Steinmeyer's son, Fritz (*b* Oettingen, 8 Dec 1918), who built organs at the Christuskirche, Düren (1967); the church of the Holy Spirit, Schweinfurt (1967); the Stadtkirche, Pforzheim (1968); the Markuskirche, Stuttgart (1968); the Lutheran church at Remscheid (1971); the Augsburg Kongresshalle (1972); the Herz-Jesu-Kirche, Nuremberg (1973); St Veit, Herrieden (1974); St Stephan, Lindau (1975); the Heiliggeistkirche, Heidelberg (1980); and the Tonhalle, Zürich (1987). Paul Steinmeyer (*b* Oettingen, 27 Oct 1933) became the firm's director in 1995. In the mid-1990s the firm's total output amounted to about 2400 organs.

Until 1890 Steinmeyer & Co. built nearly all their organs with cone-valve chests and mechanical actions; subsequently pouch-chests controlled by tubular-pneumatic action came into use, but after 1945 these were superseded by slider-chests with tracker action. The firm, which has clients in Austria, Norway, Argentina and the USA, carried out important restoration work at Ottobeuren in 1914 and 1922 (on a 1757 organ with four manuals, 48 stops; and a 1766 organ with two manuals, 27 stops) and at Weingarten in 1954 (on a large organ of 1737–50). The instrument built under the direction of Max Reger for the Shooting Gallery Hall in Meiningen (1913; three manuals, 45 stops) is now a memorial organ in Berlin.

Steinmez. *See* STAMITZ family.

Steinpress [Shteynpress], **Boris Solomonovich** (*b* Berdyansk, 31 July/13 Aug 1908; *d* Moscow, 21 May 1986). Soviet musicologist. In 1931 he graduated from Konstantin Igumnov's piano class at the Moscow Conservatory, where he continued postgraduate studies in musicology with Mikhail Ivanov-Boretsky. He took the *Kandidat* degree in 1938 with a dissertation on Mozart's *Le nozze di Figaro*. After teaching at the Moscow Conservatory (1931; 1933–6), he moved to Sverdlovsk, where he taught at the conservatory (1936–7) and later became senior lecturer and head of the music history research room (1942–3). He worked for the Sverdlovsk Philharmonia (1936–7) as senior music editor of the radio committee, head of the literary and musicological department, and lecturer. He was head of the music history department at the Central Correspondence Institute for Musical Education (1939–41) and was appointed senior lecturer and dean of the faculty of history and theory there (1940). He began writing music criticism in 1926. Steinpress was on the editorial board of a number of Soviet reference books, including the *Bol'shaya sovetskaya entsiklopediya*, and together with I.M. Yampol'sky edited the one-volume *Entsiklopedicheskiy muzïkal'nïy slovar'* (1959) and the short *Kratkiy slovar' lyubitelya muzïki* (1959). Steinpress's writings are concerned mainly with the musical life of Russia, the history of gypsy singing, the life and works of Alyabyev, Glinka and Verstovsky, music in the works of their contemporaries (including Pushkin), and the music of Mozart and Haydn. Although his book *Voprosï material'noy kul'turï v muzïke* (1931) was one of the first attempts to connect musical history and Marxist historical materialism, and although he followed official Soviet requirements (for example in writing 'we have nothing to learn from Schoenberg, Krenek, Hindemith and Messiaen, even in a narrow technical sense'; *SovM*, 1948, no.10, p.47), Steinpress, who was of Jewish descent,

often found himself under repeated criticism from the Soviet musical authorities. In much of his journalism and musicological work, his earlier affiliation with the All-Russian Union of Workers in the Arts and the Russian Association of Workers in the Arts is apparent.

JOACHIM BRAUN/ABRAHAM I. KLIMOVITSKY

Steinspiel (Ger.). *See* LITHOPHONE.

Steinway. American firm of piano makers. Heinrich Engelhard Steinway [Steinweg] (*b* Wolfshagen, 25 Feb 1797; *d* New York, 7 Feb 1871) established with his sons a piano firm that has dominated the industry from the late 1860s to the present. Precise details of Heinrich's early years are scarce. Family tradition claims that after having served in the army against Napoleon until 1818, and being prohibited by the strict guild system to work as a cabinet maker in Goslar, he assisted an organ builder in the nearby town of Seesen. In 1825 Heinrich was permitted to become a builder and cabinet maker (without the benefit of guild approval) to help rebuild the town of Seesen after it had been destroyed by fire. That year also marked the beginning of what became the Steinway dynasty, with Heinrich's marriage to Julianne Thiemer (1804–77) and the birth of their eldest son C.F. Theodor (*b* Seesen, 6 Nov 1825; *d* Brunswick, 26 March 1889; in the USA he took the name Theodore Steinway), who became the inventive genius of the firm. There followed four daughters and six more sons, of whom Charles (1829–65), Henry jr (1830–65), William (1835–96) and Albert (1840–77) came to play significant roles in the development of the piano firm. Some accounts claim that Heinrich had built his first piano by the late 1820s. By the mid-1830s he was producing several pianos a year and one of his grand pianos and two squares won notice at the Brunswick state fair in 1839. In the 1840s they were producing at least ten pianos a year with a total of about 400 by the end of the decade. Extant Seesen examples from 1836 are similar to some Viennese and German pianos of the time: all have wooden frames, a range of six octaves, and Viennese action.

Heinrich sent Charles to America in 1849 to explore business possibilities, with the family (apart from Theodor, who continued the business in Seesen) following in June 1850. For three years they worked with established New York piano makers to learn the English language and American business and manufacturing customs. In 1853 the firm of Steinway & Sons was established. One of their earliest New York square pianos (no.483) exemplifies the results of their American training, with a range extended to seven octaves, heavier English action, and, most significantly, a one-piece metal frame with cross-stringing (see illustration). Their overstrung square piano won a gold medal at the 1855 New York American Institute Fair. At first, production concentrated upon square pianos (then the most popular domestic piano in

Cross-strung square piano by Steinway & Sons, New York, 1877–8 (Smithsonian Institution, Washington)

America); by 1856 they began making grands, and by 1862 uprights (the last square was made in 1888).

The firm quickly grew in size and esteem through a combination of technical developments, efficient and high-quality production, shrewd business practices, and successful promotion through artists' endorsements and advertising. On the technical side Henry jr obtained seven patents, the most important being the one-piece iron frame with overstringing for grand pianos (US patent no.26,532, 1859), an innovation that eventually was adopted by the entire industry. Albert added the middle ('sostenuto') pedal in 1874. Theodore obtained 41 patents for inventions developed in consultation with scientific friends, and changed the conception of piano design and tone with such features as the duplex scale, the cupola metal frame, and the capo tasto bar. Through his successful example, others in the industry were forced to adopt scientific methods in developing new improvements.

In 1860 a large new factory with machines powered by a Corliss steam engine opened on Fourth Avenue (now Park Avenue) between 52nd and 53rd Streets with expansions in 1864 (along with new salesrooms on East 14th Street). Heinrich, along with Henry jr, son-in-law Theodore Vogel, and later Albert, helped to oversee the manufacturing; Charles concentrated upon sales; and William (1835–96) on business and finance. The family and firm suffered a great loss with the deaths of Vogel in 1864, and Henry jr and Charles in 1865. Theodore, who joined the family in New York by October 1865 after selling his share of the German firm (by then based in Brunswick and called Grotrian-Steinweg) to his partner Wilhelm Grotrian, concentrated upon technical developments. As production increased, they began to plan new buildings on property in Astoria, Long Island, which by the end of the 1870s included most of their manufacturing operations, a company village with schools and churches plus a 'splendid Chateau' where the family could enjoy their new wealth and success. In 1866 they also built a 2000-seat concert hall adjoining their warehouses on 14th Street (closed in 1890 with the opening of Carnegie Hall); in 1875 they established a London salesroom and concert hall, and in 1880 a factory in Hamburg.

William's talent for promotion and marketing combined with Theodore's technical genius lifted Steinway pianos to world prominence. Their pianos displayed at international exhibitions in London (1862) and Paris (1867) brought them medals, praise from international judges and musicians, and new aristocratic patrons. German manufacturers who copied the Steinway system of overstringing won high acclaim at the 1873 Vienna Exhibition (where Steinway, though not competing, was praised through its imitators). There were extended disputes with Chickering following the 1867 Paris Exhibition, and with Albert Weber in 1876 after the Philadelphia Centennial Exhibition, over who won the highest award; this publicity kept the company's name and contributions in the forefront of people's minds.

William cultivated the endorsement of numerous leading performers and sponsored marathon cross-country tours by such artists as Anton Rubenstein (who gave 215 concerts during his 1873–4 American tour) and Ignacy Paderewski (who gave 75 concerts in an 1892–3 tour). The piano used by Paderewski was basically the fully-developed concert grand of the 20th century with an ebonized case 2·7 metres long, a range of over seven octaves (*A″–c′′′′′*), the duplex scale, and a metal plate with the double-cupola design (the extra arch allowing for a continuous bridge to increase the power of the sound). After William's death, his nephews Charles H. (1857–1919) and Frederick T. Steinway (1860–1927) continued to build the roster of artists and aristocratic patrons. A new factory was added in Astoria in 1901 (the original Fourth Avenue factory closed in 1910), and profits climbed with the sale of over 6000 pianos in 1911. They expanded their advertising in popular magazines successfully promoting Steinway pianos as 'The Instrument of the Immortals'. In 1925 they moved their sales operations to a new Steinway Hall at 109 West 57th

Street, an area near Carnegie Hall which had become the centre of New York musical activity.

In the 20th century Steinway pianos remained among the leading makes, although with strong competition from Bechstein, Baldwin, Knabe, and Mason & Hamlin. The firm presented Steinway no.100,000 to the White House in 1903, replacing it with no.300,000 in 1938. Like all piano manufacturers Steinway production in the 1930s was greatly reduced. William's son Theodore (1883–1957) steered the company through the Depression and then World War II, when all their American factories were devoted to producing such war needs as gliders; the Hamburg factory was destroyed by Allied bombs in 1943. From the late 1950s to the 70s Henry Ziegler Steinway (*b* 1915) and his brother John (1917–89) successfully continued to cultivate Steinway artists who, they claimed, made up over 90% of the world's concert pianists, in spite of strong competition from Asian makers such as Yamaha and Young Chang and the American Baldwin firm.

The family business was sold in April 1972 to CBS. Although CBS invested in much-needed improvements to the plant, there was frequent turnover at the highest management level. In September 1985 CBS sold the firm to the Boston investors John and Robert Birmingham who, through the newly created company Steinway Musical Properties, continued to cultivate artists and invest in improved manufacture. In 1992 they introduced a lower-priced model called the Boston (made by Kawai in Japan). In April 1995 the Birminghams sold Steinway & Sons to the Selmer Co., which changed its corporate name to Steinway Musical Instruments. In 1998, with no involvement in corporate or manufacturing operations, H.Z. Steinway still made public appearances to promote Steinway pianos.

Steinway Hall (ii). London concert hall, built next to the Steinway & Sons premises in 1878. *See* LONDON (i), §VI, 2.

Steinweg, C(arl) F(reidrich) Theodor [Steinway, Theodore] (*b* Seesen, nr Goslar, 6 Nov 1825; *d* Brunswick, 26 March 1889). German piano manufacturer, who worked first for the German firm that was later known as GROTRIAN-STEINWEG and later in his father's New York firm STEINWAY.

Steinweg, Heinrich Engelhard (*b* Wolfshagen, 15 Feb 1797; *d* New York, 7 Feb 1871). German instrument maker, founder of the American piano-making firm of STEINWAY.

Stella, Alfred. *See* PATERSON, ROBERT ROY.

Stella, Scipione [Don Pietro Paolo] (*b* Naples, 1558–9; *d* Naples, 20 May 1622). Italian organist and composer. He was recommended in 1579 by his teacher G.D. Nola, *maestro di cappella* of SS Annunziata in Naples, for the job of organist at that church. He held the post from October 1583 until some time in 1593, possibly May. On 7 February 1590 the governors of the Annunziata contracted F. Scoppa and C. Scala to build a second organ there to Stella's satisfaction, and Giovanni de Macque became the second organist. Sebastián Raval mentioned in May 1593 that Stella had performed Raval's madrigals with Scipione Dentice, Marenzio and others in Cardinal Montalto's palace in Rome. By 1594 Stella had entered the service of Carlo Gesualdo and accompanied him to Ferrara for his wedding to Leonora d'Este. While he was there Stella prepared for publication Gesualdo's first two books of madrigals in 1594 and his own book of five-part motets in 1595, which he dedicated to Duke Alfonso II. On 30 January 1598 he entered the Theatine monastery of S Paolo Maggiore in Naples and in 1603 he supervised the construction of an organ for the monastery. In 1605 he was ordained a priest. On 29 July 1610 Stella's nephew Francesco dedicated to Cardinal Montalto a book of five-part hymns which Stella had composed for the devotions in the monastery. In 1618 Fabio Colonna mentioned that his friend 'Padre Stella' had built an enharmonic harpsichord with eight sets of strings and had composed music for it. Colonna also built an instrument (a clavichord) based on the same division of the octave, and Stella accused him of being a plagiarist.

Stella's motets only rarely paraphrase chant; they are thoroughly imitative, show little rhythmic contrast or chromaticism and have few strong cadences. The hymns, however, which use chromatic chords in strong rhythms, are akin to the frottolas which later became popular in Naples. They are to be performed *alternatim* with the appropriate chant. Stella's extant madrigals are similar to those of Scipione Dentice and Nenna, showing none of the extremes characteristic of Gesualdo's music.

KEITH A. LARSON

Stellfeld, Jean-Auguste (*b* Antwerp, 17 Feb 1881; *d* Antwerp, 14 Sept 1952). Belgian jurist and musicologist. After studies in law at the University of Leuven he established himself as a lawyer in Antwerp, becoming a judge and eventually vice-president of the local court. In his youth, he spent his spare time building up an important collection of old instruments, music manuscripts and rare prints, the Bibliotheca Stellfeldiana, which grew into one of the richest private music collections in the world, and his house became a meeting place for Belgian and foreign musicologists. After his death the collection was acquired by the University of Michigan and is now part of the music library at Ann Arbor. Among its 20,000 volumes are works of principal composers of the 16th to 18th centuries, in particular the Bach sons, 18th-century French operas and 16th-century Flemish songs.

Stellfeld was keenly involved in the cultural life of his native town. He was a whole-hearted supporter of the Concerten voor Gewijde Muziek (1903–14), and he became secretary of the Supervisory Commission of the Koninklijk Vlaams Conservatorium (1913–52). He was founder and first president of the Vereniging voor Muziekgeschiedenis (1931–52), the first president of the Conservatorium Concerten (1934–52) and vice-president of the Société Belge de Musicologie (1946–52). His musicological research was almost exclusively historical; he concentrated particularly on the Golden Age of Antwerp.

JACQUES VAN DEUN

Stellovsky, Fyodor Timofeyevich (*b* 1826; *d* 1875). Russian music publisher. He built up his firm on the basis of Klever's publishing house, which he acquired about 1850. He also took over the smaller business of Gurskalin, who had been publishing music in St Petersburg from 1838 and who owned Denotkin's printing press, established in 1844. Stellovsky was particularly known as the publisher of Glinka's music; in fact it was his editions that first introduced Rimsky-Korsakov to Glinka's two operas. He also published the works of Balakirev (who, in his early, impecunious years, helped Stellovsky to prepare other composers' scores for publication), Serov and Dargomïzhsky. After Stellovsky's death the business was carried on by his widow and then by his sister; in 1886 it was taken over by Gutheil.

GEOFFREY NORRIS/R

Stellvertreter (Ger.). *See* SUBSTITUTE CHORD.

Stellwagen. German family of organ builders. Friedrich Stellwagen (*b* Halle; *d* Lübeck or Stralsund, 1659) went to Hamburg as a journeyman with Gottfried Fritzsche, whose daughter he subsequently married. In 1635 he moved to Lübeck to set up on his own, and carried out extensive work on the cathedral organ (1635–6) and on the organs of the Jakobikirche (1636–7), Marienkirche (1637–41, 1653–5), Petrikirche (1643–6) and Ägidienkirche (1648). He also undertook work in Lüneburg, at the Marienkirche (1650), St Johannis (1651–2) and Lambertikirche (1652; this work was in fact not carried out until 1661–5 by his son-in-law, Michael Berigel). In Hamburg Stellwagen worked at the church of St Katharinen (1644–7) and in Mölln at the Nikolaikirche (1637–41), where he criticized Jakob Scherer's pipework. His most significant instrument was at the Marienkirche in Stralsund (1653–9), with 51 stops on three manuals and a pedal keyboard (restored by H.J. and K. Schuke, 1946–59).

Stellwagen built his organs in the north-German Baroque style, developed by Hans Scherer the elder and Gottfried Fritzsche; in addition to complete choruses of diapason scaled pipes, reed stops and wide-scaled pipes, the organs had a number of other stops such as Blockflöte, Querflöte, Quintadena and Tierce Zimbel. Stops such as the Feldpfeife (a stop blown at the octave) and the Trichterregal (a reed stop with funnel-shaped resonators, probably invented by Stellwagen) seem to have been special features of his instruments.

Stellwagen's son Gottfried (*fl* ?1660–65) worked as an organist and organ builder in Güstrow about 1661, and subsequently moved to Heide, Holstein, by about 1664.

HANS KLOTZ

Stemmelius [Stemmele], **Gregor** (*d* Irsee, nr Kaufbeuren, Swabia, 16 May 1619). German composer. In about 1600, together with Johann Seytz and Carolus Andreae, he composed liturgical music for the Benedictine abbey at Irsee, of which he was a member. His surviving works show that he handled the techniques of vocal polyphony competently. His date of death is given in the manuscript *D-As* TS 95.

Stenborg, Carl (*b* Stockholm, 25 Sept 1752; *d* Stockholm, 1 Aug 1813). Swedish singer, composer, translator and impresario. The son of the actor and director of the Swedish Comedy, Petter Stenborg, he grew up in the household of Count Adam Horn, who underwrote his education at Uppsala University. At the age of 14 he made his début in the public concerts of Stockholm and thereafter began to study composition with Ferdinand Zellbell (ii). In 1767 he was appointed to a government post, which he held while simultaneously performing with his father's company. He achieved an instant success as Sweden's leading tenor in the title role of the first Swedish opera, Uttini's *Thetis och Pelée* on 18 January 1773. In 1782 he was appointed court secretary and the following year was elected to the Swedish Royal Academy of Music, where he taught for the next two decades.

In 1780 he took over the leadership of the Swedish Comedy and received permission from Gustavus III to stage comic operas and plays at a new theatre in Eriksberg (and later at the Munkbro Theatre), which competed with the Royal Opera for public support. Here he produced native works, translations of French and German comic operas and parodies by C.I. Hallman, O. Kexél and Carl Envallsson, which were set to music by J.C.F. Haeffner, J.D. Zander, J.F. Grenser and himself. From 1788 he appeared on stage through a special dispensation that allowed him to perform both at the Royal Opera and his own theatre. In 1799 the theatre went bankrupt and Stenborg toured the Swedish provinces until his retirement in 1806.

Stenborg's voice was known for its dexterity and dark tone colour, and was nearer a baritone than tenor. He had considerable ability as an actor; his portrayals, particularly of Swedish royalty and heros, made him a favourite in both spoken and sung stage works. His business acumen was largely responsible for the vibrant comic theatre in the Swedish capital. The majority of his compositions were written for his own theatre; these include nine Singspiele (including parody arrangements) and at least two ballets. He also wrote an oratorio, songs and instrumental pieces. His best known work is the patriotic opera *Gustaf Ericsson i Dalarne*. His music is characterized by lyrical melodic lines coupled with a solid sense of form and harmony.

WORKS

STAGE

all first performed in Stockholm

Caspar och Dorothea (oc, 3, C.I. Hallman), 31 Aug 1775, *S-St* [parody of Handel: Acis and Galatea]
Konung Gustaf Adolfs jagt (comedy with music, 3, A.F. Ristell), 25 June 1777, *Skma*
Skeppar Rolf och Gunnild (comedy with music, 3, Hallman), 6 July 1778, *St* [parody of Uttini: Birger Jarl och Mechtilde]
Petis och Theléе (comedy with music, 3, Hallman), 27 Sept 1779, *St* [parody of Uttini: Thetis och Pelée]
Så blefvo alla nögda [Thus all were Happy] (comic op, 1, C. Envallsson), 18 Aug 1782, *St*
Donnerpamp (comedy with music, 1, Hallman), 21 June 1783, *St*, collab. J.D. Zander [parody of Piccinni: Roland]
Gustaf Ericsson i Dalarne (Spl, 3, Envallsson), Munkbro, 29 Oct 1784, *Skma*
Insertion arias in Don Micco och Lesbina, 1780, lost; Äfventyraren, 1791, *St*; J.M. Kraus: Marknaden, 1792, lost; Eremiten, 1798, *St*
Ballet music (all lost): Arlequin favoritsultanninna, 1779; Divertissement vid slutet af Michel Wingler, 1789; Karaktärsballet [arr. of music from Marknaden], 1796

OTHER WORKS

Vocal: Jesu födelse (orat), *S-Skma*; Musique wid parentation öfwer Clas Ekeblad, 1v, str, 30 April 1773, *Skma*; 2 concert arias; 14 songs, 1v, pf (Stockholm, 1792) and in *Musikaliskt tidsfördrif*
Inst: Entr'actes to Kärlek utan stumpor [Love without Stockings] (parody, 5, J.H. Wessel and C. Stenborg), 17 Oct 1777, *Skma*; Minuet, str, *Skma*; Musique till parentationen öfwer Commendateuren Tilas, 20 April 1773; 2 marches, pf, *Skma*

BERTIL H. VAN BOER

Stendhal [Beyle, Henri-Marie] (*b* Grenoble, 23 Jan 1783; *d* Paris, 22 March 1842). French writer. He was an author, aesthetician, pamphleteer, critic, journalist and highest dilettante in the 19th-century Franco-Italian sense of the word: a partisan of contemporary Italian opera, including both enthusiasts and connoisseurs, and composers but, not performers. He was a champion of Romantic modernism and of Rossini in the *querelles* with Classicists in Milan and Paris during the late 1810s and 20s, and 'Stendhal' (he pronounced the name so that it rhymed with 'scandale') was the most famous of the dozen or so cryptonyms and initials under which he published, and the 200 he used in his correspondence and affairs. Adapted from 'Stendal', the birthplace of Johann Joachim Winckelmann, the name was first employed in *Rome,*

Naples et Florence en 1817, a sketch of 'modern' Italy for which he posed as a German melomane. Music was central to the book's pro-Napoleonic subtext, and in fact permeates virtually all his works.

Stendhal's life is related in his autobiography *Vie de Henri Brulard* (childhood), in his *Journals* (1801–42, though sketchy after 1818) and in *Souvenirs d'égotisme* (1821–30). The son of a provincial government lawyer, he studied solfège, violin, clarinet, and singing as a teenager – 'too late' to become an accomplished musician. In 1799 he set off for the Ecole Polytechnique in Paris, where he enrolled instead in a painting course at the Ecole des Beaux Arts and took a clerical post at the Ministry of War that soon led to his participation between 1800 and 1812 in Napoleon's Italian, German, Austro-Hungarian and Russian campaigns. During hiatuses spent in France he took Dugazon's acting classes and prepared for a career as a second Molière. He was to work until 1830 at *Letellier*, whose anti-hero was Jules-Louis Geoffroy, theatre critic of the *Journal des débats* from 1800–1814. In 1810–11 he also worked as auditor to the Conseil d'état and as *inspecteur du mobilier et des bâtiments de la couronne*, with responsibility for the Fontainebleau palace and the Musée du Louvre. 'Falling with Napoléon', he took refuge in Milan, where he frequented La Scala and the loge of Ludovico di Breme, discovered the *Edinburgh Review*, wrote two unpublished pamphlets on Romanticism, and drafted (in French) one act of an autobiographical *opera buffa* libretto based on Shakespeare's *Twelfth Night*. Expelled as a suspected *carbonaro* by the Austrian government in June 1821, he returned to Paris, where he took up journalism and published his loosely anti-Saint-Simonian pamphlet *D'un nouveau complot contre les industriels* (1825) and the socio-political satire *Armance* (1827). In 1830 and 1831 he was named French consul at, respectively, Trieste and Civitavecchia, where he worked on his fiction, taking frequent leave to travel in Italy and France.

Though best known today for his novels *Le rouge et le noir* (1830) and *La chartreuse de Parme* (1839), in which opera serves as backdrop and emotional correlative, Stendhal was better known during most of his lifetime for his interdisciplinary and, comparative criticism and chronicling of arts and letters in relation to modern French and Italian socio-cultural politics. He cast these writings in various generic guises: biography (*Vies de Haydn, de Mozart et de Métastase*, 1814; *Vie de Rossini*, 1824), art history (*Histoire de la peinture en Italie*, 1817), travel literature (*Rome, Naples et Florence*, 1817, rev. 1827; *Promenades dans Rome*, 1829; *Mémoires d'un touriste*, 1838) and Romantic manifesto (*Racine et Shakespeare*, 1823 and 1825). The first editions of the two earliest and least successful of these works (on Haydn on painting, both substantially derivative) were published under other pseudonyms. But Stendhal was acknowledged as the author in advertisements for later books, and when the two works were reissued in 1831 and 1825.

In the complementary essays, reports and reviews as well as the occasional letters to the editor, puffs and 'prières d'insérers' that he contributed to about a dozen French periodicals and British magazines between 1821 and 1829, however, his style varied to suit the persona of his pseudonyms, and he retained his anonymity. His disguise was completed by the translation of nearly all the British material into English (some of which he thought obscured the 'bon ton' of his original). This body of criticism included a series of articles published in the *Miroir des spectacles* (summer 1821) in tandem with Delacroix's pro-Rossinian cartoons mocking the Opéra and in rebuttal to Henri-Montan Berton's anti-Rossinian philippic 'De la musique mécanique et de la musique philosophique'; a pioneering and widely reprinted and translated appreciation of Rossini, first published in English in the *Paris Monthly Review* (January 1822) under the name 'Alceste' (after Molière's outspoken misanthropist; later issues locate him in Montmorency, the site of Rousseau's hermitage); the posthumously titled 'Notes d'un dilettante', published in the *Journal de Paris* (9 Sept 1824 – 8 June 1827) and signed 'M.' (He also wrote reviews for the same journal signed 'A'.); and the monthly 'Lettres du petit neveu de Grimm' (a reference to the Querelle des Bouffons) written for the *London Magazine* (1825).

While the identity of 'Stendhal' may have been an open secret in Paris, only his closest confidants and a handful of journalists on either side of the Channel knew or suspected the identity of any one of these alter-egos. Like the 'alibis' planted in *Rome, Naples et Florence*, the adoption of these pseudonyms was prompted partly by legitimate fears of reprisal. Opposition journals were aligned with academic Classicism, controlled by coteries and neutralized by government pay-offs. The *Journal de Paris* was the mouthpiece of the king's minister of police. His anonymity was meant to strengthen his voice as a lone liberal Romantic against the 'vieil roche' school of criticism practised by Parisian *hommes de lettres*. However, it left his authority open to caricature by Berlioz (*Memoires*, chap.36), whose assumptions, like those of the Stendhalien Romain Rolland, were coloured by Fétis's and Castil-Blaze's false claims that the *Vie de Rossini* was plagiarized from Carpani's *Le Rossiniane, ossia Lettere musico-teatrali* (1824), since at least half of the first part of *Vies de Haydn, de Mozart et de Métastase* had been taken from the same author's *Le Haydine, ovvero Lettere su la vitae le opere del celebre maestro Giuseppe Haydn* (1812). (The other two parts were derived mainly from works by Winkler, Rochlitz and Cramer, and Sismondi.) Since only a fraction of this body of work was reprinted after his death, the scope of Stendhal's achievement remained unknown until the second quarter of the 20th century.

His writing on music stresses the sensuality, relatively, experientialism and culturally and nationally conditioned nature of beauty, theories first published in the original digression on 'le beau idéal, antique et moderne' and the anti-Schlegelian 'note romantique' in *Histoire de la peinture*. His progressive conviction of art's 'promesse de bonheur' was later to be opposed, by Nietzsche, to Kant's definition of beauty as the object of disinterested desire, and invoked by the Frankfurt School in its critique of affirmative culture. He wanted his epitaph to read 'Arrigo Beyle, Milanese, visse, scrisse, amò. Quest'anima adorava Cimarosa, Mozart e Shakespeare'.

JANET JOHNSON

Stengel, Georg [Jörg] (*d* Nuremburg, 1557). German brass instrument maker and dealer in woodwind and percussion instruments. He was the adopted son or perhaps the nephew of Hans Neuschel the younger; he assumed the Neuschel family name in 1535. *See* NEUSCHEL.

□

Stenger, Nicolaus [Nikolaus] (*b* Erfurt, 31 Aug 1609; *d* Erfurt, 5 April 1680). German writer on music and organist. He spent his whole life at Erfurt. He attended the St Michael Lateinschule until 1621, when he transferred to the Protestant Ratsgymnasium, which was at that time noted for its fostering of music. One of his teachers there was Liborius Capsius, director of the collegium musicum and an important Erfurt University professor. He matriculated at the university in 1626, took his bachelor's degree in 1628 and became a Master of Philosophy in 1629. He then became organist at the Protestant Thomaskirche and at the Catholic church of the Neuwerk monastery. From 1632 to 1635 he was Kantor and teacher at the Protestant school of preaching and also studied theology. In 1635 he was ordained and became deacon (in 1638 pastor) of the Kaufmannskirche in succession to Joseph Bötticher, who had won a good reputation as a musician. In 1654 he moved to Erfurt University as professor of philosophy and in 1661 became professor of theology. He was held in the highest regard at Erfurt.

Besides many theological publications Stenger produced two notable musical works. The first was a textbook for use in schools, *Manuductio ad musicam theoreticam, das ist Kurtze Anleitung zur Singekunst* (Erfurt, 1635, enlarged 2/1659, 4/1666). In this book, written in German and widely used, he provided in dialogue form a short practical introduction to figural music, followed by an anthology of fugues by various composers, most of them with words. He is specially important for his editing of the Erfurt hymnbook, *Christlichneuvermehrt und gebessertes Gesangbuch* (Erfurt, 1663). In his 11-page preface he pointed to the frequently observed arbitrary alteration of well-known hymn tunes and expressed his desire to provide churches, schools and families with a hymnbook with correct melodies. Most of the 300 or so melodies (three of which are for two voices), for over 400 hymns, date from the first half of the 16th century; the others are from 17th-century songbooks or by Thuringian composers. A number were printed for the first time in this book, making it an important source of melodies. It was in use at Erfurt until the mid-18th century.

KARL-ERNST BERGUNDER

Stenhammar, (Karl) Wilhelm (Eugen) (*b* Stockholm, 7 Feb 1871; *d* Stockholm, 20 Nov 1927). Swedish composer, pianist and conductor. He grew up in a home where the arts were strongly encouraged: his father Per Ulrik Stenhammar (1828–75) was an architect and composer (a pupil of Lindblad, he wrote sacred choral works and songs in a Mendelssohnian style) and his mother a fine draughtswoman; his uncle and aunt, Oskar Fredrik and Fredrika Stenhammar, were both singers, and their daughter Elsa (Elfrida Marguerite) became a choral conductor (she published an edition of her mother's letters, Stockholm, 1958). The Stenhammar children and their friends formed a vocal group which was highly esteemed in the upper-class circles where they entertained. Wilhelm began to compose and to play the piano as a child, without much formal training. He never went to a conservatory but passed the organists' examination privately in 1890, after two years with Heintze and Lagergren. He did, however, attend the music school run by the eminent piano teacher Richard Andersson, and had theory lessons from Joseph Dente in 1888–9 ('terribly boring', according to his diary sketch of 1891) and later from Emil Sjögren and Andreas Hallén. Nevertheless, in composition and conducting he must be regarded as self-taught. Several of his early compositional efforts, such as the *Tre körvisor* (*c*1890) and some songs, still hold a place in the repertory.

Stenhammar may have considered his lack of formal instruction a handicap, for as late as 1909 he started a nine-year course of exercises, eventually covering 500 pages, based on Heinrich Bellermann's *Der Contrapunkt*. It is likely that his uncertainty and self-questioning were exacerbated by his high ambitions and by his feeling that he was seeking his own way, a way not quite in accord with that of his contemporaries Peterson-Berger and Alfvén. He completed his piano studies with Heinrich Barth in Berlin (1892–3) and in spring 1902 made a remarkable triple début: he performed Brahms's First Piano Concerto with the *hovkapell*; he played with the Aulin Quartet; and he had his *I rosengård* for solo voices, chorus and orchestra (1888–9) presented. Following this he appeared frequently as a soloist and gave around 1000 concerts with Aulin and his quartet all over Sweden.

Stenhammar's début as a conductor had come earlier, in 1897, when he directed the first performance of his concert overture *Excelsior!*. He held appointments as artistic director of the Stockholm Philharmonic Society (1897–1900), of the Royal Opera for one season, of the New Philharmonic Society (1904–6) and of the newly formed Göteborg Orchestral Society (1906–22). In this last post he made the city a musical rival to Stockholm: he invited Nielsen to conduct, and he organized grand choral festivals involving large numbers of composers (notably his friend Sibelius), performers and listeners.

When in 1924–5 he returned to the Royal Opera, he was already sick and physically broken.

As a composer Stenhammar began in the late Romantic style typical of Scandinavia, imbued with influences from such composers as Wagner, Liszt and Brahms. Later his work came to be dominated by a classicism of his own, based principally on a profound study of Beethoven but also on Haydn and Mozart (a fruit of his prodigious activity as a chamber musician), and on Renaissance polyphony. In his greatest compositions these traits are always tinged with a specifically Nordic colour relating to Swedish folk music, though he did not quote genuine themes to the extent that Peterson-Berger and Alfvén did. His two early music dramas, *Gildet på Solhaug* and *Tirfing*, were not successful, and though he loved the theatre and wrote a great deal of excellent incidental music, he never returned to opera. *Tirfing* (1897–8) provoked a crisis, causing him seriously to question Romantic aesthetics – and above all Wagner – but not entirely to reject them.

Stenhammar's 'second period' found him striving for more concentrated motivic work and a deeper manner. The magnificent cantata *Ett folk* (1904–5) shows these tendencies in an emotive outburst of eager national feeling; the unaccompanied hymn 'Sverige' included in the work has become one of Stenhammar's most appreciated choral pieces, though here the patriotic feeling is noble and intimate. A new stylistic advance came with the much played Second Piano Concerto, whose Beethovenian dialogue between soloists and orchestra, with the tonalities of D minor and C♯ minor in contest, has a finely improvised form. The First Symphony, however, was discarded by the composer, since the work was too obviously dependent on Beethoven, Bruckner and Wagner.

Stenhammar's third and final period may be dated from the Fifth String Quartet (1910), the first work composed after his studies in strict counterpoint. This piece lives up to its subtitle 'Serenade' in its vitality and humour, and comes to terms with folklorism in a masterly series of variations on the nursery rhyme *Riddaren Finn Komfusenfej*. Other works of the last period include two orchestral compositions which stand among the greatest in the Swedish repertory, the Serenade and the Second Symphony. The former shows Stenhammar's ripe, deep knowledge of orchestration and has a tinge of Impressionist lightness combined with a quite Scandinavian nature poetry (there are hints of Strauss and Sibelius); it is at once the most aristocratic and most lighthearted of his larger works. The symphony, on the other hand, aims at objectivity, even asceticism, as may be exemplified by the Dorian feeling of its G minor tonality and the expert handling of fugato in the finale. At the same time it is full of allusions to Swedish folk music and, in the first and scherzo-like third movements, folkdance rhythms: it brings together all the best qualities he had so far displayed.

Outstanding among Stenhammar's later compositions is the 'symphonic cantata' *Sången*, written for the 150th anniversary of the Swedish Royal Academy of Music. It consists of two main parts, the first seemingly recalling youthful *Sturm und Drang*, the second austere and slightly Handelian; these are linked by an interlude, 'Mellanspel', which is often performed separately. His other important vocal works include the early ballad *Florez och Blanzeflor*, with its brilliant orchestral accompaniment, and a large number of very finely wrought songs to poems chosen with discriminating taste. Several of these are among the most prized art songs of Sweden; the collection *Visor och stämningar* provides some exquisite examples, full of ingenious formal ideas. Finally, his series of six quartets was unique in Sweden at the time; they range from rather subservient Beethoven copies to an increasingly personal and assured style in the last three.

Stenhammar's son Claes Göran Stenhammar (1897–1968) was cantor at the Storkyrkan in Stockholm and later a teacher at the conservatory. Stenhammar himself had few pupils, though Rosenberg received certain decisive influences from him and may be said to have passed these on to younger generations.

WORKS

(*selective list*)

STAGE

Operas: Gildet på Solhaug (3, after H. Ibsen), op.6, 1892–3; Tirfing (mystical saga-poem, prol, 2, epilogue, A. Boberg), op.15, 1897–8

Incid music: Ett drömspel (A. Strindberg), concert version arr. H. Rosenberg; Lodolezzi sjunger (H. Bergman), also suite; Chitra (R. Tagore), suite arr. Rosenberg; Romeo och Julia (W. Shakespeare), also suite

ORCHESTRAL AND VOCAL ORCHESTRAL

Orch: Pf Conc. no.1, b♭, op.1, 1893; Excelsior!, sym. ov., op.13, 1896; Sym. no.1, F, 1902–3; Pf Conc. no.2, d, op.23, 1904–7; 2 sentimentala romanser, A, f, op.28, vn, orch, 1910; Serenade, F, op.31, 1911–13, rev. 1919; Sym. no.2, g, op.34, 1911–15

Choral orch: I rosengården (K.A. Melin), solo vv, vv, orch, 1888–9, unpubd; Norrland (D. Fallström), male vv, orch, full score lost, arr. male vv, military band by I. Widner, 1901; Snöfrid (V. Rydberg), op.5, solo vv, vv, orch, 1891; Ett folk (V. von Heidenstam), op.22, Bar, vv, orch, 1904–5; Midvinter, op.24, vv, orch, 1907; Folket i Nifelhem, Vårnatt (O. Levertin), op.30, 1911–12, unpubd; Sången (T. Rangström), op.44, solo vv, vv, orch, 1921

Solo vocal orch: Florez och Blanzeflor (Levertin), op.3, Bar, orch, 1891; Ur idyll och epigram av J.L. Runeberg, op.4a, Mez, orch, 1893; Ithaka (Levertin), op.21, Bar, orch; 4 Stockholmsdikter (B. Bergman), op.38

SONGS

all for 1 voice and piano

Sånger och visor, *c*1888: I skogen (A.T. Gellerstedt), Ballad (Melin), När sol går ned (Melin)

2 visor ur En glad gut av Bjørnsterne Bjørnson, *c*1888: Lokkeleg, Aftenstemning

Ur Idyll och epigram av J.L. Runeberg, op.4b, 1893: Flickan kom ifrån sin älsklings möte, Flickan knyter i Johannenatten

7 dikter ur Ensamhetens tankar av Verner von Heidenstam, op.7, 1893–5: Där innerst i min ande bor en gnista, I enslighet försvinna mina år, Min stamfar hade en stor pokal, Kom, vänner, låt oss sätta oss ned, I Rom, i Rom, dit ung jag kom, Du söker ryktbarhet, Du hade mig kär

5 visor ur Idyll och epigram av J.L. Runeberg, op.8, 1895–6: Lutad mot gärdet, Dottern sade till sin gamla moder, Den tidiga sorgen, Till en ros, Behagen

2 Minnelieder (W. von der Vogelweide), op.9, 1895–6: Ein Kuss von rothem Munde, Heil sei der Stunde

2 digte af J.P. Jacobsen, op.10: Du Blomst i Dug, 1895, Irmelin Rose, 1888–9

4 svenska sånger, op.16, 1893–7: Låt oss dö unga (Heidenstam), Guld och gröna skogar (T. Hedberg), Ingalill (G. Fröding), Fylgia (Fröding)

3 Lieder von Heinrich Heine, op.17, *c*1890: Ich lieb, eine Blume, Sie liebten sich beide, Ein Fichtenbaum steht einsam

5 sånger av Bo Bergman, op.20, 1903–4: Stjärnöga, Vid fönstret, Gammal nederländare, Månsken, Adagio

Visor och stämningar, op.26, 1906–9: Vandraren (V. Ekelund), Nattyxne (E.A. Karlfeldt), Stjärnan (Bergman), Jungfru Blond och jungfru Brunett (Bergman), Det far ett skepp (Bergman), När genom rummet fönsterkorsets skugga glider (Heidenstam), Varför

till ro så brått? (Heidenstam), Lycklandsresan (Fröding), En strandvisa (Fröding), Prins Aladin av Lampan (Fröding)
Kejsar Karls visa (Levertin), op.32, 1910
4 dikter av Verner von Heidenstam, op.37, 1918: Jutta kommer till Folkungarna, I lönnens skymning, Månljuset, Vore jag ett litet barn
4 Stockholmsdikter (Bergman), op.38, 1917–18: Kväll i Klara, I en skogsbacke, Mellan broarna, En positivvisa
Efterskörd, 5 sånger: Var välsignad, milda ömsinthet (Fröding), 1904; Tröst (Fröding), 1904; Hjärtat (Bergman), 1917; Klockan (Bergman), 1923; Människornas ögon (Bergman), 1923
5 posthuma sånger, 1917–24 (1928): Melodi (Bergman), Under vintergatan (Bergman), Amiens' sång: Blås, blås du vintervind (Shakespeare), Minnesång (Karlfeldt), Orfeus med sin lutas klang (Shakespeare)

OTHER WORKS

Unacc. choral: 3 körvisor till dikter av J.P. Jacobsen, 1890; Norrland [from cantata Norrland]; Sverige (from cantata Ett folk]
Chbr: Str Qt no.1, C, op.2, 1894; Str Qt no.2, c, op.14, 1896; Str Qt no.3, F, op.18, 1897–1900; Sonata, a, op.19, vn, pf, 1899–1900; Str Qt no.4, a, op.25, 1904–9; Str Qt no.5 (Serenad), C, op.29, 1910; Str Qt no.6, d, op.35, 1916
Pf: Sonata, g, 1890; 3 fantasier, op.11, 1895; Sonata, A♭, op.12, 1895; Sensommarnätter, op.33, 5 pieces, 1914

BO WALLNER, HANS ÅSTRAND

Stenhouse, William (*b* Roxburghshire, 1773; *d* Edinburgh, 10 Nov 1827). Scottish antiquarian. He was an Edinburgh accountant and folksong enthusiast who was commissioned in about 1815 by the publisher John Blackwood to write a scholarly work *Illustrations of the Lyric Poetry and Music of Scotland*; this was a series of short notes, one on each of the 600 songs in *The Scots Musical Museum* (1787–1803), and was intended to accompany a reprint of that collection. A letter describing the progress of Stenhouse's *Illustrations* appeared in *Blackwood's Magazine* in July 1817; in 1820 it was completed and the type was set up, but for various reasons the publication was delayed until 1839, after Stenhouse's death.

Stenhouse's 600 short articles contain essential information on Scottish folk music in the late 18th century. Described by Laing (preface to *The Scots Musical Museum*, Edinburgh, 1839) as 'a mass of curious matter regarding the poetry and music of the last century', they include reminiscences by and about Robert Burns, James Johnson, Stephen Clarke, George Thomson and others involved in Scottish folksong research around 1790, as well as Stenhouse's own recollections of music in Roxburghshire in his childhood. Stenhouse tended to copy inaccurate facts from earlier studies, and to be over-dogmatic in supplying dates and nationalistic origins to individual tunes; for these reasons his work was attacked by William Chappell (1859) and John Glen (1900).

DAVID JOHNSON

Stenings. English composer who may be identifiable with Oliver Stoning (*d c*1563), possibly the father of HENRY STONING.

Stentato [Stentando] (It.: 'with difficulty'; past participle of *stentare*: 'to be in difficulty'). An expression mark often used by Verdi in vocal lines at moments of extreme anguish. But its history goes back much further; Brossard wrote in his *Dictionaire de musique* (1703):

> It is put in to show not only that one should work or 'se donner de la peine' in singing a piece, but also that one should push the voice with all possible strength and sing as though one were suffering much, or in a manner which might make one feel or which expresses the sadness that has penetrated one.

The gerund *stentando* ('having difficulty') is also found.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Stenton, Paul. *See* WINNER, SEPTIMUS.

Stentorphone. *See under* ORGAN STOP.

Stentzsch, Rosine. German singer and actress. *See* LEBRUN family, (4).

Stenzl, Jürg (Thomas) (*b* Berne, 23 Aug 1942). Swiss musicologist. He studied the recorder then the violin (from 1949) and from 1961 the oboe with Walter Huwiler. He completed his first degree in musicology with Geering and Dickenmann at Berne University (1963–8), spending a year in 1965 at the University of Paris, where he worked under Chailley. He took the doctorate at Berne University in 1968 with a thesis on the 40 clausulas of *F-Pn* lat.15139. He then began teaching at the University of Fribourg, where he completed the *Habilitation* in 1974. He was appointed professor at Fribourg in 1980. In 1992 he moved to Vienna and was artistic director of Universal Edition; in 1993 he was awarded a second *Habilitation* for his book on Italian music from 1922 to 1952 (1990). He was made professor of musicology at Salzburg University in 1996; other institutes where Stenzl has acted as guest professor include the Technische Universität, Berlin (as interim professor for Dahlhaus), universities throughout Switzerland, Cremona University and the Graz Musikhochschule.

In 1971 Stenzl became a member of the central committee of the Société Suisse de Musicologie (a position he held until 1992) and in 1975 editor of the *Schweizerische Musikzeitung*; he was also co-editor of *Contrechamps* and *Musica/Realtà* (1983–92). As an avid promoter of contemporary music he has organized international congresses in Boswil (1982–8), directed concert series in Fribourg ('Festival Belluard/Bollwerk' 1985–90; 'Musiques du Frizième Siècle' 1990–94), acted as artistic adviser of the Donaueschinger Musiktage (1994) and is a director of the electronic studio of the Heinrich Strobel Stiftung (from 1992).

Stenzl established his reputation initially as a medievalist, specializing in the Notre Dame school, but his interests quickly broadened to include Corelli (whose chamber sonatas he edited for the collected edition), Handel, the history of musical interpretation and 20th-century composers, particularly Berg and Nono. Stenzl has been a major contributor to music dictionaries in German (*Pipers*, *MGG1*, *MGG2*) and English (the sixth and seventh editions of *The New Grove Dictionary of Music*

and Musicians), and his prolific writings on modern music have shed light on a little-known repertory.

ETIENNE DARBELLAY/R

Step (Ger. *Schritt*, *Tonschritt*). The melodic interval of a major or minor 2nd (i.e. a tone or a semitone), in contrast

to a leap (or 'skip'). Melodic movement by tones and semitones is called 'stepwise' or 'conjunct' motion.

Štěpán, Josef Antonín [Steffan/Stephan, Joseph Anton; Steffani/Stephani, Giuseppe Antonio] (*b* Kopidlno, Bohemia, bap. 14 March 1726; *d* Vienna, 12 April 1797). Czech composer, keyboard teacher and virtuoso, active in Austria. His musical gifts were probably first nurtured by his father, who was organist and schoolmaster in Kopidlno. When the Prussian army invaded Bohemia in 1741, the boy fled to Vienna, where he sought the patronage of the lord of the Kopidlno estate, Count František Jindřich Šlik [Franz Heinrich Schlick]. He studied the violin with the count's music director, Hammel (whom he later succeeded), and became an early harpsichord and composition pupil of the court composer G.C. Wagenseil. Štěpán distinguished himself as a gifted composer and as one of the most brilliant harpsichordists in Vienna. He enjoyed a considerable reputation as a teacher, and throughout his career composed didactic pieces. On 14 July 1766 he was appointed Klaviermeister to the young archduchesses Maria Carolina (later Queen of Naples) and Maria Antonia (later Queen of France), but by August 1775 he had ceased his court duties. Partly because of a temporary loss of sight he was allowed to retain his annual salary of 500 florins as a pension. He resumed private teaching, and was a guest in fashionable salons. He also continued composing until his very last years. He died in obscurity, the obituary notice in the *Wiener Zeitung* of 19 April 1797 merely recording his sudden death from a stroke. In his will, dated 5 August 1795, he left the greater part of his sizeable estate in trust for the school in Kopidlno. His pupil, the novelist Caroline Pichler, described him in her memoirs as 'a humorous man of a distinctive personality, who combined the oddities common to all artists, especially musicians, with some peculiarities of his own. But he knew his art thoroughly and had an inexhaustible fund of good humour'.

Štěpán's distinctive contribution to the Classical style and the intrinsic value of his music still await full recognition. He is acknowledged for the historical importance of his collections of lieder, the first of their kind to be published in Vienna, but his real significance lies in the keyboard music, which spans the whole of his creative life. The divertimentos and sonatas of the early period, before about 1765, already show a mastery of the new Italian manner and a gift for attractive ideas creatively worked out in some notably forward-looking pieces. The slow minor-key introduction to a sonata of 1763 was the prototype for later examples in sonatas and concertos. Štěpán firmly established a colourful personal style, and in the publications of the 1770s, all substantial four-movement works, produced some of the most interesting of Viennese sonatas. His keyboard idiom is characterized by a full texture animated by complex part-writing, intricate thematic configurations and an impressive rhythmic vitality and impetus.

The mature keyboard works, from the late 1770s, are conceived for the piano, with appropriate stylization and an idiosyncratic use of dynamics. Štěpán's style in all genres shows a successful transformation into a Classical manner that is close to Mozart in its cantabile themes and melodic chromaticism, and to Haydn in keyboard style and structural ingenuity, with many stylistic parallels in addition. His individuality is evident in the continuing incorporation of fantasia effects (preludes, cadenzas, capriccios) and programmatic elements (sonatas, and the subjective *Duello* and *Spirito incostante*). The trend towards thematic integration and his liking for formal experiments resulted in the creation of hybrid forms on sonata, variation and rondo principles for single-movement capriccios, *Variazioni combinate* and sonatas. Other late sonatas are in two or three extended movements, sometimes with an introduction, but always without a minuet and trio. His expressive range extends from introspective gravity and temperamental outbursts to witty exuberance. Some late keyboard and chamber music pieces show self-borrowing and an exaggerated use of favourite motifs and other devices.

Štěpán's keyboard concertos are unique in the regular use of expressive minor-key slow introductions, with the soloist taking part. In his first movements proper he transformed the traditional ritornello pattern to produce a variety of formal schemes, finally favouring movements based, unconventionally, on sonata form principles. The slow movements were the last to develop in individuality, but eventually he dispensed with the customary prolific solo figuration and they became vehicles for melodic and dramatic interest. The character of the finales was changed, as in the sonatas, by the adoption of folksong-like themes as a means to further progress. The finales of the late concertos are large-scale movements in various types of sonata form, and are as weighty as first movements. Štěpán maintained an independent course which led him to anticipate the 'accompanied sonata' concept of the concerto, in which the soloist dominates almost completely. He was one of the most advanced concerto composers in Vienna before Mozart, but after his death his music soon fell into neglect.

WORKS

printed works published in Vienna unless otherwise stated

SACRED

Stabat mater, 1v, pf (Prague and Vienna, 1782)

7 hymns in Lieder zur öffentlichen und häuslichen Andacht (Prague, 1783)

Doubtful: Missa, 1761, *CZ-Bm*; Requiem, *Bm*, *Pu*; Laudate pueri, Beatus vir, *D-SWl*; 2 Christmas pastorellas: C, 1762, collab. J.G. Zechner, *A-GÖ*; D, *M*

Spurious: 2 missae solemnes, probably by Anton Carl (*c*1717–84) and Georg Reutter (ii), *D-SWl*

Lost: hymns in Leitmeritzer Choralbuch (Leitmeritz, 1846); Requiem, formerly attrib. Dittersdorf, according to Vacek (1827); Der unschuldig angeklagte ... Weltheiland (orat) perf. Prague, 1757, according to Dlabacž (1815); Lauda Sion, 1764; De martyre; De sancto; Litaniae Lauretanae; Missa solemnis brevior; Off

SECULAR VOCAL

Edition: *Das Wiener Lied von 1778 bis Mozarts Tod*, ed. M. Ansion and I. Schlaffenberg, DTÖ, liv, Jg.xxvii/2 (1920/*R*)

Sammlung [24] deutscher Lieder, i (1778), 3 repr. in Sammlung verschiedener Lieder von guten Dichtern und Tonkünstlern (Nuremberg, 1780)

Sammlung [25] deutscher Lieder, ii (1779)

Gesang bei dem Beschlusse der ... Prüfung der 31 Unteroffiziere und Gemeinen (1780)

Sammlung [24] deutscher Lieder, iv (1782)

1 lied in Wienerischer Musenalmanach (1781)

2 lieder in Liedersammlung für Kinder und Kinderfreunde (1791)

2 lieder, *A-Wn*

Der Doktor Daunderlaun (op, 2), *Wgm*, *CZ-Pnm*

KEYBOARD

6 divertimenti [op.1] (1759), ed. in MAB, lxiv (1964)
6 sonate, op.2 (1760), 1 movt ed. in MVH, xv (1966/R)
40 preludi per diversi tuoni (1762)
Parte 1a del op.3 continente 3 sonate (1763); Parte 2a … continente 3 sonate (1766); Parte 3a (1771), lost; pts 1–2 ed. in MAB, lxiv (1964); 7 minuets from opp.1–3 ed. in MVH, ix (1962/R)
Sonata I (1771), II (1771–6), III (1776); all ed. in MAB, lxiv (1964); minuet from I also ed. in MAB, xiv (1953/R); minuet from III repr. in Anleitung zum Gesange (Ofen [Buda], 1798), also ed. in MVH, ix (1962/R)
6 sonates choisies, hpd/pf, par … Steffann et Rutini (Paris, 1773) [4 sonatas of movts from opp.1–3]
Parte 2a continente 90 cadenze, fermade, e capricci, hpd/pf (1783), 1 repr. in Blumenlese für Klavierliebhaber, ii (Speyer, 1785)
25 variationi, pf (1785–92 and 1797)
23 divertimentos and sonatas, incl. 6 soli [no.4 lost], Br. cat. 1768, *B-Bc*, *CZ-KRa*, *D-Bsb*, *DK-Sa*, *H-Bn*, *I-Vc*: 8 sonatas ed. in MAB, lxx (1968)
5 capriccios, *A-Wgm*, *CZ-KRa*, *Pnm*, *D-Bsb*, ed. A. Weinmann (Munich and Duisburg, 1971)
5 sets of variations, *CZ-KRa*, *D-Bsb*, *H-Bn*
4 variations in Musikalisches Allerley (Berlin, 1762), attrib. to Štěpán in MS in *B-Bc*; ed. in NMA IX:27/i (1982) [Nannerl Notenbuch]

3 programmatic pieces, 10 contradanze, *CZ-KRa*
23 minuets, *Pnm*, 13 minuets, *Pk*, *D-Bsb*, 12 minuets, *D-Dl*, *I-Vc*
8 deutsche Galanterie Stücke, *A-Wn*, *D-Bsb*
12 single sonata movts, 3 alternative versions of sonata movts, 4 sinfonia arrs., 5 doubtful pieces, *A-Wgm*, *Wn*, *B-Bc*, *CZ-KRa*, *Pnm*, *D-Bsb*, *DGs*, *ROu*, *H-Bn*, *I-Vc*
Cadenza for kbd conc. by Vanhal, *A-Wgm*
Fantasia, Br. cat. 1769, lost
Movt, lost, ed. in Biba (1984)

OTHER INSTRUMENTAL

Orch: 8 sinfonie, incl. 2 in Br. cat. 1766, *A-Gd*, *CZ-Pnm*, *D-SWl*, *H-Gc*, 1 doubtful, *CH-MÜ*; 4 sinfonie, Br. cat. 1766, lost; Parthie, 1760, lost
Concs.: 6 concs., hpd/harp, op.3 (Paris, *c*1773), incl. 1 in Br. cat. 1767, nos.3–6 lost; 36 concs., hpd/pf, incl. 7 in Br. cat. 1763, 3 in 1766, 1 in 1767, *A-Wn*, *Wgm*, *B-Bc*, *CZ-Bm*, *KRa*, *Pk*, *Pnm*, *TC*, *D-Bsb*, *Dl*, *Rtt*, *H-Bn*, *I-Vc*, 2 ed. H. Picton (London, 1976) and in RRMCE, xi (1980); 1 conc., hpd/pf, lost; 2 concs., 2 hpd, *D-Bsb*, 1 doubtful, 1 arr. by J. Diettenhofer and pubd as J. Haydn's HXVIII: G2
Chbr: Concertino, hpd, fl, vn, vc, Br. cat. 1769, *D-Bsb*, ed. in RRMCE, xxxiii (1989); Concertino, hpd, fl, vn, b, 2 hn, Br. cat. 1769, *CZ-KRa*, *D-Bsb*, *SWl*, ed. in MAB, xxxix (1959); 7 trios, vn, vc, hpd/pf, incl. 1 in Br. cat. 1766, 1 in 1767, *A-Wn*, *B-Bc*, *CZ-KRa*, 1 ed. in RRMCE, xxxii (1989) and also arr. 2 hpd, *KRa*, 1st movt ed. in DČHP; Sonata, vn, pf, *D-Bsb*, ed. S. Gerlach and Z. Pilková (Munich, 1985); Variations, vn, pf, *A-Wgm*, *CZ-KRa*, *D-Bsb*; quattro, hpd, 2 vn, b, lost; quattro, hpd, fl, vn, b, lost

Doubtful (all for wind insts): 2 Harmonien, *D-SWl*, ed. D.J. Rhodes (Barrhill, Ayrshire, 1993); Serenata-Parthia, *CZ-Pnm*, ed. D.J. Rhodes (Barrhill, Ayrshire, 1997), 6 partitas, Br. cat. 1785–7, lost: all probably by Jan Stefani

HOWARD PICTON

Štěpán, Pavel (*b* Brno, 28 May 1925; *d* Prague, 30 Sept 1998). Czech pianist, grandson of Vilém Kurz (1872–1945). His parents were well-known pianists. His grandfather taught him the piano, and he gave his first public performance at the age of 16, playing Bach and Debussy. In 1943, with the Czech PO under Rafael Kubelík, he played Mozart's Concerto in C minor, and the following year he gave a solo recital. Štěpán's repertory centred on Mozart's piano concertos, but embraced works by Bach, Beethoven, Schubert, Brahms, Debussy and Prokofiev, in all of which his refined technique and poetic expressiveness were also revealed; he often included Czech and contemporary works in his programmes. Occasionally he played quintets by Schumann and Dvořák with the Smetana Quartet, and he often performed piano duets or duos with Ilja Hurník. In 1961 Štěpán began teaching at the Prague Academy of Music (AMU) and at interpretation seminars abroad. He gave successful concerts in many European countries, and his recordings, including many Suk piano and chamber works, have been highly praised. He wrote for the daily press and published occasional reviews in *Hudební rozhledy*.

ALENA NĚMCOVÁ

Štěpán, Václav (*b* Pečky, nr Kolín, Bohemia, 12 Dec 1889; *d* Prague, 24 Nov 1944). Czech pianist, writer and composer, father of PAVEL ŠTĚPÁN. He studied musicology under Nejedlý at Prague University, graduating in 1913, and continued his studies both at the German University in Prague and in Berlin. He appeared as a pianist from the age of 18, giving Novák premières (*Pan*, *Exotikon*) by the time he was 22. His piano studies, begun with Josef Čermák in Prague (1895–1908), continued with James Kwast in Berlin and, after the war, with Blanche Selva in Paris. The Paris influence was especially important and led to a number of concert tours of Paris and the French provinces (1919, 1920, 1922) and other engagements in London (1919), Berlin and Yugoslavia (1924). In Prague he taught aesthetics and later piano at the conservatory

and appeared frequently both as soloist and chamber player with the Ševčík and the Czech Quartets. He specialized in new Czech music, introducing works by Suk, Novák, Axman, Křička, Vomáčka and others. He was active as editor, critic and writer (an authority on Suk and Novák) and wrote the Czechoslovak entries in A.E. Hull's *Dictionary of Modern Music and Musicians* (London and New York, 1924/*R*). A pupil of Novák, he composed piano, chamber and vocal works, many of which were published in Paris and Vienna. After the age of 30, however, he abandoned composition in favour of his other activities.

JOHN TYRRELL

Step'anian, Haro Levoni (*b* Yelizavetpol [now Gyanja], Azerbaijan, 13/25 April 1897; *d* Yerevan, 9 Jan 1966). Armenian composer. He studied composition under Gnesin at the Moscow Music College (1923–6) and under Shcherbachyov and K'ushnar at the Leningrad Conservatory (1926–30). Thereafter he settled in Yerevan, teaching at the conservatory and holding the presidency of the Armenian Composers' Union (1938–48). He became a People's Artist of Armenia in 1960. His operatic, orchestral and chamber music played an important part in the development of Armenian music from the 1930s to the 1950s; though he followed the Armenian tradition, and in particular the work of Komitas, he drew into it certain features from Prokofiev and Shostakovich. Folk music remained an essential source of thematic material. Step'anian's operas cover a wide range, from the improbable, satiric parable *Kaj Nazar* ('Brave Nazar') to the epic *Sasuntsi Davit'* ('David of Sasun'), from the revolutionary *Lusabatsin* ('At Dawn') to the historical, romantic *Nune*. The use of the chorus is a major feature, whether in the static, oratorical writing of *Sasuntsi Davit'* or the dynamic material of *At Dawn*. In *Sasuntsi Davit'* the archaic setting is evoked through the use of sacred *sharakan* melodies, hymns, heavy measured rhythms and strict polyphony; these are also found in the First Symphony, an epic piece of harmonic richness and contrapuntal mastery, after the model of Komitas's choruses. Step'anian was also a master of the lyrical miniature: his song accompaniments are of great refinement in their harmonic colour, and some piano pieces (the preludes and the sonata) show traces of impressionism. Of a mainly lyrical and psychological nature, they are notable for their subtle timbral nuances, folksong imitations and rhythmic formation.

SVETLANA SARKISYAN

Stepanova, Yelena Andreyevna (*b* Moscow, 5/17 May 1891; *d* Moscow, 26 May 1978). Russian soprano. She studied singing with M. Polli. From 1908 she sang in the Bol'shoy chorus until, after a successful début as Antonida (*A Life for the Tsar*), she became a soloist in 1912. Stanislavsky, who had great influence on her, prepared her for the roles of Gilda (1919) and Tat'yana (1921); she was also influenced by the conductors Václav Suk, Cooper and Golovanov and the director Lossky, as well as by Chaliapin, Sobinov and Nezhdanova. Her singing was distinguished by rare clarity, crystalline coloratura and artistic sensitivity. Her Rimsky-Korsakov portrayals were fascinating: Marfa (*The Tsar's Bride*), the Snow Maiden, Pannochka-Rusalka (*May Night*) and the Queen of Shemakha (*Golden Cockerel*), among others. Her repertory also included Glinka's Lyudmila, Violetta, Elsa, Meyerbeer's Marguerite de Valois and Lakmé. She left the opera stage in 1944.

I.M. YAMPOL'SKY

Stephan, Clemens. *See* STEPHANI, CLEMENS.

Stephan, Josef Anton. *See* ŠTĚPÁN, JOSEF ANTONÍN.

Stephan, Rudi (*b* Worms, 29 July 1887; *d* Galicia, 29 Sept 1915). German composer. The elder of two sons, he was born to a respected small-town lawyer, Geheimrat Dr Karl Stephan, and his wife, Berta Schmidt Stephan. His first music teacher was the city's music director, Karl Kiebitz. During his Gymnasium years he occasionally participated in local and regional events sponsored by such groups as the Worms Musikgesellschaft und Liedertafel, and the Wagner Verein, of which his father was an active board member. By 1904 he had begun composing, mostly songs and other short pieces. His interest in visual art led him to take up watercolour landscape painting, and with a friend he experimented with the concept of a *Farbklavier*.

In the spring of 1905 Stephan persuaded his parents to allow him to leave school without graduating and to

study in Frankfurt with Sekles. Little is known of his experiences in Frankfurt, or of the reason for his departure to Munich one year later to study with Rudolf Louis. His studies with Louis (until 1908) seem to have been restricted, as were those with Sekles, to harmony and counterpoint. During his time in Munich he also studied the piano with Heinrich Schwartz and attended philosophy lectures at the university. One document indicates that he had brief contact with Reger, but it seems likely that he chose never to study composition formally. Although intent on learning craft, he seems to have deliberately avoided anyone who might have served as a mentor or influenced his creative attempts.

Most of Stephan's early works remained fragments; before 1908 the only compositions he completed seem to have been songs and a few keyboard pieces. In July 1908 he finished his first large work, *Opus 1* for orchestra. The next two years were entirely taken up with the one-act opera *Vater und Sohn*, the orchestral *Groteskes Opus 2* (both of which remained fragments) and three completed works: *Liebeszauber*, a ballad for tenor and orchestra, *Musik für Orchester*, and *Musik für Geige und Orchester* (none of which are identical with later works bearing those titles). He thought enough of these works to present them in a public concert (January 1911) for which he hired the Munich Konzertverein orchestra.

Immediately following the concert, which was a mixed success, Stephan began a number of new works including *Groteske* for violin (possibly an occasional piece for the Munich *Fasching*), *Zweite Musik* for organ and orchestra, and the opera *Die ersten Menschen*. By November he had completed the major chamber work of his oeuvre, *Musik für sieben Saiteninstrumente*; the next year saw the reworking of a new orchestral piece that became the *Musik für Orchester* known today. Performances of these last two compositions in the 1912 and 1913 festivals of the Allgemeiner Deutscher Musikverein catapulted Stephan's name into the front ranks of promising young German composers. The orchestral work was given a number of performances during the subsequent concert season and, more importantly, led to a publishing contract with B. Schott's Söhne in 1913.

Apart from reworking *Liebeszauber* for baritone and orchestra and completing what was possibly a totally new *Musik für Geige und Orchester* (no materials are extant for the first), Stephan was principally occupied in 1913–14 with his setting of Otto Borngräber's 'erotic mysterium' *Die ersten Menschen*, the work for which he considered all preceding compositions to have been studies. Ludwig Rottenberg of the Frankfurt Opera had provisionally accepted the work for performance in early 1915 and Schott was to begin preparing a piano-vocal score and orchestral material when these plans collapsed with the outbreak of World War I. Though he seems to have had reservations about the war, Stephan volunteered for service. His basic training began in March 1915 and in September he was sent to the Eastern front, where he was killed two weeks later.

Stephan was only 28 years old when he died, yet his oeuvre bears the stamp of a strong personality with a distinctive voice. Both his musical language and his aesthetic are rooted in the late 19th-century German style defined by Wagner and Liszt. His music was distinguished, however, by his desire to eliminate what he saw as non-essential stylistic features and extra-musical associations. The note he appended to his first completed orchestral work, *Opus 1* – 'no poetic title, not the designation tone poem, nothing' – explains not only his repeated use of the generic title 'Musik für … ', but also his underlying belief in expressive content created entirely by musical means. Interestingly for his time, this aesthetic was in no way at odds with the demands of music drama as he understood and sought to create it.

Stephan's harmonic language, while explicable as an extension of tonal practice, relies on the exploitation and retroactive redefinition of ambiguities, as well as on modal, particularly plagal, connections. None of his works follows a traditional schema, yet all are characterized by a hierarchical, sometimes self-reflexive, organization of musical events, each of which can be defined as much by timbre, rhythm or gesture as by motive or harmony. Many of his works are cast in an arch form in which opening material returns, transformed, at the conclusion.

What is perhaps most astonishing about the trajectory of Stephan's reception is that his music continued to have contemporary relevance after his death. Before the outbreak of World War I some thought that Stephan might be the new voice of German music. By the time the war was over the concerns of German musical life, indeed the definition of new music, had changed radically. Yet during the postwar era, Stephan's music was seen to have anticipated the aesthetic of Neue Sachlichkeit. His name, nonetheless, may have been forgotten had it not been for his friend Karl Holl, Paul Bekker's successor as critic of the *Frankfurt Zeitung*. Holl published a perceptive monograph on Stephan in 1920 and helped bring about a number of performances, including the première of *Die ersten Menschen* (1920, Frankfurt; the first of a number of productions during the Weimar era) and Schott's publication of the remaining principal works and 16 of the late songs.

Most of the papers and autographs that document Stephan's life and work were destroyed as a result of a 1945 bombing raid on Worms, and with the end of World War II performances became sporadic. Yet in the broad reassessment of early Modernism that began in the 1970s and 80s the distinctive formal and tonal language of his music and its unmistakable individuality led to a renewed appreciation of his achievement.

WORKS

complete list of surviving compositions

Stage: Die ersten Menschen (music drama, 2, O. Borngräber), 1909–14, Frankfurt, 1 July 1920

Vocal: 4 Lieder (L. Greiner, M. Greif, von Stern, A. Lindner), 1904–6: Mitternacht, Weihnachtsgefühl, Waldnachmittag, Auf den Tod einer jungen Frau; Waldstille (M.R. von Stern), 1v, pf, 1905, unpubd; Ich will dir singen ein Hohelied (G. von Robertus), 1v, pf, 1913–14: Kythere, Pantherlied, Abendfrieden, In Nachbars Garten, Glück zu Zweien, Das Hohelied der Nacht; 7 Lieder (O.J. JULIANE BRAND

Stephan, (Gustav-Adolf Carl) Rudolf (*b* Bochum, 3 April 1925). German musicologist. Until 1947 he was educated in Heidelberg, studying the violin at the conservatory and music theory under Fortner at the Evangelisches Kirchenmusikalisches Institut; at the university he studied musicology with Besseler, philosophy and art history; he continued studying musicology at Göttingen University under Gerber, taking the doctorate there in 1950 with a dissertation on early motets. In 1963 he completed his *Habilitation* at Göttingen with a study of the antiphon and subsequently became a lecturer there. He was appointed professor of musicology at the Free University of Berlin in 1967, retiring in 1990. He was president of the Institut für Neue Musik und Musikerziehung, Darmstadt (1970–76), some of whose publications he has also edited; he was also president of the Gesellschaft für Musikforschung (1980–89) and the Internationale Schoenberg Gesellschaft (1989–96), for which he organized conferences (Vienna, 1974 and 1984; Duisburg, 1993) and edited conference reports (Vienna, 1978, 1986, 1996). He has prepared critical editions of the works of Mahler and Schoenberg and is chief editor of the collected edition of Berg's works. The government of Austria awarded him the Grosses Goldenes Ehrenzeichen in 1981.

Stephan's main areas of research are medieval music and music after 1700; he has concentrated particularly on Bach, Mahler, the Second Viennese School, and more recently on Pfitzner, Reger and Hindemith. He is primarily interested in drawing on important new sources and in examining the relationship between music theory and techniques of composition. He also analyses the criteria by which the musical quality, and hence the historical relevance, of a work is judged, particularly in 20th-century music. His dictionary, *Musik* (1957), and his books are written in a style that is both scholarly and readily accessible.

HANS HEINRICH EGGEBRECHT/ALBRECHT RIETHMÜLLER

Stephănescu, George (*b* Bucharest, 13 Dec 1843; *d* Bucharest, 25 April 1925). Romanian composer, conductor and teacher. He studied harmony and the piano with Wachmann at the Bucharest Conservatory (1864–7); at the Paris Conservatoire (1867–71) he was a pupil of Réber (harmony), Auber and Thomas (composition), Delle (singing) and Marmontel (piano). Returning to Romania, he taught singing and opera from 1872 until 1904 at the Bucharest Conservatory, where his pupils included Teodorini, Darclée, Nuovina, Giovanni Dimitrescu and many others who were to make international reputations as opera singers. Stephănescu himself was never a professional singer, but he was an outstanding teacher, and he summarized his method in *Despre mecanismul vocal* ('On the vocal mechanism') (Bucharest, 1896). He conducted at the Bucharest National Theatre from the foundation of the Romanian Opera in 1877; he also helped to further opera in the city by training the house singers and by financially supporting productions

by private companies. To assist in the establishment of a national repertory he composed many stage works, some of them in a patriotic vein (e.g. *Peste Dunăre* and *Petra*). Stephănescu was also the composer of the first Romanian symphony (1869) and of many songs, often drawing on folk music. Other works that present folklike melodies in bold relief include the *Uvertura naţională* and, above all, the short symphonic poems suggested by the landscape of the Căpăţîneni village where he spent summer holidays. Stephănescu did not use authentic peasant tunes, but rather original themes in folk style, harmonizing them within the major–minor system. It is in the songs that his powers as a melodist are most finely displayed, particularly in *Kamadeva*, *Somnoroase păsărele* ('Sleepy little Birds'), *Şi dacă ramuri bat în geam* ('And when the Branches knock against Windows'). In addition to his other activities, Stephănescu reformed the curricula of the Bucharest Conservatory, wrote music criticism for the Romanian press and translated several opera librettos. He was perhaps the greatest Romanian musician before Enescu.

WORKS
(*selective list*)

VOCAL

Stage: Peste Dunăre [Across the Danube] (operetta, G. Ventura), Bucharest, National, 1879; Sînziana şi Pepelea [Sînziana and Pepelea] (musical fairy tale, V. Alecsandri), Bucharest, National, 29 March 1880; Scaiul bărbaţilor [Sticking to a Man like a Leech] (operetta, G. Bengescu-Dabija), 1884, Bucharest, Edison, 29 March 1910; Mama soacră [The Mother-in-law] (comic op, 3, T. Speranţia), 1894, Bucharest, Edison, 1902; Cometa (operetta, T. Speranţia), 1900; Petra (lyrical drama, E. Aslan), 1902, inc.

Cîntările Sf Liturghii a lui Ioan Gură de Aur [Liturgical songs of St John Chrysostom], 1894; Lieduri (Eminescu), 1887–95; Visul Sclavului [The Slave's Dream] (V. Conta), 1v, pf, 1901

INSTRUMENTAL

Orch: Sym., A, 1869; Uvertura naţională, 1876; In munţi [In the Mountains], sym. poem, 1888; In crîng [In the Meadow], sym. poem, ?1889; Intre flori, sym. poem, ?1890; In alte timpuri [In Old Times], sym. poem, 1895; Idilă, sym. poem, 1902

Chbr: Pf Sonata, A, 1863; Sonata, vc, pf, 1863; Octet, G, 1866; Septet, G, ?1870; Str Qt, F, ?1870

Principal publisher: Gebauer (Bucharest)

Stephani, Agostino. *See* STEFFANI, AGOSTINO.

Stephani [Stephan, Stephanus], **Clemens** (*b* Buchau [now Bochov], nr Carlsbad [now Karlovy Vary, Czechoslovakia], probably *c*1530; *d* Eger [now Cheb, Czechoslovakia], mid-Feb 1592). Bohemian music editor, poet, printer, bookseller and ?composer. He may have attended the Lateinschule at Eger or the one at Joachimsthal (now Jáchymov). In 1554, according to his own testimony, he was a student at Leipzig. From April 1558 for about a year he was Kantor at the Lateinschule at Eger. In 1561 he applied again for this post but was refused. Between 1559 and 1567 he seems to have travelled about a good deal – he is known to have visited Budweis (now Ceské Budějovice), whose choir he praised highly, Ossegg, Prague and Nuremberg – and he also had several private pupils. Title-pages of his prints indicate that from at least 1567 until 1569 he was again living at Eger. In 1569–70 he probably stayed for some time at Nuremberg. From 1571 to 1574 he worked as a bookseller at Schlaggenwald, Bohemia, and from 1574 until his death he lived at Eger, where he was permitted to engage in bookselling only at public markets and where he also for some time owned a printing press. He was a difficult, quarrelsome man, who was unable to obtain a settled professional position and even spent some time in prison. J. Goldammer, Rektor at Eger, wrote in 1584 of his 'poisonous, blasphemous tongue', and the Eger town council forbade performances of his play *Alexander* because it contained libellous verses about Goldammer. He knew well Johann Hagius and Jobst vom Brandt. He died penniless and left many debts.

Stephani was once known chiefly as a dramatic poet in the Hans Sachs tradition, but his numerous other activities, especially as a humanist scholar and music editor, deserve recognition. In his various literary and scholarly publications he strove for the improvement of national education and the moral uplift of his fellow men on the basis of his Protestant faith. He may well have had much to do with the cultural flowering at Eger between about 1565 and 1585 and may have been responsible for the appointment in 1570 of Hagius – another contentious figure – as town preacher. The bulk of his publications appeared between 1567 and 1572–3, several of them in a single year, 1568. In his music anthologies, international composers rub shoulders with little-known men of mainly local interest, such as Melchior Bischoff, Christophorus Cervius, Wolfgang Ottho Egranus, Valentin Rab, Josephus Schlegel and Andreas Schwartz (Francus). Despite the obviously conservative view of music found in his remarkable preface to Brandt's *Geistliche Psalmen* (1572–3), he by no means published only the works of long-dead composers such as Isaac, Josquin, La Rue and Stoltzer or of somewhat more recent composers, of the generation of Crecquillon, Ducis, Gombert, Heugel, Morales, Senfl, Vaet, Johann Walter (i) and Willaert, but also – especially in the highly original, somewhat enigmatic *Beati omnes* collection (1569) – the works of younger composers such as Joachim a Burck, David Köler, Lassus, Jacob Meiland and Nikolaus Selnecker. Except for a single motet, Brandt's sacred music is known entirely from Stephani's edition of it of 1572–3. His rapturous praise of Brandt is no less remarkable than the fact that he published Walter's *St Matthew Passion* as his own work. Whether he himself was also a composer, as Quoika and Frank – unlike Eitner and Riess – tended to assume, cannot yet be decided, but the music in *Eine geistliche Action* in particular may be by him.

WORKS
published in Nuremberg unless otherwise stated

HANS HAASE

Stephani, Johann. *See* STEFFENS, JOHANN.

Stephanie, (Johann) Gottlieb (*b* Breslau, 19 Feb 1741; *d* Vienna, 23 Jan 1800). Austrian dramatist and actor. He is sometimes referred to as 'the younger', half-brother of (Christian) Gottlob Stephanie ('the elder'). He enrolled as a law student at Halle but enlisted as a Prussian hussar in the Seven Years War, was captured by the Austrians in 1760 and became an Austrian soldier in 1761. He left the army in 1765 and in 1768 was encouraged towards a stage career by the Mozarts' friend Anton Mesmer. Stephanie joined the National-Schaubühne company in 1769, and in 1779 he succeeded J.H.F. Müller as director of the National-Singspiel. Apart from several once-popular plays (especially *Der Deserteur aus Kindesliebe* (*kindlicher Liebe*), 1773) he adapted Farquhar's *The Recruiting Officer* (1769) and Shakespeare's *Macbeth* (1772) for the Viennese stage. He is, however, chiefly remembered as a librettist. He provided or adapted nearly 20 librettos for the National-Singspiel venture between 1778 and 1786, including those for Umlauf's *Die schöne Schusterinn, oder Die pücefarbenen Schuhe* (1779), *Das Irrlicht* (1782) and *Die glücklichen Jäger* (1786), for Mozart's *Die Entführung aus dem Serail* (1782) and *Der Schauspieldirektor* (1786), for Dittersdorf's *Der Apotheker und der Doktor* (1786) and *Die Liebe im Narrenhause* (1787), and for operas by Mederitsch, F. Teyber, Süssmayr and others; he also translated operas by numerous French and Italian composers, including Grétry, Sacchini, Anfossi, Paisiello, Piccinni and Sarti. Although early in his career he was a supporter of the old popular tradition, and as an actor favoured broadly comic roles, he later turned towards his brother's more 'enlightened' attitudes.

PETER BRANSCOMBE

Stephanus, Clemens. *See* STEPHANI, CLEMENS.

Stephen [Stephens; Jones], **Edward** [Tanymarian] (*b* Maentwrog, nr Ffestiniog, Merionethshire, bap. 15 Dec 1822; *d* Llanllechid, nr Bangor, 10 May 1885). Welsh minister and composer. Edward Jones was apprenticed to a tailor, and started preaching at the age of 18; in 1843 he gave up his trade and went to read for the ministry at Bala. There, to avoid being confused with another student, he called himself Edward Stephen Jones, adding his father's Christian name, but the surname was frequently omitted and he became known as Edward Stephen(s). In 1847 he was ordained and became minister of the Welsh Independent Church at Dwygyfylchi, North Wales, where he remained until 1856 when he accepted the ministry of two churches in Llanllechid. He married his predecessor's widow and adopted as his bardic name 'Tanymarian', after the small mansion which was their home. A popular, original and witty preacher, he was much concerned with the place of music in Welsh nonconformist worship. His compositions were well known and included besides anthems and hymn tunes ('Tanymarian' is a fine example) the oratorio *Ystorm Tiberias* and a Requiem (1858) in memory of the powerful Welsh preacher John Jones, Talysarn. *Ystorm Tiberias*, the first Welsh oratorio to be published (1855), was edited by S.S. Wesley, who described the composer as a genius lacking in musical culture. The work was later orchestrated by Emlyn Evans. Stephen also had a part in editing *Cerddor y Cysegr* (1859) and *Llyfr Tonau ac Emynau* (1868), to the latter of which he added a supplement in 1879. His articles, which are distinguished by their lively style, appeared in *Cronicl y Cerddor*, *Y Cerddor Cymreig*, *Y Cerddor* and *Y Dysgedydd*. Although not in complete agreement with John Roberts over the most effective way to include congregational singing in nonconformist services, he supported him in establishing the *gymanfa ganu* (singing festival) during the 1859 religious revival, and edited (1861–3) *Greal y Corau*, the journal of the Choral Association of Wales. He travelled widely conducting such singing festivals and adjudicating at competitive eisteddfods. He was also a prolific poet and a good singer.

OWAIN EDWARDS

Stephen of Liège (*b* *c*850; *d* Liège, 16 May 920). Bishop and composer of *historiae* (Proper Offices to saints). Born in the Low Countries, he attended the cathedral school in Metz and, in 864, the palace school in Aachen, and later

became a canon of Metz Cathedral, abbot of St Mihiel, of St Evre and of Lobbes before his election in 901 as bishop of Liège. He composed three Offices, whose antiphons and responsories follow the ascending order of the eight modes: the Office of the Trinity (see Auda, 115–21), the most widely known in Europe, attributed to him by HERIGERUS; the Office of the Invention of St Stephen (Auda, 58–66), his own patron saint; and the Office of St Lambert, patron saint of Liège (Auda, 187–97; the rhymed antiphon *Magna vox* probably existed before this Office was composed). It is unlikely that the composition of *historiae* in modal order, a new procedure, was initiated by Stephen or by HUCBALD OF ST AMAND: rather, 'the two contemporaries did no more than to apply openly a manner of composition that was prevalent in their milieu' (Chartier, 39).

MICHEL HUGLO

Stephens, Catherine (*b* London, 18 Sept 1794; *d* London, 22 Feb 1882). English soprano and actress, daughter of Edward Stephens, carver and gilder, of Grosvenor Square, London. In 1807 she began to study singing with Gesualdo Lanza. Under his care she appeared in various provincial towns, and in 1812 took small parts with an Italian opera company at the Pantheon in London. Later that year she studied with Thomas Welsh. On 23 September 1813 she made a successful début at Covent Garden as Mandane in Arne's *Artaxerxes*, following it with appearances as Polly in *The Beggar's Opera*, as Rosetta in *Love in a Village* and as Clara in *The Duenna*. She remained at Covent Garden until 1822, when she went to Drury Lane, returning to Covent Garden in 1828.

Catherine Stephens never mastered Italian. It was as an exponent of 'English style on Italian rudiments' that she made her name as one of the most popular artists of the day, in concerts and oratorio as well as in the theatre, in provincial cities and in London. She appeared in ballad operas, in new operas and dramatic entertainments by Bishop and others, and in adaptations and arrangements of operas from abroad which, by 20th-century standards, are extraordinary. She sang Susanna in the first performance in English of *Le nozze di Figaro* (1819, Covent Garden), and had previously sung Zerlina in *The Libertine*, an afterpiece based on Shadwell's play, with Mozart's music, which is counted as the first performance in English of *Don Giovanni* (1817, Covent Garden). On the same evening she played Ophelia in *Hamlet* on the occasion of John Philip Kemble's last appearance in the role (in 1814 she had been hissed for introducing Purcell's *Mad Bess* into this play). Stephens was one of three sopranos who sang Agnes (Agathe) in Hawes's English adaptation of *Der Freischütz* (1824, English Opera House). When he was in London in 1826, Weber wrote for her the song *From Chindara's warbling fount I come*, his last composition. She retired in 1835 and on 19 April 1838 she married the recently widowed Earl of Essex in his London house in Belgrave Square. He died the next year at the age of 81. She lived in the same house until her death.

Contemporary writers agreed on the sweetness of her voice, which was rich if not outstandingly brilliant. Hazlitt, who placed her with Kean as one of 'the only theatrical favourites I ever had', compared her 'simple, artless manner' with Braham's elaborate artifice. Leigh Hunt praised her 'exquisite vein of gentle pathos'. Her acting may have been no more than charm of personality, yet her colleague Macready, not an easy man to please, described her in his *Reminiscences* as 'the favourite of all', and commented on the 'correctness of judgment that never deserted her'.

RONALD CRICHTON

Stephens, Edward. *See* STEPHEN, EDWARD.

Stephens, John (*b* Gloucester, *c*1720; *d* Salisbury, 15 Dec 1780). English cathedral musician. He was appointed organist of Salisbury Cathedral in 1746, having previously been organist of St James's, Bristol. He assisted James Harris in developing the annual music festival in Salisbury. His pastoral *Daphnis and Amaryllis*, set to the music of Handel, was regularly performed in Salisbury from the early 1760s and attracted the attention of David Garrick, who secured the work for performance at Drury Lane, London (see Probyn). Stephens took the Cambridge degree of MusD in 1763 and conducted the Gloucester Music Meeting of 1766; he composed one of the chimes of Gloucester Cathedral. A Chapter Act at Salisbury, dated 23 December 1773, records that his salary there was increased 'in consideration of his long and useful services in the choir, particularly for his great care and assiduity in instructing the choristers'. A volume of his cathedral music, edited by Highmore Skeats, was published in 1805.

WATKINS SHAW/GERALD GIFFORD

Stephenson, Edward (*b* London, 22 April 1759; *d* Farley Hill, Berks., 15 Sept 1833). English music collector. After studying at Oxford, he joined family members in a banking firm, and in 1794 was appointed sheriff of Berkshire. A friendship with the musician Charles Frederick Horn (Stephenson and J.P. Salomon were godfathers to Horn's son Charles Edward) may have led to his activities in the cause of J.S. Bach, which ranged from his gathering Bach enthusiasts to celebrate Bach's birthday at his home in 1810 to his preparation in about 1808 of an English translation of J.N. Forkel's biography. This translation, which Horn and Samuel Wesley planned to publish, is not known to be extant; its relationship to the first published translation (London, 1820) is unknown. W.T. Parke called Stephenson's collection of Cremona violins (which included Stradivari's 1704 'Glennie' violin and 1731 'Paganini' viola) 'perhaps the best and most valuable … of any private gentleman in England'. Stephenson's manuscript collection included J.C. Smith's copy of Handel's *Radamisto* (now in *GB-Lbl*).

Stephenson's eldest son, Rowland (*b* London, 23 Jan 1788; *d* Florence, 26 April 1843), assumed the surname Standish in 1834 in respect of an inheritance, and published as Orlando Standish the primer *Elementi di*

contrappunto (Florence, 1836); his Florence home contained a theatre where musical performances were given. He should not be confused with his brother-in-law Rowland Stephenson (*b* at sea, 19 May 1782; *d* Bristol, PA, 2 July 1856), MP for Leominster 1827–9, who has been mistaken for the Stephenson involved in the English Bach revival.

MICHAEL KASSLER

Stephenson, Kurt (*b* Hamburg, 30 Aug 1899; *d* Hamburg, 20 May 1985). German musicologist. From 1919 he studied musicology at the universities of Hamburg under Anschütz, Frankfurt under Bauer, Freiburg under Gurlitt and (from 1921) Halle under Schering, taking the doctorate at Halle in 1924 with a dissertation on Johann Schop. Subsequently he was active in Hamburg as a music critic, as an assistant at the State and University Library and as a teacher at the conservatory. He completed the *Habilitation* in musicology at Freiburg in 1937 with a work on Andreas Romberg. He was appointed lecturer (1939) and (in 1948, after six years of military service) supernumerary professor of musicology at Bonn; he retired in 1964. Stephenson concentrated on music history since the 17th century, especially on the music history of Hamburg and the history of the student song. From 1961 to 1971, while making scholarly contributions to the history of the lied, he was director of the editorial board of *Darstellungen und Quellen der deutschen Einheitsbewegung im 19. und 20. Jahrhundert*. He was the co-founder and president of the Hamburg Brahms-Gesellschaft (1969–73), and was awarded the Brahms Medal of the City of Hamburg (1973).

HANS HEINRICH EGGEBRECHT

Stephkins, Theodore [Dietrich]. *See* STEFFKIN, THEODORE.

Stepovy (Akimenko), Yakiv Stepanovych (*b* Kharkhiv, 8/20 Oct 1883; *d* Kiev, 2 Nov 1921). Ukrainian composer. The brother of Fedir Akimenko, he studied with Lyadov at the St Petersburg Conservatory (1902–08, but only sitting his final examinations in 1914) and published articles in Moscow journals (1912–14). From 1914 he served at the front (as a clerk for the military hospital train) and then taught theoretical disciplines at the Kiev Conservatory (1917–21). In 1919 he became a member of the All-Ukrainian musical committee attached to the People's Commissariat for Enlightenment as well as the musical director of the Theatre of Musical Drama and the State Vocal Ensemble. His works were conceived for small forces; his lyrical vocal and instrumental miniatures rely on folklore sources and also on the styles of Tchaikovsky and Grieg. In his folksong arrangements, the composer gave much consideration to everyday lyrical genres, but underlined their psychological content. In the choral arrangements, the significance he gave to 'choral orchestration' is notable, while his arrangements for voice and piano acquire the character of original works. For Ukrainian national musical culture Stepovy's romances are especially important. Lyrical and melodic, they have occupied an honoured place in the vocal repertory. One of the romances – *Step'* ('The Steppe') to words by N. Chernyavsky – served as the basis for the composer's pseudonymn due to its popularity. The miniature predominates in Stepovy's piano output. Shunning virtuosity, he had a particular liking for the prelude, to which he imparted his own inimitable manner, making extensive use of turns of phrase derived from folksongs and romances.

NINA SERGEYEVNA SHUROVA

Steptoe, Roger (Guy) (*b* Winchester, 25 Jan 1953). English composer and pianist. He studied at Reading University (1971–4) and the RAM (1974–7), where his teachers included Alan Bush, and took private lessons in piano accompaniment with Geoffrey Pratley. While composer-in-residence at Charterhouse School (1976–9), he won critical acclaim for the First String Quartet (1976) and the opera *King of Macedon* (1978–9), his first of several settings on Ursula Vaughan Williams's texts. He has held the posts of professor of composition at the RAM (1980–91), where he directed a series of Composer Festivals, and artistic director of the Clerkenwell Music Series (1994–7) and Musique à Malaval.

Steptoe's compositional style evinces fine craftsmanship, lyricism, rhythmic suppleness and free and translucent harmonies. His lyrical gift is best shown in the

concise expressionism of the *Chinese Lyrics* (1982–3) and the rich breadth of the cantata *Life's Unquiet Dream* (1992). The textural refinement and artful design of the solo concertos belies their intense, often rhapsodic expression. *Equinox* for the piano (1981), and other idiomatic instrumental works, displays a creative reinterpretation of the English tradition, spiced with contemporary gestures and atonality. As a pianist he has recorded works by William Walton and Frank Bridge, as well as his own music.

MALCOLM MILLER

Stepwise. *See* CONJUNCT.

Sterbini, Cesare (*b* Rome, 1784; *d* Rome, 19 Jan 1831). Italian librettist. An official of the Vatican treasury and a poet, he was fluent in Greek, Latin, French and German. His first libretto *Paolo e Virginia* (set by Vincenzo Migliorucci, 1812) was written for the benefit night of the Mombelli sisters, and although described as a cantata it was evidently staged. He replaced Jacopo Ferretti as librettist for Rossini's *Torvaldo e Dorliska* (1815), producing a badly written and ill-organized libretto which failed to stimulate the composer. By contrast, *Almaviva*, also for Rossini (*Il barbiere di Siviglia*, 1816), was a sparkling and flawless text, and it is not to decry Sterbini's achievement to point out that Beaumarchais' comedy – on which it was based – itself had all the necessary elements for a comic opera. The rest of Sterbini's short career as librettist was undistinguished. Although his choice of subjects and handling of forms were sometimes forward-looking his texts tended to retain elements of Metastasian style; however, it is hard not to see the influence of Ferretti in this.

JOHN BLACK

Sterkel, Johann Franz Xaver (*b* Würzburg, 3 Dec 1750; *d* Würzburg, 12 Oct 1817). German composer, pianist and organist.

1. LIFE. His musical gift was evident at a young age; he had rigorous musical training from the court organist A. Kette and from Weismandel in Würzburg, where he entered the university in 1764. In 1768 he was tonsured and became organist in the collegiate chapter of Neumünster, later rising to sub-deacon (1772), deacon (1773) and finally priest (1774). His lifelong service to the church provided a subsistence without noticeably compromising his musical career.

As a result of a performance at the Würzburg court, Sterkel was invited to perform for the court at Mainz, noted for its orchestra and its active musical life. His trip included a visit to Mannheim, where Mozart heard him perform and condemned his excessive tempos (letter of 26 November 1777). Early in 1778 Sterkel was called to Mainz to fill a position in the Liebfrauen chapter and was named court chaplain as well. Late in 1779 Elector Friedrich Karl Joseph von Erthal sent Sterkel and his younger half-brother, the violinist F. Lehritter, on an extended tour of Italy. Sterkel, who had already published several sets of chamber sonatas, seems nevertheless to have gained much in his mature style from his extended exposure to Italian taste. He visited all the major cities of Italy, frequently performing as a pianist. For the Naples court he played duo sonatas and concertos with Lady Catherine Hamilton; the queen commissioned his only opera, *Il Farnace*, performed in an elaborate production with ballets at the S Carlo on 12 January 1782. Travelling north again in May, he spent several weeks with Padre Martini in Bologna, then was recalled to Mainz to fill a canonry of his chapter. He visited Stein's piano workshop in Augsburg en route and was thereafter an advocate and sometimes agent for Stein's instruments. In Mainz before the end of the year, he plunged into a period of intense music-making and composition.

Sterkel's well-known meeting with Beethoven, as reported by Simrock and Wegeler (see Schiedermair), occurred early in 1791. Sterkel played one of his own sonatas, accompanied by Andreas Romberg on the violin. Beethoven was reluctant to perform in turn, and was challenged to play his own demanding Righini variations, which had recently been published; he played those that he remembered and improvised additional ones, successfully imitating throughout the distinctive light, graceful performing style just displayed by Sterkel.

When the Mainz court was disrupted by the French invasion in October 1792, the director, Sterkel's brother-in-law Vincenzo Righini, was called to Berlin. On the regaining of Mainz, Sterkel was named Kapellmeister (1793) and charged with rebuilding the court music, but the war caused further difficulties and the royal chapel was disbanded in 1797. Except for a visit to Righini in Berlin, Sterkel spent the next years in Würzburg. The court there fostered mainly sacred performances, and he composed much church music, including several festival masses generally similar to those of Haydn from the same period. From about 1802 Sterkel was in Regensburg, where his unceasing efforts on behalf of the musical life brought accolades (*AMZ*, ix, 1806–7, col.502); he established a choir school to provide good vocalists and wrote most of his partsongs at that time. After his Regensburg patron, Karl Theodor von Dalberg, was made Grand Duke of Frankfurt, Sterkel followed him to Aschaffenburg in April 1810 and was appointed music director. Among other duties he was responsible for

theatrical productions, including performances of Mozart's *Die Zauberflöte* and *Die Entführung aus dem Serail*. When Aschaffenburg was annexed to Bavaria in 1814 the court was dissolved. In 1815 Sterkel visited Munich, then returned to Würzburg. Beethoven is said once to have called Sterkel the 'royal composer' (*Reichskomponist*), as his published dedications form a roster of the highest members of the nobility. Sterkel was also an effective teacher, whose pupils included the pianists C.P. Hoffmann, G.C. Zulehner, Catherina Bauer and T. Horgniés, and the singers E. Eck, L. Barensfeld, N. Häckel, J.C. Grünbaum and G. Weichselbaum.

2. WORKS. Sterkel was famed in his time as both a pianist and a composer. His output was voluminous, and the editions published in the Rhine valley (Mainz, Frankfurt and so on), especially of chamber music, were quickly reprinted in Paris, London and Vienna – cities where the population of musical amateurs had become sizeable. Notable among the works for unaccompanied piano are those for four hands and the collections of short pieces. The latter were regarded as among the best of the type (*AMZ*, iv, 1801–2, col.672). Sterkel's many sonatas are mostly for piano accompanied by violin or violin and cello. His handling of the duo relationship is flexible but after the first publications the violin is never dispensable. A contemporary reviewer singled out this feature: 'His violin accompaniments generally consist of passages of effect and such as give importance to the player' (*Magazin der Musik*, ii, Hamburg, 1783–6/*R*, 960). As with his contemporaries, the cello only gradually gained in prominence. Generally the piano parts are fluent and only moderately difficult. Several writers find the few chamber works of larger proportions – the string quintet and the piano quartet, a kind of chamber concerto – to be the most attractive for modern performance. Far fewer in number than the chamber works, but also of some interest, are the concertos, symphonies and overtures (see Gottron).

Sterkel has been regarded as one of the important composers in translating characteristics of the Mannheim style into keyboard chamber music, despite his tenuous connections with that school. Some contemporaries found the lyricism of his works more noteworthy: Burney (*Rees's Cyclopaedia*) remarked that 'he has not only collected all the vocal flowers of the greatest opera singers of the present times, but scattered them liberally through his works'. The lyricism and curiously prolix, loose-knit structure of many of his sonatas point towards Schubert and others. Sterkel's vocal works include Italian arias with orchestra, Italian songs and ensembles, and a series of lied collections. In some of the later lieder he succeeded in enriching the expressive contribution of the accompaniment.

Sterkel's prominence in the 18th century is suggested by two works: a compilation of lessons (sonatas) for piano published by John Relfe (London, 1786) including works by Haydn, Sterkel, Schobert, Kozeluch, Vanhal, Edelmann and the compiler; and Clementi's *Musical Characteristics* op.19 (1787) comprising 'Preludes' and 'Cadences' composed in the style of eminent keyboard composers – Sterkel, Haydn, Kozeluch, Mozart, Vanhal and Clementi himself. Along with Sterkel's success came frequent critical attack. His playing was described as effeminate (*damenartig*), his sonatas as not very learned and suitable only for ladies' diversion, and he was accused of being able to play only his own works. In part such criticism must be regarded in the light of the marked discrepancy between a southern more Italianate style and the more impassioned north German school centred on C.P.E. Bach. In any event Sterkel, through the example of his unique manner of performance, his impact on students and the widespread diffusion of his works, played a significant role in the early formation of pianistic style and the character of chamber music with piano.

WORKS

INSTRUMENTAL

thematic index of chamber music in DTB, xxviii, Jg.xvi, 1915

Orch: 4 syms., op.7 (Paris, 1782), 3 also as op.1 (Berlin, 1783); 4 syms., op.11 (Paris, 1786); 2 sinfonies périodiques, op.35 (Mainz, 1792); Sinfonia, B♭ (Mainz, 1792–4; Leipzig, *c*1809); 11 further syms., *CH-Bu*, *D-Rtt*; 6 pf concs.: 1 as op.20 (Mainz, 1785) [also as op.18], 3 as op.24 (Vienna), lost, 3 as op.26 (Mainz, 1788) [no.1 = op.20], 1 as op.31 (Mainz, 1789) [also as op.24], 1 as op.40 (Offenbach, 1792) [8 listed in Boyer catalogue (Paris, 1787)]; 4 ovs.: nos.1–2 (Leipzig, n.d.), no.3 lost, copy of no.4 owned by Gottron

RONALD R. KIDD

Stern (i). German family of printers and publishers. The bookbinder Johann Stern (*d* 1614) set up a printing and publishing business in Lüneburg, where it is still active. His sons Johann (*d* 1656) and Heinrich (1592–1665) established a branch at Wolfenbüttel which became one of the most important publishing concerns during the Thirty Years War; they received royal privileges and were ennobled in recognition of their achievements. The founder's grandson Johann (1633–1712) published particularly interesting imprints of H. Rist and his circle, including works by J.W. Franck, Friedrich Funcke, F.E. and J. Praetorius, Thomas Selle and J.J. Weiland.

THEODOR WOHNHAAS

Stern (ii) (Ger.). *See* ROSE.

Stern, Isaac (*b* Kremenets, 21 July 1920). American violinist of Ukrainian birth. When he was a year old he was taken to San Francisco. He studied at the San Francisco Conservatory (1928–31), then with Louis Persinger; from 1932 to 1937 he studied with Naoum Blinder, a violinist of the Russian school, and his principal teacher. He made his début in 1935 in recital and with the San Francisco SO under Monteux in 1936. In the same year he played with the Los Angeles PO under Klemperer. He made his New York début on 11 October 1937 but returned to San Francisco for further study. After his second New York recital on 18 February 1939 Stern quickly joined the front rank of American violinists. In the war years 1943–4 he played for Allied troops in Greenland, Iceland and the South Pacific.

Stern made his European début in 1948 at the Lucerne Festival under Münch and after that toured Europe regularly. He first played at the Casals Festival, Prades, in 1950 and at the Edinburgh Festival in 1953; he toured the USSR in 1956. He has also played in Australia, Japan, South America and Israel. From 1961 to 1984 he played in a trio with Eugene Istomin and Leonard Rose which received wide acclaim. For the Beethoven bicentenary the trio gave notable Beethoven programmes in London, Paris, New York and other centres. He has subsequently played in a piano quartet with Emmanuel Ax, Jaime Laredo and Yo-Yo Ma. Stern has played most of the great concertos from Bach to Bartók, the complete trios of Beethoven and Brahms as well as a chamber music series with Casals, and sonatas with his piano partner Alexander

Isaac Stern, 1979

Zakin. He has given the premières of concertos by William Schuman, George Rochberg, Penderecki, Dutilleux and Peter Maxwell Davies, as well as Bernstein's *Serenade*. He has also recorded soundtracks for films, such as *Humoresque* (1946), *Tonight we Sing*, in which he impersonated Ysaÿe (1953), and *Fiddler on the Roof* (1971). Stern has performed at the White House on several occasions, and in 1984 received a Kennedy Center Honor.

Stern is recognized as one of the world's foremost violinists. His distinctive style reflects his vibrant personality, total involvement in music and intense communication with his listeners. His interpretations are vital and exuberant, his tone warm and expressive. His feeling for style is impeccable; invariably he finds the right inflection to bring the music alive. His technique is subordinate to his musical concept. 'To use the violin to make music, never to use music just to play the violin' is his principle. Stern's favourite violins are two by Guarneri 'del Gesù', the so-called 'Vicomte de Panette' of 1737 and the one formerly played by Ysaÿe, made in 1740.

In 1960 Stern organized a group to save Carnegie Hall, and became president of the Carnegie Hall Corporation, responsible for the cultural programmes. In 1964 he helped to establish the National Endowment for the Arts, sponsored by the US Government, and was appointed a member of the advisory board by President Johnson. As chairman of the board of the America-Israel Cultural Foundation, he has played a vital role in aiding the careers of many young musicians. In 1981 Stern was invited to visit China; a film of the trip, *From Mao to Mozart: Isaac Stern in China*, received an Academy Award.

BORIS SCHWARZ/R

Stern, Julius (*b* Breslau, 8 Aug 1820; *d* Berlin, 27 Feb 1883). German conductor. After his early musical training under Maurer, Ganz and Rungenhagen in Berlin, and violin studies with Lüstner, he went to Dresden in 1843 to study singing and then to Paris, where he was conductor of the German Gesangverein; among the works he performed there was Mendelssohn's *Antigone*, which drew from the composer a characteristic letter (27 May 1844); Mendelssohn also commended Stern's songs. He returned to Berlin in 1846 and the next year founded the Sternscher Gesangverein, which he conducted until 1874. In 1850, with Kullak and Marx, he founded the Berliner Musikschule; notwithstanding the defection of Kullak in 1855 and Marx in 1857, the conservatory, known from 1857 as the Stern Conservatory, flourished to become one of the finest in Europe. Stern was also conductor of the Berlin Sinfonie-Kapelle (1869–71) and was responsible for the two seasons of the Reichsall concerts (1873–5). He published many vocal pieces and arrangements, an unperformed opera *Ismene* and some chamber works; his editions of singing exercises by Vaccai, Crescentini, Mazzoni and others were widely used.

GEORGE GROVE/MALCOLM MILLER

Stern, Leo(pold Lawrence) (*b* Brighton, 5 April 1862; *d* London, 10 Sept 1904). English cellist. His father, Leopold, was a German-born violinist and conductor of the Brighton Symphony Society; his mother, Annie, was a well-regarded English amateur pianist. In childhood he played the drum in his father's orchestra, but then took a chemistry degree and worked in Scotland until 1883. Maintaining cello as an avocation, he studied in London with Hugo Daubert. Lung disease necessitated a change of career and, after a trip abroad, Stern entered the Royal Academy of Music, studying under Pezze and Piatti. He then spent one year in Leipzig, taking lessons from Klengel and Davïdov. He returned to England in 1886 and began to give concerts, touring with Adelina Patti and then appearing with Sauret, Paderewski and Albani. Paris performances included concerts with Godard and Massenet. In 1891 he performed with Sarasate's pupil, Nellie Carpenter, whom he also married. They divorced and in 1898 he then married the American soprano Suzanne Adams.

Stern enjoyed great social success during the 1890s, and was engaged by Queen Victoria as Prince Henry of Battenberg's cello tutor. He was also chosen by the Philharmonic Society to give the 1896 London première of Dvořák's cello concerto when the composer's choice, Hanuš Wihan, was unavailable. To appease Dvořák, Stern prepared by studying the concerto under his tutelage in Prague; subsequent performances in Prague, Leipzig, and Berlin were at Dvořák's request. Stern then made North American tours in 1897 and 1898. His final years proved to be the apex of his wife's successful operatic career, while he performed less often, probably owing to unstable health. However, the *Musical Times* (1 Oct 1904) deemed his early death to be unexpected. Stern composed salon pieces for cello and vocal airs. He possessed two Stradivari instruments, being first presented with the large 'General Kyd' (1684), and then playing on the 'Baudiot' (1726) cello.

VALERIE WALDEN

Sternberg, Erich Walter (*b* Berlin, 31 May 1891; *d* Tel Aviv, 15 Dec 1974). Israeli composer of German birth. After graduating in law from Kiel University he turned to music in 1918, studying composition with Leichtentritt. Sternberg's expressionistic early works, which display the influence of Hindemith and Schoenberg, were well received in Berlin. His String Quartet no.2 was performed by the Amar Quartet and *Yishtabakh* ('Praise Ye') by the Berlin PO. Sternberg incorporated traditional Jewish elements into his dense polyphony, for instance his salient use of the augmented 2nd and cantilation motifs in the piano cycle *Visions from the East*, a programmatic work concerning the Jews of eastern Europe. In his String Quartet no.1 he quoted a Yiddish song, *Bei a teich* ('The River'), and the formula for the prayer *Shema Yisrael*. In 1925 Sternberg began to visit Palestine annually; his decision to migrate there in 1931 was marked by concerts of his works. He was the first of a wave of professional musicians who fled to Palestine in response to the deteriorating conditions in Germany. He assisted Huberman in founding the Palestine Orchestra in 1936 and promoted the Palestine section of the ISCM. Staying aloof from politics, he did not hold any regular academic teaching position. Sternberg never overcame the trauma of displacement from his German heritage. His resettlement found its compositional expression in the clear distinction he made between returning to nostalgic Romanticism in his large-scale orchestral works and the preservation of a more modern harmonic vocabulary in his piano and chamber compositions.

In his symphonic variations *Shneim-Asar Shivtei Yisrael* ('The Twelve Tribes of Israel', 1938), the first large-scale orchestral composition written in Palestine, he turned to the powerful rhetoric of late Romanticism influenced by Brahms, Reger and Richard Strauss. In an article published in *Musica hebraica* in 1938 Sternberg opposed the nationalist ideology prevailing among critics and composers such as Lavry. He demanded that the composer 'go his own way and speak his own language from within', with high professional standards as his only goal. Sternberg maintained the same vocabulary and attitude in his next large-scale set of symphonic variations *Yosef ve'Ehav* ('Joseph and his Brethren', 1939). Both works are dominated by strict contrapuntal devices which include complex fugues. In his more radical chamber and piano works Sternberg never abandoned tonal orientation. *Capriccio* for piano, a concise illustration of his style, displays a contrapuntal elaboration of two brief motifs in sonata-rondo form, with the movement's harmonic orientation stated by the two opening chords. Gradenwitz has noted that after 1940 'Sternberg began to turn back to his earlier scores . . . revising many and using material from others for new compositions'. Though

he composed and arranged many Israeli folksongs, his treatment of the folk idiom reveals the strong influence of Jöde's choral project and of the Gebrauchsmusik of Hindemith rather than that of the predominating folk ideology of searching for inspiration in Arabic and Mediterranean songs. For example, Sternberg's arrangement of *Horra kuma, echa* ('Rise up, Brother', 1935) by Shalom Postolsky is a set of six variations for seven-part chorus displaying contrapuntal and canonic textures, while his choral song *Ima Adama* ('Mother Earth') features richly chromatic and modal harmony. He received the Engel Prize for *Yishtabakh*. One of the founders of Israeli art music, Sternberg's reticent personality has contributed to the neglect of his works.

WORKS
(*selective list*)

Stage: Amcha [Your People] (incid music, S. Aleichem), 1936; Dr Doolittle (children's op, 3), 1937; Pacificia (op, 3, R. Hunter), 1974

JEHOASH HIRSHBERG

Sternberg, Jonathan (*b* New York, 27 July 1919). American conductor. After studying the violin as a child at the Institute of Musical Art (now the Juilliard School) in New York, Sternberg took an academic degree at New York University (1939), followed by studies in musicology at NYU Graduate School and Harvard. During his undergraduate years, he was active as a New York critic for the *Musical Leader* of Chicago; he also attended rehearsals of the National Orchestral Association conducted by Leon Barzin, from whom he acquired his conducting technique. Apart from two later private sessions with Barzin (1946) and two summers with Pierre Monteux (1946–7), he was self-taught.

Sternberg began his professional career on Pearl Harbor Day, 7 December 1941, conducting the National Youth Administration Orchestra of New York in Copland's *An Outdoor Overture*, before entering military service. At the end of the war he found himself in Shanghai where he took over the Shanghai SO for a season. After returning briefly to the USA, Sternberg moved to Vienna, making his debut with the Vienna SO in 1947. He worked closely with the Haydn scholar H.C. Robbins Landon, scouring the libraries, monasteries and churches of Austria for lost manuscripts, until Robbins Landon set up the Haydn Society, for which Sternberg made a series of pioneering recordings, initially of Haydn and Mozart, not least the 'Nelson Mass', 'Posthorn' Serenade and some dozen Haydn symphonies. Other recording premières under Sternberg included Schubert's Second Symphony, Rossini's *Stabat mater*, Prokofiev's Fifth Piano Concerto, Milhaud's *Fantaisie Pastorale* and Charles Ives's *Set of Pieces*.

He also began to present modern American music to European audiences that had heard little of such repertory. With the RIAS orchestra in Berlin he conducted the first European performances of a large number of American scores, including Bernstein's *Serenade*, Menotti's Violin Concerto and the Second Symphony of Charles Ives. With other orchestras, Sternberg conducted the first European performances of works by Barber, Copland, Diamond and Benjamin Lees. He was also responsible for a number of world premières, including Rorem's First Symphony (1951) and Lászlo Lajtha's Sixth (1961).

After a year at the helm of the Halifax SO (1957–8) and five as music director of the Royal Flemish Opera in Belgium (1961–6), he returned to the USA to take the position of music director and conductor of the Harkness Ballet of New York (1966–8). Sternberg was then appointed musical director of the Atlanta Opera and Ballet, opening the new Atlanta Memorial Arts Center with the American stage première of Purcell's *King Arthur*. After Atlanta he took up a visiting professorship of conducting at the Eastman School of Music in Rochester, New York. On leaving he took up a similar position at Temple University, Philadelphia, where he taught and conducted for 20 years. Here, too, he conducted a number of world premières, including *Music for Chamber Orchestra* by David Diamond (1976), *A Lincoln Address* and *Night Dances* by Vincent Persichetti (1977) and Stanisław Skrowaczewski's *Ricercari notturni* for three saxophones and orchestra (1978). In his 80s Sternberg was still active on the podium and as a lecturer.

MARTIN ANDERSON

Sterndale Bennett, William. *See* BENNETT, WILLIAM STERNDALE.

Sternefeld, Daniel (*b* Antwerp, 27 Nov 1905; *d* Ukkel, Brussels, 2 June 1986). Belgian conductor and composer. He studied the flute and theory at the Antwerp Conservatory (1918–24), later taking lessons in composition with Gilson and in conducting with van der Stucken (1928). In 1931–2 he pursued his conducting studies with Paumgartner, Krauss and Karajan in Salzburg. He joined the orchestra of the Royal Flemish Opera, Antwerp, as a flautist in 1929, and became second conductor in 1938 and principal conductor in 1944. In 1948 he left Antwerp to become second conductor of the Belgian RSO. After nine years he succeeded Franz André as its musical director in which post he remained until his retirement in 1971. He often appeared as a guest conductor in several European countries, in Israel, South Africa and the Americas. *Mathis der Maler* and *Peter Grimes* are among the many works whose Belgian premières he directed. He also gave conducting courses at the Antwerp Conservatory from 1948 until his retirement. The pressure of his conducting work forced him to give second place to composition, but the last 17 years of his life were devoted to composing. His work shows a clear evolution towards lyrical Expressionism, although it was aesthetically far

removed from the normal definition of Expressionism. One of his most admired composers was Stravinsky.

WORKS

Dramatic: Mater dolorosa (op, W. Gijssels, after H.C. Andersen), 1934, Antwerp, 21 Dec 1935; Pierlala, ballet, 1937; Salve Antverpia (ballet, J. Brabants), 1975; Heer Halewijn (F. Van Duyse), ballet-orat, spkr, Ct, mixed vv, orch, 1978; Het hemelbed, ballet, 1978; Rossiniazata, ballet, 1981; incid music for plays by W. Shakespeare, Sophocles, J. van den Vondel, Buckner and others; music for son et lumière at St Baaf Cathedral, Ghent, 1957

Orch: Sym. Variations, 1928; Elégie, 1931; Vlaamse en waalse volksliedern, suite, 1934; Sym. [no.1], C, 1943; Variations, brass, 1954; Sym. no.2 (Breughel-symfonie), 1983

CORNEEL MERTENS/DIANA VON VOLBORTH-DANYS

Sternfeld, F(rederick) W(illiam) (*b* Vienna, 25 Sept 1914; *d* Oxford, 13 Jan 1994). British musicologist of Austrian birth. At the University of Vienna from 1933 he was a pupil of Lach and Wellesz, but he also spent extended periods in England, studying with Dent at Cambridge. In 1938 he emigrated to the USA and completed the doctorate under Schrade at Yale University in 1943. He taught at Wesleyan University, Middletown (Connecticut), 1940–46, and Dartmouth College, Hanover, New Hampshire, 1946–56; in 1954 he held a Guggenheim Fellowship and the following year was a member of the Institute for Advanced Study at Princeton, New Jersey. In 1956 he moved to a lectureship at Oxford University and subsequently took British citizenship. He was made reader in the history of music at Oxford in 1972.

Sternfeld's chief writings ranged from the Renaissance to the 20th century, and other studies, lectures and editorial work also embraced the Middle Ages and antiquity. However, his concern for music in relation to the other arts and its place in cultural and intellectual history in general was especially characteristic. His doctoral dissertation was on Goethe and music, and he wrote on James Joyce and on film music. A long series of Shakespeare studies is headed by the classic *Music in Shakespearean Tragedy* (1963, 2/1967); and his interest in English drama and poetry also produced work on the lute-song and 17th-century masque and the revision (with David Greer) of Fellowes's *English Madrigal Verse* (3/1967). Decades of research into music in the *intermedio* and the early development of opera were encapsulated in *The Birth of Opera*, published the year before his death. He was a founder-editor of *Renaissance News*, editor (1957–62) of the *Proceedings of the Royal Musical Association* (of which association he became a vice-president in 1971), and his other editorial work includes the seventh volume of *The New Oxford History of Music* (with Egon Wellesz) and two volumes of a history of Western music. His breadth of interests also made him especially influential as a teacher. A list of his writings is included in the Festschrift *The Well Enchanting Skill: Music, Poetry and Drama in the Culture of the Renaissance: Essays in Honour of F. W. Sternfeld*, ed. J. Caldwell, E. Olleson and S. Wollenberg (Oxford and New York, 1990).

EDWARD OLLESON

Stertzing [Sterzing, Stürtzing, Stirzgen]. German family of organ builders. Although the place of birth of Georg Christoph Stertzing (*b* *c*1650; *d* Eisenach, 21 Nov 1717) is unknown, he was living in Ohrdruf until 1691 when he took over the maintenance of the organs in Eisenach. He gained renown with his instrument for St Georg, Eisenach (1697–1707), designed in consultation with Johann Christoph Bach, whose son J.N. Bach influenced the design of the organ at the Michaeliskirche, Jena (1706).

In 1701 Stertzing made a study trip to Magdeburg with financial support from the Eisenach municipality. He was highly regarded by his contemporaries, and is mentioned in Burney's travel diaries. He also built organs at Craula bei Wiegleben (1687); Berka an der Werra (1697); St Petri, Erfurt (1702–7; extant); the Michaeliskirche, Erfurt (1705–6); and Udestedt, near Erfurt (1710).

Stertzing's organs are characterized by 'gravity' of sound, with particularly rich bass notes; ranks range from 32′ to 1′. The façades tend to be two-dimensional, but the construction displays little relation to the *Werkprinzip* of the 17th century. Stertzing's specifications are typical of 18th-century Thuringian organs, including 8′ Viola di Gamba, 16′ Violonbass, Sesquialtera (more than one on larger organs) and Glockenspiel. In some instruments he included a Duiflöt (stopped wooden double flute).

Two sons of G.C. Stertzing, Johann Friedrich (*b* 1681, ?Ohrdruf; *d* Kassel, 30 March 1731), and Johann Georg (Christian) (*b* 1690), were organ builders. After spending his early career with his father in Eisenach, Johann Friedrich became court organ builder in Kassel in 1714, although he built few new organs in the Kassel region. His instrument in the Augustinerkirche, Erfurt (1714–5; completed by J.G. Schröter in 1716) and the restored instrument in the Martinskirche, Kassel (1730–1; finished by Nicolaus Becker in 1732) were later examined by J.S. Bach. Johann Friedrich's organs show an expansion in the use of 8′ registers, and also a particular liking for the Sesquialtera.

FELIX FRIEDRICH

Stesichorus (*b* ?Mataurus [now Marro], *c*610 BCE; *d* ?Catana [now Catania], Sicily, *c*535 BCE). Greek lyric poet. Uncertainty surrounds the traditional accounts of Stesichorus; his very name, 'marshal of the chorus', may have been a sobriquet. It seems clear that he came from the Greek cities at the southern tip of Italy, where the active musical life of Locri (Mataurus was founded by Locrians) probably influenced him. Both the Athenians and the Spartans performed his compositions. These works are transitional: Quintilian described him as 'sustaining the weightiness of epic poetry with the lyre' (*Institutio oratoria*, x.1.62). The content was epic, the form lyric. He employed a variety of dactylic rhythms, longer or more complex than the epic hexameter (Pseudo-Plutarch, *On Music*, 1132c, 1133f, 1135c, on the authority of Heraclides, Glaucus of Rhegium and Aristoxenus). Glaucus declared that Stesichorus imitated Olympus rather than Orpheus or Terpander and used the 'chariot nome'. This associates him doubly with the AULOS; no connection with the KITHARA appears in the fragments. One fragment (Campbell, frag.278), which contains a direct reference to the lyra, must be assigned to the later poet of the same name, victorious at Athens in 370 or 369 BCE (*Parian Chronicle*, 73). The likelihood of such a connection is nevertheless strong on a number of grounds. Stesichorus apparently held APOLLO in special regard, and he would have been free to choose either the aulos or the kithara for purposes of accompaniment.

The fragments include several lines from a version of the Orestes myth (Campbell, frags.211–12). They are cited by the scholiast on Aristophanes' *Peace*, 797ff – these lines are themselves taken in part from Stesichorus. The latter speaks of 'devising a Phrygian tune' (*melos*) for gentle spring songs in celebration of the Graces. Like Plato, he ignored current views concerning the ethos of the Phrygian mode. The evidence of papyri now indicates that several of his poems were epic in length. This weakens the usual assumption that Stesichorus was simply a choral poet; it supports the thesis (see West) that he composed and sang long monodies with kithara accompaniment. Possibly, as a transitional figure, he practised both types of composition.

The 10th-century Byzantine *Suda* contains a statement that the whole of Stesichorus's poetry displayed a triadic structure of strophe, antistrophe and epode. This claim, still repeated, has no basis either in the metrical schemes of the fragments or in early critical sources. There can be little doubt that the poems on erotic or romantic themes were the work of a later writer.

WARREN ANDERSON/THOMAS J. MATHIESEN

Stęszewski, Jan (Maria) (*b* Koźmin, nr Poznań, 20 April 1929). Polish musicologist. He studied with Adolf Chybiński, Marian Sobieski and Eugeniusz Frankowski at the University of Poznań (1948–52) and with Józef Chomiński at the Polish Academy of Sciences, taking the doctorate there in 1965 with a dissertation on songs from the Kurpie district. He gained the *Habilitation* from the University of Poznań in 1994. He was a research worker at the Institute of Polish Art at the Polish Academy of Sciences, Warsaw (1952–75), and subsequently became chairman (1975) and professor (1996) of the musicology department of the University of Poznań. He has also been a visiting lecturer in ethnomusicology at universities in Poland and Germany. He was president of the Polish Musicological Society (1969–71), the Union of Polish Composers (1969–73), and a board member of the IMS (1977–87). His chief interests are ethnomusicology, particularly Polish folklore, methodology and the interdisciplinarity of musicology, and the history of Polish music from the 17th century to the 20th. To mark his 70th birthday, 40 authors collaborated to produce the Festschrift *Context of Musicology* (Poznań, 1997).

ZYGMUNT M. SZWEYKOWSKI

Stetsenko, Kirill Grigor′yevich (*b* Kvitki, Chernigov province, 12/24 May 1882; *d* Veprik, Kiev province, 29 April 1922). Ukrainian composer and conductor. After attending the Kiev Spiritual Seminary, he studied at the Lysenko Music School (1904–7) and during these years he taught singing in schools. In 1909 he was transferred by the authorities to the town of Aleksandrovsk-Grushevsky in the Donbass region where he lived for a year; after his return to Kiev he taught at the conservatory where he was professor of the choral department (1917–20) and also established two choirs and an orchestra. In 1920 he went to the village of Veprik where he served as a priest. He made a large number of folksong arrangements for chorus and his own compositions rely predominantly on folk sources. His extensive legacy of choral works is regarded as significant contribution in developing the genre, and his sacred works are considered to be among the greatest achievements of Ukrainian church music. The themes and genres of his works are varied and range from the lyrical and epic to the heroic and patriotic (in the uncompleted operas). His romances (several of which are known throughout the Ukraine) show him to be a subtle lyricist and – perhaps surprisingly – a perceptive satirist, most notably in *Tsar′ gorokh* ('King of the Peas').

WORKS
(selective list)

Stage: Karmelyuk (op), inc.; Polonyanka [The Captive Girl] (op), inc.; Svantann′ya v Goncharivtsi [The Proposal at Goncharovka] (musical comedy); 2 children's ops
Sacred choral: 2 liturgies (1907, 1910); Kheruvimskiye pesni [Cherubic Hymns]; Panikhida [Funeral Service]; Vsenoshchnaya [All-Night Vigil]
5 cants. incl. Iphigenia, Prometey [Prometheus], Sodom [Uproar]

Secular choral: Zhivi, Ukraino [Long Live the Ukraine], anthem; Son [Sleep]; Tuchi [Stormclouds]; V put′ [On the Road]
Romances (1v, pf): Tsar′ gorokh [King of the Peas] (after P. de Béranger); Vechernyaya pesnya [Evening Song]

Incid music, folksong arrs.

Stettin (Ger.). *See* SZCZECIN.

Steuccius [Steucke], **Heinrich** (*b* Weissenfels, 12 Dec 1579; *d* Naumburg, 14 Sept 1645). German composer. He came

from an old-established Weissenfels family, and his father was both Kantor and town councillor there. Although primarily a student of philosophy and law at the universities of Leipzig and Wittenberg (in 1602 he stated that he had been studying for nearly eight years), he began composing early and by the age of 17 had dedicated a mass to the Weissenfels council. By the time his only collection of music appeared in 1602, he had already written 'all kinds of sacred pieces and motets, as well as secular songs'. However, only two motets are known to have been composed after this date. By 1613 he was in Naumburg as legal adviser to the cathedral foundation, and he continued to live there until his death. His *Amorum ac leporum* contains 97 pieces, 15 of them dances, the remainder German secular songs. It continues the line of similar publications by Harnisch, Mancinus and others. Although its contents cannot be said to reach the heights of, for example, H.L. Hassler's contributions to the tradition, they are not without importance. Occasionally, when inspired by a suitable text, he shed the foursquareness characteristic of the north German style and set the words with real effect. He sometimes showed a strong sense of form too. He was also conscious of key relationships and devised carefully worked-out modulatory schemes. The music is predominantly syllabic, but passages of closely imitative texture alternate with simple homophony without the essential simplicity of the genre being lost. The motets are for two choirs, though neither choir is treated as a separate entity; forceful homophonic writing contrasts with passages of flowing counterpoint.

WORKS

Amorum ac leporum, 4–6vv (Wittenberg, 1602–3) [3 vols.]; 5 songs in Vetter, ii
Omnes gentes plandite manibus, 8vv, bc, 1618[1]

A. LINDSEY KIRWAN

Steude, Wolfram (*b* Plauen, 20 Sept 1931). German musicologist. He studied at the Dresden Kirchenmusikschule (1950–52), the Leipzig Musikhochschule (1952–5) and at Leipzig University (1955–8), where he studied musicology with Besseler, Serauky, Wolff and Eller. He took the doctorate at Rostock in 1973 with a dissertation on 16th-century music manuscripts from central Germany and worked as a teacher and church musician in Leipzig and Dresden (from 1955) and as an assistant at the Sächsische Landesbibliothek, Dresden (from 1962); he also directed the Dresden Cappella Sagittariana, a group specializing in early Dresden music and using historic instruments (1972–90). In 1980 he was appointed assistant lecturer and custos at Musikhochschule, Dresden, where he founded the early music programme. He was made professor in 1993 and is an editor of the *Schütz-Jahrbuch*, to which he has frequently contributed. His chief area of research is musical life in central Germany from the 16th century to the 18th, concentrating particularly on the 16th century, Schütz and 17th-century music in Dresden, as well as the early career of Telemann. He has also been responsible for several performing editions, mainly of cantatas by Telemann, Schütz, Biber, Walther, Zachow, C.A. Jacobi and H.G. Reichard.

KONRAD KÜSTER

Steuerlein [Steurlein, Steurlin], **Johann** [Johannes] (*b* Schmalkalden, Thuringia, 5 July 1546; *d* Meiningen, 5 May 1613). German composer, organist and poet. From 1559 he attended the grammar school at Magdeburg, where the Kantor, Gallus Dressler, had recently inherited the flourishing musical tradition built up by Martin Agricola. In 1562 he entered the University of Wittenberg, at the same time earning his living as a chancery clerk at Burgbreitungen, not far from Schmalkalden. He may well have continued his studies on a part-time basis at Jena. From 1569 to 1589 he was town clerk, Kantor and organist at Wasungen, near Meiningen, where he wrote most of his works and where Melchior Vulpius was one of his pupils. From 1589 until his death he was chancellery secretary to the Elector of Saxony at Meiningen and as such was in 1604 also promoted to notary public and mayor of the town. In his old age he was crowned poet laureate. He ranks with the many central German composers of the late 16th century who through their use of a cantus firmus in the highest voice gave a popular yet still sophisticated flavour to German-language motets and polyphonic songs; in this he had much in common with the somewhat older Leonhard Schroeter and with his

contemporary Joachim a Burck. The works of all three were widely disseminated in their day.

Steuerlein's well-known six-part song *Das alte Jahr vergangen ist* was printed in 1577; probably only some of the verses are by him, and the melody now in use is an arrangement by W.C. Briegel printed in the Darmstadt hymnbook of 1687. His *St John Passion* is closely connected historically with Burck's *St John Passion* (*Die deutsche Passion*), the second edition of which had been published by the same printer three years earlier.

WORKS

Intereunt iusti, funeral motets for Count Poppo of Henneberg, 5vv (n.p., 1574)
Das schöne Christliche und sehr Tröstliche Gebetlein, 4–6vv (Erfurt, 1574)
Das deutsche Benedicite und Gratias vor und nach Tische, bethweiss zu singen, 5vv (? Erfurt, 1575)
Weltliche Gesänge, 4, 5vv (Erfurt, 1575), lost; some ed. G. Kraft (Wolfenbüttel, 1930)
21 geistliche Lieder ... zugerichtet durch L. Helmbold, 4vv (Erfurt, 1575; RISM, BVIII 1575[11])
Die deutsche Passion ... nach ... S. Johanne, in Figural Gesang, 4vv (n.p., 1576), inc.
Das alte Jahr vergangen ist, ein christlicher Gesangk, New Year motet, 5vv (Erfurt, 1577)
XXIIII Cantiones sacrae, 4–6vv (Erfurt, 1578)
[20] Epithalamia, Deutsche und Lateinische Geistliche Hochzeit gesang, 4–6vv (n.p., 1587; RISM BVIII 1587[19])
27 newe geistliche Gesange ... der lieben jugendt zu gut, 4vv (Erfurt, 1588; RISM BVIII 1588[17]); 2 ed. in C. von Winterfeld, *Der evangelische Kirchengesang*, i (Leipzig, 1843/R1966), 1 ed. in *Handbuch der deutschen evangelischen Kirchenmusik*, ii/1 (Göttingen, 1935)
Psalm CL, Laudate Dominum in sanctis eius ... ac adeiusdem cantilenae imitationem Missa, 4vv (Erfurt, 1588); MS copy in *GB-Lbl*, together with anon. frag. of antiphonal Passion probably by Steuerlein
8 cantiones sacrae, 5–6vv (Erfurt, 1589)
Erhalt uns Herr bei deinem Wort, 5vv (n.p., 1593)
2 christliche Muteten, 6vv (n.p., 1596)
Eteostichon rhythmicum ... Dn. Humpertus a Langen, 6vv (n.p., 1597)
Prosphonesis consolatoria: Non sis chare parens, 6vv (n.p., 1598)
Psalm cxvii auff dreyerley Weise, 4vv (Erfurt, 1599)
2 christliche Grabgesenge, 4vv (Schleusingen, 1612)
Das Deutsche Benedicite und Gratias ... am Tische zu singen, 4vv (Schleusingen, 1613)
Das alte Jahr vergangen ist, Der heilig geist von Himmel kam, 6vv, *D-Rp*
Declinatio vini: Vinum quae pars, 5vv (n.p., n.d.)
3 motets, 4vv, 1597[8]
20 fugae ex solmizandi exercitio (n.p., n.d.); repr. from C. Schneegass: Isagoges musicae libri duo (2/1596)
Vexilla regis, O crux ave, formerly *D-Rp*; ed. J. Seiler, *Laudate Dominum*, ii (Paderborn, 1871)
12 deutsche und lateinische Gesänge, 4, 5vv (Wittenberg, 1571), inc., probably by Steuerlein
Der LXVII. Psalm, 4vv (Erfurt, 1599), ?lost
Other inc. and lost works, see Kraft (1940)

WALTER BLANKENBURG

Steuermann, Edward [Eduard] (*b* Sambor, 18 June 1892; *d* New York, 11 Nov 1964). American pianist and composer of Polish birth. His education as a pianist was with Vilém Kurz (Lemberg) and Busoni (Berlin). He was to have studied composition with Humperdinck, but was so shocked when asked whether he wanted to compose in the Brahmsian or the Wagnerian manner that he never went back. Busoni, therefore, sent him to Schoenberg. In 1912 he took part in the first performance of *Pierrot lunaire*, and he played in the premières of most of Schoenberg's later works. He was the pianist for the Verein für Musikalische Privataufführungen, founded in 1918 by Schoenberg, and introduced works by Skryabin and much new French music to Vienna. During his Viennese years (he emigrated to the USA in 1938), he was often the pianist for Karl Kraus's readings and recitations. In 1952 the ISCM gave him its highest award, the Schoenberg medal.

He was an illuminating interpreter of the standard repertory, and his Beethoven recitals in New York in the early 1950s were, with their structural clarity and pianistic beauty, among the most remarkable events of that time. His distinguished teaching career began in Poland in 1918 and continued there, in Vienna, Prague, in the USA (he taught at the Juilliard School of Music from 1952 until his death), Israel, Darmstadt, the Salzburg Mozarteum and Dartington Hall. His pupils included Theodor W. Adorno, Alfred Brendel, Jakob Gimpel, Natalie Hinderas, Lorin Hollander, Joseph Kalichstein, Lili Kraus, Moura Lympany and Russell Sherman.

Steuermann composed songs and choruses, music for solo piano, chamber works including Seven Waltzes for String Quartet (1946), a piano trio (1954), a string quartet, *Diary* (1961), and pieces for orchestra, among them a set of Variations (1958) and a Suite for Chamber Orchestra (1964). Some freely atonal, some serial, they are of economical, fastidious workmanship, imbued always with a keen feeling for instrumental style and sonority, and bearing, in their sensuousness, traces of his involvement with Debussy and Skryabin. Pianistic fantasy is evident also in his bravura transcription for solo piano of Schoenberg's Chamber Symphony op.9 and in his version for three pianos of Schubert's *Wohin?*

MICHAEL STEINBERG/R

Stevens, Bernard (George) (*b* London, 2 March 1916; *d* Colchester, 6 Jan 1983). English composer. Educated at Southend High School, where he was taught music by Arthur Hutchings, he then studied English and, with Dent and Rootham, music at Cambridge (1934–7; MusD 1968). Subsequently he studied with R.O. Morris and Jacob at the RCM (1937–40). His op.1, a violin sonata in the economical three-movements-in-one design Stevens was often to employ, attracted the attention of Max Rostal when Stevens's fiancée became his pupil in 1940. Rostal performed the sonata and commissioned a violin concerto, which Stevens wrote while on army service. Already, during the Blitz, he had started composing the piece which brought him brief national celebrity: the *Symphony of Liberation*, which won the *Daily Express* competition for a 'victory symphony'. Sargent conducted the LPO in the première at the Royal Albert Hall (7 June 1946); the same year Rostal gave the first performance of the Violin Concerto in a BBC broadcast.

These early successes were not sustained, and though Stevens continued to compose steadily his most important

works were comparatively rarely performed. This was partly due to his Marxist affiliations. Insofar as the *Symphony of Liberation*, dedicated to the memory of a friend killed in 1944, has any programmatic content it could apply as well to a social revolution against oppression as to victory in war. Although he resigned from the Communist party at the Soviet suppression of the 1956 Hungarian uprising, Stevens remained committed to left-wing causes, along with his fellow artists and friends Alan Bush, Randall Swingler and Montague Slater. Such an attitude brought him into conflict with the British musical establishment. His music, too, which represented a highly individual championship of traditional forms and values, came to seem out of joint with the stylistic fashions of the 1960s and 70s.

Never a self-advertising composer, Stevens was especially renowned as a distinguished and open-minded teacher at the RCM (professor of composition from 1948) and the University of London (from 1967). He believed that any inspiration must be expressed through the fullest possible technical command and craftsmanship, which manifested above all in his complete mastery of counterpoint for expressive ends. Bloch, Shostakovich, Bush and Rubbra were all composers he admired and from whose music he drew elements, though he once said he felt closest to Busoni. He took inspiration, too, from such Elizabethans as Dowland and Farnaby, whose freedom of form he emulated in several fantasia-like musical designs (for example, the Fantasia for 2 violins and piano). Although Stevens's music was essentially diatonic in foundation his interest in Schoenbergian serial technique went back to the 1930s. In the early 1960s he employed 12-note principles in a very personal fashion in three of his most substantial works – a symphony, a string quartet and the Variations for orchestra – whose series are fashioned to supply triads, scalic segments, leading notes and other elements of tonal vocabulary. Towards the end of his life he explored new methods of tonal organization involving correspondence with the I Ching.

Whether in sophisticated compositions or in the simple, direct unison songs he wrote for the Workers' Musical Association, Stevens's voice is always distinctive. He was capable of a trenchant concision of utterance, a rhythmic dynamism and sustained, unsentimental lyricism. Though his principal concern was with constructive power and the purposeful, organic growth of musical ideas, he chose his themes with consideration for their potential development. Stevens's music's strength of purpose and imperviousness to fashion may now appear to display the force of an ethical standard.

WORKS
(*selective list*)

Dramatic: The Mark of Cain (film score, dir. B.D. Hurst), 1947; The Upturned Glass (film score, dir. L. Huntington), 1947; The Shadow of the Glen (chbr op, 1, J.M. Synge), op.50, 1979, BBC, 1983

MALCOLM MACDONALD

Stevens, Denis (William) (*b* High Wycombe, 2 March 1922). English musicologist. He studied music at Jesus College, Oxford, with R.O. Morris, Wellesz and Hugh Allen (1940–42, 1946–9, MA 1947). After war service in India and Burma he was a violinist and violist in the Philharmonia Orchestra and in chamber music groups (1946–9). On joining the BBC Music Department as a programme planner and producer (1949–54) he worked principally on early music and mounted programmes on Machaut, Du Fay, Dunstaple, Tallis and Monteverdi and important radio opera productions such as Monteverdi's *Orfeo* and Charpentier's *Médée*. He also provided appropriate music for drama productions at the BBC and elsewhere (e.g. the York Mystery Plays, 1954, 1957). During the Dunstaple quincentenary (1955) he toured Italy as a British Council lecturer; subsequently he was visiting professor of music at Cornell University (1955) and Columbia University (1956). After a year's teaching at the RAM, London, he took over on Eric Blom's death the editing of the supplement to *Grove's Dictionary*, fifth edition. He then returned to the USA as visiting professor at the University of California, Berkeley (1962) and Distinguished Visiting Professor at the Pennsylvania State University (1963–4), and was appointed professor of musicology at Columbia University (1965); he was visiting professor at the University of California, Santa Barbara

(1974) and was appointed to the Brechemin Distinguished Chair of Music History at the University of Washington at Seattle (1976–7). In 1995 he became visiting professor at Goldsmiths College, University of London.

Stevens is a co-founder of the Ambrosian Singers and president and artistic director of the Accademia Monteverdiana, chamber ensembles specializing in early as well as contemporary music. He has toured throughout Europe and the USA and made (by 1975) about 55 records. His main areas of research are medieval, Renaissance and Baroque music and his major critical works are his book *Tudor Church Music*, his monograph on Thomas Tomkins and *A History of Song*; his many critical editions include works by Machaut and Monteverdi and two important collections, *The Mulliner Book* and *Early Tudor Organ Music*. He is a fellow of the Society of Antiquaries (1957), a past secretary of the Plainsong and Mediaeval Music Society, an honorary member of the RAM (1961) and a member of the Worshipful Company of Musicians (1961). He received an honorary degree from Fairfield University, Connecticut in 1967 and was made a CBE in 1984.

A professionally trained violinist, Stevens has always insisted on a close connection between research, editorial activity and performance. As a historian he has dealt with a wide range of music in a thoroughly scholarly yet accessible manner.

□

Stevens, George (*b* Norway, ME, 22 April 1803; *d* East Cambridge, MA, 15 Aug 1894). American organ builder. He went to the Boston area as a young man, and worked first as a carpenter, then as a journeyman with William Goodrich, whom he succeeded in 1833. His brother William Stevens (1808–96) worked with him for a time, but later went into business on his own (though never on as large a scale as George). Stevens broke little new ground, but produced over his long career a great number of sturdy small- and medium-sized organs with a pleasing tone. These he sold for moderate prices, and many still survive in rural New England. One of his largest organs was built in 1852 for a church in Charlestown, Massachusetts. A good businessman, he was also president of the

Cambridge Savings Bank for 30 years, and Mayor of Cambridge, 1851–2. After retirement in 1892 he was succeeded by George Gilbert and James Butler, former employees, who remained in business until 1902.

BARBARA OWEN

Stevens, Halsey (*b* Scott, NY, 3 Dec 1908; *d* Inglewood, CA, 20 Jan 1989). American composer, musicologist and teacher. He studied composition with William Berwald at Syracuse University (BM 1931, MM 1937, honorary LittD 1967) and with Bloch at the University of California, Berkeley (1944). He taught at Syracuse University (1935–7), Dakota Wesleyan University (1937–44), the College of Music, Bradley Polytechnic Institute (1941–6) and the University of Redlands (1946–7). In 1948 he gained a post at the University of Southern California, Los Angeles, later becoming professor emeritus. Visiting professor at Yale University (1960–61) and at Williams College (1970), he lectured widely on the problems of modern music. A Guggenheim Fellow in 1964 and 1971, he received many awards and commissions for his music. Stevens is a noted authority on the music of Bartók, on whom he wrote the standard critical biography in English (1953, 2/1964), and many articles and reviews.

A prolific composer, Stevens wrote for a great variety of instrumental and vocal combinations. His music is notable for its vigorous rhythm, firm tonal centres, supple melodic contours and command of timbral relations. In *Symphonic Dances*, chromatically coloured neo-classical tonality and complex thematic transformations are firmly deployed within a large musical structure. The Clarinet Concerto uses similar means to achieve an open textural setting for the solo instrument. His many chamber works exhibit scrupulous control of texture and proportion.

RICHARD SWIFT

Stevens, John (Edgar) (*b* London, 8 Oct 1921). English musicologist. He studied at Christ's Hospital and won a classics scholarship to Magdalene College, Cambridge, where he read classics (1940–41) and English (1946–8; BA 1948). His research began in 1948 under the supervision of Thurston Dart (PhD 1953); in 1950 he was elected into a bye-fellowship, and later to a research fellowship, at Magdalene. He was appointed a university lecturer in English in 1952, was elected into an official fellowship at Magdalene in 1958, and in 1974 was appointed university reader in English and music history. He became professor of medieval and Renaissance English in 1978, and in 1980 he was appointed CBE. In 1989 he was Distinguished Visiting Professor at the University of California, Berkeley, and in 1991 he was appointed as Leverhulme Emeritus Fellow.

Stevens's main musicological preoccupations in the 1950s and 60s were a direct outgrowth of his doctoral work on early Tudor song, which provided the basis for his distinguished book *Music and Poetry in the Early Tudor Court* (1961), the pioneering and standard discussion of the subject. For Musica Britannica he has produced critical editions of the three principal manuscript sources

of the Tudor song repertory and a standard edition of 15th-century English carols. Although his work has broadened in scope during recent years, it continues to be primarily concerned with the relationships between words and music in both Britain and Western Europe, and in narrative poetry as well as in song. These issues are addressed in *Words and Music in the Middle Ages* (1986). His later work concerns the trilingual repertory of song in early medieval England.

Stevens, Leith (*b* Mount Moriah, MO, 1909; *d* Los Angeles, 1970). American composer. A child prodigy, he became a professional pianist at 14 and a professional conductor and musical director for a ballet company at 16. After winning a Juilliard Foundation Fellowship, he moved to the East Coast in 1927, and by 1930 he was a vocal arranger for CBS. From 1933 to 1941 he worked on several radio shows, including those of Fred Allen and Abbott and Costello. During World War II he was radio director for the Southwest-Pacific area of the Office of War Information.

After the war Stevens went to Hollywood, where in 1948 he became the guest conductor of the Hollywood Bowl Orchestra. In 1950 he became musical director for Paramount, a post he retained until his death. He was one of the founders and the first president of the Composers and Lyricists Guild of America (1960) and was on the faculty at UCLA, where he taught film composition. He received three Academy Award nominations, for *The Five Pennies* (1959), *A New Kind of Love* (1963) and *Julie* (1956).

Stevens wrote scores for over 100 films as well as for television. His first film score, for William Dieterle's *Syncopation* (1942), included *American Rhapsody*, which was later performed as a concert piece. His Piano Concerto, composed for John Cromwell's *Night Song* (1947), was performed in the film by Artur Rubinstein and the New York PO under Ormandy. In 1954 Stevens wrote what is believed to be the first jazz score for a feature film, for Laslo Benedek's *The Wild One*. His interest in jazz also found expression in scores for films about the cornettist Red Nichols (*The Five Pennies*, 1959) and the drummer Gene Krupa (*The Gene Krupa Story*, 1959). He produced successful scores for a number of popular television shows, including 'Daniel Boone' (1964) and 'Mission: Impossible' (1966).

WORKS
(*selective list*)

Film scores (directors' names in parentheses): Syncopation (W. Dieterle), 1942; Night Song (J. Cromwell), 1947; Destination Moon (I. Pichel), 1950; The Sun Sets at Dawn (P.M. Sloane), 1950; Navajo (L.R. Foster), 1951; When Worlds Collide (R. Maté), 1951; The Atomic City (J. Hopper), 1952; The War of the Worlds (B. Haskin), 1953; The Wild One (L. Benedek), 1954; The Treasure of Pancho Villa (G. Sherman), 1955; Julie (A. Stone), 1956; The Scarlet Hour (M. Curtiz), 1956; The Garment Jungle (V. Sherman), 1957; The James Dean Story (G.W. George, R. Altman), 1957; Seven Guns to Mesa (E. Dein), 1958; The Gun Runners (D. Siegel), 1958; The Five Pennies (M. Shavelson), 1959; The Gene Krupa Story (D. Weis), 1959; Hell to Eternity (P. Karlson), 1960; A New Kind of Love (Shavelson), 1963; It Happened at the World's Fair (N. Taurog), 1963; The Night of the Grizzly (J. Pevney), 1966; over 70 others

TV scores: Daniel Boone, 1964; Voyage to the Bottom of the Sea, 1964; Mission: Impossible, 1966; Custer, 1967; The Young Lawyers, 1970; The Immortal, 1970; Assault on the Wayne, 1971

MARK BRILL

Stevens, Richard John Samuel (*b* London, 27 March 1757; *d* Peckham, nr London, 23 Sept 1837). English composer and organist. His father, John Stevens, was in the textile trade. By 1763 he was a chorister at St Paul's Cathedral, and on 15 December 1768 he was apprenticed for seven years to William Savage, Master of the Children at St Paul's. After several years as a freelance glee singer, organist, school teacher and composer, he was in 1781 elected organist of St Michael Cornhill, at a salary of £40. This was followed by appointments as organist of the Inner Temple (1786) and of the Charterhouse (1796), in each case with some assistance from the Lord Chancellor, Lord Thurlow, who had become his friend and patron.

Another supporter was Samuel Birch, alderman and later Lord Mayor of London, by whose influence Stevens in 1801 was appointed Gresham Professor of Music. In this office he gave lectures on music at the Royal Exchange for many years; the lectures survive in 48 notebooks (*GB-Lgc*). In 1808 he received yet another appointment, as music master at Christ's Hospital. Besides being valuable in themselves, these appointments helped him to attract the wealthy pupils on whom his living substantially depended: his income reached a peak of £1286 in 1805.

In 1810 Stevens married Anna Jeffery, after a long courtship; in 1811 they had a son, Richard George, who entered Gray's Inn in 1834. At his wife's family's request he gave up his pluralistic appointments, retaining only the Gresham professorship and the Charterhouse position. He embarked on the life of a gentleman of leisure, made possible by a substantial bequest from one of his father's friends in 1817. He gradually assembled a considerable collection of old music, with an emphasis on Italian music of the 17th and 18th centuries; much of it is now in the Royal Academy of Music. His three-volume edition, *Sacred Music ... from the Works of the Most Esteemed Composers, Italian and English*, was published from about 1798 to 1802. He was one of the judges of the Gresham Prize for sacred music from its inception in 1831.

Stevens's chief claim to attention is as a composer of glees. He was not prolific, considering the length of his life; the bulk of his composing was done between 1780 and 1800. His glees are among the most polished of their time, at their best rising to the level of Webbe and Callcott. They are not in the 'pure' style of the older glee, but begin to show the influence of instrumental music, especially that of Haydn, whom he admired greatly. The result often approached the later partsong in style, with the melody in the uppermost voice, straightforward harmony, little counterpoint, and a structure that was often close to sonata form. He was innovative in his use of female voices and variety of instrumental accompaniment. Stevens was more careful than many contemporaries in his choice of texts, and devoted special attention to Shakespeare. Of his 15 Shakespearean glees, composed between 1782 and 1807, five are among his best-known pieces: *Ye spotted snakes* (1782, rev. 1791), *Sigh no more, ladies* (1787), *Crabbed age and youth* (1790), *Blow, blow, thou winter wind* (1793) and *The cloud-cap't towers*(1795). As Cudworth has pointed out, the word-setting in these pieces is 'very apt for the period, for Stevens came from a family which loved good literature and particularly good poetry'. The music is relatively restrained in its emotional response to the text.

Among Stevens's compositions that did not outlive him were some anthems, including several for Christ's Hospital; three keyboard sonatas; and a few songs and hymn tunes. He kept a journal for much of his life, and also wrote recollections (now in *GB-Cpl*, *GB-Cu*). Stevens was a professional member of the Noblemen's and Gentlemen's Catch Club, and his papers give a vivid account of the life of this and other musical organizations, including the Je Ne Sais Quoi Club, the Glee Club, the Harmonists' Society and the Anacreontic Society. His account of the latter is particularly significant because it is the only source to identify John Stafford Smith as the composer of their club song *The Anacreontic Song*, which, considerably altered and with new words, is now the national anthem of the USA, *The Star Spangled Banner*.

WORKS

printed works published in London

The Captivity (orat), *GB-Cfm*

Glees: 8 Glees, 4–5vv, op.3 (1792); 8 Glees Expressly Composed for the Ladies, op.4 (1796); 10 Glees, 3–6vv, op.5 (1800); 7 Glees with a Witches' Song and Chorus, and 2 Glees from Melodies by H. Lawes, op.6 (1808); 16 pubd separately (*c*1783–*c*1811); others, *Cfm*

Songs: 10 Songs, 1v, 2 vn, pf, op.2 (1787); 6 pubd separately; others, *Cfm*

NICHOLAS TEMPERLEY, MARK ARGENT

Stevens [Steenberg], **Risë** (*b* New York, 11 June 1913). American mezzo-soprano of Norwegian origin. She sang with the New York Opera-Comique before becoming a pupil of Anna Schoen-René. Approached by the Metropolitan, she declined and sailed for Europe to study with Marie Gutheil-Schoder. She then made her formal operatic début in Prague in 1936 as Thomas' Mignon; she also sang with the Vienna Staatsoper and in Buenos Aires. Returning to the USA, she made her début with the Metropolitan on tour in Philadelphia in 1938 as Octavian, appearing a month later in New York as Mignon. She remained with the company until 1961 but also sang with other companies (including Glyndebourne in 1939 and, as Cherubino, 1955). Her warm, lyric voice can be heard on studio and off-the-air recordings of her Cherubino, Carmen, Mignon, Delilah and Octavian.

MAX DE SCHAUENSEE/ALAN BLYTH

Stevens, Wallace (*b* Reading, PA, 2 Oct 1879; *d* Hartford, CT, 2 Aug 1955). American poet. He studied at Harvard and spent his career in law and insurance. Known as a writer of exquisite language and fastidious craftsmanship, Stevens published 11 books of poetry, three plays and several miscellaneous items.

Music played a large role in Stevens's life and work. His titles often project a musical image or subject, as evidenced in his first book of poetry, *Harmonium* (1923), as well as the well-known poems *Peter Quince at the Clavier* and *The Man with the Blue Guitar*. As a young man Stevens played the piano, harmonium and guitar, and sang bass in a quartet. Over 50 of his poems have been set to music. *Thirteen Ways of Looking at a Blackbird* has been the most popular with composers, with settings by Allan Blank, Foss, Glanville-Hicks and Vincent Persichetti as well as Blacher. Persichetti set over 20 of Stevens's poems, some of them in song cycles. Other composers drawn to his work include Argento, George Benjamin, Connolly, Hoiby, Robin Holloway, Lybbert, Roger Reynolds, Rorem, Westergaard and Edgar Warren Willams.

J.M. EDELSTEIN

Stevenson, Sir **John (Andrew)** (*b* Dublin, Nov 1761; *d* Kells, Co. Meath, 14 Sept 1833). Irish composer. His father was John Stevenson, a violinist in the State Band in Dublin. In 1771 he was admitted a chorister of Christ Church Cathedral, Dublin, and from 1775 to 1780 he was in the choir of St Patrick's Cathedral. He became a vicar-choral of St Patrick's in 1783 and of Christ Church in 1800. He obtained an honorary MusD at Dublin in 1791, and his knighthood from the Lord Lieutenant (Lord Hardwicke) in 1803. In 1814 he was appointed the first organist and musical director at the Castle Chapel. Stevenson composed music for several theatrical productions in Dublin and London, and contributed songs to several more. He also wrote some church music, and innumerable separate songs, duets, glees and catches. But he is best known for his 'symphonies and accompaniments' to Thomas Moore's collection of Irish melodies, in which he showed himself a follower of Haydn. Although his arrangements seem today much too elaborate for the tunes they were intended to enhance, they remained extremely popular in the second half of the 19th century.

WORKS

STAGE

all printed music (vocal scores) published in London; unless otherwise indicated, all first performed in Dublin.

The Contract (comic op, R. Houlton), Smock Alley, 14 May 1782, lib pubd; rev. as The Double Stratagem, Capel Street, 20 May 1784; collab. P. Cogan

Love in a Blaze (comic op, J. Atkinson, after J. de Lafont: *Le naufrage*), Crow Street, 29 May 1799, lib pubd; collab. Cogan

The Bedouins, or The Arabs of the Desert (comic op, 3, E. Irwin), Crow Street, 1 May 1801 (*c*1811), lib pubd

The Patriot, or The Hermit of Saxellen (melodrama, H.B. Code), Hibernian, 1811 (*c*1811), lib pubd

Border Feuds, or The Lady of Bucchleuch (musical play, 3, after W. Scott: *The Lay of the Last Minstrel*), 1811 (*c*1811), lib pubd

The Spanish Patriots, or A Thousand Years Ago (dramatic romance, Code), London, Lyceum, 22 Sept 1812 (*c*1812), lib pubd

The Russian Sacrifice, or The Burning of Moscow (play, Code), 1813 (*c*1813), lib pubd

Edwin and Angelina (after O. Goldsmith), 1815, collab. J. Clifton

The Cavern, or The Outlaws (comic op, S. Isdell), Hawkins Street, 22 April 1825

Additional songs for 3 operatic farces by J. O'Keeffe: The Son-in-Law, 1781, The Dead Alive, 1781, The Agreeable Surprise, 1782; *see* ARNOLD, SAMUEL

Additional songs for ?Shadwell's Psyche; for J. Kenney's False Alarms, London, Drury Lane, 1807, *see* ADDISON, JOHN (i); for Kenney's Benyowsky, Drury Lane, 1826, *see* COOKE, THOMAS SIMPSON

VOCAL

12 Canzonets, 1v, pf/hpd/harp acc., op.4 (Dublin, *c*1780)

12 Glees, 3–5vv (Dublin, *c*1785)

Morning, Noon, Evening & Night, 4 Ballads, 1v, hpd/pf acc., op.4 (London, *c*1793)

8 Songs & 4 Duetts, pf/hpd acc. (Dublin, *c*1794)

A Second Sett of 12 Glees, 3–5vv, op.5 (London, *c*1795)

Morning and Evening Services and Anthems (London, 1825)

Parodies on Popular Songs (London, 1826)

Thanksgiving (orat), Dublin Musical Festival, 1831

W.H. HUSK/W.H. GRATTAN FLOOD/BRUCE CARR

Stevenson, Robert (*fl* Chester, *c*1570–1600). English organist and composer. From Michaelmas to Christmas 1571 he received six months' salary as Master of the Choristers of Chester Cathedral. He probably succeeded Robert White sometime between 1568 and 1571. Between 1571 and 1596 he was paid unusually large sums for his work as copyist, which suggests that he was establishing a new repertory for the choir. The cathedral records for 1597 to 1600 are lacking, and in those for 1601 Stevenson's name is replaced by that of Thomas Bateson. In 1583 he supplicated for the degree of BMus at Oxford. The degree was awarded in 1587, Stevenson having then been a 'student of music' for 33 years. He took the DMus from Oxford in 1596. His extant compositions include an instrumental *Miserere* (*GB-Lbl* Add.18936–9), a Whole Service and two anthems, *Behold how good and joyful* and *When the Lord turned again* (*GB-Cp*, *DRc*, *Lbl*, *Y*), the second of which is an early example of the provincial verse anthem.

PETER LE HURAY/JOHN MOREHEN

Stevenson, Robert M(urrell) (*b* Melrose, NM, 3 July 1916). American musicologist. He studied music at the University of Texas at El Paso (BA 1936), the Juilliard School of Music (graduated 1939), Yale University (MM) and the University of Rochester (PhD in composition 1942); further study took him to Harvard University (STB 1943), Princeton Theological Seminary (ThM 1949) and Oxford University (BLitt 1954). His teachers included Schrade and Westrup (musicology), Hutcheson and Schnabel (piano), and Hanson and Stravinsky (composition). After working as an instructor and assistant professor at the University of Texas (1941–3, 1946) and as a staff member of Westminster Choir College, Princeton, New Jersey (1946–9), he was appointed professor of musicology at UCLA (1949), from which he retired in the 1990s, after almost half a century of teaching. A number of highly successful American and Latin American scholars were trained by him. He has received numerous grants, awards and recognitions, among them the Gabriela Mistral prize (1985) and the Award of the Lifetime Achievement Citation by the Sonneck Society for American Music (1999).

Stevenson's chief interest has been Latin American colonial music, in which his work is outstanding; in his archival research in Mexico, Guatemala, Colombia, Ecuador, Peru, Bolivia and Chile, he was the first to discover essential documents for the reconstruction of cathedral music history, and to make known many colonial music manuscripts. He has also contributed substantially to the history of Spanish music and of American church music. His extensive publications reveal an impressive command of bibliographical tools and of the literature. *The Music of Peru* (1960), *Renaissance and Baroque Musical Sources in the Americas* (1970) and *Foundations of New World Opera* (1973) provide new information and understanding for a wealth of Latin American colonial music; *Spanish Music in the Age of Columbus* (1960) and *Spanish Cathedral Music in the Golden Age* (1961) give valuable accounts of a much neglected aspect of Renaissance music. In 1978 he founded and became editor of the *Inter-American Music Review*. Robert Stevenson has been one of the most prolific American musicologists of the 20th century in American, Iberian and Latin American musical studies. Excluding the several hundred dictionary and encyclopedia articles, his output numbers some 30 books, monographs and musical editions and almost 300 articles on Spanish, Portuguese and North and Latin American music, in addition to numerous articles on various topics of West European music.

GERARD BÉHAGUE

Stevenson, Ronald (*b* Blackburn, 6 March 1928). Scottish composer, pianist and writer on music. Son of a railway fireman (of Scots descent) and a mill-worker (of Welsh), his gifts were evident in childhood. Composer and accompanist for the Blackburn Ballet Company at the age of 14, he studied the piano with Iso Elinson at the RNCM, on an open scholarship (1945–7). In 1948 he was imprisoned for a year as a conscientious objector to national service, before finishing the sentence in agricultural and labouring work.

Stevenson taught at Boldon Colliery School, Durham, during 1950–52; the next decade – except for study at the Conservatorio di S Cecilia, Rome (1955) – he spent in various Edinburgh schools, settling in the borders village of West Linton in 1956. He was senior lecturer in composition at the University of Cape Town during 1963–5, where he gave the première of his huge *Passacaglia on DSCH* (the subject derives from the initials of the dedicatee, Shostakovich). Its subsequent performances by Stevenson and his friend John Ogdon (who also recorded it) attracted widespread attention.

Returning to Scotland, Stevenson concentrated on composition, piano-playing, writing, and frequent BBC broadcasts as lecturer and performer. His centenary radio programmes on Busoni earned a Harriet Cohen International Music Award in 1967. He was guest speaker at the Fourth Congress of Soviet Composers in 1968, gave the first performance of his song-cycle *Border Boyhood* with Peter Pears at the 1971 Aldeburgh Festival, and introduced his Piano Concerto no.2 at the 1972 Proms. He has travelled worldwide as pianist and lecturer, as advocate not only of his own music but of Busoni, Grainger and Paderewski in particular.

As a performer Stevenson is notable for his imaginative programming, wide repertory, beauty of tone and melodic articulation, expansive dynamic range and creatively-applied rubato in the tradition of Paderewski. During 1987 he took seminars in piano literature at the Juilliard School in New York, and directed a course on 'the political piano' at York University. He has been much concerned with the development of music for amateurs and young musicians. A Ronald Stevenson Society, established in 1994 to disseminate knowledge of his large output and ideas, holds an annual summer-school for young pianists and performers at Garvald, Peeblesshire.

Initiated by his father's tenor singing into a lifelong respect for the human voice and lyric melody, Stevenson's compositional development was exponentially enriched by his discovery of Busoni. Researches for a massive biographico-musical study of the composer—as yet unpublished—brought contact with Busoni's widow Gerda and significant, influential correspondence with Grainger and the theatre director and designer Edward Gordon Craig. A 20-year friendship with the poet Hugh MacDiarmid was equally vital. Like these artists Stevenson's cast of mind is epic and inclusive. It simultaneously draws inspiration from the folk music of many countries and uses the most sophisticated Western techniques.

The earliest works reveal a natural polyphonist, instinctively developing the 'symmetrical counterpoint' propounded by Berhard Ziehn which inspired Busoni's *Fantasia Contrappuntistica*. Many pieces are fugal in form, or sets of variations containing fugues; he has also absorbed pibroch, the variational *ceòl mór* ('Great Music') of the Highland bagpipe. Numerous *Scottish Folk-Music Settings* in the spirit of Grainger, and various folksong suites of different nationalities from the early 1960s, contrast with the *20th-century Music Diary*, exploring in miniature the resources of bitonality, whole-tone writing, 12-note organization, Arabic *maqām* and non-retrogradable rhythms.

These diverse tendencies are synthesized in Stevenson's major works, such as the *Passacaglia on DSCH* and Piano Concerto no.2, into a vision of 'world music' embracing (in the former) African drumming and (in the latter) Chinese pentatony, Indian rāga, blues and ragtime within a broadly variational framework which ultimately proclaims a Busonian *Einheit der Musik*. The Passacaglia's evocation of black Africa and a Lenin speech, the Concerto's quotation of a Vietnamese song and homage to Che Guevara, reveal a political dimension often implicit in Stevenson's work.

His multifarious piano output, ranging from the 80-minute Passacaglia to epigrammatic miniatures, extends the virtuoso keyboard traditions from Liszt to Godowsky, both in original pieces and in many keyboard transcriptions of other composers. Stevenson also ranks among the most prolific British song-composers of the later 20th century, responding to poets as diverse as Blake and Burns, Morgenstern and MacDiarmid, James Joyce, Tagore and Ho Chi Minh, as well as German and Italian writers in their own languages, the dialects of Lancashire and Aberdeen, and Scots Gaelic.

WORKS
(*selective list*)

INSTRUMENTAL

Orch: Fantasia, pf, str, 1946; Berceuse symphonique, 1951; Waltzes, 1952; Pf Conc. no.1 'A Faust Triptych', 1959–60; Keening Sang for a Makar, 1963; Scots Dance Toccata, 1965; Simple Variations on Purcell's 'Scotch' Tune, cl, str, 1967; Vocalise Variations on 2 Themes from Les Troyens, Mez, orch, 1969; Pf Conc. no.2 'The Continents', 1970–72; Vn Conc. 'The Gypsy', 1973; Young Scotland Suite, 1976; Recit and Air, str, 1980; Corroboree for Grainger, pf, concert band, perc, 1989; Mandela March, brass band, 1990–91; Vc Conc. 'The Solitary Singer', 1992–4

Chbr: Minuet, Hommage to Hindemith, ob, pf, 1947; Sonata, vn, pf, 1947, rev. 1952; 4 Meditations, str qt, 1964; Nocturne 'Homage to John Field', cl, pf, 1965; Duo Sonata, hp, pf, 1970–71; 3 Open-Air Dances, vn, gui, 1973; Recit and Air, vn/vc/bn, pf, 1974, arr. str qt, 1987; Variations and Theme, vc, pf, 1974; Don Quixote and Sancho Panza, 2 gui, 1982–3; Fantasy 'Alma Alba', pf qt, 1985; Bergstimmung, hn, pf, 1986; Chiaroscuro, hp, pf/hpd, 1987; The Harlot's House, dance-poem, freebass accdn, timp, perc, 1988; Str Qt 'Voces, vagabundae', 1990

Pf: 3 sonatinas, 1945–8; Variations on a Bach Chorale, 1946; 3 Nativity Pieces, 1949; Fugue on a fragment of Chopin, 1949, arr. 2 pf, 1953; Variations on a Theme of Pizzetti, 1955; Prelude, Fugue and Fantasy on Themes from Busoni's Faust, 1949–59; A 20th Century Music Diary, 1956–9; 6 pensées sur des préludes de Chopin, 1959; A Modern Scottish Triptych, 1959–67; Passacaglia on DSCH, 1960–62; A Wheen Tunes for Bairns tae Spiel, 1964; 3 folksong suites, 1965; Canonic Caprice on Grünfeld's 'The Bat', 1966–7; 3 Scots Fairytales, 1967; South Uist Folksong Suite, 1969; Peter Grimes Fantasy on themes from Britten, 1971; 3 Scottish Ballads, 1973; Recit and Air, 1974; Sonatina serenissima (In Memoriam Benjamin Britten), 1973–7; Norse Elegy for Ella

Nygard, 1976–9; Australian Log-Book, 1980; Ein kleines Triptychon in Memoriam Czesław Marek, 1986; Sym. Elegy for Liszt, 1986; Motus perpetuus temporibus fatalibus, 1987–8; Le festin d'Alkan, petit concert, 1988–97; Beltane Bonfire, 1989; A Carlyle Suite, 1995

Other solo inst: Prelude and Fugue on a Theme of Liszt, org, 1961; Variations, vn, 1961; Anger Dance, gui, 1965; 2 Cambrian Cantos, hp, 1966; Calum Salum's Salute to the Seals, pibroch, highland bagpipe, 1967; Sonata, hpd, 1968; Sounding Strings, clàrsach/hp/pf, 1977 [Celtic music arrs.]; Fantasia polifonica, hp, 1983–4; Scots Suite, vn, 1984

Many transcrs., performing versions and edns., incl. The Young Pianist's Grainger (London, 1967)

VOCAL

Choral: Ben Dorain (D. Ban McIntyre, trans. H. MacDiarmid), chorus, orch, 1962, inc.; Songs into Space (W. Whitman), chorus, pf, 1962; Weyvers o'Blegburn (Lancashire dialect), TTBB, 1962; Sapphic Fragments, S, female chorus, hp, 1963; No Coward Soul is Mine (E. Brontë), SSAA, hp/pf, 1966; A Medieval Scottish Triptych, SATB, 1967; Anns an Airde as an Doimhe (Maclean), SATB, 1968; Ballattis of Luve (W. Scott), madrigal cycle, 4v, lute, 1972; In Memoriam Robert Carver (12-part motet, Reid-Baxter), 1987; Peace Motets (Bible), SATB, 1984–7; Recit and Ps xxiii, SATB, org, 1990–92

Songs: War (W. Blake), T, pf, 1947; 19 Songs of Innocence (Blake), 1v, pf, 1947–8, rev. 1v, fl, str qnt, 1966; 2 Tagore Songs, S, pf, 1965; 4 Songs (A. Bold), Bar, pf, 1965; Vietnamese Miniatures (Ho), T, hp, 1966; 14 Songs (J. Joyce), 1v, pf, 1968; Vocalise Variations on 2 Themes from Les Troyens, Mez, orch, 1969; Border Boyhood (MacDiarmid), T, pf, 1970; The Infernal City (MacDiarmid, Maclean), T, pf, 1970–71; 9 Haiku, S/T, pf/hp, 1971; Songs of Quest (Davidson), song cycle, T, pf, 1974; Hills of Home (R.L. Stevenson), song cycle, Bar, pf; Songs from Factories and Fields (MacDiarmid), song cycle, T, pf. 1977; 2 Sacheverell Sitwell Songs, 1v, pf, 1977; Lieder ohne Buchstaben (Hope), song cycle, T, pf, 1982; Songs of Ancient China, 1v, hp/pf, 1982–3; A Child's Garden of Verses (Stevenson), cycle, S, T, Tr ad lib, pf, 1985; The Gangrel Fiddler (Gordon), cycle, Bar, vn, pf, 1987; St Mary's May Songs, S, str orch, 1988–9; over 200 songs incl. *c*30 settings of MacDiarmid's texts, *c*15 of W. Soutar texts

MALCOLM MACDONALD

Stevin, Simon (*b* Bruges, 1548; *d* ?The Hague, 1620). Flemish mathematician, scientist and music theorist, active in the northern Netherlands. He had no academic training, but worked as a clerk in a commercial house in Antwerp, later as a lower offical in Ghent. He was in Leiden by 1581. His most important scientific works date from the 1580s, and include treatises on commercial computation, on decimal notation, and on statics and hydrostatics handled the Archimedean way. About 1593 Stevin became an engineer at the personal service of the stadholder, Prince Maurits of Orange, with an official appointment as quartermaster-general in the army of the General Estates following by 1604.

Among Stevin's duties was the teaching of science to his inquisitive commander. As quantitative aspects of music theory were then treated as part of science, he intended to include a brief treatise *Vande spiegheling der singconst* (On the theory of music) in the didactically outstanding, occasionally innovative collection of outlines of science he published as *Hypomnemata mathematica* (Leiden, 1605–8). However, probably owing to criticism from the Nijmegen organist Abraham Verheyen (1565–1619), he left his virtually completed treatise unpublished, and it exists in two manuscript versions (both in *NL-DHk*, published as *'Vande Spiegheling der singconst' et 'Vande molens': Deux traités inédits*, Amsterdam, 1884; ed. E. Crone and others in *The Principal Works of Simon Stevin*, v, Amsterdam, 1966, incl. Eng. trans.).

The main subject of the treatise is the theory of consonance, Stevin's handling of which is quite unique in the history of music theory. Many authors over the centuries have adopted the Pythagorean discovery that consonant intervals are matched by ratios of the first simple integers as manifested by successive divisions of a vibrating string (i.e. the octave corresponds to 2:1, the 5th to 3:2 and so on). Several of these authors have denied, or declined to make much of, the musical significance of that discovery. Stevin, however, is the only theorist to have flatly denied the truth of Pythagoras's find. Based upon views of his own regarding surd numbers and the theory of proportions, he argued that not the harmonic, but only the geometric division of the octave yields the true ratios for the consonances; that is to say, all semitones are naturally equal. For example, the 5th is not given by 3:2 but rather by the 12th root of two to the power of seven, a quantity he went on to calculate with previously unattained exactitude. He also sought to show, by means of proofs and arguments more impressive for their cleverness than for their sensitivity to tonal purity, that musical practice conforms to his idea. That is why slightly later contemporaries (e.g. Mersenne and Descartes) rejected the central point of his argument and its numerous, no less mistaken, corollaries out of hand.

Ironically, Stevin's views, while quite wrongheaded as a theory of consonance, were in keeping with other practical aspects of music theory. With equal temperament beginning, by the 1630s, to be seen as a feasible solution to the modulation problems set for keyboard instruments by the novel treatment of dissonances, it began to look in retrospect as if he had offered not only an early computation of the values of equal temperament but also a spirited defence of that particular tuning system. But

this is just a matter of retrospective projection, as it can be shown that his understanding of tuning was no more sophisticated than his other convictions on a topic that, to him, was much more an application exercise in abstract arithmetic than a living reality of sound perceived.

H.F. COHEN

Stewart, Belle [*née* McGregor] (*b* nr Dunkeld, Perthshire, 18 July 1906; *d* 4 Sept 1997). Scottish ballad singer. Belle Stewart's family were Travellers. She learnt songs from them, especially her brother Donald McGregor, and from friends. In 1925 she married the Traveller Alex Stewart (*b* 1904), who played the highland bagpipes, and eventually settled in Blairgowrie. Their two daughters Cathie (*b* 1928) and Sheila (*b* 1937) Stewart learnt some of Belle Stewart's songs and then developed their own repertories. The Stewarts were contacted in 1954 by Maurice Fleming of the School of Scottish Studies and were recorded quite extensively. As a result, they added appearances at folk clubs and festivals to their seasonal occupations. Another member of the 'travelling Stewarts', Davie Stewart, who performed in declamatory street-singing style, also became wellknown on the folk circuit.

REG HALL

Stewart, James (*b* ?Scotland, late 18th century; *d* ?London, ? after 1860). British piano manufacturer, active in the USA. He trained as an organ builder in London, and went to Baltimore, Maryland, in 1812 to join the piano manufacturing business of his brother Adam Stewart (who had learnt his trade with the London Clementi firm). When this partnership ended in March 1813 James continued to build both pianos and organs in Baltimore until June 1819, when the Philadelphia newspapers announced the establishment of the piano rooms of 'James Stewart from London, late of Baltimore'. The Philadelphia city directories list James in business there from 1820 until 1822, along with a Thomas Stewart. Although some sources place James in the Boston piano shop of John Osborne as early as 1820, little mention is made of him there until November 1822, when the periodical *The Euterpeiad* praised a piano 'at the manufactory of Messrs. Osborn and Stewart' which had an improved, detached soundboard invented by Stewart ('recently arrived in this City from Philadelphia') and patented by him on 14 November 1822. In 1823 Stewart joined with one of Osborne's apprentices, Jonas Chickering, to form the firm of Stewart & Chickering, a partnership that was dissolved when Stewart returned to London in 1826.

Taking with him several pianos made by Stewart & Chickering, Stewart joined the London firm of Clementi, Collard & Collard (later Collard & Collard), where he is said by Spillane to have served as foreman for more than 35 years. In England he was granted seven patents dealing with piano improvements, the most influential being no.5475 (17 September 1827), which formed the basis of modern stringing by replacing two unison strings (each secured with a loop to its own hitch-pin) with one continuous wire of double length passed around a single hitch-pin.

Most of Stewart's pianos have a range of *F'* to *c''''* and most have wooden frames. A Stewart & Chickering instrument at the Smithsonian Institution has a metal plate on the right to which the hitch-pins are secured; the soundboard extends across the entire length of the keyboard, while on most instruments it extends over only the top octave. Stewart's instruments are of fine workmanship and were praised in their day as 'unrivalled in tone, touch, and action'.

CYNTHIA ADAMS HOOVER

Stewart, Nellie [Eleanor Towzey] (*b* Sydney, 20 Nov 1858; *d* Sydney, 22 June 1931). Australian soprano and actress. The daughter of Theodosia Yates-Stirling, former chorus mistress at Drury Lane, London, and a singer-actress of great versatility, she made her first stage appearance at the age of five, and followed her mother's example by excelling in both sung and spoken theatre. She sang the leading role in Offenbach's *La fille du tambour-major* in April 1881 for George Musgrove's management and played Yum-Yum in the Australian première of *The Mikado* in 1885, repeating the role in Melbourne the following year. Her other roles included Marguerite in *Faust*. A descendant of one of David Garrick's leading ladies, she was the most popular operetta and musical comedy performer in Australia before Gladys Moncrieff. She published her autobiography, *My Life's Story*, in 1923.

ROGER COVELL

Stewart, Rex (William) (*b* Philadelphia, 22 Feb 1907; *d* Los Angeles, 7 Sept 1967). American jazz cornettist. He played in minor New York groups from 1921 before becoming a cornettist in Fletcher Henderson's band in 1926. Feeling unequal to this position, which had previously been filled by Louis Armstrong, he soon left to join Horace Henderson's Wilberforce College group, but by 1928 he had returned to Fletcher Henderson, with whom he remained (with interruptions) until 1933, contributing many solos in a forceful, good-humoured style, indebted equally to Armstrong, Bubber Miley and

Bix Beiderbecke. In 1934 Stewart joined the Duke Ellington Orchestra, beginning his most creative period. During his 11 years with the band he created a distinctive element in Ellington's ensemble sound, particularly with his mock conversational 'talking' style and the novel half-valve effects which he explored from 1937. Stewart was co-composer of several of Ellington's pieces (including *Boy Meets Horn*, 1938, Bruns., and *Morning Glory*, 1940, Vic.), and also led excellent small-group recording sessions using other members of Ellington's band. After leaving Ellington he made a long tour of Europe (1947–50), during which he lectured on jazz at the Paris Conservatoire (1948). He entered semi-retirement in the early 1950s, but led the Fletcher Henderson reunion band in 1957 and 1958. In his later years he became well known as a writer of urbane, anecdotal pieces on jazz, several of which were reprinted posthumously in *Jazz Masters of the Thirties* (New York, *c*1972).

J. BRADFORD ROBINSON

Stewart, Sir **Robert (Prescott)** (*b* Dublin, 16 Dec 1825; *d* Dublin, 24 March 1894). Irish organist, conductor, composer and teacher. He was educated as a chorister of Christ Church Cathedral, Dublin, and became organist there and at Trinity College, Dublin, in 1844. In 1846 he became conductor of the University Choral Society. He graduated MusB and MusD in 1851 and the following year became organist also of St Patrick's Cathedral. In 1861 he became professor of music in the university, and ten years later a professor in the Irish Academy of Music. He composed a choral fantasia for the Boston Peace Festival of 1872, though he did not attend; in this year he was knighted by Earl Spencer. In 1873 he was appointed conductor of the Dublin Philharmonic Society, and in 1877 conductor of the Belfast Harmonic Society.

Stewart's compositions include cantatas of transient popularity, notably *A Winter's Night Awake* (1858), anthems and a Service in E♭ for double choir; he also edited the *Irish Church Hymnal* (Dublin, 1876). He wrote an *Ode to Industry* for the Cork Exhibition of 1852, an *Ode to Shakespeare* for the Birmingham Festival of 1870 and an *Ode for the Tercentenary Festival* of Trinity College in 1892, a work admired by Parry.

W.H. HUSK/JOSEPH J. RYAN

Stewart, S(amuel) S(wain) (*b* Philadelphia, 8 Jan 1855; *d* Philadelphia, 6 April 1898). American maker of banjos and music publisher. After instruction on the violin and other instruments he studied the banjo with George C. Dobson; in 1878 he opened a banjo school and shortly thereafter began to make banjos. By 1880 he was in business at 221–3 Church Street, Philadelphia, and on 18 January 1882 began the publication of *Stewart's Banjo and Guitar Journal* from the same address. This journal (published under various titles until April 1901) contained news and photographs of banjoists and banjo clubs, fulminations against competing manufacturers, testimonials from satisfied customers and music arranged for the banjo. Through this and over 15 other publications, Stewart was highly influential in promoting the popular enthusiasm for fretted instrument clubs and orchestras which lasted into the 1930s. His campaign to 'elevate' the image of the banjo by denying its African American origins is documented by Linn.

His banjos, lighter than the 'Electric' model of his competitor, A.C. Fairbanks, were very well made in a wide variety of styles, from the cheap 'Student' and 'Amateur' models to the highly decorated 'Thoroughbred' and 'Presentation' models. Stewart's only important patent (no.355,896) was taken out in 1887 on an improved neck brace for his own invention, the banjeaurine, a small banjo pitched a 4th above the standard banjo and used as a lead instrument in banjo ensembles. On 1 January 1898 Stewart merged his business with George Bauer, maker and importer of mandolins and guitars. The factory and sales rooms were moved to 1410–12 North 6th Street and the publishing business moved to 1016 Chestnut Street, both branches doing business as Stewart & Bauer. After Stewart's death his interest in the business was continued by his sons, Fred and Lemuel, who ended the partnership with Bauer in 1901 and moved to New York. Banjos bearing Stewart's name were sold by them until about 1904, by Bauer until about 1910, and were made by the Vega Co., Boston, between 1903 and 1914. The Stewart trade name was subsequently applied to a line of fretted instruments sold by the New York firm of Buegeleisen & Jacobson. Stewart banjos are in the Smithsonian Institution, Washington, DC, and the Vleeshuis Museum, Antwerp.

JAY SCOTT ODELL

Stewart, Thomas (James) (*b* San Saba, TX, 29 Aug 1926). American baritone. He studied at the Juilliard School,

New York, where he made his début in 1954 as La Roche in the American première of *Capriccio*. He also sang at the New York City Opera and in Chicago. In 1958 he was engaged by the Berlin Deutsche Oper, making his début as Escamillo; he sang the role at Covent Garden in 1960, returning as Gunther, Don Giovanni and the Dutchman. In 1960 he sang Donner, Gunther and Amfortas at Bayreuth, where he appeared regularly until 1975, adding Wotan and Wolfram to his repertory; he also sang Wotan in the Salzburg Easter Festival. He made his Metropolitan début in 1966 as Ford and returned there regularly until 1980, singing Iago, Golaud, John the Baptist, the Hoffmann villains and Hans Sachs, which he had first sung at Nuremberg (1971). He sang the title roles in the American premières of *Cardillac* (1967) at Santa Fe and *Lear* (1981) at San Francisco, where he had sung since 1962 as Valentin, Golaud, Yevgeny Onegin and Wotan. His voice, more lyrical than dramatic, was nevertheless incisive and of sufficient volume to encompass the heroic Wagner roles, as can be heard on his recordings of the Dutchman, Wotan and most notably of Hans Sachs, under Kubelík.

Stibilj, Milan (*b* Ljubljana, 2 Nov 1929). Slovenian composer. He studied psychology at Ljubljana University and composition at the academy of music with K. Pahor. Later he was a composition pupil of Kelemen at the Zagreb Academy of Music (1963–4) and studied electronic techniques in Utrecht (1966–7). In 1967–8 he worked in West Berlin as the guest of the Berliner Künstlerprogramm and he lectured in composition at the University of Montreal (1973–4). After playing the violin in various Ljubljana orchestras he lived as a freelance composer. He was secretary of the Slovenian Jeunesses Musicales (1971–3), and a music consultant to the Cultural Society and Slovenian Ministry of Culture (1976–91). He has also worked as a critic and writer on music. His style has moved from Expressionist tendencies in his earlier serial music through various phases to achieve a successful synthesis of the newest modernistic compositional ideas.

ANDREJ RIJAVEC/IVAN KLEMENČIČ

A crystallophone of the sticcado-pastrole type, England, c1800

Sticcado-pastrole. A percussion idiophone made of glass (a CRYSTALLOPHONE). The only known maker of these instruments is the publisher George Smart (*d* London, *c*1805), father of the conductor, organist and composer Sir George Smart (1776–1867). James Woodforde's *Diary of a Country Parson* (ed. J.D. Beresford, 1924–31/*R*, i, 235) contains a detailed description of the instrument in the entry of 9 September 1778:

> I saw there an instrument ... that I never saw or heard of before. It is called a Sticcardo-Pastorale [*sic*]. It is very soft music indeed. It is several long pieces of glass laid in order in a case, resting on each end of every piece of glass, and is played on in the middle parts of the glass by two little sticks with nobbs at the end of them stricking [*sic*] the glass. It is a very small instrument, and looks, when covered, like a working box for ladies.

The 'nobbs' consist of hemispheres of ivory and wood, glued together and set in a long porcupine quill, half of which is covered with leather; this results in a delightful variety of tone colour. Descriptions of the instrument as being made of wood are incorrect.

Coleridge probably intended the sticcado-pastrole to be used in Act 3 scene i of his drama *Remorse* (1813), where the stage direction reads: 'A Hall of Armoury, with an altar at the back of the stage. Soft music from an instrument of glass or steel'.

ALEC HYATT KING

Stich, Johann Wenzel. *See* PUNTO, GIOVANNI.

Stichērarion (Gk., from *stichos*: 'verse', 'psalm-verse'). A liturgical book in the Byzantine rite containing the *stichēra*, the hymns inserted between the verses of psalms at HESPERINOS and ORTHROS.

1. Structure. 2. History.

1. STRUCTURE. Stichēraria include both *stichēra idiomela* and *stichēra automela*: *stichēra idiomela* have their own melodies and are usually sung only once during the Church year; *stichēra automela* do not in themselves constitute a sung repertory but function as melodic and metrical models for the generation of *stichēra prosomoia* (*see* STICHĒRON).

A complete stichērarion contains some 1400 hymns for the fixed cycle of the 12 mēnaia, the cycle of the movable feasts of the triōdion and pentēkostarion, and the cycle of the oktōēchos. The 12 mēnaia (one mēnaion for each month) contain all the *stichēra* for Hesperinos and Orthros for the liturgical year, beginning on 1 September and ending on 31 August, and forms the Byzantine equivalent of the Western Proper of the Saints. The triōdion contains the Offices for the ten weeks preceding Easter, beginning with the four Sundays before Lent – the Publican and the Pharisee, the Prodigal Son, the Last Judgment, and the Sunday of Forgiveness, which ends the pre-Lenten fast of Cheese Fare week. The six-week fast of Lent itself begins with the *stichēra* for Hesperinos on the Sunday of Orthodoxy and concludes with the *stichēra* of Holy Week. The triōdion is so named because many of the *kanōnes* sung during Lent contain only three odes (*ōdai*).

The pentēkostarion is the continuation of the triōdion after Easter; it begins with Easter Sunday and ends on the Sunday after Pentecost, the Sunday of All Saints; it was originally known as the 'charmosynon' ('joyful', or 'flowery') triōdion, a term still current in the Slavonic Church. The *stichēra idiomela* of this cycle are mostly contained in the Palaeo-Byzantine stichēraria of the 11th and 12th centuries. The Easter hymns are not found in later manuscripts; the daily repetition of these chants during Easter Week meant that their melodies were transmitted orally. (Those earlier stichēraria containing the Easter hymns mostly reflect local tradition.)

The oktōēchos cycle begins after the feast of All Saints and ends on the Sunday of the Publican and the Pharisee. The *stichēra* of the oktōēchos are organized according to an eight-week cycle, with a different mode for each week. A complete oktōēchos comprises: (1) *stichēra anastasima* (resurrection *stichēra*), sung at Saturday Hesperinos and Sunday Orthros; (2) *stichēra anatolika*, likewise sung at Saturday Hesperinos and Sunday Orthros; (3) 24 *stichēra alphabētika*, sung at Saturday Hesperinos; (4) *anabathmoi* or *antiphona* (paraphrases of the gradual psalms, cxix–cxxxi), chanted at Sunday Orthros; (5) *stichēra heōthina anastasima* ('morning resurrection' *stichēra*), for the end of Sunday Orthros; (6) *stichēra dogmatika* in honour of the Theotokos (the Mother of God), sung at Saturday Hesperinos; and (7) *staurotheotokia* (*Stabat mater* hymns), sung at Orthros on Wednesdays and Fridays. The *prosomoia* for Hesperinos during Lent follow the resurrection hymns.

2. HISTORY. The oldest extant stichēraria date from the 10th and 11th centuries and are notated in Palaeo-Byzantine, non-diastematic Chartres and Coislin neumes (*see* BYZANTINE CHANT, §3(i)). Although the earliest codices cannot be dated precisely, a chronological ordering of sources is made possible on the basis of the degree of neumation of the chant texts. The following are regarded as the oldest surviving stichēraria:

GR-AOml γ.12 (10th or 11th century; facs. in Strunk, 1966, pl.5*b*), containing *stichēra idiomela* of the triōdion and pentēkostarion. According to Raasted (1962) the triōdion section was originally provided with Theta notation which was later replaced by Chartres neumes.

GR-AOml γ.67 (10th or 11th century; facs. in Strunk, 1966, pls.6–12), containing *stichēra* of the triōdion, pentēkostarion and oktōēchos. The manuscript also includes a table of Chartres notation (f.159*r*).

GR-AOml γ.72 (early 11th century; facs. in Strunk, 1966, pl.13), containing *stichēra* of the triōdion and pentēkostarion.

GR-AOml γ.74 (early 11th century; facs. in Strunk, 1966, pls.14–22), containing *stichēra* of the mēnaion from 25 November to 31 August.

GR-AOva 1488 (*c*1050; ed. Follieri and Strunk, 1975), containing *stichēra* of the triōdion, pentēkostarion and oktōēchos. The manuscript is written in both Chartres and Coislin notations.

GR-AOh 307 (12th century; ed. Jakobson, 1957), a Russian slavonic stichērarion. Its non-diastematic neumatic notation ('sematic', according to the terminology of Floros and Haas) developed from Coislin notation. The syllabic structure and accentuation of the texts often varies from the original Greek models, but this collection rests firmly within the tradition of the Greek stichērarion.

The stichēraria of the 10th to the 12th centuries contain a less unified repertory of hymns than the later manuscripts employing Middle Byzantine diastematic notation. The compiler of *GR-AOva* 1488, for example, drew his material from a variety of manuscripts of different origin. When the codices were rewritten in Middle Byzantine notation, a process that began in the last quarter of the 12th century, many hymns that had passed out of general use (the so-called *apokrypha*) were omitted, as were *prosomoia* and *theotokia*, and there was a reduction in the number of works dating from the 9th and 10th

centuries (i.e. the later stratum of the repertory). These changes resulted in a 'standard abridged version' of the stichēraria (Strunk, 1955, 1965).

The late stichērarion tradition is exemplified by *I-Ma* A 139 copied in 1341, by which date the traditional *stichēra* melodies had for over a century been reworked in the kalophonic style (*see* KALOPHONIC CHANT) and richly ornamented. Such *stichēra* were collected in a 'kalophonic stichērarion' containing melodies by the most important composers of the period. After the mid-16th century the kalophonic stichērarion was termed the 'mathēmatarion'.

GERDA WOLFRAM

Stichēron (Gk., from *stichos*: 'verse', 'psalm verse'). A hymn of the Byzantine rite sung between the verses of psalms by two choirs in alternation. Collections of *stichēra* are contained in the STICHĒRARION. *Stichēra* are poetic strophes that belong to the genre of *troparia* (*see* TROPARION), the oldest part of the Byzantine repertory. Such *troparia* are preserved in the stichēraria for the Offices of Christmas and Epiphany, and for the Great Offices of Good Friday. Many *stichēra* in liturgical books of the 10th century onwards were probably written in the 8th century or even earlier.

At HESPERINOS *stichēra* are inserted between the closing verses of the psalm complex *kyrie ekekraxa* (Psalms cxl, cxli, cxxix and cxvi). The evening hymn, *Phōs hilaron*, is followed by the *stichēra aposticha*, a selection of *stichēra* with a single psalm verse and concluding doxology. At ORTHROS *stichēra* are inserted into the final verses of *hoi ainoi*, the 'Lauds' psalms (Psalms cxlviii–cl). A *stichēron* is also sung to the Lesser Doxology following each psalm series.

The *stichēra* texts are based chiefly on the gospels, the homilies of the Church Fathers and the Lives of the Saints, and are generally written in free rhythmical prose. In the late Byzantine period, however, *stichēra* composed in the form of poems with 15-syllable lines, known as 'politic' verse, were included in liturgical books.

There are three kinds of *stichēra*: *idiomela*, *automela* and *prosomoia*, the two last being mostly part of the oral tradition. *Stichēra idiomela* have their own individual melodies, whereas the *automela* function as melodic and metrical patterns for generating *stichēra prosomoia* (contrafacta). *Prosomoia* do not always conform strictly to the models with regard to number of syllables, mode or melismatic formulae. The metrical and melodic periods of individual hymns are indicated by separation marks in the text. In general, *stichēra* melodies are syllabic, that is, they have one or two notes per syllable, although short melismas may occur on accented syllables or on words or phrases requiring special emphasis; *stichēra* for major feasts may also have more extensive ornamentation. Cadences are marked by recurring melodic formulae.

In liturgical books *stichēra* are arranged by individual feast according to the system of the eight modes (*oktōēchos*). Even in the earliest manuscripts the mode is indicated by a character (*martyria*) at the beginning of a *stichēron*. Although each mode has its own particular repertory of melodies, most *stichēra* are bi- or trimodal, and there are three hymns that modulate through all eight modes in turn – *Thearchiō neumati*, *Sēmeron hē anosiourgotropos mētēr* and *Ō pantōn eleēmōn*.

With the appearance of KALOPHONIC CHANT in the 13th century, new *stichēra* were composed in this style. Its most famous exponents were JOANNES KOUKOUZELES, JOANNES GLYKYS and XENOS KORONES in the late 13th and early 14th centuries, JOANNES KLADAS in the second half of the 14th century, and MANUEL CHRYSAPHES in the 15th. The predominantly syllabic melodies of the traditional repertory were extended and richly ornamented in the kalophonic style (for an example *see* BYZANTINE CHANT, ex.11). Typical of the hymns of this period was the insertion of *teretismata* (meaningless syllables).

GERDA WOLFRAM

Stich-Randall, Teresa (*b* West Hartford, CT, 24 Dec 1927). American soprano. She studied at the Hartford School of Music and Columbia University, New York, where she

created Gertrude Stein in Virgil Thomson's *The Mother of Us All* (1947) and the title role of Luening's *Evangeline* (1948). In 1949 she sang the High Priestess in Toscanini's broadcast and recording of *Aida* and in 1950 Nannetta in his *Falstaff*. She made her European début at Florence in 1951 as the Mermaid in *Oberon*. After a season at Basle she was engaged by the Vienna Staatsoper, where her first role was Violetta. From 1953 to 1971 she appeared at the Aix-en-Provence Festival as Fiordiligi, Countess Almaviva, Konstanze, Donna Anna and Pamina. She sang Gilda at Chicago in 1955 and made her Metropolitan début as Fiordiligi in 1961. She took part in the première of Martin's *Le mystère de la Nativité* (1960, Salzburg) and sang throughout Italy, as Strauss's Ariadne and in the Mozart repertory. She sang Norma at Trier in 1971, the year of her retirement from the stage. In recital and concert she was particularly admired in Bach and Handel. She had a pure, sweet voice, though her performances were sometimes marred by mannered detail; but at its best her cultivated style won wide praise. Her art is represented by recordings of her Mozart roles from Aix and her Sophie in Karajan's first recording of *Der Rosenkavalier*.

HAROLD ROSENTHAL/ALAN BLYTH

Stichting tot Exploitatie van Mechanisch Reproductie Rechten der Auteurs [STEMRA]. *See* COPYRIGHT, §VI (under Netherlands).

Stick. *See* MALLET.

Stick bass. An electric double bass with a thin, solid body and neck. *See* DOUBLE BASS, §5.

Sticker. A rigid rod, usually of wood, used to exert a pushing action in organ, reed organ and piano mechanisms. The principle of the sticker is applied to several parts of the organ: (a) chiefly, as a shorter or longer rod pushed down or up when a key is depressed and so forming part of the train of mechanisms that open the appropriate wind-chest pallet; (b) as a short rod opening such valves as the pipe-pallets of each stop in a spring-chest, the sprung valve of a tremulant or ventil, and in coupling systems. The term has an uncertain history, being used by builders long before theorists; James Talbot (MS, *c*1695, *GB-Och* Music 1187) made somewhat ambiguous use of it, and in 18th-century England it was sometimes replaced by 'strikers' (W. Tans'ur, *The Elements of Music Display'd*, 1772).

For illustrations *see* ORGAN, fig.7, fig.8.

PETER WILLIAMS

Stickl, Franz (*b* Diessen am Ammersee, nr Munich; *fl* 1727–41). German composer. He studied at Salzburg University and between 1727 and 1741, when his various publications appeared, he held the post of organist at a church in Ingolstadt.

His church music is exceptional in that he wrote optional parts for three violas as well as for the usual two violins and organ; also, in his masses (Augsburg, 1727), he subdivided the longer sections more than was customary at the time, though the individual movements are very short. He published two sets of vespers (Augsburg, 1728, 1741). His music is typical of the unpretentious church music written by many competent composers at that time, and his style most interesting for its varied choral textures and unusually purposeful bass lines.

ELIZABETH ROCHE

Stiebler, Ernstalbrecht (*b* Berlin, 29 March 1934). German composer. He studied composition with Klussmann, and music education and music theory at the Hamburg Musikhochschule (1954–9, 1962–4). As contemporary music editor at Hessischer Rundfunk in Frankfurt (1969–95), he organized and directed a number of celebrated concert and broadcast series of contemporary music, including Studio für Neue Musik, Weekend Neue Musik in Frankfurt (1978–87) and Forum Neue Musik (1989–95). He was awarded the Hamburg Bach prize in 1966 and the Boswil music prize in 1991.

As a composer, Stiebler was much influenced by the Darmstadt summer schools, especially by Stockhausen's courses in the late 1950s and early 60s. It was at Darmstadt that he became acquainted with the music of LaMonte Young, whose sustained sounds and gradually unfolding forms were influential to his own style. A reduction of the musical material to its smallest motives, which, through constant repetition, neutralize the parameters of intensity and duration, plays a central role in Stiebler's oeuvre. The appearance of uniformity created by this procedure is deceptive because the slow rate of change facilitates the perception of minimal alterations in pitch, opening up new sound-worlds to the listener. Stiebler uses a graphic notational system to express these gradual sound modifications. Essays on the composer appear in S. Fricke, ed.: *Ernstalbrecht Stiebler* (Saarbrücken, 1997).

STEFAN FRICKE

Stiedry, Fritz (*b* Vienna, 11 Oct 1883; *d* Zürich, 8 Aug 1968). American conductor of Austrian birth. After studying at the Vienna Music Academy, he was engaged on Mahler's recommendation as assistant to Ernst von Schuch at Dresden, 1907–8. He held appointments at Teplice, Poznań, Prague, Nuremberg and Kassel, and in 1914 became principal conductor at the Berlin Royal Opera House (later Staatsoper), where he remained until 1923, conducting such works as *Der Rosenkavalier* and *Palestrina*; he then succeeded Weingartner as director of the Vienna Volksoper (1924–5), conducting the première of Schoenberg's *Die glückliche Hand* in 1924. From 1928 to 1933 he was again in Berlin, as principal conductor at the Städtische Oper where he collaborated with Carl Ebert on productions of *Macbeth* and *Simon Boccanegra*, operas then seldom performed, directed a new production of the *Ring*, and conducted the first performance of Weill's *Die Bürgschaft* (1932). Forced to leave his post by the Nazi regime in 1933, Stiedry was musical director of

the Leningrad PO before settling in the USA in 1937. He conducted for the Chicago Opera Company, 1945–6, and regularly at the Metropolitan, 1946–58, where he gave highly acclaimed performances of Verdi and Wagner. He also conducted the New Friends of Music Orchestra, giving the first performance of Schoenberg's Second Chamber Symphony. In 1947 he conducted Gluck's *Orfeo ed Euridice* at Glyndebourne, in a renewed collaboration with Ebert; Kathleen Ferrier sang Orpheus and the performance was recorded. He first appeared at Covent Garden in 1953–4 to conduct a new production of the *Ring* and a revival of *Fidelio*. He was a direct, unfussy conductor in the best tradition of Austrian-trained musicians.

ALAN BLYTH

Stiehl, Carl [Karl] **(Johann Christian)** (*b* Lübeck, 12 July 1826; *d* Lübeck, 1 Dec 1911). German writer on music and conductor, brother of HEINRICH STIEHL. His father Johann Diedrich Stiehl (*b* Lübeck, 9 July 1800; *d* Lübeck, 27 June 1872) studied the organ with M.A. Bauck, whom he succeeded as organist of the Jakobikirche, Lübeck, on 10 July 1835. Carl studied in Weimar with J.C. Lobe and at the Leipzig Conservatory. He taught the organ and singing in Jever (1848–58) and Eutin (1858–77), where he was also music director to the Grand Duke of Oldenburg (from 1860). On his return to Leipzig in 1877 he taught singing and conducted the Singakademie until 1901. He also directed the concerts of the Musikverein and founded the Philharmonic Concerts (1886–96) which succeeded them. He was an important figure in the musical life of Lübeck, both for his writings on the city's history in such books as *Musikgeschichte der Stadt Lübeck* (Lübeck, 1891) and *Geschichte des Theaters in Lübeck* (Lübeck, 1901) and for his bibliographical work for the Lübeck library. He discovered and edited works by Buxtehude.

GAYNOR G. JONES

Stiehl, Heinrich (Franz Daniel) (*b* Lübeck, 5 Aug 1829; *d* Reval [now Tallinn], 1 May 1886). German organist and composer, brother of CARL STIEHL. He studied with Lobe in Weimar, then at the Leipzig Conservatory with Gade, Hauptmann and Moscheles. From 1862 to 1869 he was a professor at the conservatory in St Petersburg, where he was also organist at St Peter's. He gave concert tours as an organist, living in Vienna, Paris, Gotha and Lüneburg. He conducted the Philharmonic and Cecilia Societies in Belfast from 1874, and then taught the piano in Hastings until he took a post as organist at the church of St Olaus in Reval, Russia. His numerous compositions include the Singspiele *Jery und Bätely* and *Der Schatzgräber*, choral and orchestral works, as well as chamber and instrumental music; his piano pieces show the influence of Mendelssohn in their melodic writing. He conducted the first Russian performance of Bach's *St Matthew Passion* on 17 March 1883 in St Petersburg.

GAYNOR G. JONES

Stieler, Caspar von (*b* Erfurt, 1 March 1632; *d* Erfurt, 24 June 1707). German poet and playwright. He studied theology and medicine in Leipzig, Erfurt and Giessen between 1648 and 1650, when he went to Königsberg for further study in philosophy and theology. He was a secretary to a Prussian cavalry regiment from 1654 to 1657 and saw action in the Polish–Swedish war. He then began a four-year period travelling, first in north Germany and then in Holland, France, Spain, Italy and Switzerland. In 1662, a year after he returned to Germany, he studied law in Jena. In 1663 he was chamber secretary in Schwarzburg-Rudolstadt, and from 1666 to 1676 he was in Eisenach as secretary to the Duke of Saxe-Weimar; at this period he was enrolled as 'Der Spate' in the society known as the Fruchtbringende Gesellschaft and under that name wrote his aesthetic treatise *Die Dichtkunst des Spaten* (MS, 1685, *DK-Kk*; ed. H. Zeman, Vienna, 1975). For the last 30 years of his life he held various appointments in Jena, Weimar, Holstein, Hamburg and finally Erfurt, where he worked as writer, lawyer and private tutor.

Stieler's importance for music lies primarily in his *Die geharnschte Venus, oder Liebes-Lieder im Kriege gedichtet* (Hamburg, 1660/*R*1968 with edn), which until recently was wrongly ascribed to Schwieger. This collection of 70 strophic songs contains solo lieder with basso continuo by six composers indicated by initials only which may be interpreted thus: J.K. (Jakob Kortkamp or Johann Kruss), C.B. (Christoph Bernhard), J.S. (Johann Schop), M.C. (Martin Köler [Coler] and possibly a second composer too), J.M.R. (Johann Martin Rubert) and C.S. (Stieler himself). Five other pieces are taken from French ballets and four more from other French works; one lied is a madrigal. Stieler also figures in the history of German dramatic music before the opening of the Hamburg Opera; he included music during his plays and between the acts, but it has been lost. He is the probable composer of the chorale *Wo soll ich fliehen hin*, which appeared in his *Der bussfertige Sünder, oder Geistliches Handbuchlein* (Jena, 1679) and was later revised by J.S. Bach in the cantata *Mein Herze schwimmt im Blut* BWV199.

JOHN H. BARON

Stierhorn (Ger.: 'bull horn'). Bugle horn of antiquity and the early Middle Ages. A straight conical brass instrument of this name is called for in Wagner's Ring. *See* COW HORN.

Stierlein [Stierlin], **Johann Christoph** (*b* Nuremberg; *d* Nuremberg, July 1693). German organist, theorist and composer. He is first heard of in 1677 at the Stuttgart court, where he was court organist, and in 1690 he was appointed vice-Kapellmeister. He is most notable for his brief, carefully written introduction to the study of music, *Trifolium musicale consistens in musica theoretica, practica, & poetica* (Stuttgart, 1691). In the first of his 'three folios' he offered rudiments of musical notation, explanations of transposition and common musical terminology and eight interesting examples of frequently used vocal ornaments or 'figures'. The second and most valuable part of the manual is a succinct and, for that date in Germany, rather uncommon introduction to the art of organ continuo playing, including details for realizing thoroughbass figures. In the third part Stierlein put forward a curious suggestion for composing four-part music without using the usual musical notation. Instead, each staff line and space of the bass, tenor, alto and soprano clefs is given a number, beginning with 1 on the F below the bass staff. The examples of vocal music that Stierlein provided are in effect set out in a pseudo-tablature notation of no practicality. His only known music is *Musicalische geistliche Zeit- und Ewigkeit-Betrachtung bestehend in 25 Arien* (Stuttgart, 1688), for solo voice and continuo.

Three other musicians called Stierlein, presumably belonging to the same family, worked, mainly as organists and directors of music, at Stuttgart during the 18th century. Of these, Philipp David Stierlein (*b* 1711; *d* 31 March 1801) is known to have written an Arioso for two violins, bass and harpsichord, which is now lost.

GEORGE J. BUELOW

Stierlein, Philipp David. German 18th-century musician, probably related to JOHANN CHRISTOPH STIERLEIN.

Stierlin, Johann Christoph. *See* STIERLEIN, JOHANN CHRISTOPH.

Stiévenard, Alexandre (*b* Cambrai, 18 Aug 1769; *d* Ludwigslust, 24 Sept 1855). French violinist, guitarist and composer. The son of a wealthy merchant, he began his musical education at an early age. In 1789 he fled from the Revolution to the Netherlands, where he gave concerts and worked first as a violinist and then as director of music in an Ostend theatre. When the French invaded the southern Netherlands he fled again, to Bremen and to Hamburg, becoming first violinist of the new Schauspielhaus. In 1796 he became elocution teacher to the children of Duke Rantzau at Ludwigslust and from 1801 was also active as a violinist there. In 1837 he retired and settled at the Schwerin court.

A cultured and versatile figure, Stiévenard was an outstanding amateur musician, and his eight-volume *Biographie ou Mémoires* (*D-SWl*) provides a critical view of the musical life of his time. Most of the compositions that he wrote, including violin concertos, quintets, quartets, arias and songs, are lost; the *Recueil d'airs aisez avec accompagnement de guitarre* (*SWl*) is stylistically firmly based in the Rococo.

URTE HÄRTWIG

Stignani, Ebe (*b* Naples, 10 July 1903; *d* Imola, 5 Oct 1974). Italian mezzo-soprano. She studied at the Naples Conservatory and made her début at the S Carlo in 1925 as Amneris. In 1926 Toscanini engaged her for La Scala, where she first appeared as Eboli in *Don Carlos*. In successive seasons at La Scala she added to her repertory all the leading mezzo-soprano parts in Italian opera and a large number of other roles including Delilah, Ortrud, Brangäne and Gluck's Orpheus. But it was in the tragic characters of Verdi, above all Azucena in *Il trovatore*, that she found the greatest scope and won her greatest successes. At Covent Garden she sang Amneris (1937, 1939 and 1955), and Azucena (1939 and 1952), and Adalgisa to the Norma of Maria Callas (1952 and 1957). She had a voice of rich quality and ample range, extending from *f* to c'''.

Judged by older standards, neither Stignani's vocalization nor her phrasing was impeccable, yet her singing was always grandiose and authoritative and she brought to the fierce mezzo parts of Verdi (including his Requiem) an intensity and dramatic fire that made her for many years the leading exponent of this music. Stignani's extensive career is well documented on disc: particularly notable are her Eboli and Amneris in sets made during and just after World War II.

DESMOND SHAWE-TAYLOR/R

Stile (Ger.; It.). *See* STYLE.

Stile antico (It.: 'old style'). A term signifying a historically-conscious approach to composition, especially the use of elements of Renaissance style in later, usually sacred, works. The term has been applied to music from many historical periods, from the end of the 16th century to the 20th.

Stile antico generally indicates the presence of 'old-fashioned' features associated with Renaissance polyphony, such as *alla breve* metre (and a concomitant avoidance of dance rhythms), imitative textures, a traditional approach to dissonance, scoring for full choir (as opposed to solo voices and/or reduced forces) and a balanced melodic style reminiscent of Palestrina's. It also suggests a historicized attitude on the part of the composer, an interest in establishing a connection with the musical past, particularly with the music of Palestrina.

It was long accepted that the origins of the *stile antico* lay in the perpetuation of Palestrina's style, after his death in 1594, by his successors at Rome (notably the Naninos, the Anerios, Giovannelli and Francesco Soriano), partly in homage to him and partly to maintain the union of liturgy and music he had forged. This hypothesis seemed to be supported by the emergence in the 17th century of other terms denoting 'old style' and 'new style': first, early in the century, the Monteverdi brothers introduced the terms PRIMA PRATICA and *seconda pratica*; and secondly, composers such as Stefano Bernardi, Giovanni Ghizzolo and G.B. Chinelli began publishing sets of masses that included 'da capella' and 'da concerto' works. However, recent research into 17th-century choral music suggests that the distinction between *stile antico* and *stile moderno* is less tidy. There seems to be a substantial middle ground of *stile misto* that judiciously combines newer with older elements. More importantly, the assumption of a historicized attitude on the part of these 17th-century composers seems doubtful: the distinction between *prima* and *seconda pratica* essentially concerns the relationship between text and music, and that between 'da capella' and 'da concerto' probably turns on tutti or soloist performance; neither pair of terms presupposes a deliberate historicizing effort by composers.

The term *stile antico* did not appear until the 1640s. Marco Scacchi (*Cribrum musicum*, 1643 and *Breve discorso sopra la musica moderna*, 1649) and Severo Bonini (*Discorsi e regole*, *c*1651–5; ed. and trans. M. Bonino, Provo, UT, 1979) both used it but in ways that still do not fully accord with the positive notion of a historically informed style. Within a few decades, however, the *stile antico* had become a fully developed stylistic possibility. A crucial factor was undoubtedly the revival of interest in Palestrina's music, advanced most forcefully in Fux's *Gradus ad Parnassum* (1725), and seen in related practical manifestations from Dal Pane's *Messe … estratte da esquisiti mottetti del Pelestrina* (1687) to the masses 'alla Palestrina' by Alessandro Scarlatti and Francesco Durante.

The clearest examples of the *stile antico* are found in 18th- and 19th-century sacred choral works, particularly masses or mass sections, by composers such as Bach, Schumann and Liszt. Bach copied out and performed Palestrina's six-voice *Missa sine nomine* (1590, now sometimes known as the *Missa 'Cantabo Domine'*), and at Leipzig he made regular use of Erhard Bodenschatz's *Florilegium Portense*, an anthology of 16th-century German and Italian motets. In his Mass in B minor Bach placed *stile antico* passages in positions of structural significance, for example in the 'Credo' and the 'Confiteor' choruses that frame the Credo. Recognition of the stylistic references in such passages – the *alla breve* metre, the omission of obbligato melodic instruments – is crucial to comprehension of Bach's architectural rhetoric (see Wolff, 1968, 1991). The 'Et incarnatus' from Beethoven's *Missa solemnis* also has *stile antico* features, such as the plainchant-style melody and use of the Dorian mode, that are important to an accurate interpretation of the movement as a whole. Again, the composer is interested in rapprochement with a historical style, while the deviations from that style are quite audible.

A different kind of historical approach appeared in the late 18th and early 19th centuries, broadly related to the CECILIAN MOVEMENT, in which composers aimed to create music informed by the Palestrinian model for use in Catholic liturgical services, a purpose obviously foreign to the extended concert masses by Bach and Beethoven. The 20th-century examples of the *stile antico* largely continue within the Catholic tradition, for instance Langlais' *Messe en style ancien*. Such works however are more apt to draw on medieval and chant models rather than the Palestrina idiom. A number of other 20th-century works that utilize the term *stile antico* reflect neoclassical tendencies (Górecki's *Three Pieces in Old Style*, Donaudy's *Arie di stile antico*).

STEPHEN R. MILLER

Stile concertato (It.). *See* CONCERTATO.

Stile concitato (It.: 'agitated style'). Term used by 17th-century writers after Monteverdi and widespread in modern literature, corresponding to Monteverdi's own

term, *genere concitato*. This *genere* ('genus' or style) is one of three discussed in the preface to the composer's eighth book of madrigals (*Madrigali guerrieri ed amorosi*, 1638): *concitato* ('agitated'), *temperato*('moderate') and *molle* ('soft' or 'relaxed'), which, he claimed, corresponded respectively to the affections of 'anger', 'moderation' and 'humility or supplication'. Furthermore, the *genere concitato* ostensibly represented 'that *harmonia* that would fittingly imitate the utterance and the accents of a brave man who is engaged in warfare', a passage quoted from Plato which refers to the ancient Phrygian *harmonia* (*Republic*, §399*a*). Monteverdi claimed personally to have rediscovered this *genere* and to have reinstated it in its rightful place beside the other two. The threefold system of agitated, moderate and relaxed styles was, as Hanning has shown, a commonplace in ancient writers such as Cleonides, Aristides Quintilianus and Manuel Bryennius, who termed the styles 'diastaltic', 'hesychastic' and 'systaltic' respectively. It may have been transmitted to Monteverdi from the ancient writers by G.B. Doni.

In technical terms, Monteverdi defined his three *generi* in terms of vocal range and rhythm. The respective ranges appropriate to *concitato*, *temperato* and *molle* were high, medium and low; rhythmically, the ancient Greek pyrrhic and spondaic measures (used in antiquity for dances in armour and 'calm' dances respectively) were interpreted to represent *concitato* and *molle*. For the spondaic, Monteverdi chose even semibreves; he divided each semibreve into 16 measured semiquavers to represent the pyrrhic. (Mabbett has argued that Monteverdi was here conducting a polemic against the composer Giacomo Arrigoni, who used long bass notes in comparable contexts.) Passages of rapid, beating semiquavers occur in a number of the works in Monteverdi's eighth book, including *Il combattimento di Tancredi e Clorinda* (dated by Monteverdi to 1624), although there is no systematic use of the *generi* to reflect either Monteverdi's twofold division of the volume into 'warlike' and 'amorous' pieces or his distinction between *canti senza gesto* and *opuscoli in genere rappresentativo*. The style is used also in his late operas.

Later composers to use the *concitato* technique included Alessandro Grandi (i) and Schütz; it is found also in a passage in Handel's *Dixit Dominus*, where the phrase 'conquassabit capita' is set in a manner closely resembling Grandi's treatment of the same psalm.

GEOFFREY CHEW

Stile moderno (It.). A term most frequently used, in antithesis to STILE ANTICO, to refer to church music written after 1600 in an up-to-date style.

Stile rappresentativo (It.: 'theatrical style'). One of several terms applied in the early 17th century to the affective styles of the 'new music'. According to Pietro de' Bardi (1634), 'il canto in istile rappresentativo' was developed by Vincenzo Galilei in Giovanni de' Bardi's CAMERATA, and the term first appeared in print on the title-page of Giulio Caccini's *Euridice* (1600: 'composta in stile rappresentativo'). Other composers linking the term with the theatre include Girolamo Giacobbi, whose *L'Aurora ingannata* (1608) includes 'canti rappresentativi', and Monteverdi, in his *Madrigali guerrieri, et amorosi* (1638).

Like the closely related 'stile recitativo', the term was not restricted to stage music. 'Stile rappresentativo', 'musica rappresentativa', 'genere rappresentativo' etc. are used for *seconda pratica* madrigals (Aquilino Coppini describing Monteverdi's Fifth Book in 1608), solo songs or duets (in the preface to Caccini's *Le nuove musiche*, 1602; the 'lettera amorosa' and 'partenza amorosa' in Monteverdi's *Concerto*, 1619; Francesco Rasi's *Dialoghi rappresentativi*, 1620; Monteverdi's *Lamento della ninfa*, 1638) and even sacred *concerti* (Bernardino Borlasca in 1609). Thus the term can denote music for the theatre, music in a recitative style, or music that adopts a particularly dramatic or emotional approach to representing its text.

The theorist G.B. Doni attempted to clarify the terminology. In the *Trattato della musica scenica* (1633–5), he distinguished between the 'stile recitativo', 'stile espressivo' and 'stile rappresentativo' (the last used on the stage). But the differences remain obscure: the 'stile espressivo' is more a heightened recitative than a separate style, and the 'stile rappresentativo' is 'almost the same as today's recitative', although 'some things should be added, and others taken away, to bring it to perfection'. More fruitful was Doni's subsequent notion of three sub-species of the 'stile detto recitativo' (or 'stile monodico') in his *Annotazioni sopra il Compendio de' generi e de' modi della musica* (1640): 'narrativo' (e.g. Daphne's report of Eurydice's death in Peri's *Euridice*, 1600), 'recitativo' or 'recitativo speciale' (e.g. the prologue to *Euridice*, with its more formal strophic organization) and 'espressivo' (e.g. Monteverdi's *Lamento d'Arianna*, 1608). The confusion reflects the difficulties faced by composers of the 'new music' in giving a rational account of their essentially intuitive endeavours. Nevertheless, the term 'stile rappresentativo' is as good as any to suggest the vivid, emotional and dramatic qualities sought in music at the time.

TIM CARTER

Still, William Grant (*b* Woodville, MS, 11 May 1895; *d* Los Angeles, 3 Dec 1978). American composer and arranger. He studied the violin and later also played the cello and oboe. In 1911 he entered Wilberforce University (Ohio), determined to become a composer of concert music and opera. Coleridge-Taylor was an early role model. Leaving university in 1915 before graduating, he married Grace Bundy and struggled to earn a living playing in bands in Dayton and Columbus, Ohio. In 1916 he worked for W.C. Handy for several months and saw the publication of his first arrangement, Handy's *Hesitating Blues*. Not long after, he enrolled at Oberlin College, where he studied theory and counterpoint, interrupted by a year in the US Navy during World War I. In 1919

Handy offered him a position in New York, where he remained until 1934.

Still became increasingly successful as an arranger for theatre orchestras and early radio, while simultaneously pursuing a career as a composer. He served as music director at Black Swan Records and arranger for Luckey Roberts, Sophie Tucker, Donald Voorhees, Paul Whiteman, Willard Robison, Artie Shaw and others. He also orchestrated *Runnin' Wild*, *Dixie to Broadway*, one of Earl Carroll's *Vanities*, *Rain or Shine* and several unsuccessful shows. He studied briefly with Chadwick, but his most important teacher was Varèse, who helped him compose with greater freedom, encouraged his lyric gift and programmed his music on concerts of the International Composers' Guild. Although *From the Land of Dreams* was withdrawn after it mystified the critics at its first performance, subsequent works brought Still increasing recognition. In 1931 the Rochester (New York) PO gave the première of the *Afro-American Symphony*, the first symphony by a black American to be performed by a major orchestra. As he began to draw a wider audience, Still received a stream of commissions from such organizations as CBS, the New York World's Fair, the League of Composers and major orchestras in Philadelphia, New York, Cleveland and Cincinnati.

Supported by a Guggenheim Fellowship, he left New York for Los Angeles in 1934. There he composed and arranged sporadically for film and television, devoting himself primarily to serious music composition. The first of eight operas, *Blue Steel* (1934), was followed by *Troubled Island* (1937–49), the production of which by City Opera, New York (1949), marked the peak of his career. Although his music gradually fell out of favour in the 1950s and 60s, the 1990s saw a substantial revival of interest in his work.

Rejecting spirituals as his main source of musical material, Still turned to the blues, explaining that 'they, unlike many spirituals, do not exhibit the influence of Caucasian music' (sketchbook for the *Afro-American Symphony*, 1930). Blues elements, such as modal inflections, irregular phrase lengths and descending melodic curves, are audible in most of his works. In *From the Land of Dreams* (1924, believed lost until 1997), a diatonic blues melody serves as the subordinate theme, embedded within a framework of startlingly original timbres and chromaticism. In the *Afro-American Symphony* (1930), his best-known work, a blues melody appears as the symphony's principal theme, exhibiting stereotypically modal harmonies. *And They Lynched Him on a Tree* (New York, 25 June 1940), a protest against the institutionalized racism of the time, attests to his dramatic gift.

Still's prolific and influential career as a commercial arranger is only beginning to be explored. As the first black American to have a symphony performed by a major orchestra, to conduct a white radio orchestra (*Deep River Hour*, 1932), to conduct a major orchestra (Los Angeles PO, 1936), to have an opera produced by a major company and to win a series of commissions and performances from major American orchestras, his achievements were many.

WORKS
(*selective list*)

DRAMATIC

Ops (librettos by V. Arvey, unless otherwise stated): Blue Steel (3, B. Forsythe, after C. Moss), 1934, unperf.; Troubled Island (3, L. Hughes and Arvey), 1937–49, New York, 31 March 1949; A Bayou Legend (3), 1941; Jackson, MS, 15 Nov 1974; Highway 1, USA (2), 1942, rev. as A Southern Interlude, 1943, perf. as Highway 1, USA, 1963, Coral Gables, FL, 11 May 1963; Costaso (3), 1949, Pasadena, CA, 23 May 1992; Mota (3), 1951, unperf.; The Pillar (3), 1955, unperf.; Minette Fontaine (3), 1958, Baton Rouge, LA, 24 Oct 1985

Ballets: La guiablesse (R. Page, after L. Hearn), 1927, Rochester, NY, 1933; Sahdji (A. Locke, R. Bruce), 1929–30, Rochester, NY, 1931; Lenox Avenue (V. Arvey), 1937; Miss Sally's Party (Arvey), 1940, Rochester, NY, 1941

Other: The Prince and the Mermaid (incid music, C. Stone), pf, 1965 [arr. inst ens]; film scores

INSTRUMENTAL

Syms.: no.1 'Afro-American', 1930; no.2 'Song of a New Race', g, 1937; no.5 'Western Hemisphere', 1945 [orig. no.3]; no.4 'Autochthonous', 1947; no.3 'The Sunday Sym.', 1958

Sym. poems: Darker America, 1924; From the Heart of a Believer, 1927; Ebon Chronicle, 1933; Kaintuck, pf, orch, 1935 [arr. 2 pf]; Beyond Tomorrow, 1936; Dismal Swamp, 1936; Old California, 1941; Poem, 1944; The Peaceful Land, 1960

Orch suites: American Suite, *c*1918; From the Land of Dreams, 3 female vv, orch, 1924; From the Journal of a Wanderer, 1925; From the Black Belt, 1926; Africa, 1928; A Deserted Plantation, 1933; The Black Man Dances, 1935; Pages from Negro History, 1943; Archaic Ritual, 1946; Wood Notes, 1947 [after poems by J.M. Pilcher]; Danzas de Panama, str orch/qnt, 1948 [arr. str qt]; The American Scene, 5 suites, 1957; Patterns, 1960; Los alnados de España, 1962 [arr. pf]; Preludes, fl, str, pf, 1962 [arr. pf]

Stiller, Andrew (Philip) (*b* Washington DC, 6 Dec 1946). American composer, performer, writer and publisher. He studied at SUNY, Buffalo (MA 1972, PhD 1976), where his teachers included Lejaren Hiller and Morton Feldman. He has been a member of Lukas Foss's Center of the Creative and Performing Arts and has held faculty positions at Empire State College, Buffalo (1974–86), and SUNY, Buffalo (1979–86). He has served as a critic and writer for *Musical America/Opus Magazine*, the *Buffalo News* and the *Philadelphia Inquirer* and is the author of *Handbook of Instrumentation* (Berkeley, California, 1985). Kallisti Music Press, of which he is the founder, has published the complete works of Anthony Philip Heinrich and 40 previously unpublished compositions by Hiller, as well as Stiller's own works.

Stiller's music is eclectic and original, but makes no attempt to establish new sonic frontiers. His works are often scored for unusual combinations of instruments and many of his titles reveal a propensity towards the fanciful and whimsical. The chamber opera *Lavender and the Sphinx*, based on a comic strip of a similar name, the Chamber Symphony for four saxophones, *The Water is Wide, Daisy Bell*, a set of double variations for the piano, and *A Periodic Table of the Elements*, 105 brief pieces for orchestra, have all received significant public exposure.

WORKS
(*selective list*)

Stage: Lavender and the Sphinx (chbr op, T. Robbins), 1978, Buffalo, NY, 25 May 1978

Orch: A Hell of a Note, 1968; Magnification, 1968; Piece with Transposing Harmonics, 1975; Foster Song (C. Van Strum), 2 nars, orch, 1986; A Periodic Table of the Elements, 1988; Procrustean Conc., cl, orch, 1994

Vocal: A Christmas Carol (E. Morgan), 1v, tpt, sleigh bells, 1972; Pierrot solaire (D. diPrima), 1v, kbd, 1972; Ekgmowechashala (E.L. Simons), Bar, ob, toy pf, 1975; Cantata 1980 (A. Schwerner, V. Lindsay, V. Morosco, T. Tasso), S, 3 Bar, str qt, pf, 1980; The Albatross (C.P. Baudelaire), male vv, org, 1984; Two of a Kind (R.K. Willoughby, G. Snyder), 1v, pf, perc, 1985; mehitabel dances with boreas (D. Marquis), S, vn, 1989; Mort j'appelle (F. Villon), male v, ob, va, pf, 1996

Chbr and solo inst: Suite, 10 cl, 1965; Le tombeau d'Everett Dirksen, dbn, pf, 1966; Qnt, contra-alto cl, b sax, bn, trbn, timp, 1966; Cat-House Sonata, pf, 1967; Pitheoprakta, 6 trbn, 1969; Shook 1, 9 rattles, 1969; Paganini Variationses, str qt, 1973; The Ultimate Perc Ens Piece, 20 perc, 1973; Metric Displacement and Shibaraimono Trope of The Well Tempered Clavier, Praeludium I, kbd, 1979; Spanish Follies, 2/4 gui, 1981; Letraset and the Mouse Singer, pic, str qt, 1982; A Grand Postmodernist Fugue, vn, pf, perc, 1984; Sonata a3 pusatoribus, with gargoyle and a moral in Kesh, 3 perc, 1986; The Water is Wide, Daisy Bell, pf, 1987

HERMAN TROTTER

Stillingfleet, Benjamin (*b* Norfolk, 1702; *d* London, 15 Dec 1771). English naturalist and amateur musician. In 1724, after studying classics and mathematics at Trinity College, Cambridge, he became tutor to William Windham in Felbrig, Norfolk. In 1737 he embarked with his pupil on a tour of the Continent. From 1738 to about 1742 he and Windham, with Robert Price and others, formed a common room in Geneva for the purpose of performing plays. Stillingfleet, Windham and Price supplied the music, scenery and machines, and Gaspard Fritz led the orchestra. He returned to England in 1743 and in 1761 removed from London to Price's estate at Foxley, Herefordshire, where the two men wrote librettos for J.C. Smith, who visited Foxley in about 1758. Influenced by Price's explication of Rameau's theories, Stillingfleet undertook a partial translation of Giueseppe Tartini's *Trattato di musica* (Padua, 1754), with comments interspersed. To this he added a long appendix on the origin, power and efficacy of music, based on the doctrine of moral sentiment of Francis Hutcheson. Published anonymously in 1771, the book drew attention to the phenomenon of 'third sounds' (difference tones), for which there was no adequate explanation until the work of Helmholtz on physiological acoustics.

Stipčević, Ennio (*b* Zagreb, 17 Sept 1959). Croatian musicologist. He studied at the Zagreb Academy of Music (BA 1983, MA 1986) and took the doctorate at Zagreb University in 1993 with a dissertation on 17th century Croatian music. In 1984 he became a researcher at the Institute for the History of Croatian Music at the Croatian Academy of Sciences and Arts and in 1994 also began teaching at the Zagreb Academy of Music. His research covers Croatian music from the 16th century to the early 19th. He has written monographs on Francesco Usper and Ivan Lukačić, and prepared the first modern editions of the works of Lukačić and Puliti. Particularly valuable are his interdisciplinary studies on Croatian music and theatre, printing, and the social context of music.

ZDRAVKO BLAŽEKOVIĆ

Stirling, Elizabeth (*b* Greenwich, 26 Feb 1819; *d* Hackney, 25 March 1895). English organist and composer. She studied the organ and piano with W.B. Wilson and Edward Holmes, and harmony with J.A. Hamilton and G.A. Macfarren. In November 1839, she was elected organist of All Saints, Poplar, a post she retained until September 1858, when she gained a similar one at St Andrew Undershaft, by competition. This she resigned in 1880. In 1856 she submitted an exercise (Psalm cxxx, for five voices and orchestra) for the Oxford BMus; though accepted, it was not performed, since at that time women were not eligible for degrees. She published some original pedal fugues and slow movements, other pieces for the organ and organ arrangements from the works of Handel and Bach, songs, duets, and many partsongs for four voices, of which a favourite was *All among the Barley*. In 1863 she married the organist F.A. Bridge (1841–1917). Her opera *Bleakmoor for Copseleigh* (unpublished) was in the repertory of their chamber opera company.

GEORGE GROVE/JOHN R. GARDNER

Stirzgen. *See* STERTZING family.

Stiva. Synonym for NEUMA.

Stivori [Stivorio], **Francesco** (*b* Venice, *c*1550; *d* probably Graz, 1605). Italian composer and organist. He is traditionally said to have studied with Claudio Merulo and Giovanni Gabrieli. It is, however, unlikely that the latter taught him, for Stivori was, if not somewhat older, at least the same age as Gabrieli, who described him in a document of 16 October 1604 as 'mio cordialissimo amico'. The title-pages of printed collections show that from 1579 to 1601 he was town organist at Montagnana, near Padua. He went to Graz, apparently in 1602, to serve as organist at the court of Archduke Ferdinand of Inner Austria. He held this post, with the exceptionally high salary of 45 guilders a month, until his death. Costanzo Antegnati praised him in his *L'arte organica* (Brescia, 1608). Though Stivori was a prolific and influential representative of the Venetian school, his works have not yet been studied as they deserve. Through his manuscript collection of eight-part hymns (in *SI-Lng*) and his *Musica austriaca* (1605), the publication of which was made possible by a subsidy of 100 guilders from Archduke Ferdinand, he played an important part in introducing music for multiple choirs into Austria.

HELLMUT FEDERHOFER

Stobaeus [Stobäus, Stobeus, Stoboeus], **Johann** [Johannes] (*b* Graudenz [now Grudziadz], 6 July 1580; *d* Königsberg [now Kaliningrad], 14 Sep 1646). German composer and lutenist. After attending school in his native town, he was sent to the parochial school at Königsberg at the age of 15 and in 1600 enrolled at Königsberg University. From 1599 he took music lessons with Johann Eccard, who had come to Königsberg about 20 years earlier with the Kapelle of Margrave Georg Friedrich of Brandenburg-Ansbach, then administrator of the Duchy of Prussia. The ruler, Albrecht Friedrich of Prussia, had been put under tutelage because of a mental illness, but retained his own court. After Georg Friedrich's return to Ansbach in 1586, Eccard had stayed at Königsberg as vice-Kapellmeister. In 1601 Stobaeus entered the Kapelle as a singer; at the same time, the wealthy merchant Bernhard Thegius engaged him as private tutor for his children. A year later Stobaeus was appointed Kantor at the cathedral and school at Kneiphof. His predecessor, Johann Vogel, was an uncle of the poet Simon Dach, who became one of Stobaeus's closest friends. Eccard wrote a wedding song for Stobaeus's second marriage, in 1607, and Sweelinck (whom he may have met in Amsterdam in 1598) sent one for his third, in 1617.

In addition to his responsibility for liturgical music and teaching, Stobaeus wrote an enormous number of occasional works for both religious and official ceremonies. These continued uninterruptedly until Stobaeus, after 24 years in the service of the church, was called as Kapellmeister to the Königsberg court in 1626. He held this post until his death, but, because of the absence of the administrator, Elector Georg Wilhelm of Brandenburg, at Berlin, working conditions were not favourable. Salaries were not paid regularly, and after Stobaeus's death his heirs claimed 1578 marks from the court treasury. Also, during four outbreaks of plague he lost many members of his family. From 1639 he was a member of the Kürbishütten-Gesellschaft, a society of poets, musicians and intellectuals who styled themselves after Heinrich Albert's garden pavilion (the 'pumpkin hut') and aimed at a general improvement of German language and poetry.

Stobaeus's works had never been fully catalogued or reviewed before the Königsberg University library and the Wallenrodtsche Bibliothek at the cathedral (where seven manuscript volumes of Stobaeus's music were kept) suffered great losses during and after World War II. Many of his works are known only from a catalogue made by the music collector F.A. Gotthold (*d* 1858; see Müller), but a substantial portion of what remains is in the Staatsbibliothek zu Berlin. Most of what Stobaeus wrote before 1626 had to fulfil the needs of the conservative Prussian liturgy, and this subsequently evoked misjudgments of his quality as a composer. Like his teacher Eccard, he had his stylistic roots in the first half of the 16th century and during his early years preferred to develop patterns inherited from Lassus rather than take up Italian innovations such as monody and the basso continuo. In collaboration with Eccard he made an important contribution to Protestant congregational singing by adding about 20 new hymns to the stock (his *Such wer da will ein ander Ziel* on a text by Georg Weissel is still sung in Germany) and by making new settings of familiar tunes. In 1624 he published his *Cantiones sacrae*, including motets for four to ten voices as well as settings of the *Magnificat* (some of them with tenor melodies taken from Lassus and Eccard).

After his appointment as Kapellmeister, Stobaeus's compositions took on a more progressive character, with word-painting and expressive features derived from monody, as is first shown in the wedding motet for Albert Tidemann, *Herr, du hast meine Klage verwandelt in einen Reigen* (1631). When one considers a masterly work like *Wenn der Herr die Gefangenen Zion erlösen wird* (1640), which stands comparison with the best of Schütz, the loss of such late ceremonial compositions as the *Chorus nympharum et faunorum* for the welcome of the Elector Friedrich Wilhelm (1641) or the wedding music for Jacob of Livland (1645) seems the more deplorable. Together with Eccard, Stobaeus published two parts of *Preussische Festlieder* in 1642 and 1644. They consist of settings for the entire liturgical year, which, according to Blume, steer a middle course between simply harmonized chorales and elaborate motets. Several members of the Königsberg poets' circle contributed newly written texts, which Stobaeus set with melodious, songlike upper parts, while the lower parts are treated independently.

Stobaeus was also a lutenist. The Stobaeus Lutebook, dated 1640, containing about 150 pieces of German, Polish and Lithuanian origin, is in the British Library (Sloane 1021; *see* SOURCES OF LUTE MUSIC, §3).

Stoccken, Johannes de. *See* STOKEM, JOHANNES DE.

Stochastic. A term used in music on the basis of its use in probability theory, where it applies to a system producing 'a sequence of symbols (which may… be letters or musical notes, say, rather than words) according to certain probabilities' (Weaver, p.267). The term (from Gk. *stochos*: 'goal') means in modern parlance 'random'. A stochastic process operates on a family of random variables which is indexed by another set of variables with compatible probability of distribution. A stochastic process particularly appropriate to music is the Markov process. In this the probabilities at any one point depend on the occurrences of events so far; the process thus contains a high degree of uncertainty in its initial stages, an increasing certainty as events unfold, and a high degree of determinacy in its closing stages.

The principal user of stochastic processes in musical composition has been IANNIS XENAKIS, who uses them to determine such elements as durations, speeds and 'intervals of intensity, pitch, etc.' (1963, p.13), particularly when he is composing with 'clouds' or 'galaxies' of sounds in which very large numbers of events are present. The idea of the stochastic process also appears in the musical application of INFORMATION THEORY, and forms an important part of the aesthetic theory of Leonard B. Meyer, who sees music as a Markov process or chain.

Stochem, Johannes de. *See* STOKEM, JOHANNES DE.

Stöchs, Georg. *See* STUCHS, GEORG.

Stöchs [Stuchs], **Johann** (*d* ?Nuremberg, after 1546). German printer, son of GEORG STUCHS.

Stock, Aitken and Waterman. English songwriters and record producers. With the slogan 'the sound of Young Britain' and an avowed aim of re-creating the Motown 'hit factory' in 1980s London, Mike Stock (*b* 3 Dec 1951), Matt Aitken (*b* 25 Aug 1956) and Peter Waterman (*b* 15 Jan 1947) composed, arranged and produced numerous hit singles for mostly unknown singers on the label All Boys Music. Early successes included disco songs for Hazell Dean (*Whatever I Do (Wherever I Go)*, 1984), Princess (*Say I'm your number one*, 1985) and Sinitta (*So Macho*, 1986). They reached mass audiences by guiding the careers of Rick Astley and the former Australian television stars Kylie Minogue and Jason Donovan. Their melodic ballads for Astley included *Never gonna give you up* (1987) and *Take me to your heart* (1988). For Minogue, they produced the archetypal *I should be so lucky* (1988) which took an everyday catchphrase and set it to an artfully constructed melodic 'hook'. In addition to composing new songs, the trio also resurrected popular hits of the 1960s such as Goffin and King's *The Locomotion* and *It might as well rain until September*. They also recorded some instrumental pieces under their own name, notably *Roadblock* (1987). The team split up in the early 1990s.

DAVE LAING

Stock, Frederick [Friedrich August] (*b* Jülich, 11 Nov 1872; *d* Chicago, 20 Oct 1942). American conductor of German birth. He attended the Cologne Conservatory as a student of the violin and composition; Humperdinck and Franz Wüllner were among his teachers there. In 1895, after four years as a violinist in Cologne, he joined the Chicago Orchestra, became assistant conductor in 1899, and took charge of all concerts outside Chicago from 1903. When Theodore Thomas died in 1905, Stock was appointed conductor of the Theodore Thomas Orchestra (from 1912 the Chicago SO), a post he held for the rest of his life. In his early years there he was forward-looking, quick to introduce new compositions of Debussy, Ravel, Mahler, Skryabin and Schoenberg, and in the 1920s he was a vigorous promoter of Hindemith and Prokofiev (whose Third Piano Concerto had its première in Chicago with the composer as soloist).

Stock is also remembered for consolidating and advancing the tradition of excellence and virtuosity established by Thomas; for campaigning for benefits for orchestra members; for instituting children's concerts, which he conducted himself; and for establishing the Chicago Civic Orchestra as a training orchestra of professional quality under Chicago SO sponsorship and using Chicago SO players as teachers and coaches. He composed two symphonies and other orchestral works, a Violin Concerto (introduced in 1915 by Zimbalist) and chamber music. The few recordings he made do not justify the esteem in which he was held as an interpreter.

MICHAEL STEINBERG

Stock-and-horn. An 18th-century Scottish pastoral reedpipe, sharing many characteristics with the English hornpipe (*see* HORNPIPE (i)) and the Welsh PIBGORN. (The stockhorn, referred to in 16th-century Scottish literature, is not a reedpipe, but a type of forester's horn blown like a brass instrument.) A primitive type of stock-and-horn was described by the poet Robert Burns in 1794:

> it is composed of three parts; the stock, which is the hinder thigh-bone of a sheep, such as you see in a mutton-ham; the horn, which is a common Highland cow's horn, cut off at the smaller end, until the aperture be large enough to admit the stock to be pushed up through the horn, until it be held by the thicker end of the thigh-bone; and lastly, an oaten reed, exactly cut and notched like that which you see every shepherd boy have when the corn stems are green and full-grown. . . . The stock has six or seven ventages on the upper side, and one back ventage, like the common flute.

The finger-hole section of Burns's own instrument, made from a sheep's leg-bone, is now in the Royal Museum of Scotland. It has seven finger-holes and a thumb-hole, giving it a range of nine notes (more than that of its European and Asian relatives). Several 18th-century pictures show similar but longer instruments, with the reed and finger-hole section probably made from elderwood with the pith removed, where the single reed is also placed directly in the mouth.

David Wilkie's early 19th-century series of paintings *The Gentle Shepherd* (in Aberdeen Art Gallery and the National Gallery of Scotland) depict an elaborately turned instrument with the reed enclosed within an elongated wind cap. These illustrate a scene from Allan Ramsay's poem of the same name (1725), in which the player smashes his stock-and-horn after an unsuccessful attempt at playing the Scots air *O'er Bogie*. Three other specimens, elaborately made from blackwood inlaid with ivory or bone, survive in museums: at the Royal College of Music, London, at the Burrell Collection, Glasgow, and (with a double bore) at the Royal Museum of Scotland. These instruments, originally thought to be from the early 18th century, share not only the elongated wind cap of the modern bagpipe practice chanter, but also its very narrow bore and unusual finger hole sizes and placement. These similarities, as well as the exotic materials from which they are made, strongly suggest that all three are re-creations by a 19th-century bagpipe maker, based on the practice chanter of his day, rather than 18th-century pastoral instruments.

CHARLES FOSTER

Stockem, Johannes de. *See* STOKEM, JOHANNES DE.

Stocker, Caspar. *See* STOQUERUS, GASPAR.

Stocker [née Prince], **Stella** (*b* Jacksonville, IL, 3 April 1858; *d* Jacksonville, FL, 29 March 1925). American composer and specialist in Amerindian culture. Stocker began her study of music at the Jacksonville Conservatory. After graduating from the University of Michigan, she attended Wellesley College and then the Sorbonne. She studied singing with Giovanni Sbriglia in Paris, the piano with Xaver Scharwenka in Berlin and composition with Bruno Klein in New York. Amerindian music was of special interest to her, and she became a member of the Ojibwa people. She lectured on Amerindian music and legends both in the USA and abroad, and she incorporated melodies from this repertory in her works, for example, in the choruses for her play *Sieur du Lhut* (Duluth, MN, 1916) and in a pantomime, *The Marvels of Manabush*. Stocker also wrote four operettas – *Beulah*, *Queen of Hearts*, *Ganymede* and *Raoul* – as well as piano works and songs.

CAROL NEULS-BATES

Stockhausen. German-Alsatian family of musicians.

(1) **Franz (Anton Adam) Stockhausen** (*b* Cologne, 1 Sept 1789; *d* Colmar, 10 Sept 1868). German harpist, teacher and composer. From about 1812 he was a harp teacher in Paris. He accompanied his wife Margarethe in concert tours of Europe from the mid-1820s; after 1840 they lived in Alsace. His compositions include harp arrangements, a mass for four voices accompanied by two harps and other instruments (performed at Notre Dame, 20 May 1817; published Paris, 1822), a *Vidimus stellam* for soprano solo, chorus, harp and organ of 1835 (manuscript in *CH-Bu*) and an Introduction and Variations on a Swiss air for harp (published in London).

(2) **Margarethe Stockhausen** [née Schmuck] (*b* Gebweiler [now Guebwiller], 29 March 1803; *d* Colmar, 6 Oct 1877). Alsatian soprano, wife of (1) Franz Stockhausen. She studied singing with Gioseffo Catrufo in Paris, and in 1825 gave concerts with her husband in Switzerland and then in Paris; she became an honorary member of the French royal chapel in 1827. From 1827 to 1840 she appeared frequently in London and the provinces with

great success; her first German tour was in 1833. Her repertory included oratorios and operatic excerpts.

(3) Julius (Christian) Stockhausen (*b* Paris, 22 July 1826; *d* Frankfurt, 22 Sept 1906). German baritone, conductor and teacher of Alsatian descent, son of (1) Franz Stockhausen and (2) Margarethe Stockhausen. He showed his musical gifts early and during his school years learnt singing and musical rudiments from his parents and the piano from Karl Kienzl, also having lessons on the organ, violin and, later, the cello. In 1843 he visited Paris, where he was a pupil of Cramer for a short while. From 1844 he made Paris the centre of his musical education, spending some time at the Conservatoire (from 1845) but learning harmony from Matthäus Nagiller and singing from Manuel García outside the institution.

Stockhausen's early concert successes were in Switzerland and England, beginning in 1848 with a performance of *Elijah* at Basle. In 1849 he followed García to London, and while in England he appeared before Queen Victoria. He sang again in Switzerland in the first half of 1850 (including a performance of Hérold's *Zampa* in Lucerne), returning to England in the summer, and in 1851 performed in Beethoven's Ninth Symphony and Haydn's *Creation*. During the next decade his activities and reputation expanded to include most of the important musical centres of Europe. He was at Mannheim in 1852–3 as second baritone at the court theatre under Lachner, though his stage career led to strained relations with his parents, who were devout Roman Catholics. He gave the first public performance of *Die schöne Müllerin* as part of a series of Vienna concerts in May 1856; his first German tour, in the same year, included appearances in *Elijah*, *Alexander's Feast* and the Ninth Symphony at the Lower Rhine Music Festival in Düsseldorf, where he met Brahms and the poet Klaus Groth, both of whom became close friends. From 1856 to 1859 he was engaged by the Paris Opéra-Comique, where his roles included the seneschal in Boieldieu's *Jean de Paris*. He founded a choral society that specialized in Bach cantatas in 1858 and during the next five years made further tours of Germany and England, while holding the unexacting post of *Kammersänger* to the Hanoverian court.

Stockhausen's musical association with Brahms began with a concert in Cologne soon after their first meeting. In 1861 they gave recitals in Hamburg, which included the singer's first public performance of *Dichterliebe*; shortly afterwards Brahms began composing the *Magelone Lieder* for him. In 1863 Stockhausen was chosen in preference to Brahms for the conductorship of the Hamburg Philharmonische Konzertgesellschaft and the Singakademie; his first concert with the society included an uncut performance of Schubert's C major Symphony, and his first Singakademie concert (12 January 1864) consisted of Bach's cantata 'Wachet auf', Beethoven's Choral Fantasia (with Clara Schumann as soloist) and the third part of Schumann's *Faust*, in which Stockhausen sang. After resigning his positions in 1867 to resume travelling, he spent part of the next year touring Germany and Denmark with Brahms. He sang the baritone solo in the first performance of the *German Requiem*, conducted by the composer at Bremen Cathedral (Good Friday, 10 April 1868), but press reports indicate that he did not sing well and was apparently ruffled by the experience.

After a year (1869–70) as *Kammersänger* to Karl I of Württemberg and four years (1874–8) in Berlin as director of the Sternscher Gesangverein, Stockhausen settled in Frankfurt, where he remained for the rest of his life. Until his falling out with two successive directors, Raff and Bernhard Scholz, he taught at the Hoch Conservatory, from its opening in 1878 to 1880, and in 1883–4. Mostly, however, he taught at his own school of singing, founded in 1880; among his pupils were Hermine Spiess, Antonia Kufferath, Anton van Rooy and Max Friedlaender. He was also active as a concert organizer, and published a number of works on singing, including the *Gesangsmethode* (Leipzig, 1884).

Although Stockhausen made important contributions as a conductor and teacher, and was a distinguished singer of opera and oratorio, it is probably as an interpreter of lieder that he left the strongest impression. He did much to stimulate popularity of the songs of Schubert and Schumann, and he was an inspiration and formative influence for Brahms. His art, for which he acknowledged a debt to García, Viardot and Jenny Lind, was acclaimed by many contemporary commentators, including Sir George Grove (*Grove1*):

> Stockhausen's singing in his best days must have been wonderful. Even to those, who, like the writer, only heard him after he had passed his zenith, it is a thing never to be forgotten ... His delivery of opera and oratorio music ... was superb in taste, feeling and execution; but it was the lieder of Schubert and Schumann that most peculiarly suited him, and these he delivered in a truly remarkable way. The rich beauty of the voice, the nobility of the style, the perfect phrasing, the intimate sympathy, and, not least, the intelligible way in which the words were given – in itself one of his greatest claims to distinction – all combined to make his singing of songs a wonderful event ... But perhaps his highest achievement was the part of Dr Marianus in the third part of Schumann's *Faust*, in which his delivery of the scene beginning 'Hier ist die Aussicht frei', with just as much of acting as the concert room will admit – and no more – was one of the most touching and remarkable things ever witnessed.

(4) Franz Stockhausen (*b* Gebweiler [now Guebwiller], 30 Jan 1839; *d* Strasbourg, 4 Jan 1926). Alsatian pianist, conductor and teacher, brother of (3) Julius Stockhausen. He was first taught music by his parents, then studied the piano with Alkan in Paris, and from 1860 to 1862 was a pupil of Moscheles, Hauptmann and Davïdov at the Leipzig Conservatory. From 1863 to 1866 he was director of music at Thann, Alsace, and in 1868 moved to Strasbourg, where he was conductor of the Société de Chant Sacrée (1868–79), music director at the cathedral (from 1868) and director of the conservatory and municipal concerts (1871–1908).

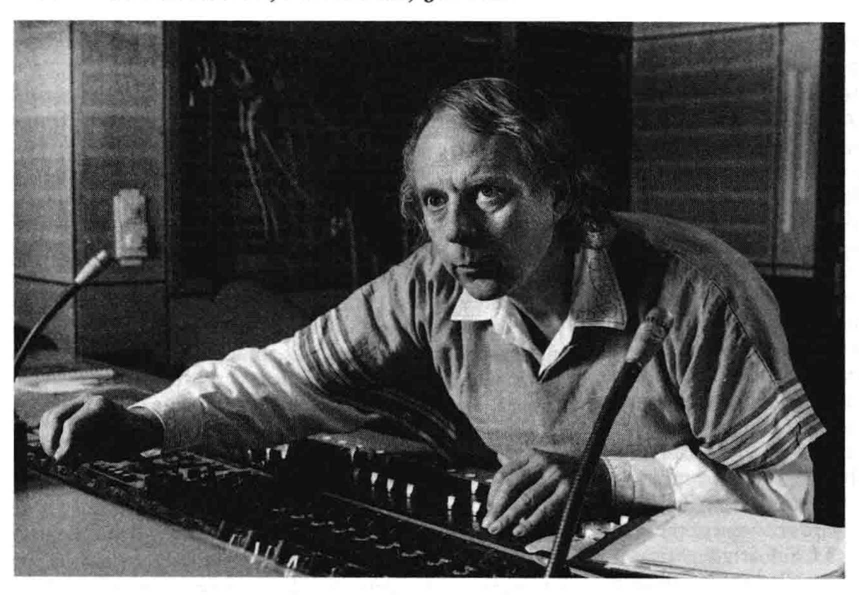
R.J. PASCALL

Stockhausen, Karlheinz (*b* Burg Mödrath, nr Cologne, 22 Aug 1928). German composer. The leading German composer of his generation, he has been a seminal figure of the post-1945 avant garde. A tireless innovator and influential teacher, he largely redefined notions of serial composition, and was a pioneer in electronic music. His seven-part operatic cycle *Licht* is possibly the most ambitious project ever undertaken by a major composer.

1. Life. 2. Works. 3. Aesthetic position. 4. Composition techniques.

1. LIFE. Stockhausen's father was a village schoolteacher with an enthusiasm for amateur theatre; his mother, who had some ability as a singer, was committed to a sanatorium in 1933, and died there (presumably killed, as a 'burden to the state') in 1942. In the same year Stockhausen was sent to a teacher-training institute in Xanten; from there he was sent to Bedburg, directly behind the army front, where he worked in a military hospital. His father died on the Hungarian front in 1945. Returning to the Cologne area towards the end of the war as an orphan, Stockhausen worked for nearly a year as a farmhand for relatives. In 1947 he enrolled at the Cologne Musikhochschule, graduating in music education in 1951; during this period, alongside piano studies with Hans-Otto Schmidt-Neuhaus, he took composition lessons with Frank Martin. At this time he was seriously considering a career as a writer, and received letters of encouragement from Hermann Hesse. He played the piano in bars and clubs, and also worked as (improvising) accompanist to the magician Adrion.



In August 1951, on the recommendation of Herbert Eimert, he went to the Darmstadt Ferienkurse für Neue Musik. There he struck up a friendship with Karel Goeyvaerts, a former pupil of Messiaen's; Stockhausen played a movement of Goeyvaerts's Sonata for Two Pianos with the composer in a composition seminar held by Adorno (who was deputizing for the ill Schoenberg), and defended the work against Adorno's criticisms. Another important impression at the summer course came from hearing a recording of Messiaen's recent *Mode de valeurs et d'intensités*. In January 1952, shortly after marrying Doris Andreae, a fellow student at the Cologne Musikhochschule, he travelled to Paris to study with Messiaen (he also attended Milhaud's classes, without enthusiasm). There he met Boulez, who introduced him to the Parisian avant garde, and also to Pierre Schaeffer and the *musique concrète* studios, where he worked analysing percussion sounds, and composed his first tape piece (*Konkrete Etüde*). He returned to Cologne in March 1953, and in May took up a position in the newly formed Studio für Elektronische Musik at Northwestdeutscher Rundfunk, Cologne, directed by Herbert Eimert. The radio station also gave him a scholarship to pursue doctoral studies in phonetics and communications theory with Werner Meyer-Eppler at Bonn University. Though never completed, these studies had a marked effect on his work in the mid-1950s; he subsequently described Meyer-Eppler as the best teacher he ever had.

By 1953 he was already established, along with Boulez and Nono, as a leading figure in the young serialist avant garde, and his sympathies lay particularly with other young composers who were interested in electronic music. Over the next few years he became the leading figure in a Cologne avant garde which also included the composers Gottfried Michael Koenig and Franco Evangelisti, the poet Hans G. Helms, the philosopher Heinz-Klaus Metzger, and later the performance artist Nam June Paik as well as Kagel and Ligeti. From 1956 Stockhausen taught regularly at the Darmstadt summer courses, and the radical group which had previously been at the fringe of the courses rapidly assumed the limelight; by the late 1950s Darmstadt had become synonymous with the European avant garde, and Stockhausen had become its standard-bearer. Particular attention, and ultimately dissension, was created when Stockhausen invited John Cage to lecture there in 1958; his (qualified) advocacy of Cage's work led to major rifts with Boulez and Nono. Stockhausen's fascination with (but not adherence to) the Cage-inspired counter-culture that sprang up in Cologne from 1958 led to an acquaintance with the painter Mary Bauermeister, who became his second wife in 1967.

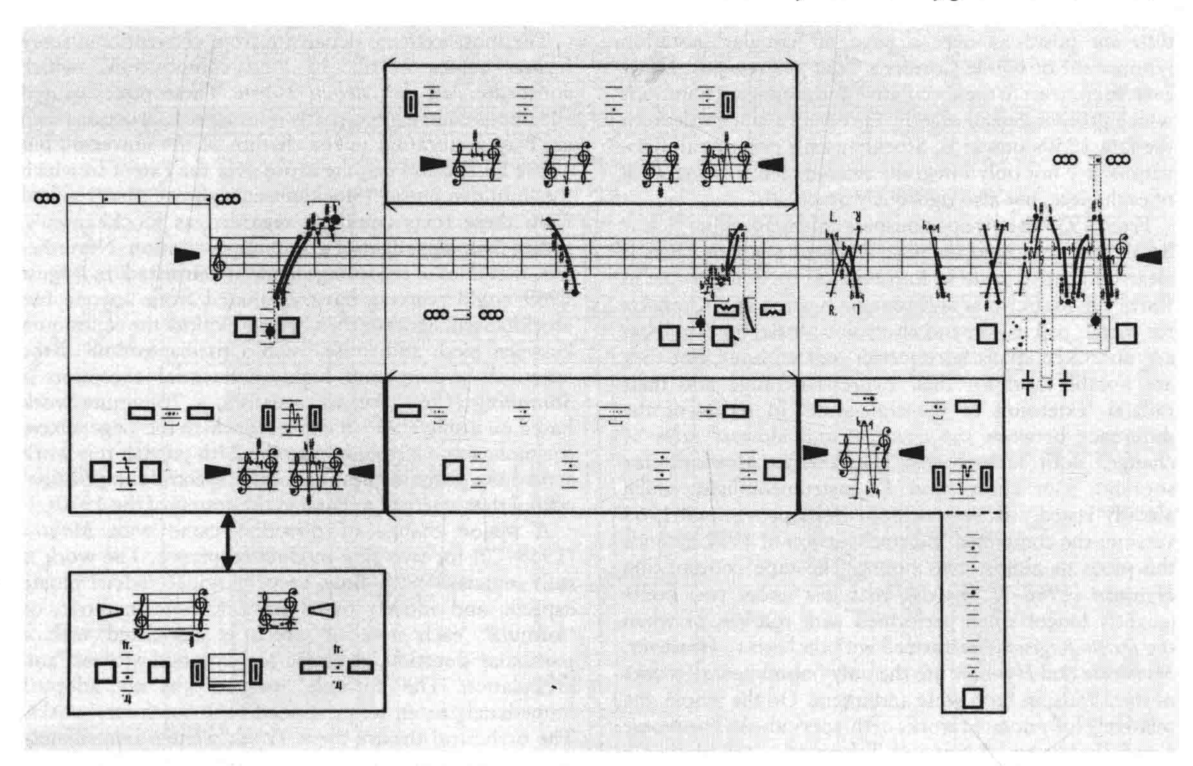
An extended lecture tour in the USA in 1958 gave Stockhausen his first significant exposure outside Europe and, at the same time, his first sustained experience of non-European (albeit still Western) culture. In 1959 he employed the first of many assistants – the English composer Cornelius Cardew – primarily to aid in the realization of *Carré* for four choirs and orchestras; subsequent assistants included the composers Hugh Davies and Tim Souster. By the early 1960s Stockhausen's work was being widely performed, and his status as the seminal European avant-gardist extended way beyond Darmstadt. In 1964 his wife Doris Stockhausen purchased a plot of land for him in the country village of Kürten, about 30 km north-east of Cologne, and Stockhausen had a house built there to his own design which served as his working base from 1965 on.

From 1963 to 1968, seeking to give the Darmstadt model a more protracted form, he directed the composition class at the Kölner Kurse für Neue Musik established by Hugo Wolfram Schmidt, and during this period he founded a performing ensemble including both seasoned new music performers such as Aloys Kontarsky and Alfred Alings, and young composers such as Johannes Fritsch and (later) Rolf Gehlhaar. During the late 1960s Stockhausen travelled throughout the world with his ensemble. Many of their performances took place in unusual (especially outdoor) venues, including the underground caves of Jeita, in Lebanon. The climax of this performing activity came in 1970 at the World Fair (Expo '70) in Osaka, where Stockhausen and his players performed daily for six months in the specially designed spherical German Pavilion which largely exemplified Stockhausen's view of the ideal auditorium for new music. After Osaka, the younger composer members of the ensemble (Fritsch, Gehlhaar and David Johnson) seceded to form their own Feedback Studio ensemble; they were replaced by Peter Eötvös and Stockhausen's assistants Joachim Krist and Tim Souster, but from this point onwards, partly as a result of Stockhausen's return to much more exactly notated works, the ensemble's activities were somewhat curtailed.

By the end of the 1960s Stockhausen's reputation was not only international, but reached outside avant-garde circles. At one stage his recordings reputedly sold more copies for Deutsche Grammophon than those of any other 20th-century classical composer except Stravinsky; this was acknowledged in the form of two 'Stockhausen's Greatest Hits' compilations. The level of his penetration into popular youth culture can be gauged from the inclusion of his photograph on the cover of the Beatles'

1. *Karlheinz Stockhausen at the Barbican Centre, London, 1985*

Sergeant Pepper album. However, in the course of the 1970s, following his espousal of formula composition (see below) and what was perceived as a very personal religious-spiritual conception of music, Stockhausen's central position within new European music receded. Partly because of a prevailing left-wing orientation in West German art, and partly because of an emerging postmodern reaction against 'grand narratives', he became an increasingly marginal (though still substantial) figure. However, although younger composers stopped looking to him automatically as an index of the future of European art music, his appointment as professor of composition at the Cologne Musikhochschule (1971–7) attracted many gifted young composers, including Klarenz Barlow, László Dubrovay, Robert H.P. Platz, Wolfgang Rihm, Claude Vivier and Kevin Volans.



Although he continued to travel widely, Stockhausen's life from the late 1970s onwards focussed ever more on his house in Kürten, and on work on the seven-part operatic cycle *Licht*, each part of which is named after a day of the week. A break with his former publisher Universal Edition in 1972 led him to set up his own publishing house, Stockhausen-Verlag. Far from being a domestic, budget-price operation, the scores issued by Stockhausen-Verlag have been immaculately produced, often including excerpts from sketch materials, and extensive verbal and photographic documentation of performing practice. Some of these scores have gained awards, notably the German Publisher's Award in 1992, 1994 and 1997. In 1992 Stockhausen inaugurated a parallel CD edition, available only by direct order, acquiring the rights to recordings previously issued by Deutsche Grammophon (Polydor) and other major companies. In 1995 he similarly began acquiring the rights to scores formerly published by Universal Edition (*Gesang der Jünglinge*, *Kontakte*, *Hymnen*, *Momente*).

A significant aspect of Stockhausen's performing practice during the 1970s and 80s was that the non-vocal parts of his *Licht* cycle were increasingly entrusted either to close associates (notably the clarinettist Suzanne Stephens and the flautist Kathinka Pasveer) or to three of his children: Markus, Majella and Simon Stockhausen. Of these latter, Markus and Simon Stockhausen have established independent careers as composer-performers. Resistance in Germany to Stockhausen's later music and its attendant ethos began to attenuate during the mid-1990s. Early evidence of this came in a Stockhausen-Symposium in Berlin in 1994, and more significantly in the German premières of parts of the *Licht* cycle at Leipzig in 1994 (*Dienstag*) and 1996 (*Freitag*). It was also reflected in many artistic and academic awards such as the Siemens Prize in 1987 and the honorary doctorate conferred by the Free University of Berlin in 1996.

The Stockhausen Stiftung für Musik, founded in 1994, includes a Stockhausen Archive, located not far from the composer's home in Kürten, which houses scores, sketches, audiovisual materials, correspondence, articles, photographs and press clippings.

2. WORKS. Although some student works (and stylistic exercises) from 1949 onwards are still extant, Stockhausen's catalogue of acknowledged works begins with three pieces composed immediately before his period of study with Frank Martin: a Chorale for unaccompanied four-part choir, a Sonatine for violin and piano and, most significantly, a set of *Drei Lieder* for contralto and small orchestra whose desolate, inadvertently Mahlerian last movement certainly suggests a major talent, but not an avant-garde sensibility. Stockhausen has sought to emphasize certain aspects of thematic construction in these pieces that anticipate his post-Darmstadt-1951 works. However, their rather free use of 12-note methods and their predominantly melancholy expressive character (which accords with Stockhausen's literary output at that time) place them worlds apart from *Kreuzspiel* and its immediate successors.

Kreuzspiel (1951) reflects the direct impact of the sound of Messiaen's *Mode de valeurs* and the form of Goeyvaerts's Sonata for Two Pianos: compared even to Webern, the works of this period are notable for their fragmentation, which became a hallmark of the early postwar avant garde. Their instrumentation establishes a lasting principle in Stockhausen's work: rather than using standard ensembles, such as string quartet or symphony orchestra with triple or quadruple wind, he selects a group of instruments directly related to the formal idea of

2. Page from Stockhausen's 'Zyklus' for percussion (1959), in which graphic signs represent instruments as well as performance directions

the piece (in the works to 1953, this involves the serial use of octave registers). A partial exception to the 'fragmentary' style is *Formel*, a piece for chamber orchestra which applies the serial principles of *Kreuzspiel* to an overtly melodic material. Rejected at the time, *Formel* proved to be a clear pointer to Stockhausen's music of the 1970s.

Many of the early 'point music' works, which often scandalized their early audiences, were withdrawn after one or only a few performances, not in deference to public opinion, but in response to sharp self-criticism. Most were eventually reissued in revised form: *Kreuzspiel* in 1959, but others, such as *Formel*, *Spiel* and the *Schlagquartett* (recast as a *Schlagtrio*), only in the early 1970s. It was not until *Kontra-Punkte* of 1953 (itself the product of drastic revision) that Stockhausen was prepared to nominate a work for publication as his no.1 (Stockhausen has always listed his works as no.1 etc., rather than op.1); thereafter, although many works were revised or left incomplete, none were withdrawn. *Kontra-Punkte* was also notable for going beyond register forms to an overall form in which the initially fragmentary textures for all ten instruments become gradually more cohesive, and focus on one instrument: the piano.

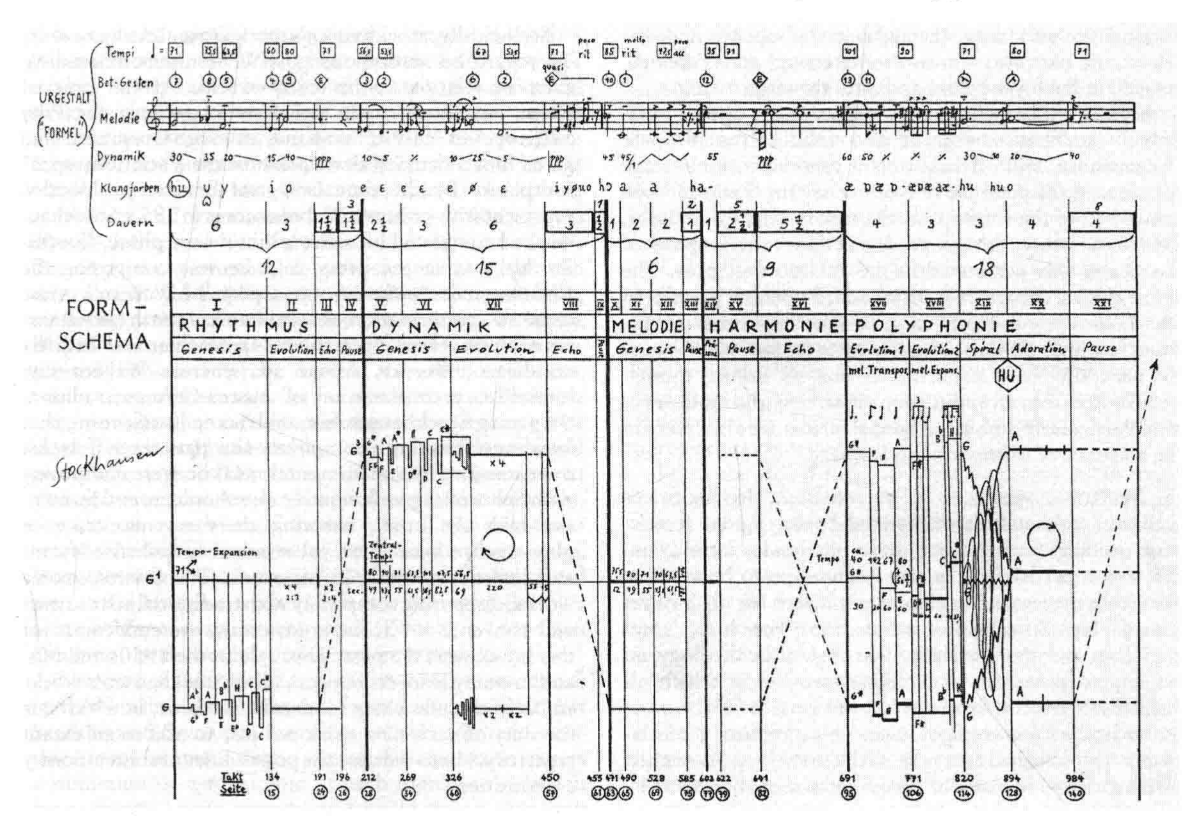
From early 1953 Stockhausen's attention turned largely to electronic music, which preoccupied him for the next 18 months, and which he regarded at the time as representing the essential future of music. The two *Elektronische Studien* prepared the ground for *Gesang der Jünglinge* (1955–6) which, though initially surrounded by controversy on account of its avant-garde treatment of a sacred text (the *Benedicite*), became the first work to establish fully the aesthetic viability of the electro-acoustic medium. However, its significance goes beyond this. It was the first major multi-track work (five channels, subsequently reduced to four), and it partly broke down the doctrinaire division between electronic music and *musique concrète* by including a boy's voice alongside the electronically generated sounds. It also embodied Stockhausen's ideas about the integration of materials, bringing together a number of different types of pitch scales and time proportions, and establishing a continuum between pitched and unpitched sound.

In parallel with *Gesang der Jünglinge*, Stockhausen returned to instrumental music in a second cycle of *Klavierstücke* (1954–5). The latter was intended not as a retreat from electronic music, but as a vital counterpoint to it: an investigation of new aspects of instrumental performance (such as the duality between metronomic time and timing determined by physical movements), revealed in part by contact with the American pianist and Cage-advocate David Tudor, to whom *Klavierstücke V–VIII* are dedicated. These 'indeterminate' considerations are extended further in the wind quintet *Zeitmasze* (1955–6). On the other hand, *Gruppen* for three orchestras (with three conductors), probably the foremost orchestral achievement of the 1950s avant garde, is exactly notated, and explores the possibilities of different simultaneous tempos (as well as 'spatial music').

The unforeseeable aspects of human performance are pushed to an extreme in *Klavierstück XI* (1956), the first significant European work to respond to the 'open forms' of the Cage school. Here, the pianist decides spontaneously on the order of 19 precisely notated fragments, distributed over a single large sheet (Stockhausen subsequently came to prefer 'prepared' versions of the piece). An unorthodox score format is even more apparent in two subsequent 'variable form' works of 1959: *Zyklus*, which is spirally bound and can start on any page (fig.2), and *Refrain*, in which a plastic strip can be rotated to

different positions over a page of 'circular' notation reminiscent of Baude Cordier's *Tout par compas*. However, in contrast to the speculative and mannerist notations which proliferated among the European avant garde from the late 1950s onwards, Stockhausen's notational innovations are not only integrally related to the formal idea of each piece, but also rigorously practical.

From 1959, a new spaciousness enters, marking a clear break with any kind of 'post-Webern' aesthetic. This is clear on a small scale in *Refrain*, and on a larger one in *Carré* for four choirs and four orchestras and *Kontakte* for piano, percussion and electronic music; both of these are unbroken spans lasting over half an hour, but they are notable also for their expressive range and their radical 'extension of the time-scale' in terms of the difference between the quickest and slowest rates of change. Both factors also characterize *Momente* for soprano, four choirs and 13 instrumentalists, which already lasted just over an hour in its provisional 1965 version; the completed 'Europe' version of 1972 extends the piece to almost two hours. The tape composition *Hymnen* (1966–7) likewise lasts just under two hours (slightly longer when performed with soloists, or when the *Dritte Region* is performed with orchestra). However, *Momente* and *Hymnen* are the only 'monumental' works of the 1960s, in both scale and intent. On the whole, the relatively fully notated works of this period – *Mikrophonie I* and *II*, *Mixtur, Adieu* and *Telemusik* – are markedly shorter than the preceding pieces, and considerably less apocalyptic (even exuberant) in tone.



Most of the works from 1964 to the end of the decade use electronics, and above all 'live electronics' (i.e. the use of electronic equipment in concert to modify the sound of amplified instruments). In *Mikrophonie I*, a single tam-tam is activated by two duos on either side of the instrument, and the results are electronically modified by two further players. In *Mikrophonie II* a chorus is ring-modulated with the output of a Hammond organ, and in *Mixtur* the orchestra is divided into five groups, four of which are ring-modulated with sine-tone generators (one per group). Only *Hymnen* and *Telemusik* are 'pure' tape compositions, and even *Hymnen* can, like *Kontakte*, also be performed with (amplified) instrumentalists (as noted above, there is also a version of the third region of *Hymnen* with orchestra).

Starting with *Plus-Minus* in 1964, Stockhausen produced a series of 'process compositions' in which the score consists primarily of transformation processes: a blueprint for composition rather than a finished work. In *Plus-Minus* the various transformation systems are so intricate that a written-out 'version' is essential. Two later works of this kind, *Prozession* (1967) and *Kurzwellen* (1968), both composed for performance by Stockhausen's own ensemble, use a greatly simplified notation, consisting essentially of the signs '+', '–' and '=' (more, less, the same) applied to the pitch, dynamic, length and rhythmic segmentation of existing figures. In *Prozession* the initial materials are drawn from Stockhausen's earlier works; in *Kurzwellen* they are picked up at random from short-wave radio transmissions. These processes are elaborated in *Spiral* (1968) for a soloist, and in *Pole* and *Expo* (both 1969–70, for two and three players respectively); none of the 'process compositions' specifies a particular instrumentation, but all assume the use of live electronics.

The most extreme departure from conventional score format comes in the 15 'text compositions' which constitute *Aus den sieben Tagen*. These pieces caused enormous controversy, partly because of instructions such as 'Play a vibration in the rhythm of the universe', but above all because dispute arose over the extent to which the 'intuitive music' (Stockhausen's phrase) that resulted from these texts could be regarded as Stockhausen's, rather than a product of group improvisation. Nevertheless, the series of recordings made at Darmstadt in August 1969 could scarcely have emanated from anyone but Stockhausen. Most of these works explore the continuum between pitch and noise, with a predisposition to the latter. A striking and highly influential exception is *Stimmung* (1968) for six vocalists, a 70-minute work based on a single B♭ 9th chord, in which the singers have to emphasize overtones up to the 24th partial; this work served as a prime inspiration for the 'spectral composition' school that emerged in Paris in the course of the 1970s.

A major change of direction came with *Mantra* (1969–70) for two ring-modulated pianos. The work is fully notated, with only very marginal indeterminate aspects, and entirely based on a 13-note 'mantra', or 'formula', each note of which is associated with a particular duration, dynamic (or dynamic process) and articulation. The 'formula' method was not adopted immediately as an unquestioned basis for future works. The orchestral theatre piece *Trans*, written immediately after *Mantra*, does not have a 'core melody', although sketches show that Stockhausen had originally intended this to be the case. Up to 1974, Stockhausen continued to produce text compositions, such as *Ylem*, the first three parts of *Herbstmusik*, and the collection *Für kommende Zeiten*. The decisive return to the formula method comes in *Inori* ('Adorations', 1973–4), for mime, dancer and orchestra, which also picks up many threads from the abandoned *Monophonie* of 13 years earlier. *Inori* is notable for the rigorously serial composition of its main visual element – the prayer gestures of the mime – and the extremely sophisticated, intricate composition of dynamic levels. Equally prophetic, however, is the expansion of the work's 'formula' over about 67 minutes to determine the broad formal proportions of the work. In addition, *Inori* is the first major work in which the formula is explicitly presented as an audible melody that permeates the work. In *Sirius* (1975–7), which marks Stockhausen's first significant engagement with the synthesizer (in this case an EMS Synthi 100), four formula-melodies from the *Tierkreis* cycle form the basis of a 96-minute work.

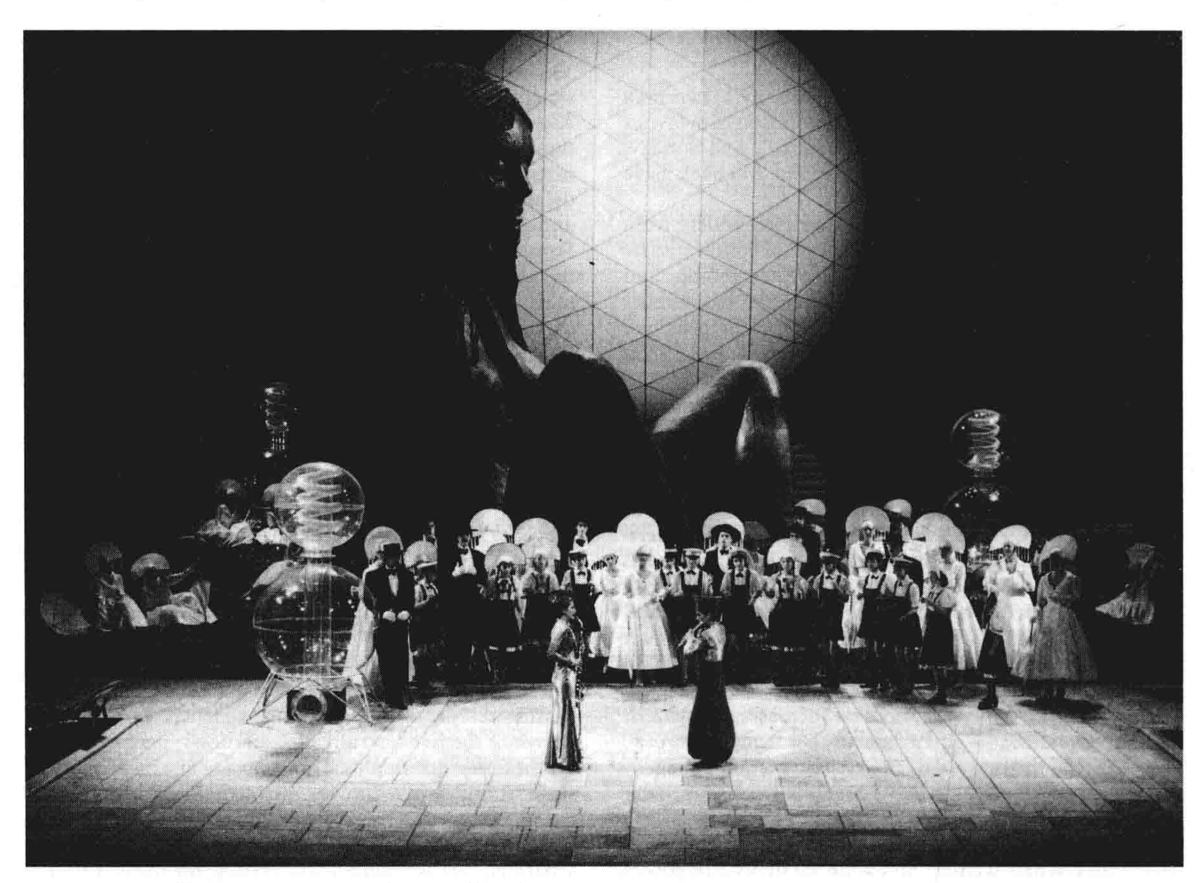
Although Stockhausen had long rejected the notion of composing operas, his sketchbooks throughout the 1960s were full of propositions for theatre pieces of various kinds, some of which have been finally realized, albeit in modified form, in *Licht: Die sieben Tage der Woche*, a 'cosmic' seven-part operatic cycle commenced in 1977, and scheduled for completion in 2002 (i.e. as a 25-year undertaking). The 'seven days of the week' have not been composed sequentially, but in the order *Donnerstag, Samstag, Montag, Dienstag, Freitag, Mittwoch, Sonntag*. That is, the three works which concentrate on just one of the three main characters (Thursday is Michael's Day, Saturday Lucifer's Day, and Monday Eve's Day) were the first to be composed, then came two operas focussed on interaction between pairs of characters (Tuesday: Lucifer and Michael, Friday: Eve and Lucifer). Wednesday,

3. Autograph score of Stockhausen's form-scheme for 'Inori', composed 1973–4

initially intended as the moment of harmony between all three protagonists but ultimately excluding them in favour of a humorous 'Lucimidiaelian Operator', and Sunday, as the final 'mystical union' of Eve and Michael, have been left until last.

From the start, the *Licht* cycle departed widely from operatic norms, not in the anti-opera sense epitomized by Kagel's *Staatstheater*, but in its tendency to ceremony and ritual: thus each work opens with a 'Greeting' (sometimes on tape) and concludes with a 'Farewell'. The principal characters are often portrayed in threefold form – as singers, instrumentalists, and dancers or mimes – and several acts (e.g. the second act of *Donnerstag* and the second and third of *Samstag*) are essentially staged instrumental works, with only marginal vocal intervention. In this, Stockhausen has allied himself with a widespread tendency in modern Western theatre since Artaud to reject a psychological approach to characterization. In the course of composing the cycle he has tended to a view that the instruments are, in many respects, more essential carriers of 'character' than the voices (here again, there are antecendents in Wagner, but also in the two vocal and two instrumental participants of *Sirius*). One consequence of this is that the texts, still relatively naturalistic in *Donnerstag*, become increasingly stylized: in *Freitag* and the 'Welt-Parlament' act from *Mittwoch*, large parts of the text are in an invented meta-language.

More significantly, perhaps, Stockhausen's approach to instrumental writing has changed enormously in the course of the *Licht* cycle. Up to the 1970s, the 'extended techniques' which were an obsession for many composers in the 1960s had scarcely interested him (a striking exception is the variety of cluster techniques deployed in *Klavierstück X*). The process- and text-compositions of the 1960s give the players ample incentive to explore new instrumental possibilities, but never prescribe them in detail. While close collaboration with Suzanne Stephens and Markus Stockhausen on the instrumental parts of *Sirius* clearly heightened Stockhausen's interest in instrument-specific techniques, the trumpet part of *Donnerstag* takes this interest much further, exploring a wide range of 'coloured noises', as does the flute part in 'Kathinkas Gesang' (from *Samstag*). From *Montag* onwards, Stockhausen also turns his attention to microtonal scales of great variety and sophistication.



Electro-acoustic music has played an increasing and changing role in the *Licht* cycle. In *Donnerstag*, as in *Der Jahreslauf* (composed before *Donnerstag*, but subsequently incorporated into *Dienstag*), there are tape playbacks. A concert version of 'Kathinkas Gesang', the second act of *Samstag*, replaced the six percussionists of the original version with a tape part, realized at IRCAM, that represents Stockhausen's first major engagement with computer music. In *Montag*, which also has many taped inserts ('sound scenes'), the instrumental music is entrusted to what Stockhausen calls a 'modern orchestra' of synthesizers and amplified instruments. In Act 2 of *Dienstag* the live instrumentalists (brass, percussion and synthesizers) are amplified, and engage in a quasi-military stage action while moving through the audience, still coordinating exactly through transmitter-receivers; in addition, there is an eight-track tape part (performable separately as *Oktophonie*). In *Freitag*, for the first time, a tape part (eight tracks of electronic music and 12 of

'sound scenes') runs throughout the opera, and the electronic part also acts as the 'Greeting' and 'Farewell' played in the foyer before and after the stage action.

Several of these works extend outside the opera house, which Stockhausen regards as a residue from the late Renaissance, still offering only a two-dimensional stage picture. At the première of *Donnerstag* the 'Farewell' was played from the rooftops of the square outside La Scala, Milan. *Samstag*, though produced under the auspices of La Scala, was performed in the Palazzo del Sport. The most drastic departure from standard operatic practice in the *Licht* cycle is the Helikopter-Streichquartett in *Mittwoch*, whose airborne string quartet (in four helicopters) is naturally only conceivable out of doors, though transmitted into an auditorium via screens and loudspeakers. Particularly ambitious spatial effects are also likely to be a feature of *Mittwoch* and *Sonntag*.

3. AESTHETIC POSITION. The consistent driving forces behind Stockhausen's works have been religious conviction (initially Catholicism), and a passion for innovation. Viewed superficially, the two might seem to be at odds. Yet from the outset, Stockhausen's search for the 'not yet heard' had a religious motivation. For him, 'total serialism' was intended as a form of acoustic theology, an attempted paradigm of a divine creation in which all elements were constantly present in perfect balance, but never in the same configuration. This intention, undeclared in his published essays from the early years, is explicit in his correspondence with Goeyvaerts (see Sabbe, C1981).

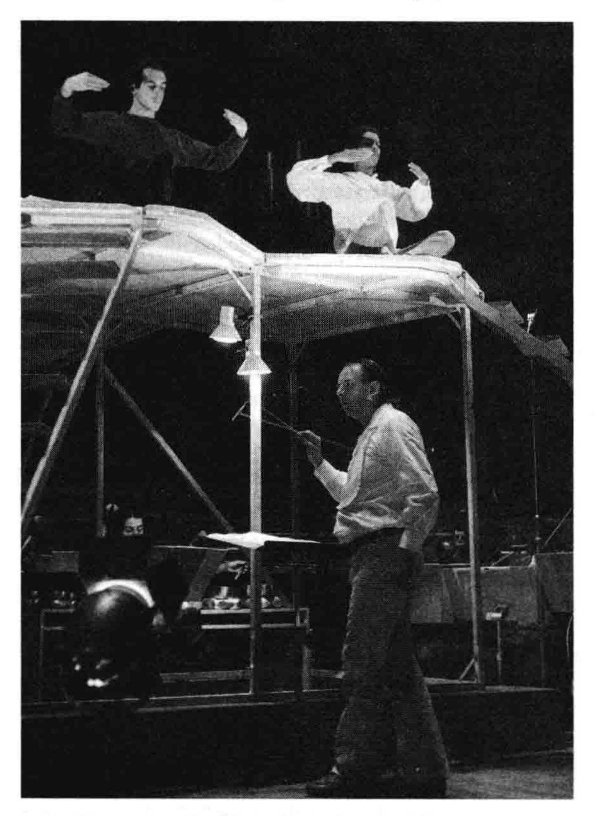
Stylistically, Stockhausen's work arose almost *ex nihilo*. To regard his outlook as post-Webernist is misleading, even in relation to his early works. At the time of *Kreuzspiel* Stockhausen probably knew only the *Fünf Sätze* op.5 of 1909 at first hand, although Goeyvaerts had given him a detailed description of the Variations op.27 for piano. By the time Universal Edition published a representative group of Webern scores in 1953, Stockhausen had completed his strict 'point music' phase, *Kontra-Punkte* was in the press, and he was composing the *Elektronische Studien*. Some aspects of Webern's music came as a confirmation of Stockhausen's path (as witness his analysis of the Concerto op.24), but there was virtually no direct influence. Above all, whereas Webern saw himself as a continuation of Austro-German tradition, the young Stockhausen felt, with some justification, that he was establishing a completely new path (even if, by his own account, he sometimes felt as if he were composing with Schoenberg looking over one shoulder, and Stravinsky over the other, ensuring there was no trace of plagiarism) – hence the total avoidance of inherited forms and instrumentations in his work. The first electronic works, dispensing completely with traditional instruments and conventional acoustic materials, are emblematic of this break with the past. Throughout the 1950s and 60s, and in many respects beyond, all of Stockhausen's works embody an unflinching modernist aesthetic, in which it is the duty of each new work not just to add to an extant repertory, but to redefine the possibilities of contemporary composition.

4. Scene from Stockhausen's 'Montag aus Licht', La Scala, Milan, 1988

It would be equally wrong to regard Stockhausen as a 'scientific' composer, although work in the early electronic studios clearly called for some expertise in acoustics and basic electronics. Nevertheless, there are certain aspects of scientific research, especially in 'inexact' or experimental areas, that inspired him. In historical terms, he has often cited Einstein, Max Planck and Werner Heisenberg as models and forerunners. In the mid-1950s he was directly influenced by information and communications theory, and experimental linguistics, primarily through attending Meyer-Eppler's courses in Bonn. Subsequently, some expositions of evolutionary genetics (e.g. Wolfgang Wieser's *Organismen, Strukturen, Machinen*) also impressed him as offering models for, or parallels to, compositional processes. As for mathematics, this has a purely pragmatic, craft-orientated function: it is largely a matter of the sophisticated use of simple arithmetic and geometric series to determine and unify proportions at various structural levels. From about 1960 onwards, Stockhausen made considerable use of the Fibonacci series. The initial impetus for this seems to have come from reading Le Corbusier's influential architectural primer *Le Modulor*, rather than (for example) Bartók's later works, and was reinforced in 1966 by a Mondrian exhibition at the Stedelijk Museum in Amsterdam.

The most significant changes from 1960 onwards are spiritual rather than technical. It was around 1960 that Stockhausen developed his notion of non-dramatic, non-directional 'moment forms', 'in which one has to expect a minimum or a maximum at each moment . . . which have always begun already and could go on that way without limit; in which each present instant counts, or nothing counts at all'. The eternal present of Stockhausen's moment form may have its Augustinian aspects, but it is also hard to separate from his precarious personal situation at the time. The breakdown of his first marriage led to his estrangement from Catholicism, but by no means from religious belief. Yet although the early 1960s seem to mark a period of spiritual uncertainty in his life, the reflection of this in his work is, paradoxically, not a sense of crisis, but a sudden omnivorous curiosity which bursts out of the self-contained sphere of the 1950s European avant garde.

If the keyword for Stockhausen's work in the 1950s is organization, in the 60s it is integration. The 50s' rigorous search for the unknown was not repudiated, but its purism in relation to consistency of material certainly was. Stockhausen was no less interested in opening up entirely new possibilities, but now he also looked for ways to integrate existing materials, often of the most startlingly familiar kind, and place them in new perspectives. This is first apparent in the street talk of *Momente*, continues through the stylized vocalizations of *Mikrophonie II* (with markings as diverse as 'Solemn Levite chant' and 'à la Jazz, cool'), and reaches its peak in *Hymnen*, whose basic materials (national anthems) are completely 'known'.



The shift of emphasis is mirrored in Stockhausen's writings. Up to 1961, the majority dealt with theoretical issues: particularly important in this respect are *Struktur und Erlebniszeit*, the very influential *. . . wie die Zeit vergeht . . .*, and *Die Einheit der musikalischen Zeit*. Since then, Stockhausen has not produced theoretical essays *per se*, although from the mid-1970s onwards there have been several analytical texts. On the other hand, he has spoken repeatedly about the spiritual basis of his work, in interviews, programme notes and essays.

Another important factor in the work of the 1960s is the notion of co-creation, in a sense going somewhat beyond that of collaboration. Earlier examples date back to the 1950s: work with David Tudor on the no.4 *Klavierstücke*, with Gottfried Michael Koenig on the electronic works *Gesang der Jünglinge* and *Kontakte* and, more radically, with Cornelius Cardew in the realization of *Carré*. In founding the Stockhausen Ensemble, Stockhausen established the basis for a new kind of live electronic 'oral tradition' exemplified in *Kurzwellen*. At the Darmstadt summer courses in 1967 and 1968, his composition classes were primarily concerned with the evolution of 'collective compositions' (*Ensemble* and *Musik für ein Haus* respectively) to which all course participants contributed.

From the mid-1960s, in West Germany as in many other parts of Europe, cultural thinking was increasingly driven by left-wing ideological agendas, and Stockhausen's work eventually came under strong criticism from influential Marxist groups in German cultural life. Although the outward sound (and even compositional process) of works such as *Prozession* and *Kurzwellen* still seemed assimilable to a prevailing 'musica negativa' aesthetic, Stockhausen's personal statements in relation to works like *Hymnen* or *Aus den sieben Tagen* established a clearly non-leftist position. In the late 1960s it became increasingly clear that his primary aesthetic motivation was spiritual and cosmic, rather than terrestrially political – even the use of short-wave radios in works like *Kurzwellen* and *Spiral* involved, as subtext, the idealistic hope that some transmissions might be extra-terrestrial. At this time, Stockhausen's principal orientation was to the writings of Sri Aurobindo, from which he reads in one of the Darmstadt recordings of *Aus den sieben Tagen*, and to the Sufi mystic Hazrat Inayat Khan.

An overtly religious standpoint is asserted in many works of the mid-1970s, notably by the prayer 'Gott, Du bist das Ganze' in *Sternklang*, the religious ceremonies in the *Indianerlieder*, the praying mime in *Inori* and the 'Annunciation' at the end of *Sirius*. Essential to the last named, and indeed to many works from *Kurzwellen* onwards, is the composer's increasingly firm conviction that there are other, higher intelligences in other galaxies with their own superior musical cultures, who will make contact with Earth, or have already done so: this is first made explicit in *Sirius*. In keeping with views expressed earlier by Stravinsky ('I am the vessel through which *Le Sacre* passed') and Webern ('Man is only a vessel'), Stockhausen regards himself as a receiver and transmitter of higher (supra-terrestrial) vibrations. A firm believer in reincarnation – each instance of which he regards as a momentary period of testing that precedes and briefly impedes access to a higher state of consciousness – Stockhausen views his late work not as messianic revelation, but as patient steps towards his own spiritual evolution which also, perhaps more importantly, may facilitate the passage of willing listeners to similar goals.

Comparisons with Wagner had been made ever since the première of *Carré*; and when, in 1977, Stockhausen announced his seven-part operatic cycle *Licht*, such comparisons, specifically with *Der Ring des Nibelungen*, became inevitable (though *Parsifal*, as 'staged festival dedication play', would probably be more relevant). A

5. Stockhausen in rehearsal conducting 'Inori', 1982

more significant influence is that of the Urantia Book, a collection of 196 'papers' supposedly revealed by extraterrestrial superhumans from 1928 to 1935, with which Stockhausen became familiar in 1971. The basic opposition in *Licht* between dissenting intellect, represented by Lucifer, and affirmative spirituality, represented by Michael, is drawn straight from the Urantia Book's cosmology, as indeed is the cycle's title: according to the Urantia Book, 'Light – spirit luminosity – is a word symbol, a figure of speech, which connotes the personality manifestation characteristic of spirit beings of diverse orders'. However, *Licht* also draws on an enormous range of other myths and religious traditions and rites – a synthetic approach already present in the many interjected 'magic names' which steer the emotional and spiritual course of *Stimmung*.

4. COMPOSITION TECHNIQUES. The first characteristic works, such as *Kreuzspiel* or the *Schlagtrio*, are instances of 'total serialism' (*see* SERIALISM, §5): the basic series is permutated rather than transposed, and applied to durations, dynamics and articulation ('mode of attack') as well as pitch (where the notion of transposition still applies). Since all elements of each parameter are constantly present, form must be achieved by other means, normally by 'register forms' such as the gradual move from extreme top and bottom to the balanced use of all octaves that occurs at the beginning of *Kreuzspiel*. The instrumentation of these works is largely determined by the need for material to be present in any octave register with a full dynamic range; in *Formel* and *Spiel* particular instruments or groups of instruments are associated with each octave.

These early works observe the Second Viennese School convention of a basic 12-note material. Once Stockhausen began work in the Parisian *musique concrète* studios and moved away from the tempered 12-note scale, the justification for the number 12 as the inevitable basis for parametric organization disappeared and works were constructed on the basis of 'proportion squares' of 5 × 5 (*Elektronische Studie II*) or 6 × 6 (*Konkrete Etüde*, *Elektronische Studie I*). This subsequently extended to all but the pitch dimensions of instrumental works like *Zeitmasze* and *Klavierstücke V–VIII*. Another discovery from late 1952, which forms part of a move from 'point music' to 'group composition', is the systematic assembling of sounds into what Stockhausen, in his letters, calls 'modes'. In the 'vertical' version, sounds begin together and end separately, or begin separately and end together; in the 'horizontal' version they are either linked together (legato) or broken into serially quantified ratios of sound and silence. This does not apply only to the *concrète* and electronic studies: the same procedures are found in the first two *Klavierstücke* and *Kontra-Punkte*.

The works from 1953 onwards apply serial organization to a great deal more than the 'four parameters' often associated with serialism: they permeate every level of the formal process. Allied to this is a move away from the 'static' conception of the early works, in which systematic exploitation of octave registers was often the only variable creating a sense of formal direction. The quest for 'unity' pursued in earlier pieces now assumes more thoroughgoing form: in *Elektronische Studie II*, for instance, the use of fives determines not only a basic 25√5 scale for pitches, durations and dynamics, and five main sections, but also five subsections per section, each consisting of five 'groups' of one to five sounds, with five different 'band-widths'. The resulting 'group composition' changes the function of the series, which no longer merely permutates independent objects (e.g. 12 notes, or 6 durations), but is concerned with their relative proportions. In the context of *Klavierstücke V–VIII*, for instance, a number series like 6 4 5 2 1 3 not only implies a movement from relatively large to relatively small, but also consciously regulates the level of increase and decrease (6 – 2 + 1 – 3 – 1 + 2).

In contrast to the focus on total unity of proportions initially pursued in the studies and *Klavierstücke V–VIII*, the works from the period 1956–8 – the extended version of *Zeitmasze*, *Gruppen* and *Klavierstück XI* – use a diversity of proportions. Not only are different basic quantities (e.g. fives, sevens, twelves) used for different aspects of the same work; there is also a dialectic between simple 'arithmetic' series of proportions (e.g. 1 2 3 4 5 6), and 'geometric' ones (e.g. 1 2 3 6 10 15 21). Another new aspect of these works is the degree to which Stockhausen is prepared to insert new material retrospectively into the music provided by an initial scheme: the variable tempo sections in *Zeitmasze*, the passages in *Gruppen* where all three orchestras play in synchrony (with coordinated accelerandos and ritardandos), and many of the more ad hoc production processes used in *Gesang der Jünglinge* are, in effect, carefully considered afterthoughts.

Up to 1959, even long works like *Gruppen* involve detailed microstructures, and the longest 'sounding' notes are not very long. The American experience (in 1958) of constant aeroplane flights, and listening to the 'inner transformations' of the long drone of aeroplane engines,

led to what Stockhausen subsequently termed 'an expansion of the time-scale'. One consequence of this is the use of a scale of durations which greatly increases the ratio between the smallest and largest units. Another change of outlook involved a re-evaluation of the function of number sequences in serial composition. Following the earlier move from 'points' to 'groups', Stockhausen now started to think of the series in terms of 'degrees of alteration'; that is, a sequence such as 6 5 1 4 2 3 is considered not only as $x - 1 - 4 + 3 - 2 + 1$ (as was already the case in 'group composition'), but also, for example, as: total change (6), major change (5), minimal change (1) etc. This way of thinking played a major role in *Refrain*, *Carré* and *Kontakte*, and paved the way for the 'process compositions' of 1963–70.

It was in 1961, in the recomposed *Klavierstück IX*, that Stockhausen first gave obvious precedence to the Fibonacci series (in practical terms, 1 2 3 5 8 13 21 34 55 89 144), which serves as a primary tool in sculpting the time-proportions (and other aspects) of such works from the 1960s as *Plus-Minus*, *Mikrophonie I* and *II*, *Stop*, *Adieu* and *Telemusik*. However, the advent of 'moment form' around 1960 brings several other factors into play. The characterization as 'unique' of each formal 'moment' (most works involve about 30 of them) lays particular emphasis on such aspects as timbre, articulation and, in the case of *Carré*, spatial location and movement. Evidence of this is the rich array of adjectives used to label the 33 'moments' in *Mikrophonie I* (e.g. 'schlürfend-quietschend' (slurping-squealing) or 'winselnd-jaulend' (whimpering-wailing), and the more objective moment-titles used in *Mixtur* (e.g. 'Dialogue', 'Layers', 'Translation'). More broadly, the 'moment form' approach tends to imply preparatory sketches which list all the available parametric combinations, and investigate significant ways of grouping and interrelating them, without giving *a priori* preference to any single ordering.

A major change of approach came with the 'formula' technique first introduced in *Mantra*. Here, not only are the various parameters of each phrase serially proportioned, but each of the individual articulation types allotted to each note of the formula subsequently dominates one of the work's 13 main sections. In addition, the rhythmic structure of each of the formula's four phrases serves as the germ for the rhythmic structure of the remainder of the work. An important aspect of the pitch structure, carried over from process compositions such as *Spiral*, is that the basic melody sequence is also subjected to 12 different 'expansions' (ranging up to over three octaves).

One inevitable outcome of Stockhausen's development of 'formula technique' is the renunciation of 'moment form'. The last significant work to be conceived in terms of 'moments' is *Trans*, and even here there are certain aspects, including the harmonic structure of the dense string chords and the lengths of sections, which are 'through-composed' as a single process. In *Inori*, the form is clearly 'organic': the five main sections, derived from the five phrases of the 'formula', progressively introduce 'rhythm', 'dynamics', 'melody', 'harmony' and 'polyphony', and all but the 'harmony' section include subsections entitled 'genesis' and/or 'evolution'. Most significant here, however, is the drastic expansion of the formula to a notional length of 60 minutes (augmented in practice by seven minutes of fermatas and various visual or theatrical elements), so that the shaping of the melody is also that of the overall form.

Licht provides the most extreme extension of the 'formula' technique. The entire cycle is extrapolated from a three-layer 'super-formula': a superimposition of the formulae for the three main characters. At the broadest level, this super-formula determines the relative length of the seven operas, and their subdivision into individual acts and scenes. It also supplies a framework of central pitches extending over long periods of time, as well as the basis for all local melodic and rhythmic detail.

Although, in some respects, the formula method seems to hark back to the serialism of the early 1950s, it is essentially a much more flexible method, allowing far more scope for on-the-spot decisions about musical substance. An essential criterion for Stockhausen is that each response to the available options should involve a new exploration of the formula's possibilities, not recourse to well-tried strategies. Halfway through work on *Mittwoch*, he commented that he had still made no use in *Licht* of the pitch expansions introduced in *Mantra*, and that the method's potential resources still seemed infinite.

WORKS

the numbering is Stockhausen's

amplification and/or other electro-acoustic transformation specified for works from no.9 onwards

NUMBERED WORKS, 1950–77

no.	
$\frac{1}{11}$	Chöre für Doris (P. Verlaine), mixed chorus, 1950: 1 Die Nachtigall, 2 Armer junger Hirt, 3 Agnus Dei; ORTF Chamber Chorus, cond. Couraud, Paris, 21 Oct 1971

RICHARD TOOP

Stockhausen, Markus (*b* Cologne, 2 May 1957). German trumpeter and composer, son of Karlheinz Stockhausen. At the Cologne Hochschule für Musik he first studied the piano, then the classical and jazz trumpet with R. Platt and M. Schoof, graduating in 1982. In 1981 he was the winner of the German Music Competition. Meanwhile, he had made his jazz début in 1974 at the Newcomer Jazz Festival in Frankfurt, and his classical début in 1976 in his father's *Sirius* at the Bicentennial celebrations in Washington DC. He began to collaborate intensively with his father in 1974, since when he has played in the premières of several of his father's works: *Sirius* (1975–6, with *Aries*, 1977) and, from *Licht*, *Donnerstag* (1978–81, including *Michaels Reise um die Erde*), *Samstag* (including *Oberlippentanz*, 1984) and *Dienstag* (including *Invasion* and *Pietà*, 1991).

In addition to his activities as a soloist, mainly in contemporary music, he has played throughout the world in various jazz ensembles, such as the quintet 'Key' (1974–9), the Rainer Brüninghaus Group (1980–84), Kairos (1985–90), Aparis (1989–96) and Possible Worlds (1995–). His duo partners have included Jasper van t'Hof (keyboards), Gary Peacock (bass), the organist Margareta Hürholz, the pianist Fabrizio Ottaviucci and his pianist sister Majella Stockhausen (*b* Cologne, 7 June 1961).

As a composer he has, together with his brother Simon (*b* Bensberg, 5 July 1967), written several film and theatre scores and created two open-air spectacles for the fifth and tenth anniversaries of the Philharmonie in Cologne. Other partnerships have been with the noted actress Hanna Schygulla as well as with Enrique Diaz, Nygên Lê and Antoine Hervé. His recordings include *New Colours of Piccolo Trumpet* (1993), *Clown* and *Jubilee* (1996). In 1996 he began to teach at the Hochschule für Musik in Cologne.

EDWARD H. TARR

Stockholm. Capital city of Sweden. It was founded in 1255 as a small island fortress between Lake Mälar and the Baltic, and soon grew into an important trading centre, with a large German population. Polyphonic singing seems to have been introduced in the 1580s and 90s, after the establishment of the Lutheran service, primarily through the Tyska Kyrka (German Church) and its Kantor, Wolfgang Burchardt (*d* 1599), also rector of the German school. Burchardt's acquisitions of German, Dutch and Italian vocal music are still an important part of the German Church Collection now in the Statens Musikbibliotek.

There were lute players, singers and other musicians at the royal court in the 16th century, and trumpeters and drummers in the guards regiments. The Hovkapell was not fully organized, however, until 1620, when 20 German musicians arrived with the composer Andreas Düben, who had studied with Sweelinck in Amsterdam. He and his descendants dominated Stockholm musical life in the 17th century, holding positions at court and as organists. The Latin school, mainly for training priests and officials, taught singing and instrumental playing, and the curriculum included plays with music, in Latin, Swedish or German. The pupils also sang at funerals and other ceremonies, providing the schools with considerable income.

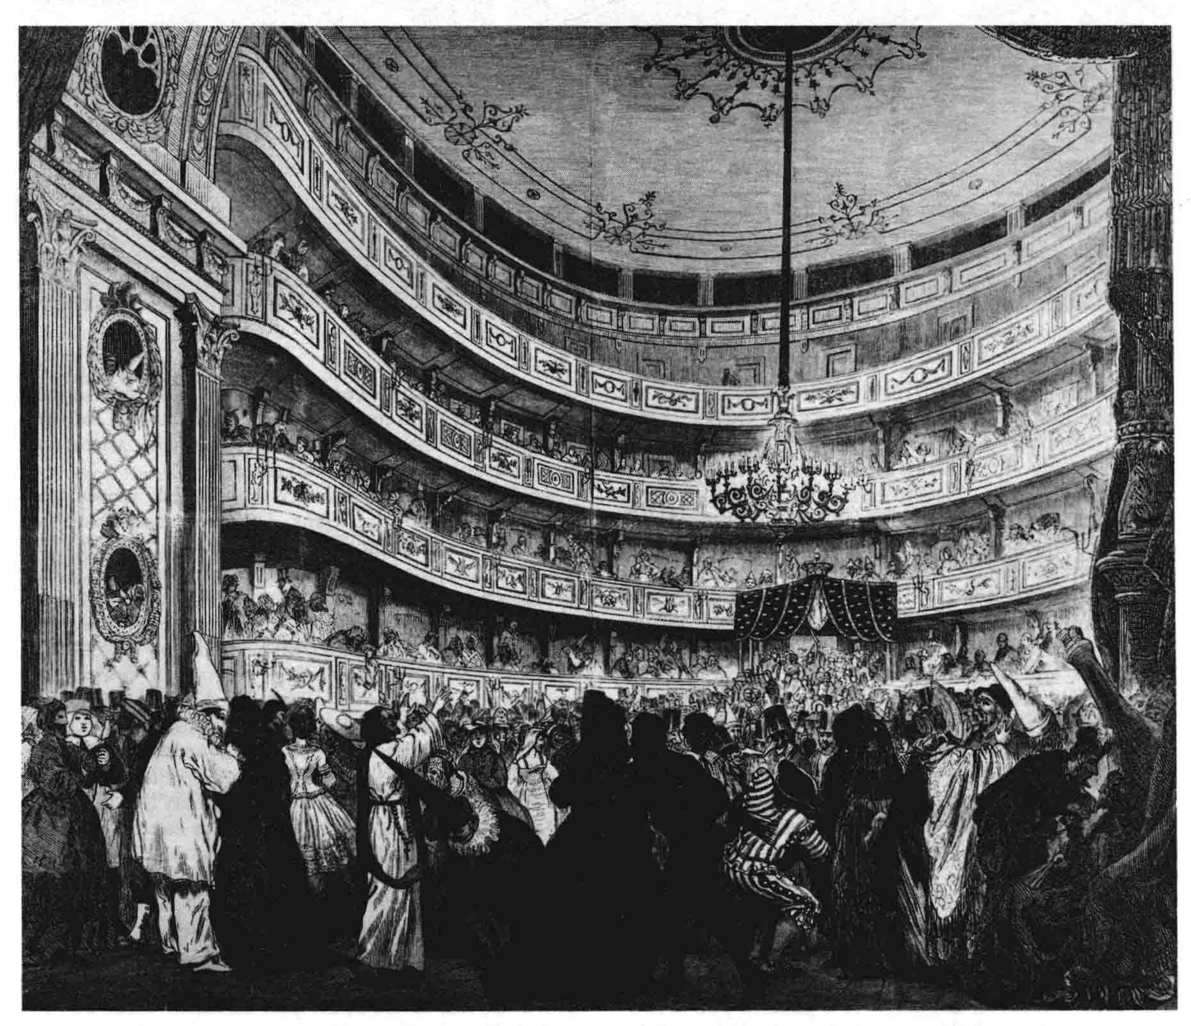
During the adult reign of Queen Christina (1644–54) music and ballet were encouraged at court. A ballet-master, violinists and singers, all from France, introduced the manners of the continental courts, and several ballets with songs were created. In 1652 a group of Italian musicians arrived, among them some well-known castratos, under the direction of Vincenzo Albrici. They performed cantatas and scenes from operas, but left Sweden, like several of the French musicians, on Christina's abdication in 1654. (20 Italian cantatas from the Albrici repertory ended up in the library of Christ Church,

1. Drottningholm royal theatre, designed by C.F. Adelcrantz, 1764–6

Oxford, probably through the English ambassador to the Swedish court, Bulstrode Whitelocke.) The kings succeeding Christina were less interested in music than in warfare, and eventually all countries around the Baltic fell under the Swedish crown. Nevertheless, the capital attracted foreign theatre troups including the Dutch Fornenbergh company, which performed ballets in the 1660s, as well as the German composers of church music Christian Geist (1670–79) and Christian Ritter (1681–3, 1688–99). The Düben family collected more than 2000 compositions in print and manuscript, mainly by German and Italian composers of the period, now held in the Uppsala University library. There are records of town musicians during the 17th century, but they never constituted a guild.

Music at court began to prosper again with the arrival of a French theatre and opera company under Claude de Rosidor (?1660–1718), which remained in Stockholm from 1699 to 1706. The military victories of Charles XII turned to defeats after 1709, and the Swedish empire shrank considerably with the peace treaties of 1719–20. Eventually the Hovkapell was reorganized and enlarged; the standard of playing was improved under Johan Helmich Roman, who returned to Stockholm in 1721 after five years of study in England. He organized public concerts at Easter from 1731 in the Riddarhus (Palace of the Nobility) with works by Handel and Italian composers. Amateur orchestras were active from 1738, culminating in the literary and musical society Utile Dulci (1766–86), in which professionals played together with aristocratic amateur instrumentalists and singers.

In 1743 the crown prince Adolf Fredrik arrived from Germany with 14 musicians. The public concerts of the Hovkapell became more numerous, especially after 1758, when F.A.B. Uttini became *Hovkapellmästare*. Their repertory included music by Handel, Pergolesi, Hasse and Graun in addition to Uttini's own arias and symphonies. Uttini had arrived in 1755 with five Italian singers from the Mingotti company; they performed operas and cantatas in the newly constructed royal theatre at DROTTNINGHOLM, 10 km from the centre of Stockholm. This theatre burnt down in 1762 but was replaced in 1766 by a building that survives largely intact and is now used for revivals of operas from its heyday (fig.1).



Gustavus III (reigned 1771–92) was eager to create a national culture with the help of theatre and opera. He was himself a talented playwright and devised plots for a series of operas on national themes, using leading authors to work out the details. He founded the Kungliga Musikaliska Akademi (Swedish Royal Academy of Music) in 1771 and the Kungliga Teaterns Operascen (Swedish Royal Opera) in 1773, the year in which Uttini's *Thetis och Pelée*, the first serious opera in Swedish, had its première. In the following years a broad repertory of

French and Italian works was presented in Swedish translations. Gluck's reform operas inspired the composers of the new, Gustavian Swedish works, notably J.G. Naumann's *Gustaf Wasa* (1786), G.J. Vogler's *Gustav Adolf och Ebba Brahe* (1788) and J.M. Kraus's *Aeneas i Carthago* (1799).

In 1782 the Kungliga Teater in central Stockholm opened with Naumann's *Cora och Alonzo*. The building was also used for concerts and masked balls (fig.2), one of the latter remembered because of the assassination of Gustavus III. A new feature was a series of concerts at which Vogler, active in Stockholm between 1786 and 1799, played the organ; his influence resulted in a general improvement of standards among the city's organists. He also started a music school and published music instruction books.

The main singer at the opera, Carl Stenborg, was given a royal privilege to run a smaller theatre on condition that he did not sing there himself. Known as the Eriksbergteater when it opened, it was renamed several times, becoming the Mindre Teater in 1799. Stenborg directed ballad operas and comic operas, mostly of French origin, but also plays with music by Swedish composers, for example *Kopparslagaren* ('The Coppersmith', 1781) by Johan David Zander and his own *Gustaf Ericsson i Dalarne* (1784). Some plays were vaudeville parodies of the grand operas, such as *Petis och Telée* (1779). Theatre life was controlled by royal licensing. Performances were given at the opera house, Stenborg's theatre and from 1787 at the Dramatiska Teater, where comedies with songs alternated with spoken drama. During the summers these theatres were closed, and comedies and vaudevilles were permitted in other theatres, especially in the popular Djurgården area. After 1825, when the Arsenalsteater burnt down, the restrictions were increasingly felt; finally Anders Lindeberg (1789–1849) daringly broke the royal monopoly by building the Nya Svenska Teater in 1842 and engaging Jacob Niclas Ahlström as conductor and composer. The theatre, with many comedies to music in its repertory, was a success, and during the 1850s four new theatres opened in Stockholm, all with orchestras. Meanwhile the Kungliga Teaterns Operascen performed European masterpieces, and some of its singers, such as Jenny Lind, Christine Nilsson and Sigrid Arnoldson-Fischhof (1861–1943), became known on the Continent and beyond.

From about 1870 more and more continental virtuosos found their way to Stockholm. Oratorios and bigger

2. Masked ball at the Kungliga Teater, Stockholm, designed by C.F. Adelcrantz, 1775–82; engraving from 'Illustrerad tidning av Gellersted-Malmström' (2 February 1869)

cantatas were given by choral societies with the opera orchestra; the main societies were the Harmoniska Sällskap (1820–47, under Johan Fredrik Berwald), the Nya Harmoniska Sällskap (1860–80; Ludvig Norman), the Musikförening (1880–1924; Norman and Franz Neruda) and the Filharmoniska Sällskap (1885–1912; first conducted by Andreas Hallén). They performed major works of Beethoven, Liszt, Brahms and Rubinstein, and also works by Swedish composers (I.C. Hallström, Vilhelm Svedbom, Norman, Hallén and others). Bach's oratorios were introduced from 1890, beginning with the *St Matthew Passion*.

The first purpose-built concert hall was the new building (1878) for the Musikaliska Akademi, used for solo recitals and chamber music. Another hall, giving cheap 'folk concerts', was established in the Arbetarinstitut (Workers' Institute) and much used from 1894 to about 1910. Fiddlers and folk singers performed at Skansen, an open-air ethnological museum opened in 1891 and still popular for choral and folk music performances. Concert life expanded considerably in the 1890s, and in the large-scale exhibition of industry and art in Stockholm (1897) music had a prominent place, especially in a Nordic music festival and the first national meeting of male choruses. Larger concerts still depended on the opera orchestra until 1914, when the Konsertförening was established (since 1992 called the Royal Stockholm PO). From 1926 it played in the main hall of the new Konserthus, the smaller hall being used for chamber music and solo recitals. Outstanding conductors have been Georg Schneévoigt (1915–23), Vacláv Talich (1926–36), Fritz Busch (1937–41), Antal Dorati (1966–73), Gennady Rozhdestvensky (1974–7) and Yury Ahronovich (1982–7). The Berwald Hall, opened in 1979, was designed for the musical activities of the Swedish RSO but is also used for public concerts.

The Royal Opera moved into a new and larger building in 1898. The international repertory has included the world premières of Korngold's *Die Kathrin* (1939), Sutermeister's *Der rote Stiefel* (1951) and Ligeti's *Le Grand Macabre* (1978). Among successful productions of Swedish works were Andreas Hallén's *Waldemarsskatten* (1899), Wilhelm Peterson-Berger's *Arnljot* (1910), Ture Rangström's *Kronbruden* (1922), Hilding Rosenberg's *Lycksalightetens ö* (1945), K.-B. Blomdahl's *Aniara* (1959) and L.J. Werle's *Tintomara* (1973), commissioned for the 200th anniversary of the Royal Opera (one episode in *Tintomara* concerns the assassination of Gustavus III at the masked ball, also the subject of operas by Auber and Verdi). Among famous singers who made their débuts there were Jussi Björling, Set Svanholm, Birgit Nilsson, Nicolai Gedda and Elisabeth Söderström. Operetta and musical comedy were given in the Oscarsteater, which opened in 1906 with Offenbach's *Les brigands*, and gave Andrew Lloyd Webber's *Phantom of the Opera* more than 500 times in the 1990s. After World War II several smaller opera companies appeared, the most successful being Folkopera (founded 1976).

Among smaller musical groups are the Par Bricole, founded as a singing and drinking society and active since 1779, and the Mazerska Kvartettsällskap, a chamber music society founded in 1847 by a merchant, Johan Mazer (1790–1847), who also bequeathed a large collection of 18th-century music to the Musikaliska Akademi. Fylkingen, founded in 1933, promotes contemporary music; in 1952 it became the Sveriges section of the ISCM and in the 1960s it was a forum for electro-acoustic music, cooperating with the electronic music studio built in 1964 by Sveriges Radio under the supervision of Knut Wiggen and later Lars-Gunnar Bodin.

Other institutions in Stockholm are the Musikhistoriska Museum, founded in 1899, which has large collections of instruments and of Swedish folk music, and presents historical and ethnological concerts; the Svenskt Visarkiv (Swedish Centre for Folk Song and Folk Music Research, founded 1952); the Svenskt Musikhistoriskt Arkiv (1965); and the Arkiv för Ljud och Bild (National Archive of Recorded Sound and Moving Images, 1979). A private collection, open to visitors since 1973, is the Stiftelse Musikkulturens Främjande (Foundation for the Furtherance of Musical Culture), rich in instruments and French opera scores.

Higher musical education has always been one of the main objectives of the Musikaliska Akademi, but lack of means permitted only limited education, mainly of church musicians, until the 1850s, when classes in many subjects including composition were introduced. The academy's library has been open to the public since 1849. In 1971 the conservatory was separated from the academy and renamed the Kungliga Musikhögskola. Other important music schools have been the A.F. Lindblads Musikskola (1827–72), the Richard Anderssons Musikskola (1886–1982), the Borgarskola Musiklinje (the music class of the civic school, founded 1943), and the Stockholms Musikpedagogiska Institut (founded 1960).

MARTIN TEGEN

Stockmann, Bartholomaeus (*b* Brunswick; *fl* 1583–90). German singer and composer, active in Denmark. In 1583 he was engaged as cantor at the Latin school in Flensburg, from which post he resigned in 1586, perhaps owing to a disagreement with the town council, as the school's rector resigned at the same time. He remained in Flensburg after leaving the school, however. On 19 September 1587 he was 'brought to the tower' for an unknown offence; it is therefore surprising that only three weeks later, on 8 October, he appears as a bass singer in the court chapel in Copenhagen. He received a salary until September 1590, after which he disappears from view. Stockmann's production is only known through the Flensburg collection *D-FLs*, which contains the only known copy of *Musica nuptialis* (Helmstedt, 1590). This is a collection of nine five-voice wedding motets for a number of named persons in the 1580s, including wedding music for the marriage of the Danish princess Elizabeth to Duke Heinrich Julius of Brunswick-Wolfenbüttel at Kronborg Castle on 19 April 1590. In addition to these, the

Flensburg collection contains the manuscript copies of three motets on *Commenda Domino viam tuam/Befiehl dem Herren deine Wege*: one for four voices in German, two for five and six voices in Latin. The motto is that of the compiler of the Flensburg collection, the County Recorder Hans Hartmann, to whom the three motets are dedicated. Stockmann's motets are charming and well-written, apparently inspired by Gallus Dressler and Orlando dei Lassus.

OLE KONGSTED

Stockmann, (Christine) Doris (*b* Dresden, 3 Nov 1929). German ethnomusicologist. She studied the piano, opera production and music theory at the Dresden Hochschule für Musik (1947–9) and musicology (with Dräger, Meyer and Vetter), theatre history and art history at the Humboldt University, Berlin, 1949–52. She also studied ethnography, folklore and linguistics with Steinitz (1953–8), taking the doctorate at Berlin in 1958 with a dissertation on Altmark songs and gained a second degree there in 1982 with a dissertation on interdisciplinary aspects in ethnomusicological research. After conducting field work in many European countries she was appointed researcher for ethnomusicology and folk music in 1953 at the Akademie der Wissenschaften in Berlin, where she was associated with different institutes: German folklore in ethnography, folklore and linguistics (with Steinitz until 1969), history (until 1979), and aesthetics and the arts (until 1989). She has been visiting lecturer from 1965 at universities throughout Europe and the USA and she has worked with the IFMC, chairing the study group on historical sources of traditional music from 1988. In her work she has focussed on the theory, structure and history of orally transmitted music in Europe, concentrating on transcription, notational systems, acoustical and musical analysis and the classification of diverse musics, such as German folksong, Albanian polyphonic music and Sami music. She has also studied the history and development of behaviour relating to musical practices in traditional cultures, examining physiological aspects and their transformations within different contexts. Her work draws on a broad range of sources from antiquity to the present, as well as different interdisciplinary approaches from archaeology, semiotics and structuralism.

HORST SEEGER/ANDREAS MICHEL

Stockmann, Erich (*b* Stendal, 10 March 1926). German ethnomusicologist. He studied musicology and German at Greifswald University (1946–9) and musicology with Dräger, Meyer and Vetter at Humboldt University, Berlin (1950–52), where he took the doctorate in 1953. He then began working as an ethnomusicologist at the Institute for German Folklore of the Academy of Sciences, Berlin, editing historical German folksong sources (*Des Knaben Wunderhorn*, *Parisius*). In 1957 he led the first ethnomusicological expedition to collect folk music in Albania and was appointed lecturer in ethnomusicology and organology at the musicological institute of Humboldt University. He has been largely responsible for the development of ethnomusicological research in Berlin. In his study of German and European folk music he has done much to promote research into folk instruments: in 1962 he founded the IFMC Study Group on Folk Musical Instruments, serving as its chairman and editing its publication series, Studia Instrumentorum Musicae Popularis from 1969; together with Ernst Emsheimer he has also been editor of the documentary monograph series Handbuch der Europäischen Volksmusikinstrumente (from 1967). He has encouraged international cooperation and communication in his field through his work as president of the ICTM (1982–97) and as a member of the executive board of the UNESCO International Music Council (1991–7). In 1997 he became an honorary member of the IMC and the ICTM.

HORST SEEGER/ANDREAS MICHEL

Stockmeier, Wolfgang (*b* Essen, 13 Dec 1931). German organist, musicologist and composer. His first organ tuition was with Ernst Kaller at the Folkwang-Schule in Essen. He then studied pedagogy at the Staatliche Hochschule für Musik, Cologne, and composition with Rudolf Petzold and musicology at Cologne University with Willi Kahl and Karl Gustav Fellerer (1951–7). From 1957 to 1961 he taught in secondary schools in Essen, and in 1960 was appointed professor of theory, musical form, organ and improvisation at the Cologne Staatliche Hochschule für Musik. He also taught at Cologne University and at Landeskirche (Protestant) music schools in Düsseldorf and Herford. In 1974 he succeeded Michael Schneider as director of the Protestant church music department at the Nordwestdeutsche Musikakademie in Detmold. While working as the organist of various Rhineland parishes from the age of ten, Stockmeier has made many recordings and given over 2000 concerts internationally. The mainstays of his repertory (apart from his own numerous compositions) are the works of Bach and the Romantic era, in particular those of Karg-Elert (of whose work he has made several recordings).

Among Stockmeier's own works are the oratorios *Jesus* and *Jefta und seine Tochter*, as well as nine organ sonatas and three organ concertos. He has completed all of Bach's unfinished organ works, and in his own compositions he has explored 12-note technique.

GERHARD WIENKE

Stodart. English firm of piano makers. It was founded by Robert Stodart (*b* Walston, Lanarks., bap. 19 July 1748; *d* Edinburgh, 10 March 1831) in 1775 when he set up his own harpsichord- and piano-making business in Wardour Street, London. He was tuning harpsichords for John Broadwood before 1772 (he was previously apprenticed to an engineer in Dalkeith) and had assisted Broadwood and Americus Backers in inventing the English grand action (*see* PIANOFORTE, §I, 4 and fig.12); in 1777 he patented a combination instrument, which included the earliest patent for this action (*see* HARPSICHORD-PIANO). Some of his grand pianos survive including one from 1781 at Heaton Hall, Manchester, which is five octaves in compass with an undivided, single-pinned, harpsichord-type bridge and three metal gap spacers to strengthen the gap between the soundboard and the wrest plank. One square piano by him survives with a five-octave compass and the English single action.

About 1792 ownership of the piano business passed to Robert's nephews, Matthew (bap. Covington and Thankerton, Lanarks., 24 Feb 1758) and William (bap. Covington and Thankerton, 30 May 1762), at an agreed valuation. At first Robert received a retainer of £3 3s. 'per Grand Forte Piano', but later this was reduced to a life annuity of £200. From 1794 the ratebooks of St James's, Westminster, list William Stodart at Golden Square; a square piano by Matthew and William, dated 1792, still has the Wardour Street address. In 1795 William patented 'an upright grand pianoforte in the form of a bookcase'. It was simply a vertical grand enclosed in a rectangular cupboard, placed on a stand with four legs, the action being behind the soundboard and striking through from behind. By about 1816 William was manufacturing on his own, his output of squares having reached 4000.

In 1820 two of Stodart's workmen, James Thom and William Allen, invented a 'compensation frame' (*see* PIANOFORTE, §I, 6) to prevent fluctuations in pitch arising from temperature changes. It is doubtful that it achieved the stability of pitch that was hoped for, but its tubular braces proved stronger than other forms of metal bracing then in use, resisting string tensions excellently. This was a vital beginning in the development of bracing in pianos and enabled heavier strings to be used to obtain a richer tone; surviving instruments have a beautifully resonant sound. Few makers adopted the compensation frame; however, the Stodart firm used it until the 1850s, exhibiting a grand with the frame at the Great Exhibition of 1851. Stodart also experimented with baize hammer coverings in the bass about 1820. The firm became William Stodart & Son in about 1825 when William's son Matthew (*b* London, 4 March 1794), became a partner. The 1851 census lists Matthew Stodart as a 'piano forte' manufacturer employing six men, and gives his address as 2 Westbourne Grove, Paddington. He had an older brother, William (*b* London, 6 July 1792), but the extent of his involvement in the business is not known. Manufacture ceased in 1861.

MARGARET CRANMER

Stoecken, Johannes de. *See* STOKEM, JOHANNES DE.

Stoeckl, Boniface [Johann Evangelist] (*b* Pilsting, 27 Nov 1745; *d* Amberg, 27 Sept 1784). German composer. He came from a rural family, received his musical instruction in Geiselhöring and, according to Lipowsky, was also a pupil of Leopold Mozart. He completed his studies in the arts and philosophy at the Benedictine lyceum at Freising. Many of his compositions originated there, some of which are possibly among the seven masses and two litanies mentioned in the thematic catalogue of the Dommusikalien of Freising (*D-Msa* HL III F.41 ex.Nr.41). After completing his studies Stoeckl entered the Benedictine abbey at Mallersdorf and took his vows on 27 October 1771. On 18 July 1773 he was ordained priest, and in the following year took over the office of music prefect in the abbey. From the autumn of 1781 he worked as professor of humanities at the Gymnasium in Amberg. His compositions for the school theatre are lost, but several sacred works are in Bavarian churches (*D-AÖhk*, *BB*, *DTF*, *FÜS*, *HR*, *Mbm*, *Mf*, *Mm*, *SBj*, *TEI*, *TZ*, *WEY*, *WS*) and in *A-RB* and *CH-SO*. Stoeckl was an ardent composer who mastered both the contrapuntal and concertante styles.

Stoeffken, Ditrich. *See* STEFFKIN, THEODORE.

Stoelzel, Heinrich David. *See* STÖLZEL, HEINRICH DAVID.

Stoessel, Albert (Frederic) (*b* St Louis, 11 Oct 1894; *d* New York, 12 May 1943). American violinist, conductor and composer. After early musical training in his native city, he studied the violin, composition and conducting at the Hochschule für Musik in Berlin, where he made his début as a violinist. After a European tour he returned to the USA, appearing as soloist with the St Louis SO. During World War I he was a lieutenant in the US Army (1917–19), obtaining, as a military bandmaster, his first conducting experience. In 1920 he appeared as a violin soloist with the Boston SO and toured with Caruso; the following year he helped to found the American Music Guild.

Stoessel succeeded Walter Damrosch as conductor of the Oratorio Society of New York in 1921, became director of music of the Chautauqua Institution in 1923, and succeeded Henry Hadley as conductor of the Worcester (Massachusetts) Music Festival in 1925; he held all three posts until his death. He appeared as a guest conductor of the symphony orchestras of Boston, Cleveland and St Louis, among others. From 1923 to 1930 he was head of the music department of New York University. In 1927 he accepted the directorship of the opera and orchestra departments of the Juilliard Graduate School, where he gave the first New York performances of Malipiero's *Il finto Arlecchino* and Strauss's *Ariadne auf Naxos*, the world premières of several American

operas (including Antheil's *Helen Retires* and Robert Russell Bennett's *Maria Malibran*, and revivals of works by Cimarosa, Pergolesi and others. In 1931 he was elected to the National Institute of Arts and Letters.

Stoessel's orchestral compositions have been widely played throughout the USA. His works, besides choral compositions and pieces for violin and piano, include pedagogical works on violin playing and *The Technic of the Baton* (New York, 1920, enlarged 1928).

GUSTAVE REESE/MICHAEL MECKNA

Stoia, Achim (*b* Mohu, nr Sibiu, 8 July 1910; *d* Iaşi, 2 April 1973). Romanian composer. At the Bucharest Conservatory (1927–31) he studied with Brăiloiu, who encouraged his love of traditional music, and with Castaldi, Cuclin and Kiriac-Georgescu. Stoia received a grant to study in Paris at the Schola Cantorum and at the Ecole Normale de Musique, where his composition teachers included Dukas; in Paris he also directed the choir Capella Română (1934–6). After teaching music at secondary schools in Târgovişte and Sibiu, he became a lecturer at the Iaşi Conservatory (1943) then its rector (1949). On being demoted by the communist authorities to a teaching post at the Iaşi Lyceum (1950–60), he fought successfully to reopen the Conservatory, becoming its rector again in 1960. He was president and secretary of the Iaşi branch of the Composers' Union (1949–68) and director of the Filarmonica Moldova in Iaşi (1950–59). His music combines the pervasive influence of Romanian traditional music with a post-Romantic compositional language.

WORKS
(*selective list*)

Orch: Învârtita, folk dance, 1937; 3 jocuri din Ardeal [3 Transylvanian Dances], 1947; Sârba moldovenească, folk dance, 1954; Rapsodia i 'Moldovenească', 1963; Divertisment no.1, 1970

OCTAVIAN COSMA

Stoianova [Stoyanova], **Ivanka** (*b* Sofia, 20 Jan 1945). Bulgarian musicologist, active in France. She was educated at the Moscow State Conservatory (1966–70) under V.A. Zuckermann, L.A. Mazel', V. Bobrovsky and V. Cholopova, and at the University of Paris VIII (1972–77) under D. Charles and G. Delevze, where she gained the doctorat de 3ème cycle (1974) with a dissertation on textual potential and musical expression and the doctorat d'Etat ès lettres et sciences humaines in aesthetics (1981) with a dissertation on narrativity and artistic expression. She also studied at the Technical University, Berlin (1981–3), with Dahlhaus. She began teaching in the music department at the University of Paris VIII in 1973 and was a member of the Institut de Recherche et Coordination Acoustique/Musique (1975–81). In 1989 she became artistic director of Edition Ricordi, Paris, and was promoted to professor of the music department at the University of Paris VIII in 1993. Her main areas of study are the history of music from the 18th century to the 20th, theory and analysis, music philosophy, aesthetics and semiotics.

MAGDALENA MANOLOVA

Stoin, Vasil (*b* Samokov, 5 Dec 1880; *d* Sofia, 5 Dec 1938). Bulgarian folklorist. He taught himself the violin at the age of ten. After graduating from the ecclesiastic seminary in Samokov in 1897, he taught in neighbouring villages until 1907 and was able to take down many of the folksongs from the area. He then studied at the Brussels Conservatory (1907–10) and from 1911 to 1922 taught music in Sofia, Tarnovo, Plovdiv and Samokov, organizing and conducting choirs and school orchestras. In 1925 he began lecturing in folk music at the State Music Academy, where in 1927 he became a professor and, for a few months in 1931, director. He also held the post of president of the Union of Bulgarian Musicians and in 1926 founded a folk-music department in the National Ethnographical Museum. Together with Rayna Katsarova and other musicians Stoin established the tradition of collecting and publishing texts and melodies of thousands of Bulgarian folksongs. In addition to four theoretical studies and a number of articles Stoin collected 9000 songs from the whole of Bulgaria, often under difficult conditions and with scarcely any technical equipment. This activity laid the foundations for Bulgarian folklore studies.

LADA BRASHOVANOVA

Stoin, Yelena (*b* Samokov, 12 April 1915). Bulgarian folklorist, daughter of Vasil Stoin. She graduated from the State Academy of Music in Sofia in 1938 and was a music teacher in various schools until 1945. In 1946 she was appointed research assistant in the Ethnographical Museum in Sofia and from 1950 to 1970 she worked as junior research fellow of the folk music department in the Music Institute of the Bulgarian Academy of Sciences, becoming senior research fellow in 1970. She took part in several folksong-collection expeditions in the 1950s, including north-west Bulgaria (1956), and the Tran, Bresnik and Kyunstendil regions in 1957–8 (see *Kompleksna nauchna ekspeditsiya v zapadna Balgariya: Transko, Bresnishko, Kyustendilsko 1957–58* [The complete scientific expeditions in west Bulgaria: the Tran, Bresnik and Kyustendil regions 1957–8], ed. P. Staynov, Sofia, 1961). Her writings consist largely of the publication and evaluation of her findings.

LADA BRASHOVANOVA

Stojanović, Petar (*b* Budapest, 7 Sept 1877; *d* Belgrade, 11 Sept 1957). Serbian composer and violinist. He graduated from the Budapest Conservatory as a violin pupil of Hubay in 1896; thereafter he studied with Grün (violin) and with Fuchs and Heuberger (composition) at the Vienna Conservatory, graduating in 1904. Early in the century he gained a reputation in Vienna as a composer and as a performer in solo and ensemble recitals. His renown was increased when the Royal Hungarian Opera staged his comic piece *Der Tiger* in 1905, and confirmed with the première of the Violin Concerto no.2, performed by Jan Kubelík in Prague in 1916. In 1925 he moved to Belgrade to become professor of violin (until 1937) and director (until 1928) of the Stanković Music School. He was then professor of violin at the academy (1937–45). A prolific composer, he was at his best in concertante pieces, particularly with regard to form and instrumental technique. The style is late Romantic, with emphasis on melody, classical forms and sonorous orchestration. Besides comic opera and operettas he composed a music drama, *Blaženkina zakletva* (Blaženka's Oath, 1934) in Wagnerian style. He also published *Osnovna škola za violinu* (Belgrade, 4/1956) and other teaching works.

STANA DURIC-KLAJN/ROKSANDA PEJOVIĆ

Stojowski, Zygmunt [Sigismond] **(Denis Antoni)** (*b* Strzelce, 14 May 1869; *d* New York, 5 Nov 1946). Polish composer, pianist and teacher. He studied composition with Żeleński in Kraków and was then a pupil of Diémer (piano) and Delibes (composition) in Paris; for a short time he had lessons with Paderewski, Saint-Saëns and Massenet. He gave successful concerts in Paris, London, Brussels and Berlin before moving in 1906 to the USA, where he was head of the piano department at the New York Institute of Musical Art until 1912. Thereafter he taught privately and each year organized concerts and masterclasses throughout the Americas; his students included Guiomar Novaes and Oscar Levant. He also wrote extensively on piano teaching. In 1938 he took American citizenship. His technically accomplished music drew on Wagner, Saint-Saëns and Franck, although his later works display the harmonic and structural influence of French impressionism. Stojowski's vivid melodic invention was always strongly connected with national colour. His compositions were in the repertories of many of the artists of the time, including Hofmann, Friedman, and Grainger, while his greatest achievement was in his virtuoso piano and orchestral music.

TERESA CHYLIŃSKA

Stokem [Prato, Pratis, Stockem, Stokhem, Stoken, Stoccken, Stoecken, Sthoken], **Johannes de** (*b* ?Stockem, nr Liège; *c*1445; *d* 2/3 Oct 1487). Franco-Flemish composer. His earliest appointment was in 1455 as a choirboy at the cathedral of St Lambert in Liège. He remained a beneficed senior member of that choir until 1481. In 1478 he was installed as a canon of the Petite-Table, replacing the deceased cleric Henricus de Prato, who was probably a relative. In 1481 he was appointed *magister capellae* to Mathias Corvinus, King of Hungary; under Stokem's leadership Mathias's choir was favourably compared to that of the pope, according to a letter of 1483 by Bartholomeus de Maraschi, *magister capellae* of the papal chapel. Tinctoris dedicated the treatise *De inventione et usu musicae* to Stokem, and in 1484 sent him a portion of this work. The dedication mentions that Tinctoris had made Stokem's acquaintance in Liège, although exactly when is still not known. It is possible that the theorist's connections with Mathias's wife, Beatrice of Aragon, might have helped Stokem to gain his post in the Hungarian chapel. Stokem left Hungary in 1486, spent two months in the choir of SS Annunziata in Florence, and in September 1486 entered the papel chapel, where he served until September 1487. On the monthly rosters of papal singers Stokem's name appears variously as 'Johannes Stokem' (with spelling variants) and 'Johannes de Pratis'. According to a document discovered by Adalbert Roth he died during the first few days of October 1487.

Stokem produced a modest body of works, including seven chansons and two works with sacred texts. Several of the songs engagingly combine a comparatively simple melodic profile, often based on a tune of popular or folk origin, with a highly developed degree of contrapuntal sophistication. Only the rondeau *Ha! traitre amours* appears not to be based on a pre-existent melody; it is treated with noteworthy expressivity. Stokem's contrapuntal skill is most clearly seen in the complex proportional duo *Ave maris stella* discovered by Albert Seay, a work added by a later hand to an early 16th-century compendium of treatises on proportional notation.

PAMELA F. STARR

Stoke-on-Trent. English city in Staffordshire. It was formed in 1925 by the federation of Tunstall, Burslem, Hanley, Stoke-upon-Trent, Fenton and Longton. It is the centre of a region dominated by the pottery industry (hence 'The Potteries') and, in former times, by coalmining. The choral societies of the area, with firm roots in the Methodist movement, became justly famous.

The establishment of Sunday school choirs led to the publication of *Salem's Lyre* (Burslem, 1830), a collection of hymns suitable for children. However, it was not until the introduction of Tonic Sol-fa that notable progress in choral singing was made. J.W. Powell, town clerk of Burslem, transcribed Mendelssohn's *Elijah* in Sol-fa, and he proved the value of the system with the Burslem Tonic Solfa Choir, which he founded. In June 1884 the choir was awarded the first prize of £35 in a Tonic Solfa Festival held in the Crystal Palace, said to have been 'a striking testimony to the spread of music amongst the humbler members of the community' (*Musical World*). In 1891 the jubilee of the Solfa Association was celebrated with a festival in London, and the contingent from the Potteries taking part in the massed choir numbered 1000. Also active at this time were the Hanley Glee and Madrigal Society (founded 1882), conducted by James Garner, a working potter, and James Docksey's Burslem Choir.

The North Staffordshire District Choral Society was founded in 1901 by a disabled miner, James Whewall. The members of the chorus were experienced singers drawn from the many church and chapel choirs of the neighbourhood and from such bodies as the Hanley Male Voice Choir and the Longton Glee Union. *The Dream of Gerontius* was given its first London performance by the society in 1903, and six years later Beecham chose the choir to give the London première of Delius's *Sea Drift*. The monopoly enjoyed by the society (renamed the City of Stoke-on-Trent Choral Society after World War II) was challenged in the 1930s by Bertrand Rhead, a potter's merchant turned impresario, who founded a Ceramic City Choir, sometimes conducted by Sargent. During the Depression the Etruscan Singers (named after Etruria where the Wedgwood works were situated) was formed from unemployed pottery workers and miners by Harry Vincent (*d* 1957), a shoemaker and entirely self-taught musician; he also turned a disused mission hall in Etruria into a concert hall.

The first music festival in the area was given in the parish church of St Peter ad Vincula in Stoke on 12 November 1833. The programme of the festival consisted largely of movements from Handel's oratorios and excerpts from works by Beethoven, Haydn, Paisiello, Grétry, Boyce, Kent and Callcott. But it was not until the Victoria Hall, Hanley, was opened in 1888 that adequate accommodation for large-scale musical performances was available. The first North Staffordshire Festival was held there in that year, conducted by Charles Swinnerton Heap, a Leipzig-trained musician. Its festival choir was a coalition of nine choirs and formed the basis for subsequent festivals. In 1896 and 1899 respectively, first performances of *King Olaf* by Elgar, who had played in the 1888 festival orchestra, and Coleridge-Taylor's 'The Death of Minnehaha' (part of the *Hiawatha* trilogy) were conducted by their composers at the festival; in 1908 Delius was invited to conduct the second English performance of *Appalachia* in Hanley. In 1975 a Stoke-on-Trent competitive festival was re-established.

During the latter part of the 19th century the pottery firm of J. & G. Meakin supported music in many ways, most notably through the Meakin Concerts in the Victoria Hall; Paderewski gave a piano recital in 1895. Meakins also provided wind instruments for its workers to form a band. On 1 November 1905 the first concert of the amateur North Staffordshire SO was given, conducted by John Cope, a local man who had studied in Munich with Rheinberger. Cope was one of the first to appreciate and to perform the instrumental works of Havergal Brian, born in the Potteries town of Dresden, whose career may be regarded as symbolic of the musical life of the region.

The Victoria Hall, Hanley, designed by a local surveyor, has fine acoustics particularly suited to the performance of large-scale works. The organ, built by Willis after the specification of S.H. Weale, the first city organist, was inaugurated on 4 May 1922.

At the end of the 19th century, when nonconformist reservations about the use of the organ had been overcome, organ builders – notably Steele and Keay, Binns, Kirkland, and Jardine – were extremely active in the district. A basic musical education was available in almost every church and chapel. However, from the second half of the century the general musical interest of the people of the Potteries was reflected in the curriculum of the elementary schools. Stoke-on-Trent was one of the first cities to appoint a superintendent of music to be responsible for musical education in all its branches. A school of music was founded after World War II by John Harvey. The music department of Keele University, near Stoke-on-Trent (the first of the postwar universities), was the first in England to have a centre for the study of American music, developed under the first professor of music, Peter Dickinson.

PERCY M. YOUNG

Stoker, Richard (*b* Castleford, Yorks., 8 Nov 1938). English composer. He studied with Winifred Smith and Harold Truscott at the Huddersfield Music School, privately with Eric Fenby and subsequently with Berkeley at the RAM where he won the first Royal Amateur Orchestral Society Award with his overture *Antic Hay* (1961), the first Eric Coates Memorial Prize for the *Petite Suite* (1961), and the Dove Prize. In 1962 he left the RAM as a Mendelssohn scholar and went to study with Nadia Boulanger in Paris. She was a key influence on his musical development and his dramatic cantata *Ecce homo* is dedicated to her. He was professor of composition at the RAM 1963–87 (one of his pupils being Paul Patterson) and editor of *Composer* (1969–80). Stylistically, Stoker's music shows a technical grasp of all classical forms, his music being carefully planned in a modern vein without overt dissonance but with rich melodic invention. He has used his creative imagination to produce works that stimulate the musician without overwhelming him with transient modernism. He is also an author, painter and poet. He has published an autobiography *Open Window – Open Door* (1985), two volumes of poems *Words*

without Music (1970) and *Portrait of a Town* (1974), two novels and *Collected Short Stories* (1997).

RICHARD TOWNEND

Stokowski, Leopold (Anthony) (*b* London, 18 April 1882; *d* Nether Wallop, Hants., 13 Sept 1977). American conductor of British birth, and Polish and Irish parentage. He entered the RCM at 13, studying with Stevenson Hoyte, Walford Davies and Stanford, and gaining the FRCO diploma in 1900. After travelling to Paris and Berlin he returned to London to form a choir at St Mary's, Charing Cross Road, in 1900–01. In 1902 he was appointed organist and choirmaster at St James's, Piccadilly, and the following year he took the BMus at Queen's College, Oxford. After three years as organist and choirmaster at St Bartholomew's, New York (1905–8), he returned to Europe in search of conducting work, making his début in Paris in 1908. With the help of Olga Samaroff (later to be his first wife) and his own guile, he was appointed conductor with the Cincinnati SO (1909–12) despite his lack of experience. Over the next 24 years (1912–36) he made the Philadelphia Orchestra one of the best in the world. He was appointed music director in 1931 but he resigned in 1936, although he carried on as co-conductor with Ormandy for two more years. He finally severed his connection with Philadelphia in 1941. A spate of new orchestras followed as he created and conducted (often for no pay) the All-American Youth Orchestra (1940–41), the New York City Symphony (1944) and the Hollywood Bowl SO (1945). After a season as conductor of the NBC SO (1941–2) Stokowski was joined by Toscanini as co-conductor for two seasons (1942–4). He was principal guest conductor of the New York PO, 1947–9, and co-conductor, with Mitropoulos, in the 1949–50 season. Several years of guest conducting followed, and he appeared in Britain (for the first time since 1912) in the 1951 Festival of Britain. After five seasons (1955–60) as music director of the Houston SO, he went on to conduct *Turandot* at the Metropolitan (1960) and to create the American SO (1962–72), with whom he gave the first complete performance of Ives's Fourth Symphony (1965). He finally returned to London and continued to give concerts until 1975, and to record until shortly before his death.

While Stokowski's roles of pop star and champion of the avant garde seem somewhat contradictory, most of his idiosyncrasies stemmed from his zeal to create a large and sophisticated audience. He had a lifelong interest in music from around the globe and believed (perhaps naively, but consistently) that music was a universal language. It was this belief, espoused in his book *Music for All of Us* (New York, 1943), that gave impetus to his missionary zeal. Recognizing his talents as a showman, he built upon his gifts by abandoning the baton in 1929, conducting from memory, creating an orchestra for the Hollywood Bowl and collaborating with Walt Disney on *Fantasia* (1940). Even when chastising his audience for

Leopold Stokowski

shuffling during modern music, he used his gift for drama, pleading on behalf of the musicians, or stomping off only to return and start from the beginning.

Stokowski's music-making was shaped by the same goals. The interpreter who created the most 'vibrant and thrilling' experience would win the most converts of the composer's music. Hence he created the lush 'Philadelphia Sound' through the use of 'free bowing' in the strings and staggered breathing with doubled winds. His rehearsal technique substituted practical direction for the traditional metaphorical explanations, while his innovation of putting all the violins on one side (with the sound directed towards the audience) is still standard practice. Stokowski's quest to popularize also led from minor reorchestrations to complete transcriptions, including the Bach Toccata and Fugue in D minor. Born when interpretation was an art, he was hardly unusual in occasionally doubling solo passages, adding percussion, emphasizing extreme dynamics and even cutting 'uninteresting' bars. But attitudes changed during his 65 years as a conductor, and critics accused him of tinkering even when all of the notes were exactly as the composer left them.

Those who disagreed with his methods chose to ignore his tremendous contribution to modern music. In addition to an unrivalled tally of several hundred world premières (among them Rachmaninoff's Third Symphony, Fourth Piano Concerto and *Rhapsody on a Theme of Paganini*, and Schoenberg's Violin Concerto), he devoted Wednesday mornings in Philadelphia to reading new pieces, even if they could not be included in concerts. His many American premières included *The Rite of Spring*, Mahler's Eighth Symphony, *Wozzeck* and *Pierrot lunaire*. In 1933 the Philadelphia board tried to stop him by declaring that 'no more debatable music' would be played. He soon left, but when he became music director in Houston in 1955 he insisted on a première at almost every concert.

Seeing their educational potential, Stokowski made acoustic 78s in 1917 and continued to experiment with new media, making the first electrical recordings of a symphony and experimenting with long-playing records, stereo and television. In 1926 he experimented with turning out all the house lights and using only small lights on the music stands and a massive spotlight underneath the conductor.

Stokowski's life off the podium was equally colourful, with three wives (Olga Samaroff, the heiress Evangeline Brewster Johnson and the young Gloria Vanderbilt) and a highly publicized relationship with Greta Garbo.

JOSÉ BOWEN

Štolcer [Štolcer-Slavenski], **Josip.** *See* SLAVENSKI, JOSIP.

Stoll, Klaus (*b* Rheydt, 24 May 1943). German double bass player. He studied at the Musikhochschule in Cologne with Heinz Detering and in 1959 became a member of the Niederrheinische Sinfoniker. He joined the Berlin PO in 1965, becoming principal bass in 1992. He was appointed professor at the Salzburg Mozarteum in 1990. As a soloist Stoll has given many first performances, including Skalkottas's Double Bass Concerto and double concertos (for cello and bass) by Helmut Eder and Harald Genzmer. In 1981, together with the cellist Jörg Baumann, he formed the Philharmonisches Duo Berlin, which until 1994 (when ill health cut short Baumann's career) gave over 600 performances worldwide; the duo also recorded extensively and commissioned and arranged numerous works, 25 of which were published in a series edited by Stoll, *Repertoire Philharmonisches Duo Berlin* (Berlin, 1981–8). Stoll has also appeared with such artists as Heinz Holliger, Viktoria Mullova, Ruggiero Ricci and András Schiff in duos and other chamber music. He plays a 1610 Maggini bass and, for Baroque repertory, a violone by Giovanni Grancino. His light-handed virtuosity is one of the most striking features of his playing.

RODNEY SLATFORD

Stolle, der junge. German poet. *See* SPERVOGEL, (3).

Stolle, Johann (*b* Calbe an der Saale, *c*1566; *d* Weimar, 25 Oct 1614). German composer, music copyist and poet. It was apparently because of the early loss of his parents that he attended the grammar school at Zwickau, where he was a pupil of Cornelius Freundt. Although he did not complete his university studies he was appointed Kantor at nearby Reichenbach in 1590 and succeeded Freundt at Zwickau in 1591. From 1604 until his death he was Kapellmeister to the Weimar court, in succession to Johannes Herold and as the predecessor of Schein. His output as a composer, which is not extensive, consists most notably of occasional sacred works and also of liturgical music – a Latin mass, Latin motets and German hymns. He had a penchant for full sonorities: several of his more important works are scored for double choir, totalling eight parts, while his motet *Laetare cum uxore*, composed for the marriage of the Elector Johann Georg of Saxony and Magdalena Sibylle of Brandenburg in 1607, is in 18 parts and three independent choral groups and is his most ambitious work. He is most important, however, for three manuscript collections (*D-Z*) that he compiled at Zwickau, mostly in his own hand; they contain a valuable and interesting repertory of liturgical music drawn from the period of Lassus, Jacob Handl and Hans Leo Hassler. Several poetic works by Stolle have also survived.

WORKS

MSS in D-Z unless otherwise stated

Surge propera, wedding song for Christoph Seling, double choir 8vv (Leipzig, 1596)

Von Gott ist mir, wedding song for Elector Johann Georg of Saxony, double choir 8vv (Jena, 1604)
Miserere mei, Domine, 4vv; Herr Jesu Christ, mein Herr und Gott, double choir 8vv; Buss wirk in mir, 4vv: funeral songs for Johann of Saxony in Exequiae saxonicae (Jena, 1606)
Lux mea quaeso veni, wedding song for Jeremias Röller, 6vv (Jena, 1606)
Si mihi quae debes, wedding song for Paul Wolf, double choir 8vv (Jena, 1608)
In aller meiner Angst und Not, funeral song for Countess Johanna of Saxony, 5vv (Jena, 1609)
Egon dormio, wedding song for Eusebius Bohemus, 6vv (Jena, 1614)
Christus ist erstanden von des Todes Banden, hymn (Dresden, 1632)

Missa 'Vespere autem Sabbati', 6vv (on Ruffo's motet)
Laetare cum uxore, wedding song for Elector Johann Georg of Saxony, triple choir 18vv, 1607, *D-Dl*
Cantate Domino, double choir 8vv, *Kl*; Da Christus geboren war, 4vv; Deus meus in adjutorium meum, 6vv; Deus patrum meorum, double choir 8vv; Heut ist unser Heiland, 3vv, ed. in *Handbuch der deutschen evangelischen Kirchenmusik*, i (Göttingen, 1935), 212; Jesus flevit super Jerusalem, 5vv; O regem coeli, 6vv; Scriptum est in lege, 5vv; Von einer Jungfrau auserkorn, 4vv; Zion die werte Gottesstadt, 5vv

WALTER BLANKENBURG/DOROTHEA SCHRÖDER

Stolle, Philipp (*b* Radeburg, Saxony, 1614; *d* Halle, 4 Oct 1675). German composer. In 1631 he was at the Dresden court as a discant singer and theorbo player; he had studied the theorbo under Caspar Kittel. Ten years later Schütz supported him in these positions and also as a violinist, player of other string instruments and teacher of the choirboys. Meanwhile, in 1634 he was in Denmark in the service of Prince Christian; he had probably accompanied Schütz there, and he certainly did so for a further period of service in 1642. In 1650 he sang in Schütz's ballet *Paris und Helena* and moved to the court chapel in Halle, where four years later he succeeded Scheidt as director. Duke August had made Halle a centre of opera, to which Stolle was immediately drawn. He wrote a number of operas, all but one now lost; in 1660 he gave up his position as Kapellmeister to devote himself entirely to opera but remained, next to the new director David Pohle, the highest-paid musician at court.

Stolle's importance lies in his contributions to early German Singspiel and in his songs. The one surviving Singspiel definitely attributable to him, *Charimunda*, is in the German pastoral tradition with a large cast, and contains strophic songs and choruses. The anonymous Singspiel *Die Hochzeit der Thetis*, which opened the court opera at Halle in 1654, is one of several anonymous operas produced in Halle to 1680 that have been attributed to Stolle because of their similarity to *Charimunda* and because he was the leading composer there at the time. His songs appear in a collection by David Schirmer: that the most important poet in Dresden at the time chose Stolle to set 68 strophic lieder for soprano and basso continuo is a measure of the great esteem in which he held him. The songs are similar to Adam Krieger's rather than to those of the Hamburg school by composers such as Rist in that the music treats the text fairly freely; their popularity is attested in Schoch's *Comoedia vom Studenten-Leben* (Dresden, 1657).

Stoll Theatre. London theatre built in 1911 and known as the London Opera House until 1916. *See* LONDON (i), §VI, 1(i).

Stoloff, Morris (*b* ?1898; *d* Los Angeles, April 1980). American musical director, orchestrator and conductor. He studied the violin with Leopold Auer from the age of 16, and during his early twenties became a first violinist with the Los Angeles PO, under Walter Henry Rothwell. In 1928, the year after the first sound film, he became concertmaster of the Paramount studios orchestra, and in 1936 he moved to Columbia studios as principal music director. He received 18 Academy Award nominations for musical direction. As department head at Columbia he received a nomination for Tiomkin's score for *Lost Horizon* (1937), but he was nominated for his own work on films such as *The Talk of the Town* (1942) and *A Song to Remember* (1945), the latter of which renewed commercial interest in the music of its subject, Chopin. Stoloff was also the principal composer of the scores to *You'll Never Get Rich* (1941) and *Fanny* (1961). He received Academy Awards for *Cover Girl* (1944), *The Jolson Story* (1946) and *Song Without End* (1960). He remarked that *The Jolson Story* provided the greatest challenge of all his scores, because it required detailed research of the musical style of productions from the years of Jolson's career on Broadway. (W. Darby and J. Du Bois: *American Film Music: Major Composers, Techniques, Trends, 1915–1990*, Jefferson, NC, 1991)

KATE DAUBNEY

Stolpe, Antoni (*b* Puławy, nr Lublin, 23 May 1851; *d* Merano, 7 Sept 1872). Polish composer and pianist. He first studied the piano with his father, Edward Stolpe (1812–72), then composition with Freyer and Moniuszko at the Warsaw Music Institute, where he graduated in 1867 with first prize. After three concerts of his own compositions (1868–9) he went to Berlin, where he studied composition with Kiel and the piano with Kullak. He then taught the piano at the Stern Conservatory in Berlin. Ill-health forced him to resign his teaching post, and he lived for a short time in Salzbrunn and Merano. Highly talented, both as a pianist and as a composer, he died at the age of 21, leaving a fair number of compositions in manuscript.

BOGUSŁAW SCHÄFFER

Stoltz, Rosine [Noël, Victoire] (*b* Paris, 13 Jan 1815; *d* Paris, 29 July 1903). French mezzo-soprano. She was discovered at the age of 12 by Alexandre Choron, who took her into his voice class. At 16 she left to perform opera and spoken theatre in Belgium and the Netherlands. In 1836 she appeared as Rachel in Halévy's *La Juive* opposite Adolphe Nourrit at the Théâtre de la Monnaie in Brussels. Nourrit's admiration probably helped her procure a contract at the Paris Opéra, where she made her début, again as Rachel, in 1837. At the Opéra she created the roles of Ascanio in Berlioz's *Benvenuto Cellini* (1838), Marguerite in Auber's *Le lac des fées* (1839), Léonor in Donizetti's *La favorite* (1840), and Zayda in his *Dom Sébastien* (1843), as well as singing in premières of Halévy's *Guido et Ginevra* (1838), *La reine de Chypre* (1841), *Charles VI* (1843) and *Le lazzarone* (1844). Other roles included Donna Anna, Isolier in Rossini's *Le comte Ory*, Desdemona (in his *Otello*), and Valentine in Meyerbeer's *Les Huguenots*.

She was a controversial figure at the Opéra, celebrated for the intensity of her acting, but accused of using unfair techniques against her rivals and of profiting from her romantic liaison with the Opéra's director, Léon Pillet. She left the Opéra in 1847 after a scandal that broke out when she lost her temper during a performance of Louis Niedermeyer's *Robert Bruce*. She continued to perform until 1860, appearing in London, the French provinces and South America, and making an unsuccessful comeback attempt at the Opéra in 1854. During this period she may have captured the affections of Charles Baudelaire, who is said to have composed the poem 'Une martyre' in Stoltz's apartments while awaiting her arrival. After retirement she devoted herself to acquiring husbands and aristocratic titles, often by flamboyant means. In old age she turned to composition, publishing a number of songs set to poetry she had written herself, as well as a pamphlet on spiritualism.

Stoltz is remembered today mostly for the role attributed to her in the onset of Donizetti's madness. According to an oft-retold anecdote, Donizetti's mental illness first manifested itself after a rehearsal of *Dom Sébastien*. Stoltz protested violently at having to stand idle on stage during the baritone's *romance* and insisted on cuts; the distraught Donizetti obliged but, the story goes, was never quite the same again. It is now known that Donizetti's illness was a result of long-dormant syphilis, and the tale is revealed as one of those fictions that collect around divas, perhaps in reaction to the influence they can exert during the compositional process.

Stoltz had a range of about two octaves, roughly from *a* to *a″*, with excellent low notes and a strong but harsh upper register. She lacked agility and technical control, but her vocal colour and broad palette of timbres were universally praised. In an 1842 letter Donizetti imagined casting her as Hélène in *Le duc d'Albe*, a part he described as 'a role of action, of a type perhaps quite new in the theatre, where women are almost always passive'. The

Rosine Stoltz as Zayda and Gilbert Duprez as Dom Sébastien in Act 2 of Donizetti's 'Dom Sébastien, roi de Portugal', Paris Opéra, 1843; lithograph by Jules David from 'Le Ménestrel'

substitute cabaletta he wrote for her in *La favorite* conveys the same forceful image: its jagged contours with sharp shifts between extremes of range, extended passages in the low register and short phrases in a mostly syllabic style create the impression that Donizetti exploited both Stoltz's weaknesses and strengths to maximum dramatic effect.

Stöltzel, Gottfried Heinrich. *See* STÖLZEL, GOTTFRIED HEINRICH.

Stoltzenberg [Stolzenberg, Stolzenberger], **Christoph** (*b* Wertheim, 21 Feb 1690; *d* Regensburg, 11 June 1764). German composer. His parents died soon after he was born and he grew up among friends, brothers and sisters. He began his musical training with singing lessons under the Kantors of Wertheim. In 1701–3 he was a pupil at the Heiliggeistschule in Nuremberg, then moved to Worms, and, in 1706–8, lived in Frankfurt, where he attended the Gymnasium. After returning to Nuremberg in 1708 he travelled extensively through Bohemia and Saxony to Hamburg and Harburg, where he spent a year; from there he went through Lüneburg to Lower Lusatia, through Dresden to Bohemia and Moravia, and finally through Bavaria to Salzburg. He was unsuccessful in his attempt to complete his musical studies in Italy. After some time in Regensburg and Altdorf (where he toyed with the idea of studying theology), he returned to Nuremberg. There he received instruction in composition from the Kantor of the Heiliggeistkirche, Nikolaus Deinl, and played in the collegia musica (keyboard, flute, horn and string instruments). In 1711 he became Kantor in Sulzbach, Upper Palatinate, and in 1714 he was appointed Kantor and tutor at the Gymnasium Poeticum in Regensburg. After 50 years in office he was presented with a Festschrift and a cantata in his honour, set to music by his son, Ehrenreich Carl (1721–85).

Stoltzenberg's works (according to his autobiography, published by Mattheson) include a complete cycle of cantatas for the church year, written during his time in Sulzbach; each work in this cycle 'begins with a biblical text (usually in fugue), continues with several arias, and concludes with a chorale'. He later composed many other annual cycles, in which recitatives were used.

GÜNTER THOMAS

Stoltzer [Stolczer, Scholczer], **Thomas** (*b* Schweidnitz [now Świdnica], Silesia, *c*1480; *d* nr Znaim [now Znojmo], Moravia, early 1526). German composer. After Heinrich Finck and Paul Hofhaimer he was the most important German composer of the early 16th century. He probably belonged to the same family as Clemens Stoltzer, a town clerk of Schweidnitz. He may have been Heinrich Finck's pupil; certainly he studied Finck's works, as his frequent musical quotations show. From 1519 he was a priest in Breslau holding a benefice at St Elisabeth, and was *vicarius discontinuus* at the cathedral. Although his later works show that he supported the Reformation he did not do so openly for fear of his livelihood (contemporary letters show him to have been timid and easily influenced).

On 8 May 1522 Ludwig II appointed him *magister capellae* at the Hungarian royal court in Ofen on the recommendation of his wife Mary, daughter of Philip the Fair. Stoltzer's motet *Beati omnes* had probably been performed at their wedding in January 1522 in Buda. At Mary's request he set Luther's translations of the four great psalms (Psalms xii, xiii, xxxvii and lxxxvi) between 1524 and 1526. With the Hungarian court chapel at his disposal he was able to produce more demanding works; his late compositions show how he exploited these resources. In the only extant personal document of Stoltzer's, a letter (now in *D-Ga*) dated 23 February 1526 to Duke Albrecht of Prussia in Königsberg, he described his recently completed *Erzürne dich nicht über die Bösen* (Psalm xxxvii), which he said he had 'composed in a particular way like a motet'. He also hinted that he would like to enter the service of Duke Albrecht, whom he knew personally from the duke's visits to the Hungarian court. An observation dated March 1526 on the original letter refers to 'the late Thomas'. Earlier speculation that Stoltzer died with Ludwig in the Battle of Mohács (29 August 1526) is incorrect, for an elegy on the death of Casparus Velius by Johannes Lang, Stoltzer's former colleague at the court chapel, states that he was drowned in the Taja.

There are some 150 surviving works by Stoltzer in 30 publications and 60 manuscripts. Since all of them date from after 1530 he presumably did not begin composing before about 1510. His works were most popular in what is now Saxony, at the centre of the Reformation. The Wittenberg music publisher Georg Rhau printed no fewer than 70 of his compositions. His works were known, however, throughout central Europe, at least wherever German was spoken. Many were still being passed on more than 40 years after his death, since his German psalm motets were almost unsurpassable models for German motets based on biblical texts. The circulation of

his manuscripts continued until the end of the 16th century. By that time cantus firmus compositions like Stoltzer's were old-fashioned and the new Italian style was gradually penetrating into Germany.

Stoltzer composed in all the forms of the day: mass, motet, hymn and partsong, although he did not give all genres the same attention, concentrating principally on the motet. In Breslau he composed mainly liturgical works, such as motets for the Proper of the Mass, responsories, antiphons and hymns. Works of his later period at the Hungarian court tend to be more in the form of Latin and German psalm motets or sacred songs. There are also a few secular pieces composed specifically for the court. Most works can be dated only approximately. The *Octo tonorum melodiae*, eight five-part pieces illustrating the eight ecclesiastical modes, probably belong among his late works.

Each of the four masses (without Credos) is composed on a chorale, and some sections are intended for *alternatim* performance, common in Germany at that time. The chorale melody is lightly embellished and often moves from voice to voice, but always fits in smoothly with the flow of the composition. The existence of 14 introits for the Christmas to Easter period suggests that Stoltzer may have intended to write a complete cycle for the ecclesiastical year.

Two distinct styles can be seen in his motet compositions. His earlier pieces show Finck's influence and are old-fashioned in their use of cantus firmus and mensural proportions; *Inter natos mulierum* contains extremely complicated proportion changes which could have been familiar to few 16th-century performers. A Kyrie printed in 1522 by Gregor Faber in his *Musices practicae erotematum* is similarly constructed. In his earlier works Stoltzer invested those numbers that encoded the proportions with theological meaning; later he used rhetorical figures to incorporate 'sacred' numbers pregnant with symbolism into his compositions. Also found in his later works are such characteristics of the late Netherlandish school as imitation and the use of contrasted choirs. The antiphon *Anima mea liquefacta est* obviously belongs to this period, together with *O admirabile commercium*, which was so popular on account of its sensitive treatment of text that it exists in 11 sources.

39 hymns by Stoltzer were printed in Rhau's *Sacrorum hymnorum liber primus* (1542). Two more processional hymns, *Gloria, laus et honor* and *Salve festa dies*, survive in manuscript. Stoltzer's contribution to the genre reveals various techniques and ranges from archaic pieces with a tenor cantus firmus in long notes to flexible imitative motet-like settings. His four sacred songs to German texts, no doubt intended as an expression of his Lutheran sympathies, are through-composed. The ten lieder are cantus firmus pieces predominantly based on love lyrics and court songs. *König, ein Herr ob alle Reich*, containing the acrostic 'König Ludwig' and 'Maria', is dedicated to the Hungarian royal couple.

Stoltzer's greatest compositions were his 14 Latin and four German psalm motets. He liked setting psalms, preferring those written in the first person. Their expression of personal involvement, together with a wealth of imagery and ideas, would have appealed strongly to the Renaissance composer. The cantus firmus plays a subordinate role and the music for the most part depicts and interprets the text. Stoltzer's mastery is most clearly revealed in the four German motets in five to seven parts, based on Luther's translation of the psalter: *Hilf, Herr, die Heiligen haben abgenommen*, *Herr, wie lang*, *Erzürne dich nicht über die Bösen* and *Herr, neige deine Ohren*. They are among the first large-scale religious compositions in the vernacular, and successfully unite traditional German features with the late Netherlandish style of Josquin des Prez.

LOTHAR HOFFMANN-ERBRECHT

Stoltzman, Richard (Leslie) (*b* Omaha, NE, 12 July 1942). American clarinettist. He studied with Robert Marcellus, Keith Wilson and Kalman Opperman, and made his début in 1973 at the Metropolitan Museum of Art. He won an Avery Fisher Award in 1976 and the Avery Fisher Prize in 1986. From 1966 to 1976 he played at the Marlboro Music Festival, and in 1973 formed the quartet Tashi with the pianist Peter Serkin, the violinist Ida Kavafian

and the cellist Fred Sherry. Many composers have written for Stoltzman, including Bill Douglas, Steve Reich, Lukas Foss, Donald Erb, Einar Einglund, William Thomas McKinley and Takemitsu (*Fantasma/Cantos*). He is known for his freely expressive style and individuality of phrasing and interpretation; he uses a double-lip embouchure and is particularly noted for his *pianissimo* playing. Among his recordings are acclaimed accounts of the Brahms sonatas (with Richard Goode), trios by Mozart, Beethoven and Brahms (with Yo-Yo Ma and Emmanuel Ax) and concertos by Copland and Corigliano.

PAMELA WESTON

Stolyarsky, Pyotr Solomonovich (*b* Lipovets, 18/30 Nov 1871; *d* Sverdlovsk, 24 April 1944). Ukrainian violinist and teacher. He studied the violin with his father, and later had lessons at the Warsaw Music Institute with Stanislaw Barcewicz and at the Odessa Imperial Musical Society School with Emil Młynarski and Y. Karbulko, from whose class he graduated in 1898. From 1898 to 1914 he played in the orchestra of the Odessa Opera and taught in his own music school. He showed exceptional ability as a teacher, and taught at the Odessa State Conservatory, joining the staff in 1920, and becoming a professor in 1923. In 1933 he founded the first Soviet special music school for gifted children, which is named after him. Stolyarsky was one of the founders of the Russian school of violin playing. His teaching method was based on his belief that a child should be taught from the start about the whole range of professional and artistic skills that he would need as a performer. The child learnt to play not so much 'on' as 'with' the violin. Stolyarsky's immense ability as a teacher and organizer, and his exceptional determination, enabled him to achieve striking results: among his pupils were David Oistrakh, Milstein and Fikhtengol'ts. He was made a People's Artist of the USSR.

I.M. YAMPOL'SKY

Stolz, Robert (Elisabeth) (*b* Graz, 25 Aug 1880; *d* Berlin, 27 June 1975). Austrian composer and conductor. He received his initial musical training from his parents, Jacob Stolz, a conductor and music teacher, and Ida Bondy, a concert pianist. He gave his first public piano recital at the age of seven with Brahms, a family friend, in the audience. Later he studied under Fuchs at the Vienna Conservatory and with Humperdinck in Berlin. In 1897 he was appointed répétiteur in Graz, in 1898 second conductor at Marburg an der Drau (now Maribor, Slovenia), in 1902 first conductor in Salzburg, and in 1903 conductor at the German Theatre in Brno. In 1904 he married the soprano Grete Holm. A meeting with Johann Strauss in 1899 had turned Stolz's thoughts to the composition of light music, and his first operetta *Studentenulke* (Marburg, 1901) had been followed by further efforts. In 1907 he became conductor at the Theater an der Wien, where he conducted *Die lustige Witwe* from about the 420th performance and the initial runs of other leading Viennese operettas of the time, but his own first lasting success as a composer came with a song, *Servus, du!* (1911), which was followed by several other popular Viennese songs. He first enjoyed international popularity with the song *Hallo, du süsse Klingelfee* (1919), sung at the Casino de Paris, and with the operetta *Der Tanz ins Glück* (1920), produced in England as *Whirled into Happiness* and in the USA as *Sky High*.

In 1924 Stolz took a job in cabaret in Berlin and his period of greatest success began with scores for early German film musicals, with interpolated songs for Benatzky's *Im weissen Rössl* and with the operetta *Wenn die kleinen Veilchen blühen*. In 1940 he went to the USA, where he composed music for Hollywood films and conducted concerts of Viennese music. In 1946 he returned to Vienna, becoming celebrated as the last major survivor of Viennese operetta from before World War I, and from 1952 to 1971 he wrote the music for the ice revues. He also continued to conduct on concert tours and for records. In the 1960s he conducted recordings of classical operettas for Ariola-Eurodisc, which remain important documents, and was also commissioned to provide new operettas, though these often turned out to be revisions of earlier works. Besides his stage and film works he composed several hundred individual songs and dances, and received many honours including Academy Awards, honorary citizenship of Vienna (1970) and a statue in his native city (1972). Stolz's longevity and his extensive promotion of his own music on LPs have led to him being ranked among the leading names of classical Viennese operetta. However, his more ambitious scores are less effective than the lighter songs he wrote for films and song-and-dance musicals, where he was able to display his melodic touch and rhythmic invention to particular effect.

WORKS
(*selective list*)

STAGE WORKS
for fuller list see GroveO

*c*65 operettas and musicals (many pubd in vs or individual numbers in Vienna or Berlin) incl. Studentenulke (F. Haller), Marburg, Stadt, 21 March 1901; Der Favorit (2, F. Grünbaum, W. Sterk), Berlin, Komische Oper, 7 April 1916; Das Sperrsechserl (Wiener Gemütlichkeit) (2, R. Blum, A. Grünwald), Vienna, Komödienhaus, 1 April 1920; Der Tanz ins Glück (3, R. Bodanzky, B. Hardt-Warden), Vienna, Colosseum, 23 Dec 1920; Mädi (3, Grünwald, L. Stein), Berlin, Berliner Theater, 1 April 1923; Wenn die kleinen Veilchen blühen (2, Hardt-Warden, after A. Kehm and M. Frehsee: *Als ich noch im Flügelkleide*), The Hague, Princess, 1 April 1932

Venus in Seide (3, Grünwald, L. Herzer), Zurich, Stadttheater, 10 Dec 1932; Der verlorene Walzer [later Zwei Herzen im Dreivierteltakt] (3, P. Knepler, J.M. Welleminsky, R. Gilbert, after W. Reisch, F. Schulz), Zürich, Stadttheater, 30 Sept 1933; Grüezi (Himmelblaue Träume) (G. Burckhard and Gilbert), Zürich, Stadttheater, 3 Nov 1934; Frühling im Prater (2, E. Marischka), Vienna, Stadttheater, 22 Dec 1949; Signorina (P. Schwenzen and Gilbert), Nuremberg, Stadttheater, 26 April 1955, rev. as Trauminsel (Weit her von Yucatan), Bregenz, Lake Stage, 21 July 1962; Frühjahrsparade (2, Marischka and H. Wiener), Vienna, Volksoper, 25 March 1964 [after film]

OTHER WORKS

*c*100 film scores incl. Der Millionenonkel, 1913; Zwei Herzen im Dreivierteltakt, 1930; Das Lied ist aus, 1930; Ein Tango für dich, 1930; Liebeskommando, 1931; Mein Herz ruft immer nur nach dir, 1933; Frühjahrsparade, 1934; Ich liebe alle Frauen, 1935; Herbstmanöver, 1935; Confetti, 1936; Ungeküsst sollst du nicht schlafen geh'n, 1936; Zauber der Boheme, 1937; Spring Parade, 1940; It Happened Tomorrow, 1943; Une nuit à Tabarin, 1947;

Rendezvous im Salzkammergut, 1948; Deutschmeister, 1955; A Breath of Scandal, 1959; Yesterday, Today and Tomorrow, 1959; Der Kongress amüsiert sich, 1966
Hundreds of individual songs incl. Servus, du!, op.102 (B. Vigny), 1911; Wien wird bei Nacht erst schön, op.216 (Sterk), 1915; Im Prater blüh'n wieder die Bäume, op.247 (K. Robitschek), 1916; In Wien gibt's manch' winziges Gasserl, op.249 (Robitschek), 1916; Hallo, du süsse Klingelfee, op.341 (A. Rebner), 1919; Salome, op.355 (Rebner), 1919; 20 Blumenlieder, op.500 (Hardt-Warden), 1927; Vor meinem Vaterhaus, op.614 (Hardt-Warden), 1933
Waltzes, marches, other orch works, pf pieces

ANDREW LAMB

Stolz [Stolzová], **Teresa** [Teresina, Terezie] (*b* Elbekosteletz [Kostelec nad Labem], 2 June 1834; *d* Milan, 22 Aug 1902). Bohemian soprano. She was one of a large musical family. Her twin sisters Francesca (Fanny, Františka, 1826–*c*1903) and Ludmila (Lydia, 1826–*c*1910), both sopranos, became the youthful mistresses (and Ludmila later the wife) of the composer Luigi Ricci, who wrote operas for and fathered a child by each of them. Teresa was trained at the Prague Conservatory; in 1856 she joined Ricci and the twins in Trieste, had further lessons from Francesco Lamperti in Milan and in 1857 made her operatic début in Tbilisi. For some six years she sang in Odessa, Constantinople and often Tbilisi. Her earliest Italian appearances to have been traced were in Turin in autumn 1863. Her successes in Nice (*Il trovatore*, December 1863) and then Granada (*Ernani*, April 1864) led to a *Trovatore* in Spoleto (September 1864), and *Ernani* and *Guillaume Tell* in Bologna. The Bologna performances were conducted by Angelo Mariani, to whom she later became engaged. In 1867 she was chosen for the Italian première of *Don Carlos*, in Bologna, and two years later for the revised *La forza del destino*, at La Scala, Milan; Verdi himself supervised the latter production. In 1872, again at La Scala, Stolz was the first Italian Aida (see illustration), and in 1874 (and subsequently, during the tour of the work to Paris, London and Vienna) the first soprano of the Verdi Requiem. Verdi's operas had from the start been prominent in her repertory and, both in Italy and abroad, she became a leading and frequent interpreter of his later heroines, from Amelia in *Un ballo in maschera* to Aida. Her last operatic engagement was in St Petersburg (1876–7) and her last public appearance in a performance of the Requiem at La Scala (1879), conducted by Verdi for the benefit of flood victims.

Teresa Stolz in the title role of Verdi's 'Aida', La Scala, Milan, 1872

After 1872 her only non-Verdian roles were Alice in *Robert le diable* and Rachel in *La Juive*. She was the Verdian dramatic soprano *par excellence*, powerful and, passionate in utterance but dignified and disciplined in manner, with a voice that extended securely from *g* to *c*♯‴. After hearing the Requiem in Paris, Blanche Roosevelt wrote of her thus (*Chicago Times*, June 1875):

> Mme Stolz's voice is a pure soprano, with an immense compass and of the most perfectly beautiful quality one ever listened to, from the lowest note to the highest. Her phrasing is the most superb I ever heard and her intonation something faultless. She takes a tone and sustains it until it seems that her respiration is quite exhausted, and then she has only commenced to hold it. The tones are as fine and clearly cut as diamond, and sweet as a silver bell; but the power she gives a high C is something amazing ... She opens her mouth slightly when she takes a note, without any perceptible effort, and the tone swells out bigger and fuller, always retaining that exquisite purity of intonation, and the air seems actually heavy with great passionate waves of melody.

Much has been written about the troubled personal relationships between Stolz, Mariani, Verdi and his wife. That Stolz became Verdi's mistress has been both asserted and denied, but there is no doubt that the attentions he paid her between 1872 and 1876 caused pain to Giuseppina Verdi.

ANDREW PORTER

Stolze, Gerhard (*b* Dessau, 1 Oct 1926; *d* Garmisch-Partenkirchen, 11 March 1979). German tenor. He studied in Dresden and Berlin, then in 1949 was engaged by the Dresden Staatsoper, where he made his début as

Augustin Moser (*Die Meistersinger*). From 1953 to 1961 he was a member of the Berlin Staatsoper. At Bayreuth he took minor roles in 1951, sang David in 1956, and from 1957 to 1969 sang Mime, a role he also recorded with success in Solti's *Ring* cycle and in which he made his Covent Garden début in 1960. He created roles in Egk's *Der Revisor* (1957, Schwetzingen), Erbse's *Julietta* (1959, Salzburg), Orff's *Oedipus der Tyrann* (1959, Stuttgart), the stage première of Martin's *Le mystère de la Nativité* (1960, Salzburg) and Klebe's *Jacobowsky und der Oberst* (1965, Hamburg). In 1968 he sang Loge at the Metropolitan. His musical intelligence and dramatic gifts specially suited him to such character roles as Herod, of which he made a notable recording under Solti, the Captain in *Wozzeck*, and Oberon in Britten's *A Midsummer Night's Dream*.

HAROLD ROSENTHAL/ALAN BLYTH

Stölzel [Stöltzel, Stözl], **Gottfried Heinrich** (*b* Grünstädtel, nr Schwarzenberg, Erzgebirge, 13 Jan 1690; *d* Gotha, 27 Nov 1749). German composer and theorist. He received his first music instruction from his father, a pupil of the Halle court organist Moritz Edelmann. In 1707 he went to Leipzig University, but felt himself drawn more towards the opera, recently reopened there, and to the collegium musicum (founded by Telemann and at that time directed by Melchior Hofmann). He proved to be a helpful copyist to Hofmann, who soon recognized his gifts as a composer. Stölzel's first works were performed under his teacher's name (Emanuel Kegel); they appeared only later under his own. In 1710 he went to Breslau, where he taught singing and keyboard in aristocratic circles. He also composed for the collegium musicum and produced his first dramatic work. A teacher of Italian with whom he was friendly recommended that he go to Italy to improve his composition; but he went next to Halle, wrote a pastorale for the court at Gera, and (through the negotiations of Johann Friedrich Fasch and Johann Theile) received a commission from the Zeitz court for which he composed three operas for the fair at Naumburg. Afterwards he received from both Gera and Zeitz offers of the post of court Kapellmeister, which he refused.

At the end of 1713 Stölzel went to Italy, meeting Francesco Gasparini, Alessandro Marcello, C.F. Pollarolo and Vivaldi in Venice, and Antonio Bononcini and Domenico Scarlatti in Rome. In Florence, where he was a guest of the court, he wrote numerous cantatas and a duet as his contribution to a gala concert. He is said to have refused offers to remain there for religious reasons. In 1715 he went to Prague, where he remained for three years; he took a lively part in the musical activities there, and composed dramatic works, oratorios, masses and instrumental music. He declined an offer of a position at the Dresden court, which would have included a study trip to France, and in 1717 he returned to Bayreuth, where he was commissioned to compose church music for the 200th anniversary celebration of the Reformation and other pieces to mark the duke's birthday.

By the beginning of 1718 Stölzel was Kapellmeister at the court at Gera, and on 24 February 1720 he was appointed to the same post at the court at Saxe-Gotha. For 30 years he held this appointment, which obliged him to compose for the church, the opera and other court festivities. He also executed commissions for the courts at Sondershausen and Gera. About this time he allowed some of his works to be copied, notably church cantatas, and his reputation grew. From the evidence of various applications to his patrons, it seems that Stölzel wrote the texts of his own vocal works. He acquired a wide reputation as a teacher and theorist, and in 1739 was elected a member of Lorenz Christoph Mizler's Societät der Musikalischen Wissenschaften.

The extent of Stölzel's reputation is reflected in the fact that Mizler placed him above J.S. Bach in his list of leading German composers. Bach himself valued Stölzel's music, and included his Partia in G minor (with his own trio added to the minuet) in *Das Clavier-Büchlein vor Wilhelm Friedemann Bach*. From the existence of transcriptions in the Leipzig Thomasbibliothek, now lost, it appears that Bach may have performed Stölzel's vocal music. Like that of many of his contemporaries (including Bach), Stölzel's music was increasingly forgotten during the later 18th century and an extensive collection of his manuscripts in Gotha was lost during the time of his successor, Georg Benda. Interest in Stölzel was reawakened in the 20th century with Arnold Schering's edition of the Concerto Grosso in D for quadruple orchestra; further new editions were largely confined to instrumental music. Not until 1965 was it possible to create a chronological catalogue of the cantatas based on morphological, palaeographical and stylistic criteria; it documents, among other things, 12 annual cantata cycles (including some double cycles).

Stölzel's only work printed in his lifetime is a treatise on canon. His other works on music theory are merely compilations, except for his *Abhandlung vom Recitativ*, the first major specialized treatise on recitative, which reflects his unrivalled superiority in this field, acknowledged by his contemporaries. Stölzel had a special preference for recitative with a number of voices which both alternated and combined. His work in general is marked, as is typical of the transitional period to which he belonged, by a contradiction between the traditional architectonic design and the new principles of form evolving within it. The traditional da capo aria, which he favoured, serves to provide development, imagery and contrast. Because Stölzel was so prolific over a short period there are inevitably superficialities in his work; but his best music shows skill in composition and richness of idea.

WORKS

STAGE

music lost; unattributed librettos may be by Stölzel

Narcissus (musikalisches Dramat or Drama, Stölzel), Breslau, 1711 or 1712; ?rev. version, Gotha, 1734–5
Valeria (Stölzel), Naumburg, 1712
Rosen und Dornen der Liebe (Pastorale), Gera, 1713
Artemisia (op or Spl, Stölzel), Naumburg, 1713
Orion (Stölzel), Naumburg, 1713
Venus und Adonis [Adonis] (musikalisches Dramat, Stölzel), Prague, 1715–17; rev. version, Altenburg, 1728–30
Acis und Galathea [Sie triumphirende Liebe] (musikalisches Dramat, Stölzel), Prague, 1715–17, lib *D-Bsb*; ?rev. version, Gotha, 1729
Das durch Liebe besiegte Glück (Stölzel), Prague, 1715–17
Diomedes, Bayreuth, 1718
Der Musenberg (Drama, Stölzel), Gotha, 1723
Die beglückte Tugend (Pastorale), Gotha, 1723
Hercules Prodicius, oder Die triumphirende Tugend (Dramat, Stölzel), Gotha, 1725, lib *Bsb*, *ALa*
Die Ernde der Freuden [Die Freuden-Ernde] (Pastorale), Gotha, 1727, lib *Ju*; ?rev. version, Altenburg, 1727
Thersander und Demonassa, oder Die glückliche Liebe (Pastorale), Gotha, 1733
L'amore vince l'inganno (dramma pastorale), Gotha, 1736, lib *US-Wc*

Endymion (musikalisches Schäfer-Spiel), Gotha, 1740, lib *D-Gs*
Die gekrönte Weisheit (Singe-Spiel), Gotha, 1742
Die mit Leben und Vergnügen belohnte Tugend (musikalisches Singe-Spiel), Gotha, 1744, lib *HAu*

SACRED VOCAL
music lost unless otherwise stated

Jesus patiens (orat), Prague, 1715/16
Caino, overo Il primo figlio mavaggio (orat), Prague, 1715–17
Die büssende und versöhnte Magdalena (orat), Prague, 1716
Die leidende und am Creutze sterbende Liebe Jesu (Passion orat), Gotha, 1720
Sechs Andachten aus der ... Historie des bitteren Leidens und Sterbens unsers allertheuresten Erlösers Jesu Christi (Passion orat), Gotha, 1723
Fall und Trost des menschlichen Geschlechts (orat), Gotha, 1724
Der für die Sünde der Welt gemarterte und sterbende Christus (Passion orat, B.H. Brockes), Gotha, 1725, *D-SHs*
Jesus, als der für das verlorene Schäflein leidend- und sterbende gute Hirte (Passion orat, G.H. Stölzel), Gotha, 1727, *Bsb*
O Welt! sieh hier dein Leben (Passion orat), Gotha, 1729
Ein Lämmlein geht und trägt die Schuld (Passion orat), ?Gotha, 1731, *Bsb*, *SHs*
Die mit Busse und Glauben ihren leidenden Jesus bis zum Grabe begleitende Seele (Passion orat), Gotha, 1737
Numerous masses (mostly Missae breves), incl. Missa canonica, ed. G. Poelchau (Vienna, 1820); Deutsches Te Deum; Mag; 2 Miserere; other works: principal sources *A-Wgm*, *Wn*, *D-Bsb*, *DL*, *GOl*, *LEm*, *Mbs*, *SHs*
442 cants., 10 fragmentary, music extant; 342 cants., text extant, music lost; 39 cants., title only extant, text and music lost; see catalogue in Hennenberg; incl. Liebster Jesu deine Liebe, A, vn, va, bc, ed. J. Bachmair (Leipzig, 1926); Aus der Tiefe rufe ich, Herr, zu dir, B, str, bc, ed. A. Adrio (Berlin, 1948, 2/1957); Kündlich gross ist das gottselige Geheimnis, chorus, SA, ob, str, bc, ed. in Organum, i/28 (Lippstadt, 1953); Lob und Danck chorus, T, ob d'amore, str, bc, ed. in Organum, i/29 (Lippstadt, 1954)

SECULAR VOCAL

82 cants., incl. 65 dramatic cants. for soloists, chorus, orch, written for courts at Gotha and Sondershausen, music for only 12 extant, *D-Bsb*, *SHs*: incl. Das durch himmlisches Schicksahl über allen Unbestand triumphirende Fürsten-Wohl, 1732, parodied as Glücklicher Zustand anmuthiges Leben; Fontinalia Schwarzburgica, 1732; Irene und Apollo, 1733 [?rev. of Die beschütze Irene, Altenburg, 1722, lost], parodied twice, 2nd as Sonne spiel in reinsten Lichte; Die Liebe als die Quelle aller fürstliche Ruhmwürdigkeiten 1734; Alles was sonst lieblich heisset [?rev. of Die Harmonie der Tugende, Gotha, 1725, lost]; Alles in einem, 1737; Was herrlich fürtrefflich und prächtig erscheinet, 1737; Aussnehmender Vortheil vortreffliche Krafft, 1737; Das mir angenehmster Sorge erfüllte Fürsten-Hertz, 1738
17 solo cants., all in *D-SHs*: 1 for B, str, bc; 16 for S, bc, incl. Die Rose bleibt der Blumen Königen, ed. R. Eitner, *MMg*, xvi (1884); see catalogue in Hennenberg

INSTRUMENTAL

Orch: Conc. grosso a 4 chori, *D-GOl*, ed. in DDT, xxix–xxx (1907/*R*); Conc. grosso, e, *Dl*; Conc. grosso, b, *S-Uu*; Conc. grosso, F, *D-Bsb*, *Dl*, ed. H. Winschermann (Wolfenbüttel and Zürich, 1963); Conc., g, ob, *D-SWl*; Conc., D, ob, *Dl*, ed. H. Töttcher (Hamburg, 1954); Conc., e, fl, *RH*, *S-Uu*; Conc., G, fl, *D-RH*; Conc., D, 2 ob d'amore, *RH*
Chbr: 3 qt, *D-Bsb*; *c*23 trio sonatas in *Bsb*, *Dl*, *S-Uu*, incl. e, ed. in Collegium musicum, lxxii (Leipzig, 1943); C, ed. G. Frotscher (Cologne, 1937); D, ed. G. Frotscher (Hamburg, 1957); G, ed. G. Frotscher (Hamburg, 1958); F, ob, hn, vn, bc, ed. in Collegium musicum, lxxix (Leipzig, 1952); G, ed. G. Hausswald (Heidelberg, 1955); c, ob, vn, bc, ed. in Collegium musicum, lxxvi (Leipzig, 1950); B♭, ed. in Collegium musicum, lxxxii (Leipzig, 1956); D, ed. in Collegium musicum, lxxxi (Leipzig, 1955); f, ed. in NM, cxxxiii (1937, 2/1959)
Enharmonische Sonata, F, hpd, in *Musikalisches Allerley von verschiedenen Tonkünstlern*, ii (Berlin, 1761–3), ed. E.W. Böhme (Kassel, 1936)
Partia, g, hpd, ed. in *J.S. Bach: Klavierbüchlein für Wilhelm Friedemann Bach*, Neue Ausgabe sämtlicher Werke, v/5 (Kassel, 1962)

WRITINGS

Practischer Beweis, wie aus einem ... Canone perpetui in hypodiapente quatuor vocum, viel und mancherley ... Canones perpetui à 4 zu machen seyn (1725)
Abhandlung vom Recitativ (MS, *A-Wgm*), ed. in Steger
Other theoretical writings in *D-Bsb*, *A-Wgm*, some lost

FRITZ HENNENBERG

Stölzel [Stoelzel], **Heinrich David** (*b* Schneeberg, Saxony, 7 Sept 1777; *d* Berlin,16 Feb 1844). German musician and inventor. The only son of the municipal musician Christian Heinrich Stölzel, he learned to play the harp, cello, horn and trumpet equally well. He was a member of the Prince of Pless's private band and from early 1818 of the Royal Opera orchestra in Berlin, from which post he retired with a pension in 1829. At his death he left in poverty a widow and four children, including Moritz Carl Stölzel (*b* 1 Oct 1809), who became a painter.

By July 1814 Stölzel had demonstrated a horn with two tubular valves (then referred to as 'Röhrenschiebeventil' or 'Stopferventil', today called 'Schubventil' in German and 'piston Stoelzel' in French) fingered with the right hand, intending that this invention be applied to other brass instruments as well. His primacy was contested by Friedrich Blühmel (with the box valve), and the two men eventually joined forces, obtaining a ten-year Prussian patent for both the tubular valve and the box valve on 12 April 1818. Stölzel bought out Blühmel's rights for 400 thalers. In 1827 Stölzel also devised another type of valve, the Berlin piston (then called 'Röhrenventil', today 'Berliner Pumpventil' in German). Formerly attributed to Wilhelm Wieprecht, who only developed a variant in 1833, this type was later frequently used by Adolphe Sax in Paris, who called them 'cylindres'. In 1828 Stölzel's and Blühmel's separate applications for a patent of a rotary valve were refused, since it was only the general

principle of the valve as applied to brass instruments which was patentable but not the type of valve.

At first Stölzel built his valves himself. The Berlin firms Griesling & Schlott and, later, C.W. Moritz built his instruments. (Stölzel is also mentioned as a maker – 'Mechanikus' – in a price list published by A. Sunderlin in 1828, but no such instruments survive.) Very soon the model with two tubular valves was copied in Russia (by J.F. Anderst in 1825), England (by Metzler), and France (by Antoine (HALARY (ii)) and Labbaye in 1826 and 1827). Inexpensive cornets with tubular valves were made in France well into the 20th century.

For illustration *see* VALVE (i), fig.9.

Stomius [Mulinus, Muling], **Johannes** (*b* Perlesreut, 1502; *d* Salzburg, 14 Jan 1562). German music theorist and composer. He had music lessons from an early age and was friendly with Hofhaimer. In 1530 he founded a private school in Salzburg, attended mainly by children of the aristocracy; in spite of his Protestant sympathies he remained its director for 32 years. His music treatise, *Prima ad musicen instructio* (Augsburg, 1537), intended for use in schools, takes as its chief subjects solmization, modes and mensural theory. He used in it a number of striking erudite terms: for example, he described the fugue as 'mimesis', a term which was not used again until the 17th century. A short final chapter sums up advice for the singer: as well as the usual rules of vocal performance, Stomius recommended that the singer determine the range of a piece in order to start at the right pitch, sing a few melodic phrases to establish the mode, and occasionally make a diminution for artistic effect on longer note values. As an example of the combination of different mensurations he printed a textless four-part piece by Isaac and as an example of a fugue Senfl's four-voice canon *Manet alta mente repositum*. Eight motets by Stomius survive (in *D-Rp*). Like most of the examples in the treatise they are limited to three-part settings and were clearly intended for the school choir. Some of them are reworkings of Lutheran hymn tunes.

MARTIN RUHNKE

Stonard [Stoner, Stonerd, Stonnard], **William** (*b* ?Oxon., ?*c*1575; *d* Oxford, 1631 or later). English organist and composer. According to Anthony Wood he was probably descended from the Storey or Strover family of Watlington, Oxfordshire. In December 1608 he took the degree of BMus at Oxford, for which he wrote an eight-part hymn. At the end of the month he became organist and Master of the Choristers at Christ Church, Oxford; he held the post until his death. A layclerk of the same name was mentioned in accounts at Ely Cathedral from 1584 to 1630. The two were probably close relatives (unpublished information from Ian Payne).

NORMAN JOSEPHS/JOHN MILSOM

Stone [Stane, Stoue] (*fl c*1440–70). Composer, presumably English. He is known from two antiphon settings and a fragmentary motet (a 'Deo gratias' substitute). The presence of this last piece in the Archivio di Stato, Lucca, strongly suggests that its composer was the 'Stane' mentioned by John Hothby in a list of excellent composers, 'many of whom are still alive' (*Dialogus in arte musica*, written in Lucca in the late 1470s; ed. in CSM, x, 1964). Stone's music is all in duple metre, and its edgy rhythms and often awkward gait suggest that he was a younger contemporary of Walter Frye; other stylistic traits recall the music of Plummer. He might conceivably have been John Stone, the well-known chronicler of Christchurch, Canterbury (*d* 1480), whose writings show some interest in music. A more likely identification, though, is with the John Stone who joined the Chapel Royal of Edward IV in 1465 or 1466 and was still there in 1468. The tenor of *Ibo mihi* has its chant almost unornamented, yet in fast-moving rhythms indistinguishable from the freely composed voices – a unique experiment.

WORKS

Deo gratias agamus, ?4vv, *I-La* 238 (frag.)
Ibo mihi ad montem myrrhe, 3vv, *MOe* α.X.1,11 (Sarum ant chant in iii)
Tota pulchra es, 3vv, *MOe* α.X.1,11 (ant chant not used)

BRIAN TROWELL

Stone, Carl (Joseph) (*b* Los Angeles, CA, 10 Feb 1953). American composer and radio producer. He studied composition with Tenney and Subotnick at the California Institue of the Arts (BFA 1975), where he became involved with experimental and electro-acoustic music. From 1974 he resided in Los Angeles, working for the Independent Composers Association and as director of KPFA radio, for which he produced numerous concerts of experimental and contemporary music. He has also served as president of the AMC.

In the 1980s he developed a reputation as an innovative and avant-garde performer of live electronic and computer music. Most of his compositions are performed in real time and involve processing devices. He has travelled and performed widely, especially in Japan where his work is particularly esteemed; a grant from the Asian Cultural Council took him to Japan for six months in 1989 for research purposes, and while there he also performed and lectured in several cities. Many of his works describe a gradually unfolding process, but often in reverse of the expected. The opening passage of *Shing kee* (1986), for example, initially sounds like a highly processed *musique concrète* study but very gradually (over 15 minutes) reveals itself as a fragment of a Schubert lied sung by a Japanese pop singer. A careful and thorough scrutiny of an isolated musical artefact (usually not revealed until the end) is of central importance to his compositional thought. His work has found favour with choreographers such as Ping Chong and Bill T. Jones. Many of his compositions are named after favourite oriental restaurants or dishes.

INGRAM D. MARSHALL

Stone, John. English chronicler, who may be identifiable with the composer STONE.

Stone, Joseph (*b* Worcester, MA, 20 March 1758; *d* Ward [now Auburn], MA, 2 Feb 1837). American composer and tunebook compiler. He was briefly a private in the Continental Army, and then worked as a surveyor and a bookbinder. He served his town in many capacities including selectman, town clerk (for 24 years), justice of the peace, representative to the Constitutional Convention in Boston (1787) and representative to the Massachusetts General Court (1806–7). After a conversion experience in 1810 he joined the Baptist Church, and in 1816 the Congregational Church, and he built an extensive collection of books on religious and moral topics that would form the nucleus of Ward's first public library.

Between 1785 and 1836 Stone wrote hundreds of poems and hymns, mostly devotional in character and precisely dated, and he set many of these to music. His 14 extant manuscript collections of original poetry and music establish him as the most prolific American composer of his generation. His one published tunebook, *The Columbian Harmony* (n.p., [1793]), which he co-compiled with Abraham Wood of nearby Northboro, Massachusetts, contains 43 of Stone's compositions, including several large, vigorous fuging tunes that are typical of his earlier style. A dozen pieces by Stone found their first printings in other tunebooks of the 1780s and 90s, and a *Memoir of Joseph Stone* published in 1838 brought eleven more tunes into print, these written in the plain, homophonic style that characterizes his later music. Most of Stone's manuscript music and poetry is held in *US-LAur*; his portrait (by Zedekiah Belknep) is at the Auburn (MA) Public Library.

NYM COOKE

Stone, Kurt (*b* Hamburg, 14 Nov 1911; *d* Wilmington, NC, 15 June 1989). American music editor and musicologist of German birth. He studied at Hamburg University and at the Royal Danish Conservatory in Copenhagen, where he graduated in 1937. He taught in Hamburg and Copenhagen and, after moving to New York in 1938, he was a teacher at the Dalcroze School of Music. From 1942 he worked in music publishing with various firms, notably Associated Music Publishers, G. Schirmer, Alexander Broude and Joseph Boonin, and produced 50 editions of his own. He was particularly concerned with American music, but also prepared a number of editions of Renaissance and Baroque music. In 1971 he established the Index of New Musical Notation at New York Public Library which led to his writing *Music Notation in the Twentieth Century: a Practical Guidebook* (New York, 1980). His writings include articles on publishing and on contemporary music; with his wife, Else, he also edited *The Writings of Elliott Carter* (Bloomington, IN, 1977).

PAULA MORGAN

Stone, Lew [Louis] (*b* London, 28 May 1898; *d* London, 12 Feb 1969). English bandleader, arranger and pianist. He wrote scores for Bert Ralton's band and rapidly became known as one of the most inventive arrangers of his time, blending elements of jazz, symphonic and commercial music within single arrangements. From 1927

he provided several outstanding arrangements for Ambrose's band, introducing a rhythm string section. He joined Roy Fox in 1931. He first led a band in 1932, at the Monseigneur Restaurant, and later formed his own band there with exceptionally good players and the singer Al Bowlly. The band recorded and broadcast regularly. Stone was musical director for British and Dominion Films (1931–5) and the British National Film Company (1936–9), appearing with his band in several films including *Bitter Sweet* and *The Little Damozel*. He also played in clubs, theatres, restaurants etc., made recordings and broadcast, latterly with a sextet (1959–67). His best recordings include a darkly textured arrangement of Reginald Foresythe's *Garden of Weed* (1934) and numerous settings for the singing of Bowlly such as *Just let me look at you* and *Isle of Capri*. He was musical director in London for such musicals as *On your Toes* (Rodgers and Hart, 1937) and *Annie Get your Gun* (Irving Berlin, 1947–9). During his last years he ran an agency. He wrote *Harmony and Orchestration for the Modern Dance Band* (1935, 2/1944).

ALYN SHIPTON

Stone, Robert (*b* Alphington, Devon, 1516; *d* London, 2 July 1613). English composer. His will mentions both his birthplace and his boyhood at Exeter Cathedral. He was probably the man sworn as probationary vicar choral at Wells on 16 August 1542. A list endorsed on 3 April 1546 records him as a member of the Chapel Royal, apparently as yeoman, a position he later held at the coronation of Edward VI. He was promoted to Gentleman before Edward VI's death. He was still an active member of the chapel at the turn of the century. He was fourth in order of seniority (senior to Byrd) at the coronation of James I, and he regularly attended business meetings of the chapel choir at this time. The Cheque Book of the Chapel Royal records his death at the age of 97; in his will he left a house in Alphington. His popular setting of the Lord's Prayer dates from about 1550, and was published by John Day in his *Certaine Notes* (1565). It is notable for its freely rhythmic structure, suggestive of the late 16th-century French technique of *vers mesuré*.

PETER LE HURAY/ANDREW ASHBEE

Stone, William Henry (*b* London, 8 July 1830; *d* London, 8 July 1891). English physician and amateur musician. The son of a rector of Spitalfields, he read classics at Oxford, then medicine in London and Paris. After a brief period of work in Trinidad he returned to London, where he had a distinguished medical career. He was a brilliant scholar, and his interests extended to physics and music; he was also an enthusiastic amateur performer on instruments of the clarinet and bassoon families. He lectured on acoustics at Trinity College of Music in London, and his publications ranged from papers on medical subjects (including the Harveian Oration of 1887) and electricity to textbooks on acoustics and contributions to *Grove1*. These articles on wind instruments are over conservative in tone (e.g. that on Boehm) and have since been shown to contain factual errors. He wrongly identified the oboe da caccia as a small bassoon or tenoroon, examples of which he had in his collection and on which he performed Bach parts written for the former instrument. He also claimed credit for the development of the wide bore version of the double bassoon first invented in 1847 by Haseneier of Koblenz as the 'contrabassophon'. He introduced one into England, playing it at the Handel Festival of 1871; subsequently Morton based his version of the instrument on it. Stone's collection of instruments is in the Bate Collection at Oxford.

WILLIAM WATERHOUSE

Stoner [Stonerd], **William.** *See* STONARD, WILLIAM.

Stone Roses, the. English rock group. Formed in Manchester in 1985, its most consistent line-up was Ian Brown (*b* Manchester, 20 Feb 1963; vocals), John Squire (*b* Manchester, 24 Nov 1962; electric guitar), Reni (Alan Wren; *b* Manchester, 10 April 1964; drums) and Gary 'Mani' Mounfield (*b* Manchester, 16 Nov 1962; bass guitar). In the second half of the 1980s and early 90s Manchester was the focus for many important musical developments within British popular music, and The Stone Roses helped to revitalize the guitar-based indie scene after the demise of The Smiths in 1987. They played a distinctive brand of 1960s-influenced psychedelic guitar-based pop that also incorporated the newer dance styles such as hip hop. Like their contemporaries The Happy Mondays, The Stone Roses were at the centre of Manchester's rave or 'baggy' (so-called because of fans' predilection for flared trousers) culture, and helped revolutionize the sound of British indie music, making it danceable and melodic. Their eponymous début album (Silvertone, 1989), which contained the single *She Bangs the Drums*, is regarded as a classic of its time. The single *Fool's Gold* (1988) was their apogee, with its shuffling rhythm, James Brown-influenced drum pattern (*see* BREAKBEAT) and trademark deadpan vocals from Ian Brown. After years of legal problems The Stone Roses released a second album, *Second Coming* (Geffen, 1994), by which time their brand of music was firmly in the mainstream. Squire left in 1996 to form The Seahorses, while The Stone Roses finally disbanded later that year, with Reni joining Primal Scream.

DAVID BUCKLEY

Stoning [Stoninge, Stonynge, Stoninges], **Henry** (*fl c*1600). English composer. He was described by Anthony Wood as 'a noted musician living in [the] reign of Queen Elizabeth [and] king James I'. Three five-part works for consort are in *GB-Lbl* Add.31390 – a *Miserere*, a *Browning* and an In Nomine (which is also in *GB-Ob* Mus.Sch.D.212–16, as is a simpler, four-part In Nomine; all ed. in MB, xliv, 1979). The *alternatim* Latin *Magnificat* attributed to Stonings/Stenings in *Lbl* Add.17802–5 may be by Oliver Stoning (*d c*1563), a cleric with Lichfield and Windsor connections who was possibly Henry's father.

NORMAN JOSEPHS/DAVID MATEER

Stonnard, William. *See* STONARD, WILLIAM.

Stop. A term indicating 'blocking/unblocking'.

(1) In usage from about 1500, to block (or close) tone-hole(s) on a woodwind instrument with finger(s) or key(s) to alter the pitch produced. Also (now obsolete) the hole itself or the metal key used to close it.

(2) To block off a portion of a string or strings of a bowed or plucked string instrument: a 'full stop' (from 1530) meant the fingering of all strings to produce a chord; 'double (triple, etc.) stopping' is the simultaneous playing of two or more strings; *see* MULTIPLE STOPPING.

(3) A specific rank, or multiple ('compound') ranks of organ pipes (from *c*1500). *See* ORGAN STOP and REGISTRATION, §I; *see also* ACCESSORY STOP; COMPOUND STOP; MACHINE STOP; MIXTURE STOP; MUTATION STOP; SOLO STOP; SPEAKING STOP; and TOY STOP.

(4) [drawstop, draw-stop, stop-lever] (Fr. *tirant*, *tirant de registre*; Ger. *Registerknopf*, *Registerzug*; It. *tiro*). The mechanism in an organ that moves a SLIDER to put on and off a rank of organ pipes. The use of the word 'stop' in this sense in English (as opposed to a cognate of 'register' or 'tirant' in other languages) suggests that it might have its origin either in the resemblance of the slider's many holes to the tone-holes of a woodwind instrument, or in the origin of the slider itself in its present form (from the late 14th century onwards) as a means by which the organist might selectively prevent some ranks of a multi-rank organ from sounding. Some Flemish and other organs exist where stop-knobs have to be pulled out to silence ranks of pipes, so perhaps English stop-knobs were once similarly arranged. The present, practically universal convention of using draw-stops (i.e. stops that are pulled to open sliders) leaves the English word linguistically stranded, like 'downs' (for hills) or 'dikes' (for ditches).

The use of the same term for ranks of pipes and the mechanism which might control them has led to difficulties of interpretation, as in the much-debated phrase in the 1519 contract at All Hallows Barking by the Tower, City of London, whose organ was to have 'as fewe stops as may be convenient'. However, if it is understood that 'fewe' and 'convenient' are legal-clerkly terms for 'a small number' and 'congruent/accordant' respectively, then the meaning of the phrase becomes clear: 'as many/few stops as there are ranks'. This phrase emphasises an aspect of the typical late 16th-century English organ: that it did not contain compound ranks, and was therefore musically more sophisticated, if smaller, than the *Blockwerk*-based organ.

The posthumous inventory of Henry VIII's instruments, made 14 September 1547, refers to 'Stoppes', 'halfe Stoppes' (i.e. bass or treble parts of ranks separately controlled) and 'one hole Stoppe' in the modern way.

COUPLER and other mechanisms (e.g. tremulants, accessories, toy stops) are also often controlled by draw-stops in organs.

(5) The hand-lever or knob that takes off (or puts on) a set of harpsichord jacks or other accessory mechanism on a string keyboard instrument (1780). On later harpsichords and early pianos, these stops might also be operated by knee-levers or pedals (*see* PEDALLING). COUPLER mechanisms on harpsichords are also often controlled by such stop-knobs. *See* REGISTRATION, §II; *see also* ARPICHORDUM STOP; BASSOON STOP; BUFF STOP; JANISSARY STOP LUTE STOP; LUTHÉAL; MACHINE STOP, (1); MODERATOR; and PANTALON STOP.

MARTIN RENSHAW

Stop-list. *See* SPECIFICATION.

Stopped Diapason. *See under* ORGAN STOP.

Stopped flute ensemble. A term used to designate an ensemble based on sets of end-blown flutes closed (i.e. stopped) at their distal ends by natural nodes or by movable tuning plugs. They are mostly single-note flutes, each blown by one man while dancing, accompanied by drumming and singing. Scholars of African music have frequently used the terms 'reed-pipe' or 'reed-flute' for such instruments, but the flutes can be made of material other than reeds (e.g. bamboo, olyra latifolia, papya stalks or clay), and the term 'reed-pipe' is best restricted to pipes fitted with a vibrating reed or reeds at one end. Ensembles of panpipes such as those played in the Solomon Islands, parts of Africa (e.g. the *nyanga* ensembles of Mozambique) and South America could also be included in this term since each panpipe is essentially a raft or bundle of stopped flutes. Cone-flute ensembles, such as those used in the court music of several of the former kingdoms of the inter-lacustrine area of east-central Africa, though obviously related to stopped flutes in musical style as well as organologically, often include instruments with one or more finger-holes and a small vent (also fingered) at the bottom end.

The music of the true stopped flute ensemble has fascinated observers in Africa since Vasco da Gama reported them during his exploratory voyage around the tip of southern Africa in 1497. Kirby (1933) documented this and other accounts and mapped the distribution of such ensembles in southern Africa (see also Cooke). Further north, in eastern parts of Zaïre, the occasional use of these ensembles by Mbuti pygmies (see Demolin) and Tetela children has been reported. They are also found in Mozambique, Zambia (if panpipe ensembles are included), along the line of the western rift valley into Uganda and the Sudan, and as far north as Ethiopia (where they are played in the central highlands and by Cushitic-speaking peoples in the south). The western limit appears to be Chad (where Brandily reported finding ensembles of fana flutes made from unbaked clay) and the nearby areas of both Nigeria and Cameroon (Nikiprowetzky). However, stopped flute ensembles are not as widespread in Africa as the trumpet ensembles that are played in a similar manner and whose music serves similar purposes. Outside Africa stopped flute ensembles have been reported in Lithuania and some of the Pacific Islands, including the Philippines.

The ensembles of Africa and elsewhere have many common aspects. Since each flute usually can play only one pitch, the ensembles generally perform in hocket style, like many African trumpet ensembles. This performing technique results in pieces that can hardly be considered simply as representations of single melodies. The use of 'harmonic equivalents' (see Blacking) and a considerable amount of apparent improvisation within

the constraints of a basic pattern produce descending series of chord progressions (the Ethiopian ensembles appear to be exceptions in this last respect). Only men and boys may play; where women participate in the dancing they usually make their own circle around that of the males. The dances are central to the musical and social life of the peoples who perform them: for example, the *tshikona* flute dance of the Venda of the Transvaal is considered their 'national' dance (*see* SOUTH AFRICA, §I, 3), the *eluma* dance of the Amba of western Uganda brings together all the men and youths of an extended family and serves to strengthen kinship bonds; and the *embilta* (notched flute) dances of Ethiopia are focal points of weddings, funerals and other family gatherings.

PETER COOKE

Stopped notes (i). On string instruments, notes sounded with the string pressed hard to the fingerboard – or, in the case of fretted instruments, against a fret – as opposed to those produced by the full length of the string (*see* OPEN STRING). The terms double, triple or MULTIPLE STOPPING are used to describe bowing on several strings at once, even when open strings are involved.

PHILIP BATE/MURRAY CAMPBELL

Stopped notes (ii). On the HORN, notes which are obtained by closing the bell to a greater or lesser degree with the hand. In normal horn playing, the right hand is partially inserted into the bell, leaving a gap about 40 mm wide; in this position the hand not only supports the instrument, but significantly influences its tuning and timbre. Pushing the wrist forward, so that the palm partly closes the gap, lowers the pitch of each natural note to an extent which decreases as the harmonic number of the natural note concerned increases. On a horn in F, almost complete closure of the bell lowers each natural note in the middle range of the instrument by about a semitone; if the corresponding motion of the hand is accompanied by a slight increase in lip tension there is an upward transition to the next harmonic, and thus a net rise in pitch of one semitone (*see also* HORN, §2(iii)). Despite an inevitable change in tone quality between stopped and unstopped notes, this technique allows a skilled player of the valveless natural horn to sound a fairly even chromatic scale over about an octave and a half, from the 4th harmonic upwards. On the valved horn, stopped notes are sometimes demanded because of their special timbre. Stopping should be clearly distinguished from muting (*see* MUTE, §2(ii)); although a transposing horn mute is available which raises the effective sounding pitch in the same manner as hand stopping, the normal horn mute alters the timbre without changing the pitch. Hand stopping may also have been used on coiled natural trumpets in the 17th and 18th centuries.

PHILIP BATE/MURRAY CAMPBELL

Stopped pipe. In the terminology of organ building, a flue pipe in which the end remote from the mouth is closed by a movable stopper or airtight cap. This provides a means of tuning.

In general, a stopped pipe is any tube that communicates freely with the ambient air at one end and is completely closed at the other. The AIR COLUMN in such a tube will vibrate with an antinode at the open end and a node at the closure. The fundamental is approximately an octave lower than that given by a pipe of equal dimensions open at both ends, and its wavelength is four times that of the tube itself. The harmonic series of a stopped pipe lacks the even-numbered partials; OVERBLOWING begins a 12th above the fundamental. Because it shows this characteristic the clarinet is sometimes loosely termed a stopped pipe. Among folk instruments the stopped pipe is represented by many end-blown flutes of varying degrees of sophistication.

PHILIP BATE

Stopping (i). A technique used in playing the HORN. *See also* STOPPED NOTES (ii).

Stopping (ii). *See* MULTIPLE STOPPING.

Stop-time. A technique used to focus attention on a singer or an instrumental soloist. An ensemble or pianist repeats in rhythmic unison a simple one- or two-bar pattern consisting of sharp accents and rests, while the soloist takes command. Metre and tempo remain intact; only the texture of the accompaniment changes. An unusual instance in ragtime may be found in Scott Joplin's *Ragtime Dance* (1906). The technique is common in jazz; famous examples occur during Johnny Dodds's clarinet solos on King Oliver's two recorded versions of *Dipper Mouth Blues* (1923, Gen.; OK) and Louis Armstrong's trumpet solo on *Potato Head Blues* (1927, OK). A more recent type of stop-time occurs in urban blues and related popular genres where, in the four opening tonic bars of the 12-bar blues progression, the group places a heavy accent on the downbeat of each bar and then gives way to the singer.

BARRY KERNFELD

Stoquerus, Gaspar (*fl c*1570). German theorist, active in Spain. Originally his name was probably Caspar Stocker. He resided in Italy (chiefly, it would seem, in Venice) before going to Spain. There he attended lectures by Francisco de Salinas at the University of Salamanca (Salinas first lectured there in 1567) and referred to him as his teacher. His two treatises (both ed. in GLMT, v, 1988) seem to have been written about 1570 and survive in a single manuscript copy. The more substantial of the two, *De musica verbali libri duo*, is unique in music theory in being, so far as is known, the only work devoted exclusively to text underlay; appended to it is a much

briefer treatment of solmization. In discussing text underlay Stoquerus drew and expanded on the ten rules laid down by Zarlino (*Le istitutioni harmoniche*, 1558, book 4, chap.33); to these he added the concept of obligatory rules (so indispensable as to demand attention by all) and optional ones (to be followed by those intent on a more meticulous coordination of pitches and syllables), and he distinguished between the practices of 'ancients' (the Josquin generation) and 'moderns' (Willaert and his school). He established 15 rules, five obligatory, five optional for earlier composers and five optional for moderns; some were additions, others exceptions, to the Zarlino canon. He provided a rational explanation of them as conforming to nature and the dictates of logic and as applicable to all forms of music, sacred and secular. They exist before the act of composition; hence the *a priori* necessity of complying with them. Stoquerus detected a gradually increasing readiness to observe them from one generation to the next, so that by Willaert's time the exceptions to the rules seemed to have disappeared and the practice had become standardized to meet the demands of the 'natural judgment' of the ear. Stoquerus's treatise also provides valuable information about the origins of Willaert's *Musica nova*.

DON HARRÁN

Storace, Bernardo (*fl* mid-17th century). Italian composer. All that is known of Storace's life derives from the title-page of his sole collection of music: in 1664 he was *vicemaestro di cappella* to the senate of Messina, Sicily. Since the music was published in Venice and seems more akin to that of northern Italy than to that of the Neapolitan-Roman school, it may be inferred that he originated in the north. It is not known whether he was an antecedent of the Storace family active in England at the end of the 18th century.

Storace's surviving music is all contained in his *Selva di varie compositioni d'intavolatura per cimbalo ed organo* (Venice, 1664/Rin *Archivum musicum: collana di testi rari*, xiii (Florence, 1979); ed. in CEKM, vii, 1965). It is an important link between that of Frescobaldi and Pasquini. He concentrated on larger structures in the form of variations on bass patterns. One group of nine, including variations on passamezzo, romanesca, *spagnoletta*, *monica* and Ruggiero patterns, features longer patterns of up to 24 bars, while the other group, comprising four passacaglias and a ciaccona, involves brief four-bar patterns repeated many times. In the former some variations (*parti*) are marked 'gagliarda' and 'corrente'. The passacaglias are divided into *partite*, each consisting of a number of statements of the bass distinguished in metre or mood or, most notably, by tonality, with sequences of keys such as D–A–E–B minor and F minor–B♭ minor–E♭. These sequences are connected by brief modulating passages marked 'passa ad altro tono' pointing up Storace's grasp of tonality. Significantly the pieces are the first to be designated as being on *Alamire*, *Csolfaut* etc., rather than on the traditional ecclesiastical tones still used by Frescobaldi. Altogether Storace wrote some 320 four-bar phrases on some form of descending tetrachord.

Storace's two toccatas, each followed by a canzona, are less dynamic and passionate than those of his Neapolitan and Roman predecessors. They are much briefer, smoother and more consonant and dwell only on tonic, dominant and subdominant harmonies. The two ricercares are more striking, especially the first, which has three sections, each on a separate theme, followed by a fourth section in which the three themes are combined; the first is that used by Frescobaldi as the opening theme of his *Ricercare con l'obbligo di cantare la quinta parte senza tocarla* in his *Fiori musicali* (Venice, 1635). The volume also includes four dances, and the final piece is a very long Pastorale with the most ingeniously contrived repeated patterns and variations in texture and mood, all over a D pedal.

BARTON HUDSON

Storace, Nancy [Ann Selina; Anna] (*b* London, 27 Oct 1765; *d* Dulwich, 24 Aug 1817). English soprano, the daughter of Stefano Storace, an Italian double bass player, translator of Italian opera into English and adapter, and sister of STEPHEN STORACE. A vocal prodigy, she appeared in Southampton in 1773 as 'a Child not eight Years old'; her first London concert was at the Haymarket Theatre in April the following year. About this time she began lessons with Venanzio Rauzzini, in whose opera *L'ali d'amore*, on 29 February 1776, she created the role of Cupido. She also studied with Antonio Sacchini. In 1778 she followed her brother to Italy. She began her operatic career in 1779 in Florence where she took small roles in *opera seria*. This was followed by appearances in revivals of comic opera (1780–81) in which she took both *prima seria* and *prima buffa* roles. In 1782 she sang in Milan, Turin, Parma, Rome and Venice. The first opera composed for her specifically was one of the most acclaimed of its time, Sarti's *Fra i due litiganti il terzo gode* (1782, Milan).

Her growing celebrity, which Kelly witnessed in Venice where he sang with her, caused the Viennese ambassador to Venice, Count Giacomo Durazzo, to engage her for the newly organized Italian opera in Vienna in 1783. The company's first opera was Salieri's *La scuola de' gelosi*. Storace sang the Countess, a role she had sung in Venice a few weeks earlier. During her first season at the Burgtheater, Storace sang in half of the 14 productions; that year she received the highest salary in the company. On 21 March 1784 she married the composer J.A. Fisher, but he apparently treated her cruelly and they soon parted; she gave birth to a child in early 1785, but it died after only a few months. Her years in Vienna (1783–7)

are important for the roles that major composers (Paisiello, Martín y Soler, Salieri, Mozart) created for her. Her early vocal training and her experience in serious opera in Italy had helped her acquire vocal and dramatic resources that she could integrate into her comic performances; composers responded with roles of stylistic richness and variety. Her vocal qualities can be inferred from her music in the greatest operas written for her, Mozart's *Le nozze di Figaro* and Martín y Soler's *Una cosa rara* (this latter the greatest popular triumph of Viennese music theatre). Both Susanna and Lilla exploit her dramatic talents and display her preference for melodies within a limited vocal range (with occasional and modest bravura flourishes) and in *nota e parola* style. Similar vocal writing is found in Mozart's other compositions for Storace, which include a single aria from the aborted *Lo sposo deluso* and the concert aria 'Chi'io mi scordi di te . . . Non temer amato bene' (for her farewell concert). In Vienna Storace also met Haydn, in whose oratorio *Il ritorno di Tobia* she sang in 1784.

In February 1787 Storace, her mother, the composer Thomas Attwood and Michael Kelly left for London where on 24 April she appeared in Paisiello's *Gli schiavi per amore* at the King's Theatre, Haymarket, for which she was provided additional arias by her brother, Corri and Mazzinghi. Stephen wrote that his sister 'has had great opposition from the Italians – who consider it as an infringement on their rights – that any person should be able to sing that was not born in Italy'. After the King's Theatre burnt in 1789 she moved to Drury Lane to join her brother for the 1789–90 season. She launched an extensive career in English opera on 24 November 1789 with her appearance as Adela in her brother's *The Haunted Tower*, for which she received top billing (unusual for a woman on London playbills); its great success was in large measure due to its prima donna and her large-scale italianate piece, 'Be mine tender passion'. Other leading roles in operas by her brother included Margaretta in *No Song, no Supper*, Lilla in *The Siege of Belgrade* and Fabulina in *The Pirates*. There is reason to think she had a close relationship with the Prince of Wales in the early 1790s, when he, the Duke of Bedford and the Marquis of Salisbury attempted to hire her for their secret court theatre at the Pantheon concert hall in Oxford Street (see Price, 1989, pp.66ff). She sang at the King's Theatre for a season in 1793.

Storace also took part in the Handel Festival at Westminster Abbey in 1787. Mount Edgcumbe, who heard her at this and subsequent performances at the Abbey, commented that 'in that space, the harsh part of her voice is lost, while its power and clearness filled the whole of it'. In addition to her many appearances in oratorios in London, she also sang in Salisbury in 1787 in a benefit concert for her early teacher Joseph Corfe, and in 1790 she sang in Bath with Rauzzini, the first of several concerts that continued over seven years. She contributed arias to a number of concerts organized by Salomon for Haydn in 1791 and again in 1795. Other oratorio and concert appearances included Salisbury (in 1792 and 1796, the latter another benefit for Corfe), Hereford (1792), Bristol (1793), Manchester (1794) and Liverpool (1794).

After her brother's death in 1796 she left Drury Lane and returned briefly to the King's Theatre before she and her lover, the tenor JOHN BRAHAM, left for a tour of the Continent in 1797. She was present at a rehearsal of Haydn's *The Seasons* in Vienna in 1801. A son, Spencer, was born in London in 1802. Her farewell performance, and that of her friend Kelly, was at Drury Lane in *No Song, no Supper* in 1808. She and Braham parted on acrimonious terms in 1816 and she died a year later.

After her death in 1817 Storace was underpraised by English writers. Burney called her 'a lively and intelligent actress' but said her voice had 'a certain crack and roughness' and 'a deficiency of natural sweetness'. Mount Edgcumbe wrote that she was unfitted for serious opera and was undoubtedly most successful in comic parts: 'In her own particular line . . . she was unrivalled, being an excellent actress, as well as a masterly singer'. These evaluations suggest that it could not have been her virtuosity or purity of tone that made her voice so compelling to composers but rather that her intelligence, vivacity and charm inspired some of the most vocally and dramatically incisive music of its time.

PATRICIA LEWY GIDWITZ, BETTY MATTHEWS

Storace, Stephen (John Seymour) (*b* London, 4 April 1762; *d* London, 15 or 16 March 1796). English composer. His father, Stefano (later Stephen) Storace was an Italian double bass player, who was working in Dublin in 1750, and in London by 1758. His mother (née Elizabeth Trusler) was a daughter of the owner of Marylebone Gardens. After learning the violin and harpsichord as a youth, he was sent to the S Onofrio Conservatory in Naples to study composition. Thomas Jones, a painter who took him on sketching expeditions around Naples in the late 1770s, indicated that Storace treated his studies lightheartedly. His parents and his younger sister, NANCY

STORACE, visited him in late 1778, before the whole family travelled in Italy. By autumn 1779 he and his sister were performing in Florence, she singing, he playing second harpsichord at the opera house. In Livorno they met the Irish tenor Michael Kelly, who became their friend and colleague and whose memoirs include many anecdotes about the Storace family. Storace's earliest known composition, *Orfeo negli elisi*, a cantata for two voices (now lost), was from this time.

In the early 1780s Storace returned to England, where he tried to settle in both London and Bath. His earliest published works were songs and chamber music from this period, but his later output was to be mainly operatic. He made several trips to Vienna, where his sister was employed as a singer. His two *opere buffe*, *Gli sposi malcontenti* (1785, Vienna) and *Gli equivoci* (1786, Vienna), were probably commissioned through Nancy's influence on Emperor Joseph II. Storace was in Vienna for the premières of these two operas, in both of which his sister and Michael Kelly sang. The Storaces became friends of Mozart and invited him to London, but this plan never came to fruition. Although Storace was clearly influenced by Mozart, there is no evidence that he was Mozart's pupil, as is sometimes claimed. On 20 February 1787, a few days before he was due to return permanently to London, Storace was briefly jailed for disorderly behaviour. He described the incident in a letter from prison to J. Serres, a friend in London.

Back in London, both Stephen and Nancy Storace joined the Italian opera company at the King's Theatre. In 1787 they made their London operatic débuts in Paisiello's *Gli schiavi per amore*, he as director. Storace's Italian opera for London, *La cameriera astuta*, lasted for only a few performances. In the same year he sued the publishers Longman & Broderip for printing his substitute aria 'Care donne che bramate' without permission, and eventually won his case. In the summer of 1788 Storace joined the Society of Musicians, sponsored by Samuel Arnold. On 23 August he married Mary Hall, daughter of John Hall, historical engraver to the king. Their only surviving child, Brinsley John, died in 1807.

By the beginning of the 1788–9 season, Storace had moved to Drury Lane, where Thomas Linley (i), the house composer and a family friend, seems to have happily delegated his responsibilities. (Storace never officially became composer to the theatre because Linley, a part-owner, retained his title until his death only shortly before Storace's.) For his first project, Storace worked with James Cobb, Linley's librettist, in using Dittersdorf's *Doktor und Apotheker* as the basis for an afterpiece. In the following season they followed that success with a full-length opera, *The Haunted Tower*.

For the rest of his career Storace composed almost entirely for the Drury Lane company, usually collaborating with Cobb for mainpieces and with Prince Hoare for afterpieces. Storace and Hoare first worked together on *No Song, No Supper* (1790). All of their afterpieces were first staged as benefits for Storace's principal singers – Nancy Storace and Michael Kelly, and their less distinguished partners, John Bannister and Anna Maria Crouch – and subsequently adopted into the repertory of the theatre. Storace derived his own income from sharing benefit nights with his librettists and by selling the copyright of his music to publishers – normally his operas were published in vocal score as soon as they were established as successes on stage.

Several of Storace's works were composed for specific occasions. *Poor Old Drury*, a prelude with songs by Storace, was produced when the Drury Lane company moved to the King's Theatre in 1791. (They were without their own theatre for almost three years while it was rebuilt.) In the 1792–3 and 1793–4 seasons Storace again directed Italian operas at the King's Theatre, along with Michael Kelly. He wrote his own serious English opera *Dido, Queen of Carthage* (1792) for performance by the Drury Lane company there, but it was a failure. Another occasional work was the afterpiece *The Glorious First of June*, staged in July 1794 to raise money for the dependents of sailors killed in Lord Howe's victorious battle against the French on 1 June.

Storace's two early Viennese operas are typical *opere buffe*, and he thought well enough of them to incorporate sections into his English works. In his earliest works for the Drury Lane company, he quite blatantly set out to please the English audience, modelling his operas on those of Thomas Linley (i), Shield and Arnold. He then gradually modified the model – a series of dramatically inessential musical numbers alternating with spoken dialogue – towards a greater integration of drama and music, especially in ensembles. This trend reached its height in *The Pirates* (1792) and *The Cherokee* (1794), his last two completed mainpiece operas. With these he became the sole proponent of action finales on the English stage. His operatic songs run the gamut from simple folklike strophic songs to bravura numbers in complex forms. In most of his operas he followed the English tradition of using borrowed numbers side by side with those he had composed himself. Most of his overtures are in one movement, following the continental European model rather than the old three-movement overture retained by other English composers.

Storace was taken ill in March 1796 during rehearsals for *The Iron Chest* and died a few days after its première; his death has been attributed to gout. He was buried in St Marylebone parish church on 21 March, an event recorded in John Philip Kemble's diary (*GB-Lbl*). Nancy Storace and possibly Michael Kelly made his unfinished opera *Mahmoud* stageworthy by adding music from other sources. Prince Hoare wrote a prologue in Storace's memory for its première on 30 April, and on 11 May it was performed as part of a benefit night for Storace's widow and child. In 1797 Joseph Dale, who had been Storace's main publisher, brought out the *The Iron Chest* and *Mahmoud* together for their benefit.

When Storace died at the age of almost 34, his career in the English theatre had lasted less than eight years. His innovations had little influence on his contemporaries and successors, who continued to segregate drama and music. Although some of his operas remained popular for several decades, his contribution to the history of English opera was small: while audiences accepted his tactfully introduced innovations, other English composers rejected them in favour of the status quo.

WORKS

STAGE WORKS

afterpieces and mainpieces are dialogue operas unless otherwise stated; librettos published unless otherwise stated

LDL – *London, Theatre Royal, Drury Lane*
LKH – *London, King's Theatre in the Haymarket*
LLH – *London, Little Theatre in the Haymarket*

aft – *afterpiece*
a-s – *all-sung*

Gli sposi malcontenti (ob, a-s, 2, G. Brunati), Vienna, Burg, 1 June 1785, *A-Wn*, *D-Dl* (2 copies), ov. pubd pf 4 hands
Gli equivoci (ob, a-s, 2, L. da Ponte, after W. Shakespeare: *The Comedy of Errors*), Vienna, Burg, 27 Dec 1786, *A-Wn*, *D-Dl* (2 copies), *US-Wc*; ed. R. Platt as The Comedy of Errors, MB (forthcoming)
La cameriera astuta (ob, a-s, 2), LKH, 4 March 1788, ov. pubd in kbd arr., 2 arias and qt pubd in full score (all London, 1788)
The Doctor and the Apothecary (aft, 2, J. Cobb, after G. Stephanie the younger), LDL, 25 Oct 1788, vs (London, 1788); incl. music from Dittersdorf: Doktor und Apotheker
The Haunted Tower (mainpiece, 3, Cobb), LDL, 24 Nov 1789, vs (London, 1789)
No Song, No Supper (aft, 2, P. Hoare), LDL, 16 April 1790, *GB-Lcm*, vs (London, 1790); ed. R. Fiske, MB, xvi (1959)
The Siege of Belgrade (mainpiece, 3, Cobb, partly after Da Ponte: *Una cosa rara*), LDL, 1 Jan 1791, vs (London, 1791); incl. music from Martín y Soler: Una cosa rara
The Cave of Trophonius (aft, 2, Hoare), LDL, 3 May 1791, lib unpubd
Poor Old Drury (prelude with music, 1, Cobb), LKH, 22 Sept 1791, text unpubd
Dido, Queen of Carthage (mainpiece, a-s, 3, Hoare, after P. Metastasio: *Didone abbandonata*), LKH, 23 May 1792
The Pirates (mainpiece, 3, Cobb), LKH, 21 Nov 1792, vs (London, 1792), lib unpubd; rev. with new text, as Isidore de Merida, London, LDL, 29 Nov 1827
The Prize (aft, 2, Hoare), LLH, 11 March 1793, vs (London, 1793)
My Grandmother (aft, 2, Hoare), LLH, 16 Dec 1793, vs (London, 1794)
Lodoiska (aft, 3, J.P. Kemble, after J.E.B. Dejaure), LDL, 9 June 1794, vs (London, 1794); incl. music from R. Kreutzer: Lodoiska and L. Cherubini: Lodoïska
The Glorious First of June (aft, 1, Cobb and others), LDL, 2 July 1794, vs (London, 1794), lib unpubd
The Cherokee (mainpiece, 3, Cobb), LDL, 20 Dec 1794, vs (London, 1795)
The Three and the Deuce (aft, 3, Hoare), LLH, 2 Sept 1795, vs (London, 1795)
The Iron Chest (mainpiece play with music, 3, G. Colman (ii), after W. Godwin: *Caleb Williams*), LDL, 12 March 1796, vs (London, 1797)
Mahmoud (mainpiece, 3, Hoare), LDL, 30 April 1796, vs (London, 1797), lib unpubd; music probably completed by N. Storace and M. Kelly

OTHER VOCAL WORKS

Orfeo negli elisi (cant.), Lucca, 1781
8 Canzonetts, 1v, pf/harp acc. (*c*1782)
Ah se poro, recitative and rondo (?1782)
Ah! Delia, see the fatal hour (after Metastasio), ariette (*c*1785)
Care donne che bramate (Badini), aria for Paisiello's Il re Teodoro in Venezia, KT, 8 Dec 1787; full score pubd, *US-Wc**
The favorite air in the Heiress … with variations and an introduction (*c*1790)
Io non era, aria for Sarti's Le nozze di Dorina, KT, 26 Feb 1793; full score (1793)
Captivity, a Ballad supposed to be sung by the unfortunate Marie Antoinette during her Imprisonment in the Temple (J. Dibden), 1v, ?str (1793)
Lamentation of Marie Antoinette … on the Morning of her Execution, 1v, str, bn (1793)

INSTRUMENTAL WORKS

2 quintets, str, pf/hpd and sextet, fl, str, pf/hpd, op.2 (1784)
3 trios, D, C, E♭, vn, vc, pf, in Storace's Collection of Original Harpischord Music (1787–9); also pub separately
Six Easy and Progressive Sonatinas (1791)
Venus and Adonis (ballet, Noverre), KT, 26 Feb 1793; pf arr. (1793)

JANE GIRDHAM

Storaket. A sign marking a secondary pause in Armenian EKPHONETIC NOTATION.

Storchio, Rosina [Rosa] (*b* Venice, 19 May 1872; *d* Milan, 24 July 1945). Italian soprano. A pupil at the Milan Conservatory, she made her début there in 1892 at the Teatro Dal Verme as Micaëla in *Carmen*. After further study with Alberto Giovannini she appeared at La Scala in 1895 as Sophie in *Werther*; at Venice in 1897 she took part in the first performance of Leoncavallo's *La bohème*. The best years of her career began when she sang the title role in the première of *Zazà*, also by Leoncavallo (1900, Milan, Teatro Lirico), and continued with the successes she obtained at La Scala as Donizetti's Linda (1902), Stefana in the first performance of Giordano's *Siberia* (1903), Norina (1904; for illustration *see* DE LUCA, GIUSEPPE) and Violetta (1906). She also created the title role of *Madama Butterfly* (1904) at La Scala (see illustration), and returned there occasionally until 1918. She was very popular in Spain, singing frequently at Barcelona and Madrid between 1898 and 1923, and in Buenos Aires (1904–14). In 1921 she appeared at the Manhattan Opera House, New York, and in Chicago. Among her notable parts were Mimì, Massenet's Manon, and the title role in Mascagni's *Lodoletta*, which she sang at the first performance (1917, Rome). Her voice was not large, but flexible, pure and sweet; at the height of the popularity for *verismo* opera she personified the lyrical, refined, gentle school of singing. Her plaintive and fragile Cio-Cio-San was typical of this approach, in contrast to the more lively and dramatic style of Krusceniski and Destinn. But in other roles, such as Violetta or Manon, her acute sensitivity led her to depict the characters with passionate and touching impulsiveness. After her retirement in 1922 she taught singing and devoted herself to charitable works.

Rosina Storchio as Cio-Cio-San and Giovanni Zenatello as Pinkerton in Puccini's 'Madama Butterfly', La Scala, Milan, 1904

RODOLFO CELLETTI/R

Storck, Karl G(ustav) L(udwig) [Murbach, Hans] (*b* Dürmenach, Alsace, 23 April 1873; *d* Olsberg, Westphalia, 9 May 1920). German writer on music. He studied musicology, literature and art history at the universities of Strasbourg and Berlin and his dissertation on Brentano's fairy tales received the Grimm prize in 1895. For many years he was the chairman of the Deutscher Schriftstellerverband and fine arts editor of the magazine *Der Türmer*. He occasionally wrote under the pseudonym Hans Murbach.

An influential popularizer of the fine arts, especially music, Storck wrote widely read histories of music and German literature (*Deutsche Literaturgeschichte*, Stuttgart, 1898, 10/1926), and his guide to opera, *Das Opernbuch*, was reprinted until 1949. He advocated a broad range of practical reforms in German musical life, including open-air concerts, systematic singing instruction in schools, state examination and certification of music teachers, and municipal and state financing of public concerts. Storck's activities as a popularizer were inspired by his conviction that the arts were vehicles of political and moral education, and he hoped that a revival of German musical life would help overcome political and social fragmentation in Imperial Germany. He therefore presented his proposed reforms under the rubric 'Musikpolitik' (musical politics), a term based on similar calls for a 'Kunstpolitik' (artistic politics) in pre-World War I Germany. Storck's cultural politics were strongly nationalist, and his writings on art and music during World War I became increasingly marked by a chauvinism and an anti-Semitism that have significant affinities with later Nazi cultural attitudes.

ROBERT KUNATH

Storioni, Lorenzo (*b* Cremona, 10 Nov 1744; *d* Cremona, 10 Jan 1816). Italian violin maker. Although Cremona's greatest years, which ended with the deaths of Stradivari, Guarneri 'del Gesù' and Carlo Bergonzi, were over before he was born, Storioni had among his contemporaries G.B. Guadagnini (Turin), Balestrieri (Mantua), and the comparatively inactive Nicola Bergonzi (Cremona). Storioni complemented each of these; he was a productive maker who drew something from the traditions of his predecessors and added to them his own strongly individual character, thus keeping Cremonese violin making alive and healthy.

Storioni's first instruments date from the early 1770s. His work is rough by contemporary standards, though well proportioned. The roughness, together with a rather ordinary choice of locally grown wood, is a feature common to many lesser late 18th-century Italian makers, whose instruments sometimes now bear false Storioni labels in place of the originals. This sometimes obscures Storioni's real merit: genuine instruments are rarely less than very good on all important counts. Curiously, Storioni was more influenced by Guarneri 'del Gesù' than either Stradivari or Amati. The outline of his instruments is characterized by a feeling of extra width in the lower part of the centre bouts, a certain straightness coming towards the corner block that is matched by the stiff, slanting soundholes. The scrolls are often heavy and not at all deeply cut, in contrast to a rather shallow pegbox. The varnish varies, the best being of a pleasing orange-red colour, though usually brittle in consistency.

Storioni was the central protagonist in the revival of Cremonese violin making during the last quarter of the 18th century. From *c*1787 to 1792 Giovanni Rota was his apprentice, while Storioni lived and worked next door

to Nicola Bergonzi. It is also believed that Storioni's successor was G.B. Ceruti. However, the assumption that G.F. Pressenda and Luigi Marconcini were apprenticed to Storioni is now regarded as erroneous. Among musicians, Storioni has proven to be the most highly regarded northern Italian violin maker of the late 18th century.

Under somewhat mysterious circumstances, Storioni left Cremona in about 1802. His itinerary in subsequent years is not certain but he may have gone to the cities of Trieste, Fiume and Venice. By 1810–11 Storioni had returned to Cremona and though he is documented as a violin or instrument maker during his final years, none of his known work dates from after 1804.

In addition to many violins, Storioni made some cellos and a number of small violas, a little over 39·5 cm in body length; larger violas are very rare. His instruments are highly regarded by players for their breadth of tone; their bright, open, powerful sound is well suited to solo playing.

Storioni's son Giuseppe (*b* Cremona, 30 Aug 1772; *d* Milan, 27 July 1823) was a cellist, pedagogue and composer of occasional music. In the 1790s he studied the cello with Giuseppe Rovelli in Parma, and while there made the acquaintance of Alessandro Rolla. He then worked in Vicenza and Verona before settling in Milan, where he was employed as solo cellist at La Scala, where Rolla had become director of music in 1803, and chamber musician to the Viceroy Eugène Beauharnais, Napoleon's stepson. He was highly regarded by Paganini, and taught the cello at the Milan Conservatory (now the Conservatorio di Musica G. Verdi) when it was first founded. His pupils included Vincenzo Merighi.

CHARLES BEARE/DUANE ROSENGARD

Störl, Johann Georg Christian (*b* Kirchberg an der Jagst, 14 Aug 1675; *d* Stuttgart, 26 July 1719). German composer. He grew up in Gaildorf, near Backnang, and, according to Mattheson, was a chorister at the Stuttgart court at the age of 12; but he is recorded there only after 16 April 1690 (he remained a chorister until 22 January 1695). He received his basic training in music at the hands of the Hofkapellmeister Theodor Schwartzkopff, who later boasted that he had taught Störl many good things for seven years and had 'brought him so far in the field in instrumental achievement, especially on the keyboard' that even as a junior member of the Kapelle Störl was capable of 'playing the organ for ordinary occasions at court'. At the beginning of 1697 Duke Eberhard Ludwig sent him to Pachelbel in Nuremberg, where Störl received instruction in composition and keyboard. He returned to Stuttgart and in 1699 became court organist. In 1701 the duke granted him permission to spend time studying under F.T. Richter in Vienna; while there he played before the emperor. In February 1702 he travelled to Maastricht, by sea to Venice, and then on to Ferrara, Bologna and Rome, where he arrived on 8 March and remained until 11 January 1703. While in Rome he came into contact with Francesco Grassi, Bernardo Pasquini and Arcangelo Corelli. The return journey took him through Florence, Bologna, Ferrara and Venice, where he stayed from 23 January until 24 March (here he met C.F. Pollarolo), and on through Maastricht, Augsburg and Ulm. He reached Stuttgart again on 5 May, having been appointed Hofkapellmeister there on St George's Day (23 April). He worked in this post alongside his former teacher, Schwartzkopff, under the senior Kapellmeister; until 1704 that position was held by J.S. Kusser, and from 1706 by J.C. Pez. Disagreements with Pez and the poor remuneration in this post were the reasons behind Störl's application for the post of organist at the Stiftskirche at the beginning of 1707; he was appointed on 19 February and took up office on St George's Day, but apparently continued in the post of Hochfürstlich Württembergischer Kapellmeister. In his new capacity he did much to reorganize the music of the chapter. His hymnbook for the organ (its melodies are typical of the taste of the period) contains many original settings, some of which continued in use until the 20th century. Schubart, writing of Störl's ecclesiastical cantatas, considered the 'tuttis and the final choruses to be particularly masterly'. Störl's dignified, two-movement sonatas for cornett and three trombones were presumably intended as tower music for the Stiftskirche.

Stothart, Herbert (Pope) (*b* Milwaukee, 11 Sept 1885; *d* Los Angeles, 1 Feb 1949). American composer and conductor. He was educated in Milwaukee and then became involved in conducting and composing for theatrical productions at the University of Wisconsin. He began working as a conductor on Broadway in 1920, writing songs with the lyricists Oscar Hammerstein II and Otto Harbach, and collaborating with the composers Rudolf Friml, George Gershwin and Vincent Youmans. In 1929 he moved to Hollywood to work for MGM, where he remained until his death, conducting and composing for more than 100 films. As a music director he was associated mainly with film musicals, notably *The Wizard of Oz*, for which he won an Academy Award, and those starring Jeanette MacDonald and Nelson Eddy. As a composer he worked on almost all of MGM's prestige productions of the 1930s and 40s. His idiom incorporates thematic quotation from other composers, including Chopin (*A Tale of Two Cities*, 1935, *The Picture of Dorian Gray* 1945), Delius (*The Yearling*, 1947), and Tchaikovsky (*Conquest* and *Romeo and Juliet*, both 1937). This was partly a response to an emphasis at MGM on broadening the experience of its audience through the inclusion of 'classical music' in film. His scoring technique also reflects his interest in Wagner's operas and the leitmotif: this traditional conception of film music also reflects his experience as a song-writer for music theatre, and his career on Broadway gave him an understanding of how music might be integrated with dramatic action. His scoring was versatile and he wrote music for films from a range of genres, including *Mutiny on the Bounty* (1935), *David Copperfield* (1935), *The Good Earth* (1937) and *Mrs Miniver* (1942). He was nominated for 12 Academy Awards, for scoring both dramatic and musical pictures, and his songs, including *I wanna be loved by you*, appeared in over 50 films.

WORKS
(*selective list*)

STAGE
all are musicals and, unless otherwise stated, have librettos and lyrics by O. Hammerstein II and O. Harbach; dates are those of first New York performance

Wildflower, collab. V. Youmans, 7 Feb 1923; Rose-Marie, collab. R. Friml, 2 Sept 1924; Song of the Flame, collab. G. Gershwin, 30 Dec 1925; Golden Dawn, collab. E. Kálmán, 30 Nov 1927; Good Boy (libretto by Hammerstein and Harbach; lyrics by B. Kalmar), collab. H. Ruby, 5 Sept 1928

FILM SCORES
director in parentheses

The Squaw Man (C.B. DeMille), 1931; Night Flight (C. Brown), 1933; Treasure Island (V. Fleming), 1934; Anna Karenina (Brown), 1935; David Copperfield (G. Cukor), 1935; Mutiny on the Bounty (F. Lloyd), 1935; A Tale of Two Cities (J. Conway), 1935; Camille (Cukor), 1937; Conquest (Brown), 1937; The Good Earth (S. Franklin), 1937; Romeo and Juliet (Cukor), 1937; Marie Antoinette (W.S. Van Dyke), 1938; Northwest Passage (K. Vidor), 1940; Waterloo Bridge (M. LeRoy), 1940; Mrs. Miniver (W. Wyler), 1942; The Human Comedy (Brown), 1943; Random Harvest (LeRoy), 1943; Madame Curie (LeRoy), 1944; Dragon Seed (H.S. Bucquet and Conway), 1944; The White Cliffs of Dover (Brown), 1944; National Velvet (Brown), 1945; The Picture of Dorian Gray (A. Lewin), 1945; The Yearling, 1947

KATE DAUBNEY (with WILLIAM H. ROSAR)

Stotijn, (Jacob) Haakon (*b* The Hague, 11 Feb 1915; *d* Amsterdam, 3 Nov 1964). Dutch oboist, son of JAAP STOTIJN. He studied with his father. For some time he worked at Berne, and in 1940 was appointed first oboe with the Concertgebouw Orchestra. As a soloist he made tours through the Netherlands and abroad and was regarded as one of the best oboists in Europe, with a notably lyrical, expressive style of playing. Besides the usual works his repertory included modern compositions, such as those of Ibert, Dresden, Van Hemel and Voormolen. He also enjoyed a reputation as a chamber musician, and took part in the instrumental sextet Alma Musica, and other groups. With his father he gave countless performances of Voormolen's Concerto for two oboes, composed for them. He taught at the Amsterdam Muziekyceum and at the Amsterdam Conservatory (Edo de Waart and Han de Vries were among his pupils).

TRUUS DE LEUR

Stotijn, Jaap (*b* The Hague, 22 Sept 1891; *d* The Hague, 5 April 1970). Dutch oboist and pianist, father of HAAKON STOTIJN. He studied at The Hague Conservatory winning the Fock Medal. Having played in various orchestras he became first oboe with the Residentie-Orkest (1919–46) and taught at The Hague Conservatory (1919–56). He enjoyed a great reputation as a soloist admired for his powerful but refined tone, as a chamber musician, and as a teacher, and is widely regarded as the founder of the modern Dutch school of wind playing. Dresden, Cor de Groot and Voormolen composed concertos for him.

Toscanini invited him to be first oboist in the Israel PO on its foundation in 1936. For a long time he played in a trio with the flautist Johannes Feltkamp and the pianist and composer Piet Ketting, and he also conducted various amateur orchestras. As a pianist he frequently accompanied other instrumentalists. Among his pupils were his son, Haakon, and Han de Vries. He devised a new style of reed scrape, a subject on which he published articles. His autobiography, *Even uitblazen*, was published posthumously in The Hague in 1975.

TRUUS DE LEUR

Stott, Kathryn (*b* Nelson, 10 Dec 1958). English pianist. She studied first at the Yehudi Menuhin School with Marcel Ciampi and Barbara Kerslake, and later with

Kendall Taylor at the RCM and Vlado Perlemuter. She was a finalist in the 1978 Leeds International Piano Competition and the same year made her London début at the Purcell Room. Shortly afterwards she commenced a distinguished series of recordings reflecting her special love of British music, notably by George Lloyd, Ireland, Walton and, above all, Bridge. Stott has also made a speciality of the music of Fauré, and directed a Fauré Festival in her native Lancashire and recorded his complete piano works to critical acclaim. She has appeared widely in Britain, Europe and America, where she formed a musical partnership with the cellist Yo-Yo Ma. Her playing is marked by a vivid sense of immediacy and personal communication.

BRYCE MORRISON

Stott, Wally [Walter]. *See* MORLEY, ANGELA.

Stoudios [Stoudion, Stoudiou, Studios]. Greek Orthodox monastery founded in 463 between the Golden Gates in Constantinople. It was an influential centre of Byzantine hymnography and liturgical activity between the 9th century and the 12th and probably the most important such centre in Constantinople. The monastery (dedicated to St John the Baptist) was founded by Studius (or Stoudios), a former consul. It may originally have been populated by *akoimētēs*, 'sleepless' monks who in turn incessantly chanted the 'praise of the Lord'. Fleeing before the Arabs, monks of this type from the monastery of Sakkoudion in Bithynia, near Brussa, settled in Stoudios in 798 under Theodore (759–826), who was an important defender of the veneration of icons in the iconoclastic controversy and was repeatedly exiled. Theodore reputedly drew up a monastic rule which included provision for manuscript copying (rather unusual in Eastern monasteries); the Stoudios scriptorium still existed in 1350. The Studite rule (typikon) was, in the 10th century, adopted on Mount Athos; during the patriarchate of Alexios the Studite (1025–43) it was transmitted to Russia and survived there even after the introduction of the Jerusalem typikon in the 14th century. (The Stoudios typikon provided for simpler services; that of Jerusalem provided for more festive services.) The monastery was ravaged by the crusaders in 1204; the last period of its significance started with its renovation in 1294 and ended with the Turkish conquest of Constantinople in 1453. Part of the monastery served as a mosque until the earthquake in 1894 and the fire of 1920 left it in ruins.

Between the 9th century and the 12th many monks there composed hymns and wrote treatises. Theodore the Studite and his brother Joseph (the metropolitan of Thessaloniki) are believed to have brought the triōdion into its present form; both contributed hymns to it.

Stout, Alan B(urrage) (*b* Baltimore, 26 Nov 1932). American composer. He studied concurrently at Johns Hopkins University (BS 1954) and the Peabody Conservatory. After a year at the University of Copenhagen, he completed his formal musical training at the University of Washington, Seattle (MA 1959). His teachers included Cowell, Riegger, Holmboe and Verrall. In 1962 he joined the music department at Northwestern University. His diverse musical interests are reflected in the various societies to which he belongs. He is a founding member of the International Gong Society and the International Double Reed Society, a patron of the Schoenberg Institute, and a member of the board of directors of the International Percy Grainger Society. In addition, he has completed numerous performance editions and realizations of unfinished works of composers such as Ives, Webern and Grainger. He is also an advocate of Scandinavian music.

A prolific composer, Stout has written over 100 works. His style exhibits a blend of American experimentalism and more traditional writing. Often based on a relaxed application of the 12-note system, his music makes use of tone clusters, transcriptions of natural phenomena, and rhythmic notations that allow performers a certain degree of rhythmic flexibility. A consistent concern for timbre is also characteristic of his music. Many of his works revise and re-use material from earlier compositions. The Music for Oboe and Piano (1966) and the Music for Flute and Harpsichord (1967), for example, rework sections of the Second Symphony (1951–66). That work, as well as the *George Lieder* (1962), the Fourth Symphony (1970) and *Passion* (1975) were given premières by the Chicago SO.

KATHRYN GLEASMAN PISARO

Stöwe, Charlotte Wilhelmine Caroline. *See* BACHMANN, CHARLOTTE CAROLINE WILHELMINE.

Stoyanov, Pencho (Tsvetanov) (*b* Sofia, 9 Feb 1931). Bulgarian composer and musicologist, son of VESELIN STOYANOV. He studied the violin with Simeonova (from 1947) and composition with Khadzhiyev and Vladigerov at the Sofia State Academy (1951–6); thereafter he attended the Moscow Conservatory, where his teachers included Protopopov. In his composition, Stoyanov has developed a style that gives priority to text-setting and to using vocal lines as part of an orchestral texture; examples of this are found in the cantata *Letopis na Nachaloto* ('The Origin Chronicle'), the Fourth Symphony and the symphonic poem *Na proshtavane* ('Farewell'). In his purely instrumental works, complex sound-mosaics form part of the musical discourse, particularly in works such as the Concerto for String Orchestra (1976) and the Third Sonata for violin and piano. In the songs and other chamber pieces, free form and continuity are the overriding concern. As a teacher, Stoyanov has introduced musical analysis to all areas of specialized study by drawing on his experience as a composer and theorist. His most important writings are *Kontrastno-sastavni formi v muzikata* ('Contrasting-compound forms in music'), *Vzaimodeystviye mezhdu muzikalnite formi* ('Interaction of musical forms') and *Muzikalen analiz*.

TOMI KURKLISIJSKY

Stoyanov(-Ivanov), Stoyan (*b* Sofia, 3 Sept 1912; *d* Sofia, 3 March 1983). Bulgarian musicologist. He learnt the violin as a child and in 1921 had lessons with Nikola Abadzhiev, with whom he continued his studies while a student in the theory department of the State Academy of Music in Sofia. There he studied music history, education and aesthetics with Stoyan Brashovanov. He graduated in 1935 and earned his living as a violinist and, from 1948 to 1952, as conductor for Sofia Radio. He was editor-in-chief of the periodical *Balgarska muzika* (1956–64), director of the Sofia State Philharmonic (1958–61) and a secretary of the Bulgarian Composers' Union (1962–5). In 1964 he became senior research fellow at the department of theory and aesthetics in the Music Institute of the Bulgarian Academy of Sciences. In addition to his other writings he was active as a music critic.

LADA BRASHOVANOVA

Stoyanov, Veselin (*b* Shumen, 20 April 1902; *d* Sofia, 29 June 1969). Bulgarian composer. One of the most

important representatives of the so-called contemporary classicism in Bulgaria during the 1930s. From 1926 to 1930 he studied composition with Franz Schmidt at the Vienna Hochschule für Musik. After returning to Bulgaria he first worked as a concert pianist then as a conductor and professor of composition and theory at the Sofia Conservatory. He was director of the conservatory during the years 1943–5 and 1956–62, and director of the Sofia National Opera from 1953 to 1954.

In its tending towards exoticism, large-scale forces and through-composed forms sustained by leitmotif technique, his work bears the hallmarks of late Romanticism as represented by Strauss. A national stamp to this style is provided by modal colouring, peculiarly Bulgarian irregular rhythms, complicated rhythmic figures and melismas, as well as the use of Balkan modes containing the interval of the augmented 2nd. These are all present in his most important work, the opera *Salammbo* based on Flaubert's novel. The dramatic charge of elevated emotions and fateful passions, presented against the broad canvas of the bizarre and exotic world of ancient Carthage, made the splendour and superabundance of the late Romantic orchestra the composer's natural choice. As in Strauss's *Salome*, the dramaturgy of *Salammbo* is driven by a sequence of confrontational dialogues, each increasing the tension but embedded within a Romantic choral tableau. Stoyanov's preference for instrumental genres such as the symphonic poem and the suite, and the underlying programmaticism of most of his works, also prove his allegiance to the Romantic tradition. The Bulgarian cultural tradition, on the other hand, is the source for the grotesque, caricature-like musical characterization of works such as *Zhensko tsarstvo* [The Kingdom of Women] and *Bay Ganyu*. Stoyanov simplified his musical language after the revolution of 1944 in order to accommodate the call for new, socialist art. Diatonic tonal organization, a song-like melodic style and symmetrical rhythmic phrases became the principal features of his new language, while dramatic conflict and powerful emotions gave way to lighthearted, life-affirming subject matter, as in the opera *Khitar Petar* [Cunning Peter] and the *Prasnichna uvertyura* ('Festival Overture').

MARYA KOSTAKEVA

Stoyanova, Ivanka. *See* STOIANOVA, IVANKA.

Stözl, Gottfried Heinrich. *See* STÖLZEL, GOTTFRIED HEINRICH.

Stracciari, Riccardo (*b* Casalecchio di Reno, nr Bologna, 26 June 1875; *d* Rome, 10 Oct 1955). Italian baritone. After studying briefly at the Bologna Conservatory he sang in the chorus in operetta (1894), then continued his studies with Umberto Masetti at Bologna. He made his début in Firenze in 1898 in Lorenzo Perosi's oratorio *La resurrezione di Lazzaro*; his solo operatic début followed a few days later in *La bohème* at the Teatro Duse in Bologna. In the 1900–01 and 1902–3 seasons he appeared at Lisbon, then at La Scala (1904–6, 1908–9), Covent Garden (1905), the Metropolitan (1906–8), the Paris Opéra (1909), the Real, Madrid (1909–11), and other leading theatres. He then sang mostly in Italy (especially Rome), Spain and Argentina, though from 1917 to 1919 he was a member of the Chicago Opera Association. His vocal decline can be dated from 1928, but though he devoted himself to teaching, first in Naples (1926), then later in Milan and Rome (Christoff and Silveri were among his pupils), he did not leave the stage until 1942, and in 1944 appeared again in *La traviata* at the Teatro Lirico, Milan. Stracciari's mellow, velvety voice, coloured and resonant over its whole range, with an extended and penetrating upper register, made him, between 1905 and 1915, the rival of Titta Ruffo and Pasquale Amato. His repertory included all the great baritone roles and among the dramatic parts he preferred those in *Il trovatore*, *Rigoletto* and *Aida*. But, thanks to a technique characteristic of the best traditions of the 19th century, he excelled in works which allowed him to display his courtly enunciation, smooth singing, elegant phrasing and musical delicacy: *La favorite*, *Ernani* and above all *La traviata*, in which he played the heavy father with exceptional, gripping effect. He was also a noted Figaro in *Il barbiere di Siviglia*, a role that well displayed his brilliant high notes and which, like Rigoletto, he recorded in 1929. But his voice is heard at its freest and finest in the recordings he made for Fonotipia (1904–15) and Columbia (1917–25).

RODOLFO CELLETTI/R

Strada, Giovanni Battista. *See* STRATA, GIOVANNI BATTISTA.

Strada del Pò, Anna Maria (*b* Bergamo; *fl* 1719–41). Italian soprano. She sang in four operas in Venice in 1720–21, the first of them Vivaldi's *La verità in cimento*, then in

Milan in 1721, Livorno in 1722 and Lucca in 1724. She appeared at the S Bartolomeo, Naples (1724–6), in Vinci's *Eraclea* and *Astianatte*, Porpora's *Semiramide*, Leo's *Zenobia in Palmira* and two operas by Porta. While in Naples she married Aurelio del Pò, who for a time managed the theatre and signed the dedication of a number of librettos in 1721–5. He is said to have married Strada because he owed her 2000 ducats and could find no other means of satisfying her.

In 1729 Handel engaged Strada for London, where she made her début as Adelaida in *Lotario* and was the leading soprano in all his operas and oratorios until 1737. She sang more major Handel parts than any other singer, appearing in at least 24 operas, the opera-ballet *Terpsicore* and many other works, and was the only member of his company who did not go over to the Opera of the Nobility in 1733. Handel composed many roles for her: Adelaida in *Lotario* (1729), Partenope (1730), Cleofide in *Poro* (1731), Fulvia in *Ezio* and Elmira in *Sosarme* (1732), Angelica in *Orlando* (1733), Arianna and Erato in *Terpsicore* (1734), Ginevra in *Ariodante* and Alcina (1735), Atalanta (1736) and Thusnelda in *Arminio*, Ariadne in *Giustino* and Berenice (1737). She sang in 11 Handel revivals, taking eight roles composed for Cuzzoni and one for Faustina; nearly all were modified or included new or adapted arias. She also appeared in a number of pasticcios under Handel and in his revival of Ariosti's *Coriolano* (1732). She refused to sing for Bononcini in 1732. In 1738 she left London for Breda; she sang in Naples in 1739–41 and in Turin and Vicenza in 1741 before retiring to Bergamo.

Burney attributed Strada's success largely to Handel, calling her:

> a singer formed by himself, and modelled on his own melodies. She came hither a coarse and aukward singer with improvable talents, and he at last polished her into reputation and favour ... Strada's personal charms did not assist her much in conciliating parties, or disposing the eye to augment the pleasures of the ear; for she had so little of a Venus in her appearance, that she was usually called the *Pig*. However, by degrees she subdued all their prejudices, and sung herself into favour.

These prejudices are attested by Rolli and Mrs Pendarves ('her person *very bad* and she makes *frightful mouths*'), though she was clearly no negligible artist. Rolli called her 'a copy of Faustina with a better voice and better intonation, but without her charm and brio', and quoted Handel as saying that

> she sings better than the two who have left us, because one of them [Faustina] never pleased him at all and he would like to forget the other [Cuzzoni]. The truth is that she has a penetrating thread of a soprano voice which delights the ear, but oh how far removed from Cuzzona!

She was famous for her shake, and seems to have combined something of Faustina's dramatic flair with the seductive warbling for which Cuzzoni was renowned. Her parts point to a wide range in emotional and expressive power as well as in compass (*c′* to *c‴*, later (1737) *d′* to *b♭″*).

WINTON DEAN

Stradella, Alessandro (*b* Nepi, nr Viterbo, 3 April 1639; *d* Genoa, 25 Feb 1682). Italian composer. He was a leading composer in Italy in his day, and one of the most versatile.

1. LIFE. Stradella came from a noble family originally of Fivizzano in Tuscany; when his great-uncle Alessio became Bishop of Sutri and Nepi, the family moved south. Alessandro's father Marc'Antonio was a member of the Cavalieri di S Stefano, a prestigious military order founded in Pisa by the Medici. During the War of Castro he became vice-Marquis of Vignola, and it is possible that in 1642–4 Alessandro lived there with his family. From 1653 to 1660, after the death of Marc'Antonio, Alessandro lived with his mother and brother Stefano in the Lante palace in Rome, where he served as page. The first notice of Stradella as a composer is from 11 March 1667 when a Latin oratorio by him was performed for the Arciconfraternita del SS Crocifisso. He soon began to receive commissions from the Venetian Polo Michiel, and by the beginning of 1668 had composed the prologue 'O di Cocito oscure deità' (text by G.F. Apolloni) for Jacopo Melani's comic opera *Il Girello*, one of the most frequently performed operas of the century. The next collaboration between Stradella and Apolloni was the serenata *Se desio curioso* (*La Circe*), presented on 16 May 1668 at Olimpia Aldobrandini Pamphili's palace in Frascati to celebrate Leopoldo de' Medici's investiture as cardinal. Stradella's family connections gained him access to noble patrons but, although he received commissions from Rome and Venice, payment was not prompt, and he found himself in financial difficulty. On 27 November 1670 he asked his patron Cardinal Flavio Chigi for a large loan. The outcome is not known, but Stradella began to collaborate with the new Teatro Tordinona, composing prologues, intermezzos and substitute arias for the 1671–2 seasons.

During his Roman years Stradella continued to compose oratorios, now in Italian, such as *S Editta, vergine e monaca* and *Ester, liberatrice del popolo ebreo*, both to librettos by Lelio Orsini. In Autumn 1671 he wrote the cantata *L'avviso al Tebro giunto* to celebrate the marriage of Anna Teresa Pamphili Aldobrandini and Prince Giovanni Andrea Doria of Genoa. August 1674 saw the performance of the serenata *Vola, vola in altri petti*, commissioned by Prince Gaspare Altieri to be performed before Christina of Sweden; it is the earliest datable composition known to employ concerto grosso instrumentation. On 28 January 1675 Stradella's motet *Pugna, certamen* was heard in the church of SS Domenico e Sisto for the investiture of Angelica Lante as a nun; it too was scored for a concerto grosso ensemble. Another work with the same instrumentation was heard on 31 March: the oratorio *San Giovanni Battista*, commissioned by the Venerabile Compagnia della Pietà. Also in 1675 Stradella's abilities were recognized by Pope Clemente X, who made him an honorary 'servant'. It was about this time that Queen Christina wrote a detailed scenario which Baldini elaborated into verse and Stradella set to music as the serenata *Il Damone*; it also employed concerto grosso instrumentation.

Although not precisely datable, several cantatas are shown by their texts to have been written during Stradella's years in Rome. The cantata *Ecco Amore ch'altero risplende* celebrated the wedding of Anna Altieri to Egidio Colonna on 14 June 1676. The first mention of Stradella's instrumental music was made shortly after, in a letter of July 1676, when a sonata (perhaps for concerto grosso) was commissioned by Polo Michiel. In the autumn Stradella corresponded with the Venetian on the question of whether it was advisable for him to leave Rome. Together with the castrato Giovanni Battista Vulpio, he had contrived to get 10,000 scudi from an 'ugly and old' woman to arrange her marriage to a relative of Cardinal Cibo, the papal secretary of state. The culprits were

Opening of Stradella's cantata 'Ah! troppo è ver' (I-MOe Mus.F.1145)

threatened with imprisonment, and Stradella left for Venice at the beginning of February 1677. There both Polo Michiel and his brother Girolamo requested his music. There was mention of Stradella composing an opera for the Teatro di SS Giovanni e Paolo to a text by Gianfrancesco Saliti, possibly for Carnival 1678, but nothing seems to have come of it. We do know, however, that Alvise Contarini asked him to teach his mistress Agnese Van Uffele, and that she and Stradella left Venice together in June 1677 and went to Turin, from where Stradella was brash enough to ask Polo Michiel for letters of recommendation. When, less than a month later, Contarini arrived in Turin, Agnese entered the convent of S Maria Maddalena and Stradella that of S Domenico. Contarini departed, but instructed the archbishop that the girl should marry Stradella or take the veil. Succumbing to pressure, Stradella agreed to marry Agnese, and on 10 October 1677 he signed the marriage contract. While walking away from the convent, however, he was attacked from behind and left for dead. The two henchmen found asylum in the palace of the French ambassador. (Through all this, Stradella succeeded in promoting his music: the cantatas *Se del pianeta ardente* and *Sciogliete in dolci nodi* refer to the regent, Maria Giovanna of Nemours.)

There followed an international 'Stradella affair'. Maria Giovanna put Agnese's father in prison, objected to 'foreign' powers entering her territory and wrote to Louis XIV complaining about his ambassador's behaviour. It was affirmed by various court representatives that the henchmen had been hired by Contarini, and in the end France and Savoy used the affair to settle another diplomatic problem. By November Stradella had recovered and resolved his differences with Contarini, and at the beginning of 1678 he arrived, alone, in Genoa. Nothing more is heard of Agnese Van Uffele. In Genoa he was immediately put in charge of the orchestra at the Teatro del Falcone and asked to prepare some of the female singers. A group of nobles agreed to pay him 100 Spanish doubloons a year and to provide him with a house, food, and a servant; in return, he had only to stay in Genoa. In quick succession he composed *La forza dell'amor paterno* (performed 15 times during the 1678–9 season), *Le gare dell'amor eroico* and the comic opera *Il Trespolo tutore*. At the same time he was teaching and composing other music, both sacred and secular. In 1680 he wrote the *cantata morale Alle selve, agli studi, all'armi*, to words by Benedetto Pamphili, and the sacred cantata *Esule dalle sfere* and some works were published in miscellaneous collections in England (1679) and Italy (1680). In 1681 Duke Francesco II d'Este in Modena requested an oratorio of him: *La Susanna* (to a libretto by the duke's secretary, Giovanni Battista Giardini) was heard in the oratory of S Carlo in April. Another commission, this time for an opera, arrived from Duke Flavio Orsini in Rome, who asked Stradella to set his own libretto, *Moro per amore*. On 24 May the composer sent him the finished score, saying that he was composing a 'cloak-and-dagger operetta' for six characters to be done at a summer villa. He was also finishing a serenata to celebrate the wedding of Carlo Spinola and Paola Brignole: *Il barcheggio*, 'a mixture of harmonious voices, poetry and instrumental music', was performed in the bay of Genoa on 19 June.

Stradella's life ended tragically at the age of 42 when an unknown assassin stabbed him to death for reasons which are still unclear. In a city of public puritanism and private crime, free access to the nobility, especially women, had already been complained of in anonymous letters, and it was said that the murder had been organized by a certain Giovanni Battista Lomellino, who became jealous when he realized that an actress who had been made pregnant and abandoned (supposedly by Abate Granvella), and whom he had aided, preferred Stradella to him. Whatever the reason, Stradella's burial in S Maria delle Vigne, one of Genoa's most aristocratic churches, and the careful attention paid to his mutilated body and to his soul (involving payment for 24 masses) are signs of respect accorded a gentleman. It should be noted that none of Stradella's personal scandals had ever affected the demand for his music.

Stradella left no will, and his belongings were divided between his relatives. As early as 19 August 1682 his half-brother Francesco offered music to Francesco II d'Este; it is likely that the Stradella manuscripts catalogued Mus.F in the Biblioteca Estense, Modena (see illustration), came both from the composer himself (who, after *La Susanna*,

continued to send music to the duke) and through his half-brother's offer. In 1688 a Genoese nobleman, Giuseppe Maria Garibaldi, offered copies of Stradella's music in exchange for copies of music already in the duke's library; the manuscripts catalogued Mus.G in the Biblioteca Estense presumably came about in this manner. The dukes of Modena were probably responsible also for the Stradella pieces in the Österreichische Nationalbibliothek, Vienna, since Francesco V d'Este took to Vienna what he considered his family's private collections. Stradella manuscripts owned by the Venetian bibliophile Jacopo Soranzo (1686–1761) eventually found their way to the Bodleian Library in Oxford and the Biblioteca Nazionale in Turin. The important Stradella autographs and other manuscripts in the Biblioteca Marciana, Venice, were probably left in the city by the composer or sent by him to Polo and Girolamo Michiel. Both Handel and Burney acquired Stradella manuscripts which are now in the British Library, London, and Christ Church, Oxford; other music acquired by Viscount Fitzwilliam is now in Cambridge. Many works in the Bibliothèque Nationale, Paris, were taken there from Italy by Napoleon as spoils of war. In short, although Stradella's music is now to be found in 55 European and American libraries, the most important collections were formed in the 17th and 18th centuries.

These same centuries witnessed the continued performance of Stradella's music, especially in Italy and England, but also the rise of the 'Stradella legend'. The *Histoire de la musique et de ses effets* of Pierre Bourdelot and his nephew Pierre Bonnet-Bourdelot, published posthumously in 1715, included a seven-page biography of Stradella, the falsities of which were frequently repeated (by Burney and Hawkins among others) and further elaborated; it became the source for opera librettos set by Niedermeyer (1837), Flotow (1844), Franz Doppler, Adolph Schimon (1846), Giuseppe Sinico (1863) and Virgilio Marchi (1866), as well as for novels, songs, poems and plays. Remo Giazotto's two volume *Vita di Alessandro Stradella* (Milan, 1962), although purporting to be based on actual documents, is yet another blatant fabrication of events. Even the aira 'Pietà, Signore' (also known as *Aria di chiesa* and *Agnus Dei*) is not by Stradella, although it bears his name on hundreds of copies and arrangements; it was possibly composed as a spoof by F.-J. Fétis, although it has also been attributed to Louis Niedermeyer..

2. WORKS. The prominent stylistic characteristics of Stradella's music are its contrapuntal texture, continually varied rhythms and occasional striking chord progression in a tonal context. His extant compositions, numbering 309 in all, include works in all major categories, both instrumental and vocal. His surviving instrumental music comprises 27 works. With the exception of a set of 25 variations over a bass all are *sonate da chiesa* in three to six sections. The largest of the sectional works is 333 bars in length. The commonest key is D; 17 of the 26 string pieces have all movements in the same key. About a fifth of the movements are in binary form, though the style is based more on motivic play than on the grouping of phrases. Imitation is a dominant technique; coupled with a strong rhythmic drive it gives insistence and unity to the music. None of Stradella's movements bears a dance title, but several have the characteristic rhythms of typical Baroque dances. The music is clearly tonal; in many works the main keys are tonic, dominant and subdominant. Major and minor 5-3 chords are the most frequent, and secondary dominants are plentiful.

Stradella's string writing makes idiomatic use of scales, arpeggios and characteristic figuration but does not exploit the technical possibilities of the instruments. Two of the instrumental compositions reflect his experience with sacred vocal music. One four-part sonata is written for two 'cori' (the first consisting of two violins and continuo, the second of two cornetts and continuo) which are handled as independent groups in the manner of vocal *cori spezzati*; the two timbres are never mixed. The four-movement *Sonata a otto viole con una tromba*, in which two groups of four strings alternate, shows a similar treatment, but with the addition of an obbligato trumpet part.

Stradella's greatest contribution to the development of instrumental music is his use of concerto grosso instrumentation, employed first as an accompaniment to vocal music, then in opening sinfonias to vocal works and finally for an independent instrumental composition. The cantata *Vola, vola in altri petti* is the earliest datable composition with such instrumentation. In the *Sonata di viole* a concertino of two violins and lute alternates with a 'concerto gross di viole'. Although the concertino parts are not markedly more difficult than those of the concerto grosso, a distinction in volume is maintained, since the groups rarely join together (they do so only in the third movement). There is some imitation within each group. This earliest known concerto grosso would seem to have been the model for Corelli's op.6, the first published concerti grossi – a plausible supposition, since the two composers were apparently acquainted.

Notwithstanding these noteworthy contributions to instrumental music, most of Stradella's works are vocal. Following the dictates of 17th-century poetic-musical structure, he set *versi sciolti* as recitative and more structured poetry as aria. Since in this period poets attempted no overall design in alternating the two types of verse, Stradella's vocal music shows no preference in the number of sections. Notes of quaver and semiquaver value are employed in free fashion in the recitatives to simulate the rhythms of speech. Formal melody is not attempted there, but the lines have clear contours and proceed largely in conjunct movement. The full cadence is used only at major points of verbal punctuation; otherwise the flow is maintained by a denial of cadence. Occasionally the bass is static for long phrases, encouraging the creation of a dramatic mood. Cadences with the last syllable placed on the penultimate note, widely used in the earlier 17th century, are still common in Stradella's music. He used arioso to heighten the emotional content of recitative without disturbing the flow of the drama, to relieve the monotony of an extended recitative and to organize recitative by its repetition as a refrain. In some works, such as *Il Corispero*, the arioso also serves as a formal bridge between recitative and aria, appearing consistently at the end of recitative sections which precede arias.

Stradella used several aria forms without any marked preference, usually following the structure of the text as far as sections or strophes are concerned. Common types include the popular *ABB′* and *AB* forms, as well as the *ABA* aria with or without clear sectional contrasts of key and metre; dimensions vary considerably. A number of

arias are built on ostinatos, which usually migrate to other pitch levels in the course of a piece and may be varied as well. A feature related to the ostinato principle is Stradella's employment of a single rhythmic motif throughout a section, imparting insistence and drive to the music. In all his vocal music the preferred texture is a contrapuntal one: instruments and voices generally proceed in imitation, creating a full concertato texture. Where an orchestra is used it may play only ritornellos, alternate phrases with the voice or serve as a continuous accompaniment. The vocal music is clearly tonal in its chord progressions, modulation and preference for opening motifs that outline the tonic chord.

Stradella's largest contribution was to the cantata, of which 174 examples are extant. Reflecting the period's passion for *recitar cantando*, the cantata was a poetic genre alternating *versi sciolti* (for recitative) and closed poetic forms (for arias). It was not a drama, although it could have dramatic elements; it dealt usually in description, explanation and discussion. Stradella's cantatas were either secular (usually amorous and either serious, comic or historical), sacred (e.g. *Si apra al riso ogni labro*, for Christmas) or moral (didactic in intent, such as *Spuntava il dì*). As was usual in the period, most of the secular cantatas are for solo voice and continuo: of the 123 such works, 107 are for soprano, seven for bass, five for alto, two for tenor and one each for mezzo-soprano and baritone; ten other secular cantatas are for two or three voices with continuo, and a further 22 use larger instrumental forces. Such works are often called serenatas and were usually composed for specific occasions. The forces range from one or two voices with two violins and continuo to several voices with concerto grosso accompaniment (e.g. *Lo schiavo liberato* (*Non ti riveggio ancora*) for four voices and *Il Damone* (*Hor che il mondo ristaura*) for seven). The sacred and moral cantatas exhibit the same variety of scoring.

Stradella's settings follow the text closely in both structure and meaning. They are predominantly syllabic, with mostly stepwise movement or small leaps, and in ever-changing rhythmic patterns that follow the stresses of the text. When Stradella altered this approach, it was perhaps because he felt that another style would interpret the text better, or because he had a particular singer in mind (such as Andrea Adami, for whom he wrote particularly florid cantatas). Even so, he ensured that the words would be understood by beginning with a syllabic setting and reserving more complex treatment for repetitions of the text. Another aspect of the cantatas is that their basses usually call for virtuoso instrumentalists. The bass line might be organized as an ostinato (normally a rather free one), but Stradella's intent was always to create as contrapuntal a texture as the forces would allow.

The texts of Stradella's oratorios show considerable variety. *S Editta*, with its arguments between the abstract characters Nobility, Beauty, Humility, Greatness and the Senses (each of whom tries to claim the saint as his own), recalls Cavalieri's moral opera *La rappresentatione di Anima et di Corpo*. Also in the realm of allegory is *S Pelagia* with characters such as Religion and the World. *La Susanna*, on the other hand, has a *testo* who relates an Old Testament tale with the aid of a chorus of commentators in addition to the principal characters, very much in the manner of Carissimi's oratorios. *S Giovanni Crisostomo* and *Ester* are of the same type. The latter even uses two voices as *testo* (bass in the first part, soprano in the second), a treatment typical of Carissimi. Although *Ester* and *Susanna* both present historical figures in a most human manner, the oratorio which best achieves this is *S Giovanni Battista*, which has no allegorical figures and no *testo* and is a drama of real passions straightforwardly presented.

The oratorios are musically diverse as well. Accompaniments range from continuo alone (*S Giovanni Crisostomo*), through two violins and continuo (*Susanna* and probably *S Editta* and *Ester*, which lack the indicated orchestral parts) and two violins, viola and continuo (*S Pelagia*) to a concertino of two violins and continuo with a concerto grosso of violin, two violas and continuo (*S Giovanni Battista*). The polyphonic ensembles of *S Editta* reveal Stradella's training in *stile antico* counterpoint. *S Pelagia* resembles a cantata in its able lyrical writing. *Susanna* exhibits an interest in rhythm, instrumental motifs and the free use of ostinatos characteristic of Stradella's mature years. A concerto grosso ensemble is used in *S Giovanni Battista* with variety and skill: six of the 14 arias are accompanied by continuo only and seven by the orchestra. Of the latter, one aria is accompanied by the concertino alone, two by the concerto grosso alone; one has a first section with concerto grosso and a second section with concertino; one is accompanied by the combined groups; and in two other arias Stradella regrouped the instruments to create two further ensembles. Ostinatos appear only in the arias with continuo accompaniment and are used in a free manner. The da capo form is rare. Recitatives make frequent use of arioso.

All Stradella's operas have serious main plots, with the exception of *Il Trespolo tutore*, an early *opera buffa* and one of the first to have a comic bass in the leading role. The rapid recitative is of the patter type, filled with repeated notes. Trespolo's arias are in a light, quick vein and make use of running quavers or square, folklike melodies. Occasional use of falsetto also heightens his *buffo* aspect. More serious scenes, such as those in which the eight arias with orchestral accompaniment appear, serve as a relief to the comedy; however, the melodic style is entirely devoid of coloratura.

Stradella's opera orchestra consists of two violin parts and continuo; it plays the sinfonias which introduce the acts, the ritornellos of continuo arias and accompaniments to some of the other arias. The later operas (*La forza dell'amor paterno, Moro per amore*) use the orchestra for more continuous accompaniment of the voice, as well as for exchanges with the voice, but arias with only continuo accompaniment are also plentiful. Although *Le gare dell'amor eroico* was performed in 1679, its emphasis on the ensemble, its related interest in *stile antico* writing and its lack of organization of musical means towards a dramatic end suggest that it is an earlier work. *Il Corispero* reveals Stradella's awakening interest in rhythm through a melodic style which is more motivic and instrumental. Occasionally a rhythmic figure is used so frequently in all parts that it becomes the single characteristic motif of the aria.

La forza dell'amor paterno contains a strong element of vocal virtuosity. Coloratura passages abound in all but the comic roles; the voice is consistently exploited in concertato fashion, either sustained over several bars of instrumental activity or in rapid exchanges of short phrases with the instruments. The same contrapuntal

texture predominates in *Moro per amore*. In both these works, Stradella's most mature operas, da capo arias are in the majority, but arias in all forms are numerous and often extended. Also extant are 11 prologues and nine intermezzos for other composers' operas, all comic.

Four of Stradella's sacred vocal compositions are liturgical, 14 are non-liturgical motets. Some exemplify traditional polyphonic techniques (e.g. *Ave regina coelorum*); some alternate solo sections with others in more parts (*Sinite lacrimari*); and most are in what might be called 'cantata style', alternating sections of recitative and closed musical forms.

36 arias, 13 duets, a trio and eight madrigals, with or without continuo, complete Stradella's extant vocal music; part of a treatise also exists.

WORKS

STAGE

O di Cocito oscure deità (prol., G.F. Apolloni), Rome, Palazzo Colonna, 4 Feb 1668, perf. as prol. to J. Melani: Il Girello, *GB-Lbl, I-MOe, Nc, Rvat, Tn**

Che nuove? Oh, ragionevoli (prol.), probably Rome, May–June 1668, *MOe, Tn**

Con meste luci (prol., F.M. Sereni), probably Rome, May–June 1668, *MOe, Tn**

Reggetemi, non posso più (prol., F. Orsini), ?Rome, 4 Dec 1668, *MOe, Tn**

CAROLYN GIANTURCO

Stradivari. Italian family of violin makers.

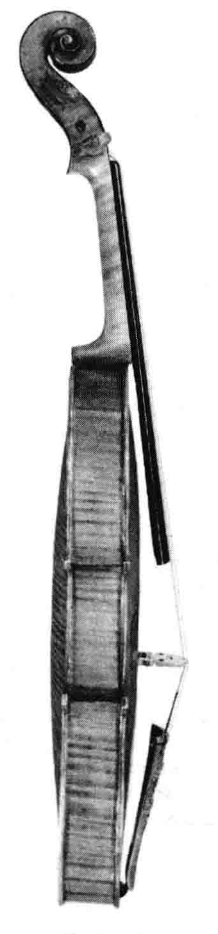
(1) **Antonio Stradivari** (*b* ? Cremona, 1644–9; *d* Cremona, 18 Dec 1737). Maker of violins and other instruments. Since the end of the 18th century he has been universally regarded as the greatest of all violin makers. In point of tonal excellence, design, beauty to the eye and accuracy of workmanship his instruments have never been surpassed. Stradivari inherited more than 100 years of Cremonese violin-making tradition, and upon this firmest of foundations he built his own unique career. At the peak of a working life spanning almost 70 years he brought his art to a perfection which has not been equalled. Later, at least two of his sons worked with him, but both died within a few years of their father, and thus almost the entire production of the family workshop is attributed to Antonio. In all, some 650 of his instruments survive, many of them used by the world's leading string players.

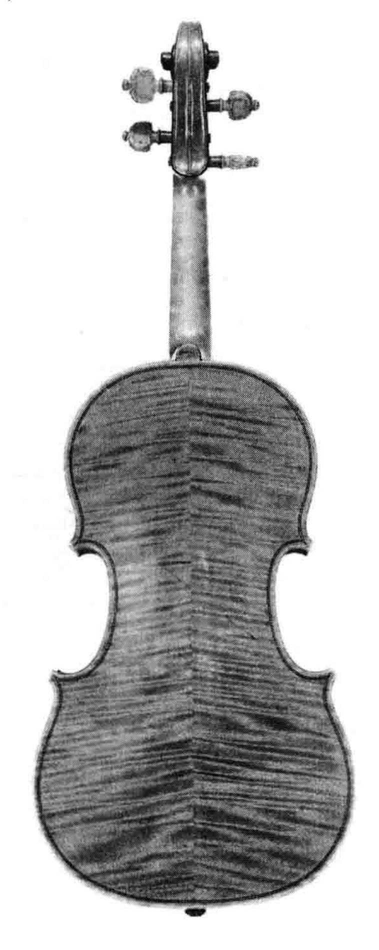
Although the surname Stradivari was common to the area around Cremona during the 16th century, nothing concrete is known of Antonio's origins or his family background, except that his father was named Alessandro. Of his education and professional formation, various hypotheses have been advanced: it is possible that he was first apprenticed to a wood carver before turning to instrument building, or he may have been a pupil of Nicolò Amati. The nature of Stradivari's rapport with Amati is unclear, although on his first known violin label (dated 1666) Stradivari claimed to be Amati's pupil. The violin that bears this label shows a hand already adept in the use of woodcarving tools, though inexperienced in certain of the finer points of violin construction. In July 1667 Stradivari married Francesca Feraboschi, a young widow who bore him six children, including (2) Francesco and (3) Omobono.

The rarity of surviving violins by Antonio from 1666 to 1680 is surprising, unless only a part of his time was devoted to their manufacture. Possibly he was working for other makers, such as Amati or Rugeri. Of violins from this early period there are fewer than 20, and one viola; all are thoroughly Cremonese in character, and beautifully made, though perhaps not stamped with the mark of genius: these are the instruments to which the term 'Amatisé' is correctly applied, to indicate their close stylistic adherence to the work of Amati. Two works deserve special mention for their originality, each a landmark of its kind. One is the contralto (i.e. smaller-sized) viola of 1672, of original design and a fairly rare

1. Violin by Antonio Stradivari, Cremona, 1688 (private collection)

size for the period, its body measuring just over 41 cm (now in the collection of Rolf Habisreutinger, St Gallen, Switzerland). The other is the first of ten known 'inlaid' instruments, the 'Lever du soleil' violin of 1677 (sold in 1971–2 to a private collector). In this the traditional purfling is replaced by a strip of dark paste, flanked by purfling at each side, into which are set alternate ivory or bone diamonds and circles. The sides and scroll are also ornamented, with painted or inlaid designs. Such embellishment was not entirely new to violins, and was perfectly normal for fine guitars; Stradivari, however, carried it out with a delicacy and charm unequalled by others (*see* VIOLIN, fig.12).





In 1680 Stradivari moved with his family to the Piazza S Domenico, where he lived and worked for the rest of his life. With the move came a change of emphasis in Stradivari's work, and from 1680 he made many more violins and quite a number of cellos. With the death of Amati in 1684, Stradivari was recognizably superior to all his competitors, and his fame began to spread beyond Cremona. From 1680 to 1690 his work moved away from Amati's and his instruments became more robust in certain features, particularly the corners. The varnish, however, is still often the soft, honey-coloured Amati covering, with an occasional warm orange tint. Tonally these violins are more powerful than those of the Amati family.

After 1690 there was a surge of individuality, the beginning of a new era of violin making. The heavy corners of the previous decade were now matched by wider purfling, bolder soundholes, stronger arching in the tables, varnish of deeper colour which often crumbled readily away from the wood, forming spontaneously the splendid patterns of wear which so excite the eye. Stradivari was also active with a change in design, the introduction of the 'Long Strad', whose outlines preoccupied him all through the 1690s. With this increased length he doubtless sought to introduce some of the tonal qualities of the old Brescian makers, whose violins offered a darker sound than those of the Cremonese, combined with extra strength of response. These elegant violins, representing a huge improvement on everything that had gone before, are not always as well appreciated for their tone as perhaps they should be.

In 1698 Stradivari's first wife died, and in the following year he married Antonia Zambelli Costa, who bore him five more children, including Paolo (*b* 26 Jan 1708; *d* 14 Oct 1775). By this time Francesco was fully occupied in the workshop; Omobono was often attending to business affairs unconnected to violin making. It is rare at any period but the very last to find an instrument made by either brother without their father's participation. Both sons were completely dominated by Antonio: they most likely carried out the rough work and were only occasionally allowed to complete a cheaper order, using an inferior grade of maple or beechwood. Many of these types of instrument were given a 'sotto la disciplina' label, indicating that they were made under the auspices of Antonio but not by him.

The period from about 1700 to 1720 (the 'golden' period to most writers) shows the ultimate development of Stradivari's powers, with the highest pinnacle being reached in about 1715. The gradual adoption of a broader, squarer-looking centre bout saw out the last noticeable sign of Amati's influence, and the varnish took on the ultimate, now well-known orange brown colour. These developments were complemented by magnificently flamed maple backs, in one and two pieces, so that the appearance of the whole leaves nothing to be desired. So it is too with the tone, for in these instruments there is incredible richness and ease of response, with an ample reserve of power. Outstanding examples are far too numerous to list comprehensively, though no account of Stradivari could fail to note the 'Betts' (1704), the 'Alard' (1715) and the 'Messiah' (1716), and that most of the world's finest artists have preferred these violins for two centuries. The 'Betts', one of Stradivari's greatest achievements, was bought by John Betts for only £1; in excellent condition, it is now in the Library of Congress, Washington DC. The 'Alard' is regarded by Hill and others as marginally the finest Stradivari in existence. The 'Messiah' remained in Antonio's family for a long time after his death, and was passed in perfect condition to the collector-dealer LUIGI TARISIO by Count IGNAZIO ALESSANDRO COZIO DI SALABUE, who had bought it and several other of Antonio's violins in 1775–6 from Paolo, Antonio's last surviving son. The 'Messiah''s next purchaser, JEAN BAPTISTE VUILLAUME, unfortunately modernized the violin, replacing the original bass-bar and fingerboard and lengthening the neck. It is still the most perfectly preserved Stradivari, looking almost new (although some scholars continue to question its authenticity; see Pollens, 1999). It is now in the Ashmolean Museum in Oxford (fig.2).

At the turn of the century Stradivari began to direct his inventive mind towards the problems of the cellist. Previously his cellos had been exclusively large: all but one out of 35 or so have now had their dimensions reduced. Maggini had made some smaller cellos, and the last quarter of the 17th century saw Cremonese and other

2. Violin (the 'Messiah') by Antonio Stradivari, Cremona, 1716 (Ashmolean Museum, Oxford)

Italian makers doing likewise, facilitating the emergence of a new breed of virtuoso cellist. Stradivari's first concessions to this trend came in 1699–1700, but between about 1707 and 1710 he designed and made a smaller model of cello, known as the 'forma B', which has served as a model for almost every maker since the beginning of the 19th century. His achievement with this numerically small series of instruments (only about 20 survive) is no less than that with the violins. They have an extraordinary quality of sound that carries through a hall even when played *pianissimo*, and have an immediate response and swelling power. The sound projects forward from the instrument in such a way that the player is at first not aware how much volume he can produce. In the last ten years of his life Stradivari narrowed his outline to produce a cello with similar proportions to those of the 'Long Strad' violins. Another model retained the width but shortened the length. Though excellent instruments, these last creations are not really as satisfactory as the 'Duport' (owned by Rostropovich) and its sisters.

Stradivari's achievement with violas is rather less significant, since fewer than a dozen complete examples are now known. It is curious that he should have made so few, for no-one doubts the greatness of those that are still heard. Most of these are alto violas built on the model Stradivari created about 1690 for the Medici court, slightly over 40 cm in length. Only one tenor viola survives, the stunning specimen now in Florence, also made in 1690 for the Medici: its body length is 47.6 cm.

Stradivari also made a large variety of other stringed instruments, principally plucked ones, however only one harp, a mandolin and a few guitars survive (for illustration, *see* GUITAR, fig.9). Stradivari's original designs for viols, lutes, mandolins, guitars and other instruments are now in the Museo Stradivariano in Cremona, together with patterns and moulds for instruments of the violin family and many of his tools. All of the workshop materials were bought *en bloc*, along with the violins mentioned above, by Cozio di Salabue. Later, the majority of these relics passed to the Marquis Della Valle who sold them in 1920 to the violin maker Giuseppe Fiorini, who in turn donated them to the city of Cremona. Six of the wooden moulds which had been part of Cozio's collection are today in the Musée de la Musique, Paris.

After 1720 Stradivari seems to have been less easily able to obtain the most handsome maple. Wood of local origin predominates from this date to 1730. There can have been no slowing down in production, and players are at least as well served by these later violins. There are few signs of Stradivari's old age until after 1730, though almost to the end his craftsmanship was superb. In the last year of his long life he was still supervising the activity of the workshop. After his death, control of the business passed to his son Francesco.

Stradivari's work was copied from the first, but not until the end of the 18th century did it begin to achieve the extraordinary ascendancy that it enjoys today over that of Amati and Stainer. To follow his pattern was one thing, but in the 19th century the art of imitation was developed, particularly in France and England, and many forgeries were constructed, sometimes of a very high quality. Today hundreds of thousands of inferior factory-made instruments bear copies of Stradivari's label. Most of them were made at the end of the 19th century for sale through music shops, with no apparent intent to deceive. These turn up in attics all over the world, providing for their owners a brief period of ecstatic anticipation, but their similarity to the real thing is minimal to a trained eye.

Much has been written of Stradivari's varnish and the loss of its recipe. The influence of varnish on the quality and carrying power of violin tone is considerable. A varnish which, when completely dry, has a hard consistency generally causes an instrument to produce a hard, glassy sound with a limited range of tone-colour. A thick, heavy, oily coating inhibits the wood's vibrations in a different way and is equally unsatisfactory. Somewhere between the two is a varnish that dries to the point of forming a light, delicate, elastic skin but no further. This is the characteristic of most old Italian varnish, and that used by Stradivari and certain of his contemporaries seems to represent the ideal.

The varnish, which has defied so many attempts at analysis and rediscovery, is only a part of the 'secret' of Stradivari. He succeeded in all branches of the violin maker's art, given the best initial training, as fine a hand and eye as it is possible to have, a comprehending and inventive mind, and a long working life in a superior artistic environment. His understanding of design and structure was probably unique, at least until the emergence of Guarneri 'del Gesù', and the remarkable appearance and effect of his best varnish is but one more triumph of his genius.

(2) **Francesco Stradivari** (*b* Cremona, 1 Feb 1671; *d* Cremona, 11 May 1743). Violin maker, eldest son of (1) Antonio Stradivari. Although only a handful of his instruments still bear their original labels, he was nevertheless a highly important maker, though perhaps less spontaneous and confident than his father. He was his father's right-hand man for over 50 years, during which time he assisted in the building and occasionally the design of a wide variety of bowed and plucked instruments. He was perhaps responsible for the modification of the 'forma B' cello, about 1730, and was the author of the drawing used for a further modification of the same model, called the 'forma B piccola'. Antonio's models for mandolins were also slightly modified by Francesco. His most distinguished violin is the 'Ex-Salabue' of 1742.

(3) **Omobono Stradivari** (*b* Cremona, 14 Nov 1679; *d* Cremona, 9 June 1742). Violin maker, son of (1) Antonio Stradivari. While still a young man he travelled to Naples, perhaps in pursuit of a career outside violin making. He made violins intermittently after 1700, and a great deal of his time was taken up with social acitivities unrelated to the family workshop. The most well travelled of the Stradivari family, as a young man he spent a long period in Naples. Later in life he was on familiar terms with Tomaso Vitali, the leading violinist at Modena. Nevertheless, Omobono did build a recognizable number of violins which though not up to high artistic standards of his father and brother, are highly appreciated for their acoustic qualities.

CHARLES BEARE/CARLO CHIESA, DUANE ROSENGARD

Stradling, Rod (*b* London, 25 June 1942). English traditional-style singer, melodeon player and record producer. He became involved in skiffle music in the mid-1950s and in the early 1960s discovered 'folk music' when he attended the Singers Club run by Ewan MacColl and Peggy Seeger in London. In 1964 he and his wife, Danny Stradling, founded and ran the Fighting Cocks, a traditional folk club in Kingston, and in 1968 the King's Head traditional folk club in Islington. In 1973 he moved to the West Country.

Stradling was a member of the trail-blazing group Oak, whose seminal album *Welcome to Our Fair* is seen as having instigated the renewed interest in traditional English music and dance during the 1970s. He joined Bampton Morris Dancers, went on to form the Old Swan Band, which spearheaded the English country dance revival, and has subsequently been involved with bands as diverse as the English Country Blues Band, Tiger Moth, Edward II, Feckless and, currently, the English Country Dance Band.

In 1996 Stradling published the moribund *Musical Traditions* magazine on the Internet (and in CD-ROM format), where it continues to flourish and win awards under his editorship. He inaugurated the Musical Traditions label, which produces CDs of traditional musicians. He has been one of the prime movers behind the revival of traditional English music, a catalyst for the formation of key bands and has influenced the melodeon playing style.

CAROLE PEGG

Straesser, Joep (*b* Amsterdam, 11 March 1934). Dutch composer. He studied at the University of Amsterdam (musicology) and at the Amsterdam Conservatory (organ with Anthon van der Horst; composition with Ton de Leeuw). In 1962 he was appointed professor of music theory (and from 1975 composition) at the Utrecht Conservatory (retired 1989).

Straesser became interested in the music of the Second Viennese School and the post-war avant garde as a result of his studies with de Leeuw, and during the 1960s he used freely serial and aleatory techniques in his music. In pieces such as *22 Pages* (1965), based on Cage's book *Silence*, and *Ramasasiri* (1968), a multi-layered composition based on a travel song from the Papuan people of Papua New Guinea, Straesser combines experimental innovation with musical intuition, with the result that his music never sounds dry or academic.

With the 'Spring' Quartet (1971) Straesser abandons the idea of radical parametric composing, using and transforming a theme from Beethoven's String Quartet op.131. With his organ piece *Splendid Isolation* (1977) he admitted consonant harmonies for the first time and, having reconquered traditional elements without betraying his earlier interest in experimental composing, wrote the short opera *Über Erich M.* (1985–6) and three symphonies. His denial of tradition gradually became a dialogue with tradition, as is shown by the reference to Mahler in his Third Symphony (1992). At first sight his music may have changed considerably over the years, but permanent features include a technical facility and a density of structural and motivic coherence resembling the music of Webern and Beethoven.

MICHAEL H.S. VAN EEKEREN

Straeten, Edmond vander. *See* VANDER STRAETEN, EDMOND.

Straeten, Edmund S(ebastian) J(oseph) van der (*b* Düsseldorf, 29 April 1855; *d* London, 17 Sept 1934). German cellist, writer on music and composer. He studied the cello with Johannes Hoecke and Ludwig Ebert in Cologne, making his début in 1875. Later he was a pupil of Gustav Libotton at the Guildhall School of Music, London, and Louis Hegyesi in Cologne. He also studied composition with Humperdinck. In 1888 he returned to London and was appointed cello teacher at the North-East London Institute. Here with Prout he began a chamber music society which sponsored performances of little-known Classical and Baroque works, as well as modern compositions (for example, they gave the London première of d'Indy's Clarinet Trio). In 1900 he and Emile Sauret founded the Tonal Art Club, St John's Wood, which later became the London Musicians' Club. Van der Straeten was important for his participation in the revival of viol playing: he wrote numerous articles for *The Strad* about basic techniques, instruments and repertory and traced the viol's development in his *History of the Violoncello* (1915); he also formed a trio with his son Ludwig and his pupil Norman Greiffenhagen, which performed music by Marais, Simpson and Jenkins. He composed several chamber works and made arrangements for viola da gamba and piano of works by Abel, Hammer and Kühnel.

M. ELIZABETH C. BARTLET

Straight, Thomas. English engraver and publisher, partner with THOMAS SKILLERN in the firm of Straight & Skillern.

Stråkharpa. A term coined by Andersson (1923) for a bowed lyre without fingerboard commonly used for folk music-making until the beginning of the 20th century in Finland, particularly in east Karelia, and in the Swedish communities of Estonia. Since the early 1970s there has been a revival in making and playing the *stråkharpa* in all these regions.

The Finnish instrument (*jouhikannel*, *jouhikantele* or *jouhikko*) has a flat soundboard let in to the box-shaped base (sometimes with convex or concave sides), which has an extension on the same plane as the soundboard, with a long, narrow opening on the right for the player's left hand, or with openings on both sides of a narrow central arm. It has two or three strings of horsehair, gut or wire, which run from a string-holder over a straight bridge to the pegs, usually dorsal, in the upper end (for illustration, *see* FINLAND, fig.3).

Stråkharpa (bowed lyre) player, Sweden

The Swedish-Estonian 'broad-holed' bowed lyre (*tallharpa*, *hiiukannel*) has a flat, or sometimes slightly arched, soundboard in a box- or violin-shaped base. The base continues in two straight arms which form a yoke with dorsal pegs for three to five strings of horsehair, gut or wire. Of the two bowed lyres found in Sweden, one has the narrow opening, the other is the 'broadholed' type (see illustration).

The instrument is usually held diagonally, supported against the player's knee, with the thumb holding the right arm of the yoke and the fingers stopping the melody string or strings with the knuckles. The other strings are drones. The bow, curved or straight, is held like a pencil.

The origin of the *stråkharpa* is uncertain. The earliest evidence of bowed lyres in Scandinavia is a bowed-lyre player sculpted in stone in Trondheim Cathedral, Norway, dating from the early 14th century. Andersson sees a connection with the Welsh crwth, but without a fingerboard, and claims that the instrument spread east to Finland and Estonia from Sweden. That plucked lyres were in earlier use in Scandinavia is confirmed by two lyre bridges, found in Broa i Halle, Gotland (8th century), and Birka, Sweden (9th century; *see* ROTTE (ii), fig.2). The Arabic geographer Ibn Fadlan, in his account of a Viking funeral on the Volga in 921 CE, mentions a harp that was placed with the body of a chieftan to accompany him on his final journey. This could in fact have been a lyre. One might speculate that the use of a bow in playing string instruments, first mentioned in 10th-century Arabic writings, might have been encountered and brought back to Scandinavia by the Vikings.

See also ROTTE (ii).

BIRGIT KJELLSTRÖM/STYRBJÖRN BERGELT

Strakosch, Maurice (*b* Gross-Seelowitz [now Židlochovice], nr Brünn [now Brno], ? 15 Jan 1825; *d* Paris, 9 Oct 1887). American impresario of Czech origin. He went to New York in 1848, where he became associated with Salvatore Patti; that winter he began a two-year American tour with a small company including Patti's daughter Amalia, whom he subsequently married. He also managed and coached Amalia's eight-year-old sister, Adelina Patti, after her 1851 début, and from 1852 to 1854 he, Amalia, Adelina and Ole Bull toured the USA. Strakosch managed his own company from 1856 to 1857, merging with Bernard Ullman's troupe in February 1857. The Ullman and Strakosch Opera Company presented opera at the Academy of Music and toured the East Coast until 1860; its final season was a near-disaster, and was rescued only by Adelina Patti's operatic début.

Strakosch managed Adelina Patti from 1860 to 1868; in 1861 he and the Pattis moved to Europe, where he also recruited performers for his brother Max Strakosch (*b* Gross-Seelowitz, 27 Sept 1835; *d* New York, 17 March 1892). Max had assisted Maurice from 1857 to 1861, and had then managed Gottschalk until 1864. From 1865 until the mid-1870s Maurice managed singers and

intermittently presented opera, frequently as his brother's partner. The brothers presented Christine Nilsson from 1870 to 1874. From 1877 to 1880 Max directed the Max Strakosch English Opera Company, and Maurice toured the USA and Europe with Ole Bull. Thereafter Maurice worked primarily in Europe, often with his son Robert or his brother Ferdinand. Karl Strakosch (*b* c1859; *d* Hartford, CT, 23 Oct 1916), a nephew of Max and Maurice, was also an impresario.

WILLIAM BROOKS/R

Straková [née Švehlíková], **Theodora** (*b* Vienna, 21 Dec 1915). Czech music historian. She studied German and French at Brno University (1935–9) and at the same time attended Helfert's musicology lectures. After World War II she continued her studies in musicology with Jan Racek (1945–9) and in 1953 obtained the doctorate with a dissertation on an anonymous Moravian organ tablature. In 1942 she married the music historian and critic Vincenc Straka. She had begun working in the music collection (now the Music History Institute) of the Moravian Regional Museum in Brno in 1937; in 1948 she succeeded Racek as director. She enlarged the institute's scope and initiated the large-scale cataloguing of its music source materials and Janáček archives. In addition to her administrative work she lectured on music archival method at Brno University (1952–72). In 1968 she obtained the CSc degree with a dissertation on court music in Brtnice. Her published work deals mainly with 17th- and 18th-century Moravian court and church music and with Janáček.

JIŘÍ SEHNAL

Strambotto (It.: 'rustic song'). A stanzaic form of Italian poetry set by composers of the frottola and 16th-century madrigal, also known as *ottava rima* and *rispetto*. Each stanza consists of eight lines of 11 syllables. Three types of *strambotto* exist, distinguished by their rhyme scheme: the *strambotto toscano*, with a rhyme scheme of *abababcc*, was the more common form set to music in the 15th and 16th centuries; the *strambotto siciliano*, with a rhyme scheme of *abababab*, seems to have been the poetic form common to early 17th-century monodies known as *arie siciliane* (*see* SICILIANA); and the *strambotto romagnuolo*, with a rhyme scheme of *ababccdd*, the least commonly set kind of *strambotto*. *See* FROTTOLA, §2.

DON HARRÁN

Strand. Swedish family of organ builders. Pehr Strand (*b* 15 Jan 1758; *d* 19 Aug 1826) was based in Stockholm and obtained a charter to build small organs and toy actions in 1791. Four examples of his work still exist for Forsmark Church (1800), the old church, Sabbatsberg, Stockholm (1804; now in the Nordiska Museet, Stockholm), Tångeråsa (1806), and Närtuna (1818). Pehr Zacharias (*b* 25 Feb 1797; *d* 30 June 1844), son of Pehr, was trained by his father and in Germany, where he

obtained a good knowledge of the new Romantic style of organ building and also studied Silbermann's organs. He obtained his charter in 1824 and subsequently took over his father's workshop. He was soon acknowledged as the leading master of his time, and his pupils included E. Söderling and Johan Gustaf Ek. Over a period of 20 years he built some 70 organs, of which about 15 still exist. His most remarkable work was the 61-stop organ in Lund Cathedral (1830–36; four manuals and pedal) built in collaboration with P. Lund; it was the largest in Sweden at the time. One of the finest of his works is the organ in Trinity Church, Karlskrona (1827; 20 stops). Other examples include those at Östervåla (1825), Arnö (1828), Rasbokil (1829), Gryt, East Gotland (1835), Roslagsbro, Stockholm (1838), Kalvträsk (1839), Klockricke (1842) and Häggeby (1843). Pehr Strand's elder son Johan Samuel (*b* 3 June 1786; *d* 23 July 1860) was organist at Väster Vingåker. He built organs at Väster Skedvi (1847) and the chapel at Högsjö (1853) which are still in use. Erik A. Setterquist and Per L. Åkerman both began their training in his workshop.

BENGT KYHLBERG

Strang, Gerald (*b* Claresholm, AB, 13 Feb 1908; *d* Loma Linda, CA, 2 Nov 1983). American composer. He attended Stanford University (BA 1928) and the University of Southern California (PhD 1948). His principal teachers were Charles Koechlin, Toch and Schoenberg. He served as Schoenberg's teaching assistant at UCLA (1936–8), going on to teach at Long Beach City College (1938–58), San Fernando Valley State College (1958–65), California State University, Long Beach (1965–9) and again at UCLA (1969–74) where he was lecturer in electronic music. During the years 1935–41 he was managing editor of New Music, which published several of his works. He was active as an acoustician and design consultant, and wrote several articles on acoustics, design and computer music. Until 1960 Strang wrote mostly instrumental pieces; subsequently he turned exclusively to electronic and computer-generated music, much of which was realized at the Bell Telephone Laboratories in New Jersey. The adjective 'experimental' applies both to his early pieces, such as the palindrome *Mirrorrorrim* for piano (1931, Strang's first published piece), and to the later tape pieces. *Compusition no.7: Tripla decima*, based on an equal-tempered 10-tone scale, employs random series of pitches and rhythms; like most of the pieces titled 'Compusition', it was composed at UCLA on an IBM 7090–7094 computer.

WORKS

Orch: Suite, chbr orch, 1934–5, incl. Intermezzo, arr. str qt; Sym. no.1, 1938–42; Canzonet, str, 1942; Overland Trail (1943), ov., 1943; Sym. no.2, 1946–7; Conc. grosso, 1950; Vc Conc., vc, ww, pf, 1951

Chbr and solo inst: Eleven, pf, 1931; Mirrorrorrim, pf, 1931; 2 Pieces, pf, 1931–2; Cl Sonatina, 1932; Qnt, cl, str, 1933; Str Qt, 1934, last move arr. pf, 1934; Perc Music, 3 perc, 1935; Divertimento, any 4 ww/str, 1948; Sonata, vn, pf, 1949; arr. cl, 1953; Sonata, fl, pf, 1951; Variations, any 4 ww/str, 1956; at least 20 others incl. 8 pf pieces

El-ac: 10 Compusitions, cptr-synth tape, 1969–72; Synthions, synth tape, 1969–72; Synclavions, synth, 1983

Choral: 3 Whitman Excerpts, 1950; Every Night and every Morn (W. Blake), 1960; 4 others

MSS in *US-LBH*, *US-NH*

STEVEN E. GILBERT

Strange, (John) Allen (*b* Calexico, CA, 26 June 1943). American composer and performer. He studied composition with Michalsky at California State University, Fullerton (BA, MA 1967) and later with Erickson, Partch, Gaburo and Oliveros (composition and electronic media) at the University of California, San Diego (1967–8, 1970–71). He received two grants from the San Jose State University Foundation (1969 and 1974) for research into electronic music and in 1970 became professor of music and director of the electronic music studios at the university. In 1973 he attended Chowning's music seminar at Stanford University's Artificial Intelligence Center. Strange is one of the leading authorities on analogue electronic music; his *Electronic Music: Systems, Techniques, and Controls* (1972) is now a classic text. He also wrote *Programming and Meta-Programming the Electro-Organism* (1974), the operations manual for the Buchla Music Easel and has documented the 200 Series synthesizers made by Buchla. He co-founded two performance groups, Biome (1967–72), in order to make use of the EMS Synthi, and, with Buchla in 1974, the Electronic Weasel Ensemble. He was president of the International Computer Music Association (1993–8) and has appeared as a guest artist-lecturer throughout the world.

Strange composes for live electronic instrumental ensembles, for live and taped electronics with voices and acoustic instruments, and for the theatre; most of his works for acoustic instruments require extended performance techniques. He is particularly interested in linear tuning systems (as in *The Hairbreath Ring Screamers*, 1969, and *Second Book of Angels*, 1979), spatial distribution of sound (*Heart of Gold*, 1982, and *Velocity Studies*, 1983), the isolation of timbre as a musical parameter, and composing for groups of like instruments or voices. Elements of vaudeville, rock-and-roll, country-and-western music, and the guitar techniques of Les Paul are found in his works. His theatre pieces employ various media including film, slides, and lighting effects; he produced a series of such works in collaboration with the playwright and director Robert Jenkins, of which the most important are *Jack and the Beanstalk* (1979) and *The Ghost Hour* (1981), an audio drama. In the mid-1980s, Strange became interested in alternate tuning systems.

WORKS

STEPHEN RUPPENTHAL/DAVID PATTERSON

Strange, Le. *See* L'ESTRANGE family.

Stranglers, the. English rock group. Formed in Guildford in 1974, the band's most consistent line-up was Jet Black (Brian Duffy; *b* Ilford, Essex, 26 Aug 1938; drums), Hugh Cornwell (*b* London, 28 Aug 1949; vocals and electric guitar), Jean Jacques Burnel (*b* London, 21 Feb 1952; bass guitar and vocals) and Dave Greenfield (*b* Brighton, 29 March 1949; keyboards). Although forerunners of, and generally more conventionally melodic than, new wave bands such as the Sex Pistols and the Clash, they nevertheless rose to fame in 1977 in the publicity surrounding punk rock. In that year they outsold all the other punk and new wave artists put together, with two major hit albums, *Rattus Norvegicus* (U.A.) and *No more Heroes* (U.A.). Their sound was instantly recognizable: a toppy, growling bass, Greenfield's trademark arpeggiated Hammond organ, reminiscent of the Doors' Ray Manzarek, and Cornwell's melodic though quirky lead guitar. The band always courted controversy: their early work was dubbed violently misogynistical by a section of the music press, and in 1980 the entire band were arrested in Nice after allegedly causing a riot at one of their concerts.

In the late 1970s the band developed a more experimental pop style, first on *Black and White* (U.A., 1978) and *The Raven* (U.A., 1979), and then on their *folie de grandeur*, *The Gospel According to the Meninblack* (Liberty, 1981), a collection of songs about religion and the paranormal, set against an eccentric mixture of psychedelic loops and Kraftwerk-style electronic music. After the successful and whimsical paean to heroin in *Golden Brown* (1982), a haunting, harpsichord-led waltz, their music became more mainstream on albums such as *Feline* (Epic, 1983), *Aural Sculpture* (Epic, 1984) and *Dreamtime* (Epic, 1986). Cornwell left in 1990 and was replaced by the guitarist John Ellis and the singer Paul Roberts. More recent work, such as *About Time* (When, 1995), shows that they have retained their melodic distinction despite a lack of chart success, and they remain a powerful live act. For further information see D. Buckley: *No Mercy: the Authorized and Uncensored Biography of the Stranglers* (London, 1997).

DAVID BUCKLEY

Strangways, A.H. Fox. *See* FOX STRANGWAYS, A.H..

Stransky, Josef (*b* Humpolec, Bohemia, 9 Sept 1872; *d* New York, 6 March 1936). Czech conductor. He studied medicine in Prague and Leipzig, getting his degree in Prague in 1896, but simultaneously worked in music, his teachers including Jadassohn, Fibich, Fuchs, Bruckner and Dvořák. He conducted a student orchestra in Prague, and in 1898 had his first professional engagement at the Neues Deutsches Theater there. In 1903 he moved to the Hamburg Opera as principal conductor, and in 1910 became associated with the Blüthner Orchestra in Berlin.

The peak of Stransky's career was his appointment in 1911 as Mahler's successor at the New York PO (to the distress of Strauss, who thought Stransky would give German conducting a bad name abroad). In Germany he was thought a fiery Bohemian and in New York a somewhat staid German; on the whole, he pleased his New York audience with his uncontroversial but not altogether unspiced programmes. He resigned in 1923 but stayed in New York to conduct the newly formed State SO for a year. He conducted the première (7 December 1922) at the Philharmonic of Schoenberg's Bach chorale-prelude transcriptions, despite having received a sulphurous letter from Schoenberg.

Stransky gave up music in 1924 and became an art dealer. He composed songs (some introduced by Schumann-Heink), orchestral and other instrumental music, and an operetta, *Der General*. His editions include an adaptation of Berlioz's *Béatrice et Bénédict*, which he felt wanted reorchestrating for modern taste.

MICHAEL STEINBERG

Stranz, Ulrich (*b* Neumarkt St Veit, Bavaria, 10 May 1946). German composer. He studied theory and composition with Fritz Büchtger and the violin with Erich Keller at the Walterhausen Seminar in Munich and was a pupil of Heinz Endres (violin) and Günter Bialas (composition) at the Munich Musikhochschule (1968–72). He

also worked at the Institute for Sonology at Utrecht University and the Villa Massimo in Rome. In 1974 he settled in Zürich as a composer and an occasional orchestral musician and teacher.

As a reaction to having attended Stockhausen's course at Darmstadt he wrote the piano piece *Anabasis* (1970), which was followed by a short period of post-serial and electroacoustic experiments. Then, like other German composers of his generation, he began looking for a greater expressivity and a more openly melodic style, the particular impulses coming in his case from Ligeti, Bialas, Killmayer and Messiaen. In the provocatively titled *Déjà vu* for oboe d'amore and small orchestra (1973), he toyed with a lightly melancholic nostalgia and evocation of beauty; *Tachys*, played in 1974 in Stuttgart, brought him an international reputation. By now his style was marked by an elaborate tonality, adroit technique and formal processes arising from the interplay of, and tension between, individual parts and layers. After the rejection of his *Musik für Klavier und Orchester* no.1 at the Donaueschingen Festival in 1978 – apparently on account of its provocative distancing from the usual avant garde idiom, with its triads, waltz allusions and instrumental effects – his works were played less on new music stages than in conventional concert series. His later music is in a style received as reminiscent of Strauss and Berg. His later works are colourful: dreamily sensitive, self-forgetfully gentle, intimate, yet at times dramatic and playful, and often marked by an ironically broken pathos.

THOMAS GARTMANN

Strappato (It., from *strappare*: 'to tear off', 'to wrench'). A term, used by Vivaldi, which probably indicates that the notes in question are to be played sharply accented.

Strasbourg (Ger. Strassburg). City on the Rhine in Alsace. It was a free imperial city from the 13th century until 1681, when it was reunited with France. From 1871 to 1919 it was part of Prussia.

1. To 1600. 2. 17th century. 3. 18th century. 4. 19th century. 5. After 1900.

1. To 1600. By the early 6th century Alsace was Christian. Monks composed hymns in Latin and in the vernacular, and in the 8th century Heddo, Bishop of Strasbourg, introduced Gregorian chant. In 775 Charlemagne founded the choir school of Strasbourg Cathedral, which is rich in sculptures showing musical instruments. About the end of the 12th century mystery plays began to be performed at St Etienne and at the cathedral. Jacob Twinger von Königshoven, Kantor of the cathedral school, director of the choir of St Thomas and librarian of the chapter, wrote a German chronicle and a tonary (*c*1415; *CZ-Pu* Strasbourg C XI E9). The Flagellants (*Geissler*), who appeared in Alsace at that time, encouraged popular sacred song and influenced the works of Heinrich Laufenberg, who lived in Strasbourg until 1460.

Secular music was cultivated by jongleurs or minstrels and Minnesinger. The jongleurs were wandering musicians, scorned by the Church and beyond the faith and the law. The guilds eventually forbade them to perform in Strasbourg, and the bishops drove them from churches and processions, where their buffoonery had been a joy to the faithful. The Minnesinger, who formed themselves into a guild in the 13th century, gave more refined musical performances, close to Gregorian monody. They included Gotfrid von Strassburg (*c*1210), author of 20,000 verses of *Tristan et Yseut*, Hesso de Strasbourg (*c*1230) and Nicolas de Strasbourg (14th century).

Towards the end of the Middle Ages musical instruments were permitted in church, and a small organ was donated to the cathedral in 1260. The first large organ (1292) was burnt in 1298. Claus Karlen constructed a new one (1324–7) of 16 to 24 manual ranks and a 12-key pedal-board; it was destroyed by fire in 1384 and replaced the following year. St Thomas had an organ by 1333. In 1489 the Cathedral was endowed with a 'swallow's nest' organ by Friedrich Krebs.

In the 16th century Strasbourg was at the height of its fortunes, theological and cultural as well as political and economic. Musical life in the city was supported less by notable individuals than by broad participation at a popular level; printing played an essential role. In 1500 there were already more than 20 printing firms, most of which later served the cause of the Reformation, which was preached at the cathedral from about 1518. In 1524 Wolfgang Köpphel printed *Teutsch Kirchenampt mit Lobgesengen und göttlichen Psalmen*, the first Protestant collection of canticles, with the melody on a five-line staff. In 1539 Calvin, exiled from Geneva, organized the printing of *Aulcuns pseaumes et cantiques mys en chant*, including five psalms adapted by Calvin himself to fit melodies from the *Teutsch Kirchenampt*. Bernhard Jobin printed his own lute tablatures (1572) and those of Neusidler (1574), Sixt Kargel (1574) and the elder Bernhard Schmid (1577) and the *Thesaurus motettarum* by Jakob Paix (1589).

Secular music also benefited from printing, and enjoyed the protection of the bishops of Strasbourg: Sebastian Virdung dedicated his *Musica getutscht* (1511) to Bishop Guillaume de Honstein. A group of renowned humanist musicians gathered around Johann Rudolphinger, including Symphorianus Pollio, Thomas Sporer and Sixt Dietrich; all composed polyphonic songs, some of which appeared in 1536 in *Fünff und sechzig teütscher Lieder*.

In 1515 Othmar Luscinius, organist at St Thomas, had his *Musicae institutiones*, lectures on music given in Vienna, published in Strasbourg.

The melodies of early Protestant psalms were often borrowed from Gregorian chant. Polyphony and the use of the organ were thought to be largely responsible for the decadence of religion; the Strasbourg Reformation excluded them both from worship and allowed only the unison chorale. In 1563 a work (*Bellum musicale*) by the Metz organist Claudius Sebastiani appeared in Strasbourg; in it the author lamented the conflict between polyphony and plainchant in the church. Protestant Kantors who composed secular polyphonic songs and psalm melodies included Wolfgang Dachstein, organist at St Thomas and at the cathedral, and Matthias Greiter, who became a teacher at the Gymnasium and wrote a treatise on music education, *Elementale musicum juventuti accommodum* (1544).

The history of the organ in 16th-century Strasbourg reflects the religious upheavals of the period. In 1529, 1531 and 1541 the magistrate ruled that the cathedral organ (built in 1489 and probably neglected) could be used. After a long period of inactivity other organs in the city were repaired (that of St Thomas in 1560 and that of St Pierre-le-Jeune in 1591) and a new organ was donated to St Pierre-le-Vieux in 1590. An ordinance of 1598 governed church music strictly, defining the role of the organ. A new tolerance of polyphony is indicated by the publications of the elder and younger Bernhard Schmid: nevertheless, the basis of Protestant church music continued to be unison singing by the congregation. Towards the end of this troubled century the city considered granting official status to *maîtres chanteurs* and subsidizing them. The Counter-Reformation attempted to introduce hymn singing in the vernacular.

2. 17TH CENTURY. At the beginning of the 17th century music in Strasbourg was dominated by C.T. Walliser, *maître de chapelle* at St Nicolas in 1598 and *musicus ordinarius* of the Gymnasium in 1600. In 1605 he inaugurated a weekly *publicum exercitium musicum*, at which his own works were performed. For theatrical productions at the Gymnasium he composed songs in Latin and Greek. He combined polyphony and the chorale, using both the organ and instruments to accompany the congregation in the rich polyphony of his chorale arrangements, collected in his *Ecclesiodae* (1614–25). He also composed music for *Moïse*, a play presented on the occasion of the Gymnasium's transformation into the university (1621).

The Thirty Years War (1618–48) did not extinguish all musical life: sacred works continued to be performed in private homes and in some parish churches, and the *maîtres chanteurs* and minstrels were active. The minstrels' guild was powerful, and any musician caught without his guild card had his instruments confiscated. Several outstanding composers of instrumental music were active during this period and published works in Strasbourg: Matthias Mercker (organist at St Nicolas, *c*1620); Elias Mertel (*Hortus musicalis*, 1615); J.U. Steigleder, who published an organ tablature in 1627; Vincenz Jelić (*Parnassia militia*, 1622); P.F. Böddecker (*Sacra partitura*, 1651); Valentin Strobel (ii); and J.E. Rieck (organist at St Thomas, 1652–81). Georg Muffat, one of the leading exponents of the French style outside France, grew up in Strasbourg, and about 1671 became organist of the cathedral. In the preface to his *Florilegium primum* (1695) he wrote: 'I was perhaps the first to bring any idea of these things to musicians of good taste in Alsace'.

In 1681 Strasbourg was unified with France by Louis XIV, and the cathedral reverted to Catholicism. The focus of musical life moved to the Temple Neuf, a Dominican church given to the Protestants by way of compensation. In 1685 the Council of XIII decided that one of the duties attached to the position of organist was to enrich the repertory of 'figured' religious music, sacred songs and psalms. Sébastien de Brossard's work in Strasbourg consolidated French influence there; *maître* of the cathedral choir from 1687, he founded a society for the presentation of French operas, the Académie de Musique. J.G. Rauch (i) was cathedral organist (1687–1710); in 1697 he published his *Cithara Orphei*, a collection of 12 trio sonatas.

3. 18TH CENTURY. Organ building flourished in Strasbourg during the 18th century; in 1701 Andreas Silbermann settled there and built organs in St Nicolas (1707), St Pierre-le-Vieux (1708–9), the cathedral (1714–16), Ste Aurélie (1718) and St Guillaume (1728). His son Johann Andreas built about 50 organs in Alsace and Baden from 1736 to 1783, including those of St Thomas (1737–40), Temple Neuf (1749) and St Pierre-le-Jeune (1780) in Strasbourg. One of Silbermann's workmen, Konrad Sauer, also founded a dynasty of organ builders in Strasbourg. It was on the Silbermann organs of St Thomas and Temple Neuf that Mozart gave three concerts in 1778.

Throughout the first half of the 18th century J.C. Frauenholtz had a marked influence on the city's musical life. He held, as was the custom, the two posts of *maître de chapelle* at Temple Neuf and director of municipal concerts (1714–54). During this period municipal concerts were organized by another Académie de Musique, founded in 1731, and grew in number to 30 each year. The city's first opera house was built in the Place Broglie in 1701. French opera (mostly *opéra comique*) was given there; German troupes used the Petit Théâtre (or Théâtre des Drapiers, built in 1733 by the drapers' corporation).

F.X. Richter arrived in Strasbourg from Mannheim in 1769, and the musical life of Strasbourg reached a new peak. Richter was appointed *maître de chapelle* at the cathedral, where at that time the orchestra and choir were second in France only to those at Versailles (in 1782 it comprised 17 singers and 28 instruments); he also conducted the municipal concerts in the Salle au Miroir for the visit of Marie Antoinette (1770) and the centenary of Strasbourg's reunification with France (1781). Ignace Pleyel succeeded Richter in 1789 and wrote his best works in Strasbourg. In 1781 J.P. Schönfeld (*maître de chapelle* at Temple Neuf, 1777–90) organized the Concerts des Amateurs, which gave 20 concerts a year and enjoyed great success.

The Revolution dealt a blow to Strasbourg's musical life, attacking the institutions of the *ancien régime*; most musicians chose exile. In 1792 the *Marseillaise*, battle-song of the Rhine Army, was composed in Strasbourg. The minstrels' guild dissolved in 1791 after 600 years of existence. During the Terror the cathedral, transformed into a Temple de la Raison, employed an orchestra of 40 for celebrations of national holidays. Worship was not securely re-established there until the Concordat of 1801; sacred music was mostly in the form of plainchant and

fauxbourdon. The *grand motet* was authorized for major feasts.

4. 19TH CENTURY. Kreutzer and Franz Stanislaus Spindler (*maître de chapelle* 1808–19) played a part in the revival of musical life in Strasbourg after the upheavals of the Revolution, but the recovery was largely due to the people. Musical societies sprang up, including the Société des Concerts du Miroir (founded 1796), the Concerts de la Réunion des Arts (1798), the Société des Amateurs de musique (1808–27), the Académie du Chant (1826) and the Société Philharmonique (1832). In 1830 the first Réunion Musicale Alsacienne took place. The Strasbourg Ecole Normale included music in its curriculum. Many vocal works were written in the Alsace dialect; the German language dominated the repertory. The Association des Sociétés Chorales d'Alsace organized annual festivals from 1856 to 1863. At the last one, held in Strasbourg, Berlioz conducted his *L'enfance du Christ* with 500 participants. In 1855, attempting to remedy the decline of the Orchestre du Théâtre, the town founded the Strasbourg Conservatoire, directed by Josef Hasselmans, who organized the Société des Concerts du Conservatoire in 1866. The younger Franz Stockhausen, director of the Conservatoire from 1871 to 1907, raised its standard to international level; from 1868 to 1879 he also directed the Société de Chant Sacré at the cathedral, where he was *maître de chapelle* (1868–1900). The opera house burnt down in 1800. A new one, the Théâtre Municipal, was built in the Place Broglie and inaugurated in 1821 with Grétry's *La fausse magie*. It was almost totally destroyed by the Prussian bombardments of 1870.

In 1871 Strasbourg was seized by Prussia, and subsequently profited from Wilhelm II's desire to provide an artistic showcase on the Rhine. The Théâtre Municipal was rebuilt and reopened in 1873. Musical life flourished with new vigour. In 1872 the Männergesangverein was founded, and in 1903 the Sängerhaus (later the Palais des Fêtes) was constructed for the society; Widor gave the inaugural organ performance there in 1909. The Polish pianist and composer Ignacy Paderewski taught at the Conservatoire (1885–6). Some Strasbourg composers became well known, such as Waldteufel, Nessler and Georges Merkling, who edited the *Elsasslothringische Gesang- und Musikzeitung* and wrote biographies of local musicians. From 1872 Gustav Jacobsthal taught at the university, where a chair of musicology was created for him in 1875.

Among the leading figures in Strasbourg's musical life during this period were Ernest Münch (1859–1928), organist at St Guillaume in 1882, who founded the choir of St Guillaume in 1885 to perform the music of Bach; F.X. Mathias, organist at Strasbourg Cathedral from 1898 to 1908, who reorganized Gregorian chant and reformed organ building in collaboration with Emile Rupp (organist at St Paul, 1896–1939); and also Albert Schweitzer. All three joined in editing the *Internationales Regulativ für Orgelbau* (Vienna and Leipzig, 1909), which initiated a 'return to Silbermann'.

5. AFTER 1900. In 1905 Friedrich Ludwig succeeded Jacobsthal in the chair of musicology at the university; he was succeeded by Théodore Gérold (1919), Yvonne Rokseth (1937), Fritz Münch (1949), Marc Honegger (1958) and the composer François-Bernard Mâche (1983). Hans Pfitzner replaced Stockhausen as head of the Conservatoire in 1908. In 1913 Mathias founded the Institut de Musique Sacrée St Léon IX and the review *Caecilia*. Joseph Guy Ropartz, a pupil of Franck, was appointed head of the Conservatoire in 1919, the year in which Strasbourg was returned to France; he introduced the contemporary French school of composition to Strasbourg, created the Société des Amis du Conservatoire and conducted subscription concerts.

During the German annexation, directors of opera at the Théâtre Municipal included Otto Lohse, Pfitzner (who composed his opera *Palestrina* in Strasbourg), Klemperer and Szell. Paul Bastide was director from 1919 to 1948 (replaced by Hans Rosbaud for part of the second German occupation, 1941–44), succeeded by Roger Lalande (1948–53) and Frédéric Adam (1955–72). Their regimes included numerous French premières as well as the world premières of Rabaud's *Martine* (1947), Delannoy's *Puck* and Arrieu's *Noé* (1950). In 1972 the cities of Strasbourg, Colmar (where the Atelier lyrique du Rhin resides) and Mulhouse (with the Ballet du Rhin) united to form the Opéra du Rhin; in 1998 it became the Opéra National du Rhin.

Alphonse Hoch, a priest at the cathedral in 1925, reorganized music there; under his direction the cathedral choir improved its *a cappella* singing and made numerous tours. Under Ernest Münch and, later, his son Fritz (1924–61), the St Guillaume choir expanded its repertory; Schweitzer played the organ for the choir's concerts. The choir of the Eglise Réformée performs a Bach cantata every month, following a tradition dating from 1890.

In 1929 Fritz Münch became director of the Conservatoire. The municipal orchestra, founded in 1875, was directed by Ernest Bour (1950–63), Alceo Galliera (1964–72), Alain Lombard (1972–83), under whom it became the Orchestre Philharmonique, Theodor Guschlbauer (1983–97) and Jan Latham-Koenig (from 1997). From 1973 concerts have been given in the Palais de la Musique et des Congrès (cap. 2000).

In 1932 the Congrès International d'Organologie was organized in Strasbourg, and the Festival de Musique – the first in France – was established, organized by the Société des Amis de la Musique de Strasbourg and chaired by Louis-Marie Pautrier until 1959. From the outset it was an enormous success, presenting such artists as the Cortot-Thibaud-Casals Trio (1933), the Busch Quartet (1934), and Schnabel and Klemperer (1936), and it continues to attract international performers. World premières given at the festivals have included Florent Schmitt's String Quartet (1948) and Symphony (1958), and Poulenc's *Stabat mater* (1951) and Flute Sonata (1963). In August 1933 the Session d'Etudes Musicales et Dramatiques de Strasbourg took place, organized by Hermann Scherchen: in ten days 64 contemporary works were performed and seven lectures were given, and among the participants were Bartók and Roussel. In 1958 the 32nd Journées Annuelles de la Société Internationale pour la Musique Contemporaine took place in Strasbourg simultaneously with the festival.

In the 1960s, under Louis Martin's direction, the Conservatoire became one of the foremost in France, particularly for the study of the organ. It was endowed with a large Schwenkedel organ (three manuals, 45 stops) in 1964, and has spread to many local annexes, including the Villa Greiner in 1966. In 1970 it became the national conservatory of the region. A jazz course was introduced

in 1979 and expanded in 1992 to encompass all improvised music, under the direction of Bernard Struber. In 2000 a new conservatory was planned to house the 160 teachers and 1600 pupils at the Place de l'Etoile. From 1961 the Institute of Musicology (founded in 1919) organized an annual university festival, the Journées de Chant Choral. There are important music collections at the Bibliothèque Nationale et Universitaire, the Institute of Musicology, the Great Seminary and the Protestant Seminary.

Other musical associations in the city have included the Amis des Jeunes Artistes Musiciens, founded in 1960; Les Percussions de Strasbourg, established in 1961; the symphony orchestra of Radio Strasbourg, active until 1974; Musique de Notre Temps, which organized lectures and recitals with commentary, the Amis de la Musique sur Instruments Anciens, founded in 1976; and the Parlement de Musique, early music ensemble founded in 1990 by Martin Gester. Some 20 instrument makers in and around the city have benefited from the growing interest in early music; among them are makers of lutes, pianos, harpsichords and organs, the best-known organ firms being those of Kern and Mühleisen.

Strata [Strada], **Giovanni Battista** (*fl* 1609–51). Italian organist and composer. He was second organist and priest at Genoa Cathedral about 1610. He later seems to have worked at S Maria delle Vigne, Genoa, before resuming his post at the cathedral on 21 July 1648. He was succeeded there on 13 March 1651, perhaps because he had died. His music is simple and unpretentious and was probably all intended for performance in the churches and religious houses of Genoa.

SERGIO MARTINOTTI

Stratas, Teresa [Strataki, Anastasia] (*b* Toronto, 26 May 1938). Canadian soprano of Greek descent. She studied with Irene Jessner and made her début in Toronto with Canadian Opera in 1958 as Mimì (also the role of her 1961 Covent Garden début). Having won the 1959 Metropolitan Opera Auditions of the Air, she made her début at the Metropolitan that October as Poussette (*Manon*). Her regular appearances in New York included those as Sardula (Menotti's *Le dernier sauvage*), Lisa (*The Queen of Spades*), Liù, Nedda, Micaëla, Zerlina, Cherubino, Despina and Hänsel. In 1961 she created the title role in Peggy Glanville-Hicks's *Nausicaa* at the Athens Festival. She appeared regularly as a guest in Munich, Hamburg and Paris, and also performed at Salzburg and the Bol'shoy. Her repertory included Verdi's Joan of Arc, Violetta, Tatyana, Mélisande and Lulu, which she sang at the opera's first complete performance and recording (1979, Paris). She sang Violetta to Domingo's Alfredo in Zeffirelli's film (1983), appeared on Broadway in *Rags* in 1986, and took the role of Marie Antoinette in the 1991 première at the Metropolitan of Corigliano's *The Ghosts of Versailles*, which was recorded on video. Her other filmed roles include Nedda and Salome. Stratas had a lyric-dramatic voice of individuality and a keen sense of

the stage. Deep involvement in her roles distinguished all her appearances.

HAROLD ROSENTHAL/ALAN BLYTH

Strategier, Herman (*b* Arnhem, 10 Aug 1912; *d* Doorwerth, 26 Oct 1988). Dutch composer and organist. He studied with Dusch (piano), Winnubst (theory) and Hendrik Andriessen (organ and composition) at the Roman Catholic School of Church Music, Utrecht, later continuing studies with Andriessen (the greatest influence on his work) for several years. Together with Jan Mul and Albert de Klerk, also pupils of Andriessen, Strategier pursued his teacher's devotion to the Roman Catholic liturgy and to writing music for laymen. His orchestral work *Musique pour faire plaisir* (1950) expressed this main aesthetic. In addition to teaching at the conservatories of Utrecht and Rotterdam and at Utrecht University, he was until 1973 conductor of the Dutch Madrigal Choir of Leiden.

ROGIER STARREVELD/LEO SAMAMA

Stratford, William [William, monk of Stratford] (*fl* *c*15th–16th centuries). English composer. He is described in the Eton choirbook (*GB-WRec* 178) as 'monachus Stratfordiae', i.e. a monk of the Cistercian abbey of Stratford-atte-Bowe in Essex. He may be identifiable with the 'Parker monke of Stratforde' a single part of whose song *O my lady dure* survives in *GB-Lbl* Roy.App.58. He is represented in the Eton choirbook by one of its few surviving complete settings of the *Magnificat* (in four parts; ed. in MB, xii, 2/1973, no.48). It is a competent piece of counterpoint for men's voices in the florid style of the late 15th century.

JOHN CALDWELL

Strathspey. A Scottish dance, a REEL of slower tempo, allowing the use of more elaborate steps both in the setting step and in the travelling figure. It usually leads into another reel without a break, or vice versa. It is written in common time, crotchet = 160 to 168, or slower. Musically, the strathspey is characterized by its dotted quaver–semiquaver rhythm and the inversion of this, the 'Scotch snap' (ex.1).

Ex.1 *Highland Whisky*

The strathspey made its appearance in about the mid-18th century. Two tunes, each labelled 'A New Strathspey Reel', appeared in Oswald's *Caledonian Pocket Companion* (*c*1745). Robert Bremner's *A Collection of Scots Reels* (1759–61) contains about ten tunes marked as strathspeys, of which the first bears the note, 'The Strathspey Reels are play'd much slower than the others'. Thomas Newte in 1785 ascribed the composition of early strathspey tunes to the Strathspey families of fiddlers, the Browns and Cummings. The strathspey was essentially music conceived for the fiddle, and as such exploited the peculiar bowing technique of the Scots fiddler.

The slow strathspey was purely an exhibition recital piece for the fiddler, and did not normally accompany the dancing of the strathspey. Its performance on the fiddle was highly stylized, its chief characteristic being the substitution of a rest for the duration of the dot of the dotted quaver, giving a detached, staccato effect; considerable rubato was also used. However, a dance for two dancers known as the 'strathspey minuet' was sometimes performed to the slow strathspey.

For bibliography *see* REEL.

FRANCIS COLLINSON

Stratico, (Giuseppe) Michele (*b* Zara [now Zadar, Croatia], 31 July 1728; *d* after 1782). Italian amateur violinist and composer. He came from an aristocratic provincial Venetian family of some intellectual distinction; his brother Simone (*b* Zara, Oct 1733; *d* Milan, 30 June 1824) was a prominent physician, educator and scientist known to Goldoni and Voltaire, and who wrote a treatise, in 1815, in which he discussed the differences between noises and sounds, timbre, articulation and temperament. After his early education in Zara, Stratico continued his studies in Padua. He was supported there by his uncle Antonio Stratico (*d* 1758), a translator of Greek literature into Italian, an amateur musician and the rector of the Collegio Cottunio. (Giuseppe) Michele read law at the university (1737–45) and also studied music with Tartini and Antonio Sberti; the physicist Giordano Riccati noted that Stratico was an outstanding violinist in the orchestra of the Basilica del Santo. Sometime between 1758 and 1763 he moved to Sanguinetto, a town near Verona, where he accepted the position of *vicario* (an advisor to the local governor on criminal matters). His signature appears on a number of documents relating to legal matters in Sanguinetto, dated between 18 May 1763 and

19 September 1782. In Sanguinetto Stratico also concentrated on issues in music theory, particularly mathematical and physical axioms of the intervals and problems of dissonance and consonance. In his *Trattato di musica* he discussed issues of temperament and intonation, arguing that temperament is nothing but a necessary evil. His other treatise, *Lo spirito tartiniano*, written in the form of a dialogue between Tartini's spirit and his sleeping student, discusses Tartini's *De' principi dell'armonia musicale contenuta nel diatonico genere.*

Stratico composed about 280 instrumental works, including over 170 sonatas for violin and bass, of which just six were published in his lifetime. His finest compositions are his concertos for the violin, which are strongly influenced by Tartini, and his six string quartets. His works demonstrate a composer whose sense of instrumental virtuosity is calmed by his feeling for the Baroque stability of phrase. In his chamber works he stands at a turning-point between the Baroque and early classicism. The opening movements are often based on contrasting thematic material, which is developed in the movement's middle section, anticipating the later evolution of the sonata allegro form. The harmonic progressions, chromatic sequences, and three- and four-bar thematic units, also anticipating early classicism, are combined with contrapuntal imitations, canon and melodic sequences. His orchestral works are more conservative and less successful.

ZDRAVKO BLAŽEKOVIĆ

Strattner, Georg Christoph (*b* Gols, nr Pressburg, *c*1644; *d* Weimar, bur. 11 April 1704). German composer of Hungarian birth. He went to Pressburg about 1651 as a chorister and schoolboy to stay with Samuel Friedrich Capricornus, director of music there, who was his cousin and whom he followed to Stuttgart in 1657. After Capricornus's death (in November 1665) he was Kapellmeister at the court of Baden-Durlach from 1666 until 1682. Because of the destruction of Durlach in 1689, very few of his numerous compositions from this period have survived. In 1675 he was already performing his own works at Frankfurt, and in 1682 he was appointed Kapellmeister at the Barfüsserkirche there. This post also entailed the supervision of performances in the other Frankfurt churches, as well as teaching music at the Gymnasium. In addition to his own works he regularly performed those of other composers of his day, including W.C. Briegel and J.P. Krieger. At the 'instigation of high and distinguished persons and valued friends' he published at Frankfurt, with his own melodies, a new edition of the influential hymn collection of 1680 of Joachim Neander. Strattner's activities at Frankfurt ended abruptly in 1692 when he was found guilty of adultery and banished. He remained without a new post until 1694 when he became a tenor and chancery clerk at Weimar. In 1695 he was appointed vice-Kapellmeister there in order to relieve J.S. Drese, director of the Hofkapelle, who was in poor health; he held this post until his death. Like Bach later, he was required to write a new church composition every fourth Sunday, and he was responsible for the chamber music too. He was also appointed director of the Weimar opera house when it opened in 1697, though it is not certain whether he himself wrote works for it.

Comparatively little of Strattner's large, mainly sacred output has survived. It is therefore difficult to undertake a definitive appraisal, particularly as most of the surviving works date from his Frankfurt period, when, in the wake of Pietist influence, church music tended to be rather simple. The individual features of his music may also be in part the product of Pietist devotion. He usually set biblical texts in his cantatas, which are close to the form of the dialogue cantata. He generally favoured an all-embracing form, with fine rhythmic and melodic differentiations and frequent modulations to intensify the meaning of the text. His Passion cantata, *Sehet doch, ihr Menschenkinder*, marks an important stage in the development towards the Passion oratorio.

SUSETTE CLAUSING

Stratton, George (Robert) (*b* London, 18 July 1897; *d* London, 4 Sept 1954). English violinist. He studied the violin and composition at the GSM, London. He led the LSO from 1933 to 1952, the orchestra at Glyndebourne from its foundation in 1934, and from 1936 he was leader and manager of the Queen's Hall Orchestra, which was revived for recording. He became violin professor at the RCM in 1942, and conductor in 1944. He was associate conductor of the LSO during the last few years of his life. He was a founder-member in 1927 of the Stratton String Quartet (later renamed the Aeolian String Quartet) and this quartet was chosen by Elgar to record his Quartet and Quintet in 1933. Stratton was also a founder-member of the Reginald Paul Piano Quartet (1932–42). He was a most distinguished all-round musician. He wrote, with Alan Frank, *The Playing of Chamber Music* (London, 1935).

WATSON FORBES

Stratton, John F(ranklin) (*b* West Swanzey, NH, 14 Sept 1832; *d* Brooklyn, NY, 23 Oct 1912). American manufacturer and importer of musical instruments and bandleader. Both John Stratton and George William Stratton, his brother, older by two years, were precocious young musicians. Both boys studied music avidly, George learning the clarinet and violin and John the trombone, E♭ keyed bugle and cornet. For three years beginning in 1839 the boys and their father travelled around New England giving concerts.

John began his career as a bandleader in Worcester, Massachusetts. He then went to Hartford, Connecticut, where he directed the Hartford Cornet Band and opened his first music store. In 1857 or 1858 he moved to New York, where he established a brass instrument factory and led Stratton's Palace Garden Orchestra. His brother ran a music store in Boston. John's business prospered during the Civil War years and as soon as the war was over he began establishing factories in Germany to supply his own New York store and his brother's in Boston. After founding brass instrument factories at Markneukirchen in 1866 and Leipzig in 1868, Stratton built in 1870 a very large factory making between 50 and 100 violins a day at Gohlis (now a suburb of Leipzig). These factories were sold in 1883 and Stratton returned to New York, continuing his business there until 1912. Instruments by John F. Stratton are found in most American collections, notably America's Shrine to Music Museum, University of South Dakota, which also has archival material; the John H. Elrod Memorial Collection, Germantown, Maryland; the Henry Ford Museum, Dearborn, Michigan; the instrument collection at the University of Illinois, Urbana; and the Greenleaf Collection at the National Music Camp, Interlochen, Michigan.

ROBERT E. ELIASON

Stratus (Lat.: 'stretched'). In Western chant notations an adjective used to describe a neume whose final element is the ORISCUS. For instance, a VIRGA (single note of relatively higher pitch) with added *oriscus* forms a VIRGA STRATA (also known as the *gutturalis*). As with all neumes that include the *oriscus*, there is doubt as to the exact significance of the *stratus* type. A peculiarity of execution or an ambiguity of pitch may be involved. (For illustration *see* NOTATION, Table 1.)

DAVID HILEY

Straube, Karl (Montgomery Rufus Siegfried) (*b* Berlin, 6 Jan 1873; *d* Leipzig, 27 April 1950). German organist, teacher and choral conductor. The son of an organist and instrument maker, he received his early training from his father and other Berlin organists, but he never had a formal music education. His knowledge derived from practical experience (in 1895 he became deputy organist at the Kaiser-Wilhelm-Gedächtnis-Kirche in Berlin) and from the thriving musical and intellectual life of Berlin. He took Hans von Bülow as his model for interpretation and in 1897 formed a lifelong friendship with Reger,

whose music he championed. That year he became organist at the Willibrordikirche, Wesel, in the Lower Rhine valley; his success there led to his appointments at the Thomaskirche, Leipzig, as organist (1902) and Kantor (1918). Straube began teaching the organ in Leipzig in 1907 and was known as 'der Organistmacher', training and guiding numerous church musicians and organists. Up to 1913 he favoured the 'orchestral organ' style of registration and performance, in the manner of Liszt and Wagner, but he later changed his style to reflect the characteristic tone-qualities of Praetorius, Schnitger and Silbermann organs. This was exemplified in his weekly performances of Bach's motets at the Thomaskirche and at six Bach festivals he directed between 1904 and 1923. In 1919 he founded the Kirchenmusikalische Institut der Evangelisch-Lutherischen Landeskirche Sachsen at the Leipzig Conservatory. He merged the Leipzig Bach and Gewandhaus choirs in 1920 and conducted them until 1932, and from 1931 to 1937 he conducted regular performances by the Thomanerchor and Gewandhaus Orchestra of all Bach's cantatas. Straube made several European tours with the Thomanerchor, and promoted choral works by Honegger, Kodály, Arnold Mendelssohn and Raphael among others. He received an honorary doctorate of arts and divinity from Leipzig University.

□

Straube, Rudolf (*b* Trebnitz, 1717; *d* London, *c*1780). German lutenist and composer. He sang in the choir of the Leipzig Thomasschule under J.S. Bach in the early 1730s, and entered the university at Leipzig on 27 February 1740. Early in 1754 he visited Erfurt and presented various compositions to Jakob Adlung, who described him as a good lutenist, a well-trained keyboard student of J.S. Bach, and one who at that time was interested only in travel. According to Coggin he also became known as a player of the English guitar. His travels evidently took him to London: C.F. Pohl included Straube among a list of musicians active there in 1759.

Straube's works reflect most of the prevailing elements of the Baroque style: binary design, a fairly consistent and conservative extension of opening figuration, all usually enhanced by a pronounced rhythmic vitality. His compositions for lute and guitar are thoroughly idiomatic, often accompanied by a violin or keyboard instrument. A dialogue between Straube and Thomas Gainsborough on the latter's manner of purchasing a lute and lute music, and a diagram of a fingerboard and tuning system by Straube, are in the British Library (Add.31698).

DOUGLAS A. LEE

Straus, Christoph (*b* ?Vienna, *c*1575–80; *d* Vienna, mid-June 1631). Austrian composer and organist. He came from a musical family with a long record of continuous service to the imperial house of Habsburg. He himself entered its service in 1594 and by 1601 was organist of the court church of St Michael. His remuneration was insufficient to provide for a growing family and in 1614 he was given the better-paid task of administering the estate of Kattenburg, an imperial property on the site of modern Schönbrunn. He was appointed vice-Kapellmeister in January 1616 and Kapellmeister in May 1617, but he did not hold the post for long: his patron and constant supporter, Emperor Matthias I, died in 1619, and the new emperor, the italophilic Ferdinand II, had Straus replaced as Kapellmeister by Giovanni Priuli. Straus retained the title 'Camer Organist' and was compensated with a post in the court bureaucracy. From at least 1626 until his death he was in charge of the music at the Stephansdom, Vienna.

Of Straus's two volumes of sacred music that of 1613 contains 36 motets in five to ten parts, including the essential use of instruments but without continuo. They are greatly influenced by the transitional polychoral style of Giovanni Gabrieli, with contrasts between traditional polyphony and block homophony, madrigalian word-setting and closely worked imitation, and refrain forms and the use of plainsong tones; they also make use of *cori spezzati* and the disposition of instruments. Straus's fondness for employing instruments in families (e.g. groups of trombones, viols, etc.) is a typically Austro-German feature; the pieces requiring instrumental participation are described in the index as concertos, in the Gabrielian sense of the term. Constant variety of texture, tessitura and instrumentation and the dramatic presentation of the words combine to make this a collection full of interest.

Straus's other volume, the *Missae* (prepared for publication before his death and published by his son Matthias), contains 16 masses, including two requiems, and shows him to be a composer of considerable invention, sensitivity and contrapuntal skill. Most of the works are parody masses, in which the basic melodic units appear in many different guises throughout and lend unity to the whole. Four of the masses, on the other hand, are marked 'concertata', and it is in them that the most progressive tendencies occur. The influence of the Venetian mixed concertato style may be found in the contrast between vocal, instrumental and mixed groups, in the rhythms and style of the vocal writing, in the treatment of the polychoral medium, and also in the juxtaposition of powerful tuttis and sections for one, two or three voices, sometimes accompanied by instruments. Various dynamic markings, literal word-painting and precise instrumentation indicate a truly Baroque approach to the text. The *Missa pro defunctis* [2] includes a string 'Symphonia ad imitationem campanarum' on an ostinato bass derived

from the opening of the 'Dies irae', while vocal and instrumental tremolo is employed at the 'Quantus tremor est futurus' section of the sequence itself (this was much copied by later composers). The *Missa 'Veni sponsa Christi'* includes music for a five-part trumpet choir with timpani (the virtuoso clarino part includes a cadenza at the end of the symphonia and an assured concertato pairing with the soprano soloist at 'Et resurrexit tertia die' in the 'Credo'); it also requires extra-musical military trumpet interjections, and is a testament to imperial high ceremonial. The great masses of the 18th century can trace their ancestry to works such as these.

Straus was without doubt one of the finest Austrian composers of his day: his music is not only of considerable intrinsic worth but is also historically important.

A. LINDSEY KIRWAN/PETER DOWNEY

Straus, Oscar (*b* Vienna, 6 March 1870; *d* Bad Ischl, 11 Jan 1954). Austrian composer and conductor. On the recommendation of Brahms he studied with Hermann Grädener and in 1891 went to Berlin as a pupil of Bruch. Advised by the younger Johann Strauss to gain practical theatrical experience in the provinces, he conducted between 1893 and 1899 in Bratislava, Brno, Teplitz, Mainz and Hamburg. During the same period he was active as a composer of stage works and a good deal of salon music. He was conducting in Berlin when, in 1900, he was engaged as pianist and composer in the newly founded Überbrettl cabaret, and he enjoyed his first popular successes with songs such as *Die Musik kommt* and *Der lustige Ehemann*. Having returned to Vienna he began a series of operettas of which *Ein Walzertraum* (1907) rivalled *Die lustige Witwe* in popularity and first brought Straus international success. Its successor, *Der tapfere Soldat* (1908), gained particular success in the USA as *The Chocolate Soldier*. Subsequent operettas failed to add to his success until *Der letzte Walzer* (1920), in which the lead was played by Fritzi Massary around whom several of Straus's later works were written. *Eine Frau, die weiss, was sie will* (1932) was produced in London as *Mother of Pearl*, and *Drei Walzer* (1935), which used the music of Johann Strauss I and II in the first two acts and that of Straus himself in the third, achieved its greatest success with Yvonne Printemps in Paris. In 1939 he left Vienna and lived in France (where he was awarded the Légion d'Honneur), New York and Hollywood, returning to settle in Bad Ischl in 1948. He continued to conduct his music on concert tours and for gramophone records, and his compositions included the operetta *Die Musik kommt* (1948), which used some of the tunes from his Überbrettl days, and music for the film *La ronde* (1950) with which he enjoyed a new worldwide success. His final stage work was *Božena*, on which he had worked since 1936, although he subsequently revised the scores of *Ein Walzertraum*, *Drei Walzer* and *Eine Frau, die weiss, was sie will*. Straus composed much cheerful, lilting music in the Viennese operetta style, eminently piquant and charming without ever matching Lehár's passion and sensuousness. His son Erwin (1910–66) was a pianist and composer.

WORKS
(*selective list*)

STAGE
unless otherwise stated, all are operettas first performed in Vienna; for complete list see GroveO

Over 40 works (most pubd in vocal score in Vienna or Berlin) incl. Die lustigen Nibelungen (burleske Operette, 3, Rideamus [F. Oliven]), Carl, 12 Nov 1904; Hugdietrichs Brautfahrt (kömische Märchen-Operette, 3, Rideamus), Carl, 10 March 1906; Ein Walzertraum (3, F. Dörmann and L. Jacobson, after H. Müller: *Das Buch der Abenteuer*), Carl, 2 March 1907; Der tapfere Soldat [Der Praliné-Soldat] (3, R. Bernauer and Jacobson, after G.B. Shaw: *Arms and the Man*), An der Wien, 14 Nov 1908; Rund um die Liebe (3, R. Bodanzky and F. Thelen), Johann Strauss, 9 Nov 1914

Der letzte Walzer (3, J. Brammer and A. Grünwald), Berlin, Berliner, 12 Feb 1920; Mariette, ou comment on écrit l'histoire (musikalische Komödie, 3, Guitry), Paris, Edouard VII, 1 Oct 1928, as Marietta (trans. Grünwald), An der Wien, 25 Oct 1929; Eine Frau, die weiss, was sie will (3, Grünwald, after L. Verneuil), Berlin, Metropol, 1 Sept 1932; Drei Walzer (3, P. Knepler and A. Robinson), Zürich, Stadt, 1935, as Trois Valses (F.L. de Marchand and A. Willemetz), Paris, Bouffes-Parisiens, 22 April 1937; Die Musik kommt (musikalische Komödie, 3, Knepler, Robinson and R. Gilbert), Zürich, Stadt, 1948, rev. as Ihr erster Walzer, Munich, Gärtnerplatz, 31 March 1950; Božena (3, Brammer and Grünwald), Munich, Gärtnerplatz, 16 May 1952

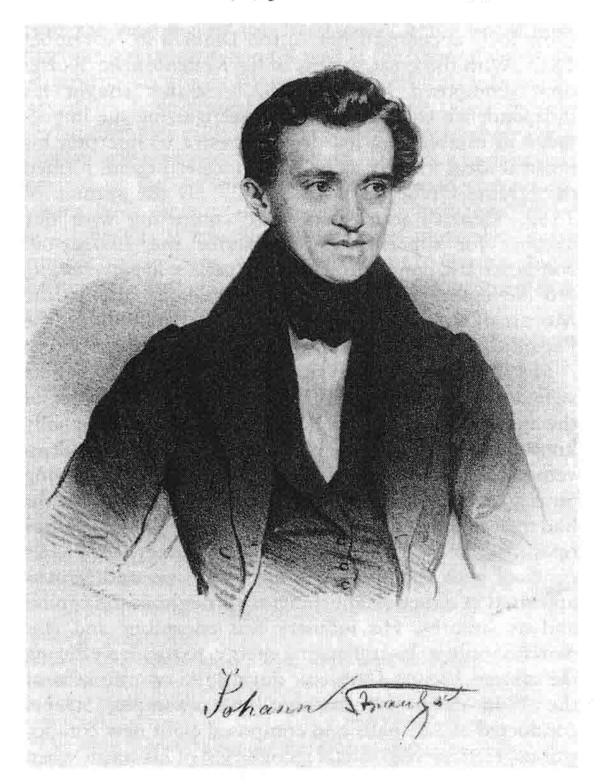
ANDREW LAMB

Strauss. Austrian family of dance music composers and musicians of Hungarian origin. Through a combination of melodic invention and masterly orchestral technique, allied to an astute sense of the commercial, they elevated 19th-century popular music, and especially the Viennese Waltz, to a consummate form.

(1) Johann (Baptist) Strauss (i) (*b* Vienna, 14 March 1804; *d* Vienna, 25 Sept 1849). Composer, conductor and violinist. His grandfather, Johann Michael (*c*1720–1800), left his Hungarian native town of Buda around 1850 as manservant to a field-marshal-lieutenant, travelling with him to Vienna, seat of the Habsburg monarchy. Johann Michael remained there as a 'journeyman upholsterer', where he converted from Judaism to Catholicism and married. He died from consumption in a poorhouse in 1800. The second of his four children, Franz Borgias (1764–1816), worked as an itinerant waiter before becoming tenant of a small tavern and dwelling within the house 'Zum heiligen Florian' at Flossgasse 7, a back street in the suburb of Leopoldstadt. It was here that Johann Strauss was born and first became fascinated by the music of the wandering tavern musicians who worked along the Danube. After the deaths of his mother (1811) and father (1816), the young Johann was placed under the guardianship of Anton Müller, who apprenticed him (1817–22) to Johann Lichtscheidl, a Viennese bookbinder. During this period Strauss obtained his first proper violin tuition from the Wiener Neustadt-born theatre musician Johann Pollischanzki (1779–1836), later studying thorough-bass and instrumentation with Ignaz von Seyfried and violin with the virtuoso and theorist Leopold Jansa. Reports that Strauss played in the orchestra of the renowned Michael Pamer remain unsubstantiated, though his study under Pollischanzki certainly made it possible for him to earn a little additional money by playing at various musical events. In spring 1823 he joined the trio of Joseph Lanner (violin), Johann Drahanek (violin) and Anton Drahanek (guitar) as a viola player, his technical competence on the violin being as yet insufficient. During 1824, with the recruitment of the three Scholl brothers, Joseph, Karl and Simon, the quartet grew to a septet, consisting of first and second violins, viola or 3rd violin, guitar, cello or bass, flute and clarinet. Strauss's arrangement (in a copyist's hand) of the overture to Auber's opera, *La neige, ou Le nouvel éginard* (1823) dates from April 1824, and is one of his oldest extant works. From 1825 it is likely that ensemble was enlarged further, gradually achieving an orchestra size of 11–12 players.

From autumn 1824 to probably spring 1825, Strauss was a conscript militiaman in the 'Hoch- und Deutschmeister' Infantry Regiment no.4. On 14 March 1825 Strauss applied for a one-year passport to undertake a tour 'to Graz and the Imperial lands, to seek earnings'. His girlfriend, Maria Anna Streim (1801–70), daughter of a tavern-keeper, dissuaded him, knowing herself to be carrying his child. The couple married on 11 July 1825 and their child, the future 'Waltz King', (2) Johann (ii), was born on 25 October that year. They had a further five children: (3) Josef (1827–70), Anna (1829–1903), Therese (1831–1915), Ferdinand (*b* and *d* 1834) and (4) Eduard (1835–1916).



Strauss's musical career did not progress as rapidly as is frequently claimed, and in official documents at this time he gave his occupation as 'music teacher'. On 1 September 1825 Lanner reorganized his orchestra, appointing Strauss as second musical director, and as such Strauss played in various restaurants including Zu den zwey Tauben and Zur Kettenbrücke. Reports of a separation and permanent rift between the two men on this date are unfounded and date from later writings. His first published composition, 7 Walzer für das Pianoforte (now lost) appeared from Anton Diabelli in November 1825. With the great success of his *Kettenbrücke-Walzer* op.4 (composed February 1827) Strauss sought his independence from Lanner and, recognizing the importance of establishing his own orchestra to interpret his musical ideas exactly as he had conceived them, formed the Strauss Orchestra in May 1827. By the autumn of 1833, Vienna's journalists were competing with one another for superlatives to describe the 29-year-old composer and conductor. Adolf Bäuerle's *Theaterzeitung* (16 November 1833), for example, lauded him as 'the Mozart of the waltz, the Beethoven of the cotillons, the Paganini of the galop, the Rossini of the potpourri'.

In 1829 his career was significantly enhanced when he signed a six-year fee-paying contract with the owner of the fashionable Zum Sperlbauer premises (colloquially known as the Sperl) in the suburb of Leopoldstadt, a venue which became almost a second home for the young Strauss: over a quarter of his more than 250 compositions had their premières there, including his *Sperls-Fest-Walzer* op.30, written for his début on 4 October 1829. His contract with the Sperl was not exclusive, and Strauss appeared at dance establishments throughout the capital and its suburbs. His industry was enormous and was matched only by his unflagging energy, particularly during the annual Vienna Carnival: during the two months of the 1848 carnival 'campaign', for example, Strauss conducted at 125 balls and composed eight new compositions. He received official recognition of his status when he was appointed Bandmaster of the 1st Vienna Citizens' Regiment in 1832. Recalling a visit to a Strauss concert in Vienna that same year, Richard Wagner (*Mein Leben*, 1911) observed:

> I shall never forget the extraordinary playing of Johann Strauss, who put equal enthusiasm into everything he played, and very often made the audience almost frantic with delight. At the beginning of a new waltz this demon of the Viennese musical spirit shook like a Pythian priestess on the tripod, and veritable groans of ecstasy which, without doubt, were more due to his music than to the drinks in which the audience had indulged, raised their worship for the magical violinist to almost bewildering heights of frenzy.

The constant pressures upon the somewhat irascible Strauss resulted in gradual alienation from his wife and family, a situation exacerbated by his prolonged orchestral tours away from home. Around 1833 he met and began a lasting affair with a young Moravian-born milliner, Emilie Trampusch (?1814–after 1857), with whom he had seven children between 1835 and 1844. Anna sued her husband for divorce in 1844; this was granted in 1846, whereupon the estranged Johann left the marital residence to set up home with Emilie.

In contrast to Lanner, Strauss realized that a dance music composer and conductor could only secure an international reputation by travelling with his music: with his visit to Pest in 1833 he became the first person to rise to the challenge of taking dance music on tour. His impact was immediate. His 1834 tour through Germany, including performances before the Prussian king and the visiting tsar and tsarina of Russia, was financially and artistically rewarding. Increasingly extensive tours followed annually, the most ambitious being undertaken in October 1837. From Vienna the 28-man ensemble travelled through southern Germany into France. Some six weeks of concerts in Paris attracted such prominent musicians as Adam, Auber, Cherubini, Halévy, Meyerbeer and Paganini, as well as the French 'Quadrille King' Philippe

1. *Johann Strauss (i): lithograph by Josef Kriehuber, 1835*

Musard, with whom Strauss also gave joint performances. Berlioz was moved to observe in the *Journal des débats* (10 November 1837): 'We knew the name of Strauss, thanks to the music publishers ... that was all; of the technical perfection, of the fire, the intelligence and the rhythmic feeling which his orchestra displays, we had no notion'. From Musard and Louis Dufresne, Strauss gained a thorough understanding of the 'quadrille française', a dance form largely unknown to the Viennese until he introduced it, with huge success, during the 1840 carnival.

The importance of the Strauss Orchestra in Viennese cultural life was determined from the outset by Strauss in the musical programmes he devised for his audiences. Whereas balls were naturally confined to dance music, Strauss's open-air concerts featured operatic extracts and symphonic fantasies alongside lighter fare. This practice was both continued and developed by Strauss's sons, thus ensuring that their audiences were exposed to a generous cross-section of music they might not otherwise have heard.

After further concerts in France and Belgium, Strauss and his band arrived in London on 12 April 1838 to commence a 33-week British tour, taking them to 26 provincial centres in England as well as to Dublin, Edinburgh, Glasgow and Paisley. In London, as elsewhere, their fame preceded them and, apart from numerous public performances, Strauss and his orchestra entertained at state balls and dinner parties at Buckingham Palace, the Almack's Subscription Balls and private balls and concerts hosted by members of the nobility. After the first concert on 17 April in London's Hanover Square Rooms, the *Morning Post* (18 April 1838) declared:

> The concert, which was exclusively instrumental, opened with Auber's overture to 'Le Serment', the performance of which was at once sufficient to convince all present that so perfect a band was never before heard on this side of the Channel. Orchestras we may boast, the individuals composing which are equal in talent to these, but the perfection of such an ensemble we have never yet reached. The accuracy, the sharpness, the exquisite precision with which every passage, however complicated, is performed, can be the result only of the most careful and persevering practice .... We had almost forgotten to notice the superior talent of Strauss himself on the violin; he performs with peculiar energy, and imparts much of his own spirit to his band, the combined effect of which ... more resembles the unity of one single powerful instrument than any orchestra that has yet been heard in this country.

As with his concerts elsewhere in Europe, Strauss marked his first British visit with a clutch of new compositions or arrangements, including the waltz *Hommage à la reine de la Grand Bretagne* op.102 and the potpourri, *Le télégraph musicale* op.103, later published in Vienna as opp.103 and 106 respectively. In January 1846 he applied directly to the Austrian Emperor Ferdinand I, and was granted (24 January 1846), the position of *k.k. Hofballmusik-Direktor*. This purely honorary title, specifically created for Strauss the father, remained exclusively within the family until relinquished by Eduard Strauss in 1901, whereupon it passed in 1908 to the last holder, C.M. Ziehrer.

The European Revolution, which flared in Vienna in March 1848, found Johann Strauss father and son in opposing camps. While the younger Johann sided with the students and revolutionaries in opposing the unyielding autocracy of the Austrian Chancellor Metternich, the elder Johann openly supported the established order: indeed, the most durable testament to the elder Strauss's imperialist sympathies is his *Radetzky-Marsch* op.228, which he dedicated to the Austrian army. An astutely-commercial businessman, however, Strauss senior also paid tribute to Vienna's revolutionary elements with a *Marsch der Studenten-Legion* op.223 and a *Freiheits-Marsch* op.226, prompting the Viennese newspaper *Der Wanderer* (7 September 1848) to dub him 'a musical chameleon'.

Immediately after the 1849 Vienna Carnival the elder Johann Strauss and his orchestra of 31 players left Vienna by steamship for Linz, and embarked upon a four-month concert tour through Germany and Belgium, arriving again in England. After a two-and-a-half-month tour, comprising performances in and around London and in Brighton, Richmond, Reading, Oxford and Cheltenham, he returned to Vienna. On 22 September he had been due to perform his *Radetzky-Bankett-Marsch* at a banquet for Field-Marshal Radetzky, given by the Vienna Municipal Council in the Redoutensaal of the Imperial Hofburg Palace, but he failed to appear. The reason was noted by his publisher, Carl Haslinger, on the unfinished manuscript of the work: 'During the instrumentation of this march Strauss Father became ill with scarlet fever and died three days later'. He died on 25 September 1849 at the apartment in the Kumpfgasse he shared with Emilie, after contracting the illness from one of their illegitimate offspring. 100,000 Viennese followed his funeral procession and lined the route, while *The Illustrated London News* (13 October 1849) concluded its obituary for him: 'If there had been no Strauss, we should not have had Musard or Jullien. Hosts of imitators have sprung up since Strauss, but to him will remain the glory of originality, fancy, feeling and invention'.

The elder Strauss combined consummate musicianship with an astutely-commercial mind and an unerring sense

of showmanship, attributes inherited by his sons Johann (ii) and Eduard (i) in particular. He worked closely with his principal publisher, Tobias Haslinger and then with Haslinger's widow and son Carl to produce works of ever-increasing originality and quality which were attractively presented to maximize the sales of sheet music to the public. Strauss also organized with Carl Friedrich Hirsch elaborate and costly summer festivals with fireworks. He occasionally offered inducements to newspaper editors to ensure favourable notices, though, given his unwaning popularity, it is difficult to comprehend why he deemed this necessary.

Verve and a fiery spirit lie at the heart of Strauss's compositions. Of his waltzes, one contemporary writer colourfully observed: 'In his waltzes a profusion of melodies effervesce and bubble, fizz and froth, dash and sweep like the five hundred thousand devils in the champagne, slipping their bonds and flinging one cork after another into the air'. In retrospect, however, when comparing the elder Strauss's work with that of his sons, the attraction of his music lay more in the ingenuity of his rhythms than in the originality of his melodies, entrancing though many of these may be. Schönherr (*Grove6*) considered that the principal appeal of Strauss's music lay in 'the refinement and piquancy of his rhythmic idiom, with its frequent cross-rhythms, syncopations, dotted figures and an ingenious use of pauses and rests. These features gave his style its cachet and were responsible for its galvanizing effect on dancers and listeners alike'. As a pioneer of the waltz, Strauss, along with Lanner, established the foundations upon which more extended and developed melodic line and ambitious harmony and structure could be built by their successors in the field of dance music.

WORKS

unless otherwise stated, all printed works were published in Vienna for piano solo in year of first performance; where published, titles as shown on cover of first piano edition; most compositions also published for piano 4 hands and for violin and piano

for other arrangements and complete MS details, see Weinmann (1956) and Schönherr and Reinöhl (1954); principal MS sources are A-Wgm, Wn, Ws and Wweinmann

G – *Galop*

(2) Johann (Baptist) Strauss (ii) (*b* Vienna, 25 Oct 1825; *d* Vienna, 3 June 1899). Composer, conductor and violinist, eldest son of (1) Johann Strauss (i). He was

known throughout his life variously as Strauss Son, Johann (ii) and Johann the younger. During their education at the k.k. Normal-Hauptschule bey St Anna in Wien, Johann and his brother (3) Josef passed the entrance examination to the respected Vienna Schottengymnasium, where they jointly studied from the academic years 1837–8 to 1840–1. In autumn 1841, at the instigation of their father, both sons entered the Commercial Studies Department of the Polytechnic Institute, where Johann was awarded 'First with Distinction' in his bookkeeping examination. Although his father intended him for a respectable, middle-class career in banking, Johann left the Institute in April 1843, having resolved to devote himself to music. Like his father he had grown up surrounded by music and, since the Strauss Orchestra rehearsed not only dances and marches in the family apartments but also overtures and concert pieces, the youngsters gained a thorough understanding across the broad spectrum of the musical repertory. Encouraged by their father, Johann and Josef became accomplished social pianists and, as Johann later recalled:

> We boys paid close attention to every note, we familiarized ourselves with his style and then played what we had heard straight off, exactly in his spirited manner. He was our ideal. We often received invitations to visit families ... and would play from memory, and to great applause, our father's compositions.

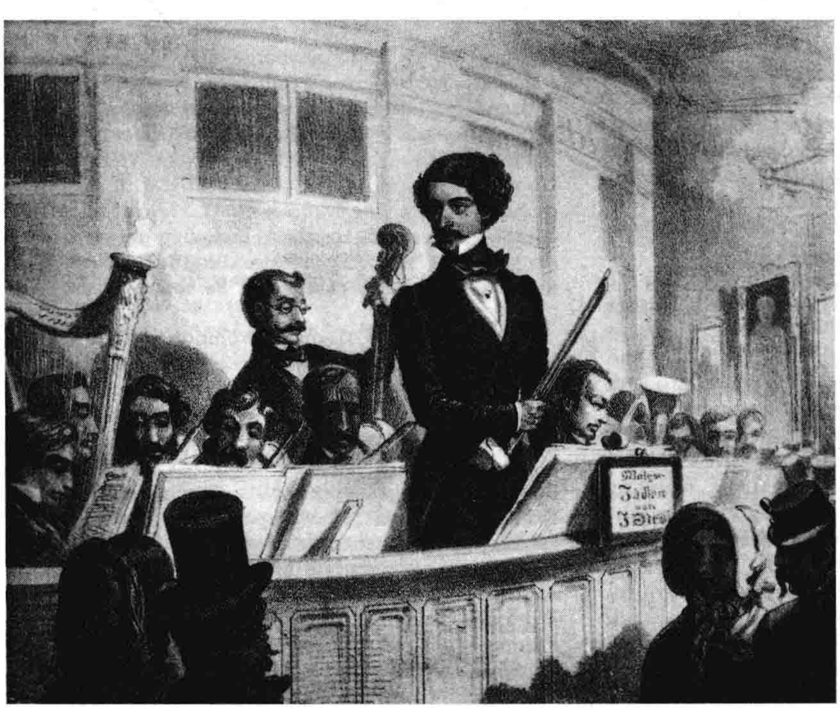
The elder Johann's infidelity with Emilie Trampusch placed severe restrictions on the income reaching his legitimate family, and mother Anna Strauss strove to ensure her eldest son was fully prepared for his role as family breadwinner. Behind his father's back he studied the violin with Franz Amon, the leader of his father's orchestra, harmony and counterpoint with Joachim Hoffmann and later with Joseph Drechsler (for whom he wrote the gradual *Tu qui regis totum orbem* as an exercise in 1844) and violin with Anton Kohlmann, ballet répétiteur at the Vienna Court Opera. Thus equipped, he applied successfully (3 August 1844) to the authorities for a licence 'to hold musical entertainments', drew up a one-year contract with 24 musicians (8 October 1844) and announced his public début as a composer and conductor at a *soirée dansante* for 15 October 1844 at Dommayer's Casino in the suburb of Hietzing. The selection of music he presented on this occasion included works by Meyerbeer, Auber, Suppè and his father (the waltz *Loreley-Rhein-Klänge* op.154). He also gave the premières of four of his own compositions, *Sinngedichte*, *Debut-Quadrille*, *Herzenslust* and *Gunst-Werber*, published in 1845 as opp.1–4. The press was unanimous in its praise for the young Strauss and his music, the critic for *Der Wanderer* (17 October 1844) perspicaciously predicting: 'Strauss's name will be worthily continued in his son; children and children's children can look forward to the future, and three-quarter time will find a strong footing in him'.

Despite such plaudits, the younger Johann was unable to consolidate this initial success in his native city until after his father's death in September 1849, when he merged his own orchestra with that of his father and the managements of the various entertainment establishments gradually transferred their contracts from father to son. Until then, particularly during the busy Vienna Carnival period, Johann (ii) was sometimes forced to seek work with his orchestra further afield: in 1846 they travelled to Graz, Ungarisch-Altenburg and Pest-Ofen (from 1872 known as Budapest) while in 1847–8 they undertook a six-month tour through Hungary and Transylvania to Bucharest and Wallachia.

2. *Johann Strauss (ii), c1863*

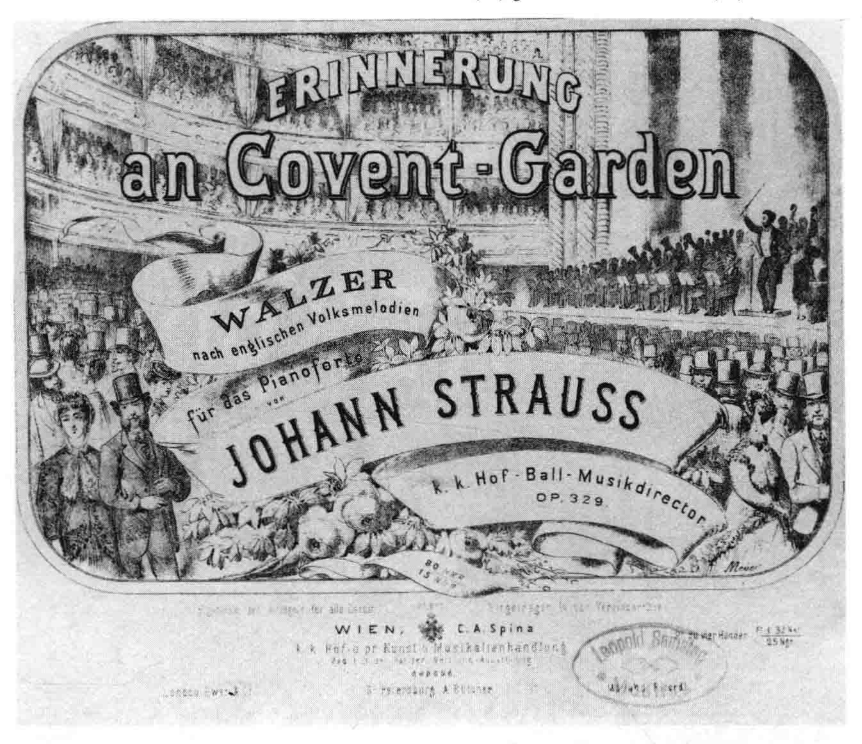
The first manifestations of official recognition for the future 'Waltz King' came in 1845 when he was offered the honorary position of Bandmaster of the 2nd Vienna Citizens' Regiment, a post more social than military. His father was at this time Bandmaster for the 1st Vienna Citizens' Regiment. 1847 marked the beginning of the younger Johann's long and fruitful association with the influential Wiener Männergesang-Verein (Vienna Men's Choral Association) when he dedicated to it his purely orchestral waltz *Sängerfahrten* op.41. He later wrote nine choral compositions for them, including the waltzes *An der schönen, blauen Donau* op.314 (1867), *Wein, Weib und Gesang!* op.333 (1869) and *Bei uns z'Haus* op.361 (1873).

During the 1848 Vienna Revolution Johann showed his support for the revolutionary elements in the capital by composing such pieces as the *Revolutions-Marsch* op.54 and performing *La Marseillaise*, actions which rendered him persona non grata in court circles. He was interrogated by the police for this provocative behaviour, but the case against him was apparently dismissed. Realizing his *faux pas* was proving prejudicial to his career, Johann switched his allegiance and exploited every opportunity to ingratiate himself with the new young Austrian Emperor, Franz Joseph (for example with *Kaiser Franz Joseph-Marsch* op.67 and *Kaiser Franz Josef I. Rettungs-Jubel-Marsch* op.126), though initially petitioned in vain to be permitted to conduct ball music at the imperial court. Indeed, so entrenched was opposition



to the young Kapellmeister that not until 1863 was he granted the title of *k.k. Hofballmusik-Direktor* in succession to his father. He was granted his release from the functional duties of this post in 1871 'on the grounds of ill health', whereupon the title passed in 1872 to his brother Eduard.

The earliest of Strauss's master waltzes is *Liebes-Lieder* op.114 of 1852, a work praised by the usually austere music critic of the *Wiener Zeitung*, Eduard Hanslick. By this time there was widespread recognition of Strauss's talents, and the *Allgemeine Wiener Theaterzeitung* (27 May 1852) commented significantly: 'It now turns out for certain that Strauss Father has been fully replaced by Strauss Son'.



The constant physical and mental demands upon Strauss resulted in his suffering a severe nervous breakdown in 1853. On doctors' advice, that summer he undertook a seven-week rest cure in the country, while relinquishing direction of the Strauss Orchestra to his reticent younger brother, Josef. He made further recuperative trips to Bad Gastein in 1854 and 1855, probably during the last of which he reached agreement with the management of the Tsarskoye-Selo Railway Company of St Petersburg for him to conduct the summer concert season at the Vauxhall Pavilion at Pavlovsk in 1856. So successful and mutually lucrative was this venture that Strauss returned every year until 1865. Many of his most evergreen compositions date from these visits, including the *Champagner-Polka* op.211, *Tritsch-Tratsch-Polka* op.214, *Egyptischer Marsch* op.335, *Im Krapfenwald'l: Polka française* op.336 and the *Pizzicato-Polka* (the latter composed jointly with Josef Strauss), while some works such as Johann's *Pavlovsk-Polka quasi Galopp*, *Kaiser-Alexander-Huldigungs-Marsch* and *Faust-Quadrille* saw publication only within Russia. Together with his brother Josef he undertook his final Pavlovsk season in 1869, while performances in 1886 at St Petersburg and Moscow and a single concert at Pavlovsk marked Johann's final visit to Russia.

The Viennese *Morgen-Post* newspaper (1 January 1855) described the 29-year-old Johann Strauss as 'a true beachcomber of world history', a pertinent observation of his shrewd commercial mind. Over the next 44 years, until his death at the age of 73, the composer rarely failed to commemorate in music any significant social, cultural, technological or political event in Vienna, in the Habsburg Empire or, indeed, elsewhere in Europe. Like his brother Eduard, he was also driven by a passion to accumulate for himself an awe-inspiring array of medals, decorations and honours from the world's sovereigns; the titles and dedicatees of his compositions may be viewed as a musically-illustrated guide to about 50 years of European history.

Johann, together with Josef Strauss, held sway over Vienna's dance-music scene from the late 1850s until the latter's death in 1870. Demand for their services reached a peak during the annual carnival 'campaign', when they were expected to compose dedications for the great corporation balls and those of the various faculties at Vienna University. During much of this time which, significantly, coincided with Johann's most fruitful period as a dance music composer (manifested especially in his waltzes *Reiseabenteuer* op.227, *Accellerationen* op.234, *Morgenblätter* op.279, *An der schönen, blauen Donau* op.314, *Künstler-Leben* op.316, *Geschichten aus dem Wienerwald* op.325 and *Wein, Weib und Gesang!* op.333), the brothers engaged in fraternal rivalry, each responding to a master work by the other with one of his own. By the mid-1860s Johann had established himself as Europe's leading composer of dance music. Although he did not travel with the same frequency as his father and actively avoided it whenever possible, he made important appearances in Paris (most significantly in 1867 when, *inter alia*, he performed at the Austrian Embassy Ball, an

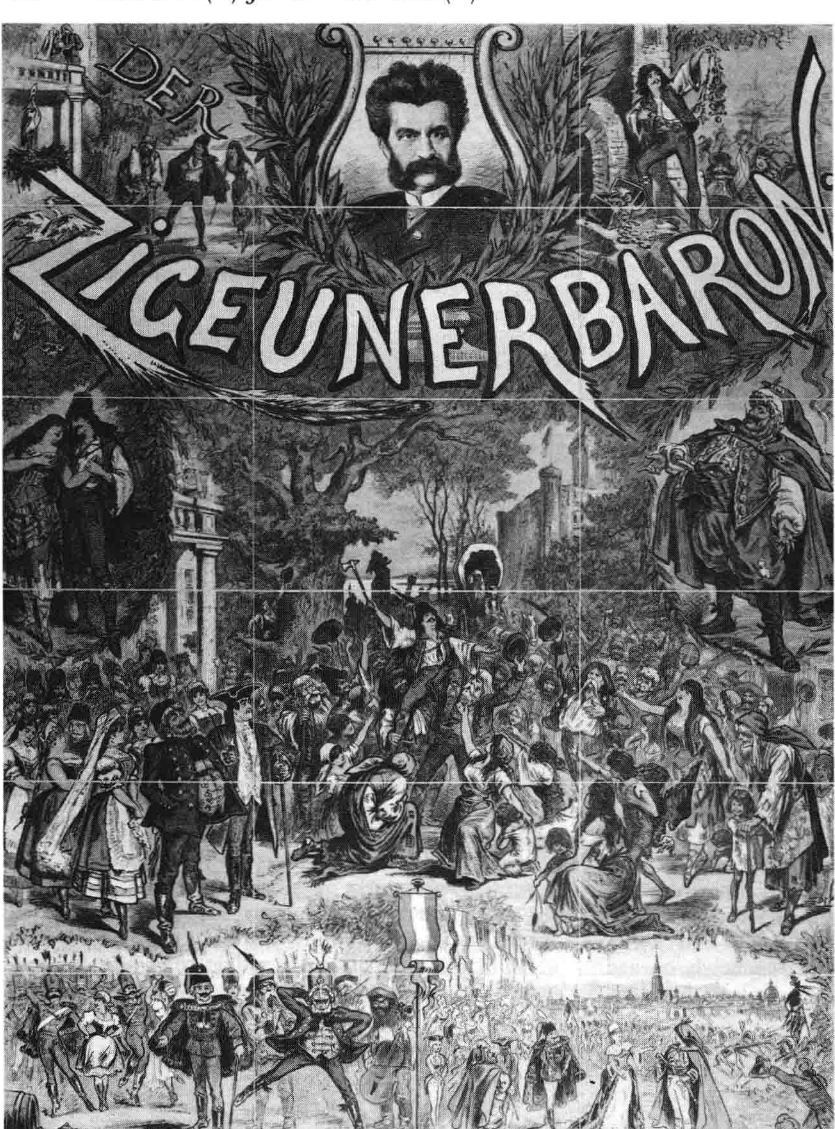
4. Title-page of the piano edition of Johann Strauss (ii)'s waltzes 'Erinnerung an Covent-Garden' op.329 (Vienna: Spina, 1868)



event which helped popularize *An der schönen, blauen Donau* outside Vienna), London (conducting at all 63 promenade concerts at the Royal Italian Opera House in 1867, recollected by his waltz *Erinnerung an Covent-Garden* op.329; see fig.4), Boston (in 1872 playing at the World's Peace Jubilee and International Musical Festival, followed by appearances in New York) and Berlin (conducting a series of concerts at the newly-opened Königsbau concert hall, during which he introduced his *Kaiser-Walzer* op.437).

Strauss staunchly championed the music of Liszt and Wagner, and when in 1853 and 1854 he introduced the 'futuristic' instrumental styles of these composers into his waltzes such as *Wellen und Wogen* op.141, *Novellen* op.146 and *Schallwellen* op.148, Eduard Hanslick dismissed the results as 'new waltz requiems' (*Wiener Zeitung*, 6 November 1854). Significantly, Johann and Josef Strauss were the first musicians in Vienna to feature extracts from Wagner's operas in their concerts, while Verdi, who was initially much reviled in Vienna, found eager protagonists in the pre-eminent figures of Johann Strauss and the Austrian Emperor Franz Joseph I. Arrangements of Verdi's music frequently figured in the programmes of the Strauss Orchestra, while three of Johann's quadrilles (*Melodien-Quadrille* op.112, *Neue Melodien-Quadrille* op.254 and *Un ballo in maschera*, op.272) present thematic material from Verdi's stage works. It is not surprising that the Italian master later said of Johann: 'I honour him as one of my most gifted colleagues'. Strauss's innate skill at instrumentation as well as his lifelong genius for melodic invention drew the praise of composers such as Brahms, Hans von Bulow, Leoncavallo, Anton Rubinstein, Richard Strauss, Verdi and Wagner. Indeed Brahms, who was by no means always an uncritical admirer of his friend, remarked to Hanslick at the première of the operetta *Waldmeister* (1895) that Strauss's 'splendid' orchestration reminded him of Mozart.

During the late 1850s and 60s, the directors of Vienna's musical theatres became uneasy at the dominance of the imported stage works of Jacques Offenbach, and also at the exorbitant cost of acquiring the rights to them. They turned, naturally, to Strauss as the one popular composer of sufficient international standing to mount a home-grown counter-attack. On the advice of his first wife, the

6. Poster by J. Weiner for Johann Strauss (ii)'s 'Der Zigeunerbaron', Theater an der Wien, Vienna, 1885

theatrically-astute mezzo-soprano Henriette ('Jetty') Treffz, Johann began experimenting with the composition of operetta during the mid-1860s, but it was not until 1871 that a stage work of his, *Indigo und die vierzig Räuber*, was produced. Though a box-office success, the work received mixed critical reviews; Ludwig Speidel (*Fremden-Blatt*, 12 February 1871) considered the piece 'promises the most splendid expectations for the future', while Hanslick (*Neue Freie Presse*, 12 February 1871) dismissed it as 'Strauss dance music with words added and ascribed rôles'.

Certainly Strauss was no judge of librettos and throughout his life he found it both cumbersome and restricting to compose to prescribed texts, though with *Der Zigeunerbaron* (1885) he showed himself uncharacteristically adept in this. Over the next quarter of a century a further 14 operettas and even a grand opera (*Ritter Pásmán*, 1892) cemented Strauss's position as the leading light in 'Silver Age' Viennese operetta, though even in the composer's lifetime only three of these found international success: *Die Fledermaus* (1874), *Eine Nacht in Venedig* (1883) and *Der Zigeunerbaron*. Even after defecting to the camp of the operetta composers, the shrewd Strauss maintained a presence in the ballrooms and bandstands of the world by arranging the melodies from his stage works into orchestral dances and marches, some of which (such as the Schnell-Polka *Auf der Jagd* op.373, *Banditen-Galopp* op.378, the waltz *Rosen aus dem Süden* op.388, and the *Kuss-Walzer* op.400) have achieved lives of their own long after the operettas which gave rise to them had long since vanished from the theatre repertory. With his unfinished ballet *Aschenbrödel* (1901), commenced shortly before his death, he was unfettered by textual restrictions and was once more able to give free rein to his genius for dance music.

Strauss was married three times; first to Jetty Treffz (1818–78) then, after her death, to the actress Angelika ('Lili') Dittrich (1850–1919) and finally to Adèle Strauss (née Deutsch, 1856–1930). Strauss and Lili were granted a civil divorce in 1882 after four-and-a-half years of

marriage, but papal consent to their divorce was withheld. Through the personal intervention of Duke Ernst II of Saxe-Coburg and Gotha (brother of Prince Albert, consort of Queen Victoria), Strauss was required to convert to Lutheran Protestantism (as did Adèle, a Jewess), relinquish his Austrian citizenship and enrol 'on the nationality register of the dukedom of Saxe-Coburg-Gotha, and into the citizenship of the city of Coburg'. Strauss's marriage to Lili was finally dissolved by Duke Ernst in July 1887 and the following month Strauss married Adèle in Coburg. The composer chivalrously immortalized each of his wives in musical dedications: Jetty (the *Bluette-Polka Française* op.271, 1862), Lili (*Kuss-Walzer* op.400, 1882) and Adèle (*Adelen-Walzer* op.424, 1886).

Responding to an official toast made to him during 1894, his golden jubilee year as a composer and conductor, Johann Strauss said:

> The distinctions which you bestow upon me today I owe to my predecessors, my father and [Joseph] Lanner. They indicated to me the means by which progress is possible, through the broadening of the forms, and that is my single small contribution.

With these words the composer openly acknowledged that the fundamental structure of the Viennese waltz had been developed, expanded and formalized by the elder Strauss and Lanner from its origins in the unsophisticated rural dances of, chiefly, Upper Austria, Styria and southern Germany, including the Ländler, Steirer, Dreher, Spinner and Weller. The standard form for the earliest waltzes of Strauss (i) and Lanner had been a chain (or set) of seven or eight unrelated waltzes without introduction or coda. In addition, each bipartite waltz section comprised eight bars, except for a final section that was extended to 16 bars, and each waltz was clearly set apart from the next by the numbering. Later, the individual waltz sections were increasingly of 16-bar rather than eight-bar length.

Further developments saw the number of waltzes in a set reduced to five or six, with the addition of a brief, sometimes descriptive, introduction and a rudimentary coda recapitulating the main themes. Strauss (ii) extended the form, providing greater coherence to each composition; the introduction was developed, in some cases, such as op.333, providing almost symphonic music, and the waltz themes themselves were expanded melodically and harmonically to produce a seemingly homogenous entity. The coda, too, was lengthened in order to give balance to the whole. His study of contemporary classical composers enhanced his masterly orchestrations, inspiring Brahms to remark in 1887 that 'there is now no one who is as sure as he is in such matters'. Thus, together with Josef Strauss and others, the younger Johann built upon those early foundations, eventually elevating the classical Viennese waltz to the point where it became as much a feature of the concert hall as the dance floor. Yet, as early as 1860, in an article for the theatrical newspaper *Der Zwischen-Akt* (6 June 1860), the critic Eugène Eiserle had made a trenchant observation as to where the 'magic' of Johann Strauss's richly melodic and unceasingly inventive dance tunes lay:

> What makes Strauss's compositions even more attractive is the careful, inspired and bold development and charming instrumentation ... He is a master of musical effect, and knows how to exploit it with nobility and fine taste. In a word, he has become the reformer of dance music.

WORKS

unless otherwise stated, all printed works were published in Vienna for piano solo in year of first performance; where published, titles shown as on cover of first piano edition; most compositions also published for piano 4 hands, violin and piano and orch

for complete arrangements and MS details, see Weinmann (1956); principal MS sources are A-Wgm, Wn, Wph, Wst, Wweinmann, Wiener Konzerthausgesellschaft

Transcrs. for orch of music by other composers

(3) **Josef** [Joseph] **Strauss** (*b* Vienna, 20 Aug 1827; *d* Vienna, 22 July 1870). Composer, conductor and violinist, second son of (1) Johann Strauss (i). After completing courses in technical drawing and mathematics at Vienna's Polytechnic Institute, simultaneously complementing his studies with private tuition in landscape, ornamental and figure-drawing at the Academy of Fine Arts, he defied his father's wish that he should enter the military and embarked first upon a successful career as an architect and mechanical engineer. An all-rounder, he published two books on mathematical subjects, invented a street-cleaning machine (later adopted by the municipality of Vienna), wrote an anthology of poems and a five-act drama, *Rober*, for which he wrote the text, visualized the settings, and provided sketches of the characters, costumes and scenery. He also composed a few unpublished songs (some to his own texts) and piano pieces, possessed a fine bass voice and was a virtuoso pianist. When his brother Johann was taken seriously ill in 1853, a reluctant Josef agreed to deputize as conductor of the Strauss Orchestra on a strictly interim basis. He made his conducting début at a soirée in the 'Sperl' dance-hall on 23 July 1853, conducting with the baton rather than the violin bow, a challenge to his confidence he did not overcome until 23 April 1856. Josef also had to deputize for his brother as a composer by writing the traditional new piece for the parish festival in the Viennese suburb of Hernals on 29 August 1853, and to which he gave the significant title *Die Ersten und Letzten*. This waltz, his op.1, had to be repeated six times, and *Der Wanderer* (30 August 1853) voiced the opinion of the majority:

> Josef Strauss is a decided musical talent, for whom it would be a pity if he were to withdraw again so soon from public activity. His waltz is brimming with freshness and vitality, and also with that electricity which appears to be the sole preserve of the Strauss family. The instrumentation is so brilliant and effective that you think that you are dealing with a complete master.... The tumultuous applause and the unremitting desire for repetitions on the part of the numerous public, will doubtless soon encourage Herr Josef Strauss to write a new composition.

Upon Johann's return to Vienna in mid-September 1853 Josef retreated from the limelight; he underwent violin instruction with Franz Amon, Johann's teacher, and much later studied thoroughbass and composition with the music-school proprietor Franz Dolleschall. He only resumed direction of the Strauss Orchestra at the beginning of June 1854 when Johann departed for a further rest-cure at Gastein. A new waltz written during this period, *Die Ersten nach den Letzten* op.12, hints at a degree of resignation to his changing lifestyle, but eye problems and persistent headaches – manifestations of probable congenital brain damage that was to hasten his demise – led him to withdraw again from professional engagements upon Johann's return at the end of that July. Yet, when Johann severely restricted Josef's engagements during carnival and spring of the following year, Josef called his brother's bluff by threatening to withdraw completely from the music scene. Johann relented and, until brother Eduard's début as a ball-music conductor in 1861, Johann and Josef shared the direction of the Strauss Orchestra. From 1862 all three brothers participated in leadership of the orchestra, until the following year when Johann was appointed *k.k. Hofballmusik-Direktor* and deliberately restricted his conducting activities in Vienna. When Josef replaced the malingering Johann in Pavlovsk in 1862, the latter promised to organize Russian engagements for his brother during 1863 and 1864, though later signed the contracts for himself. Both brothers shared the conducting in Pavlovsk during the 1869 season, jointly composing the *Pizzicato-Polka* there. On 17 April 1870, Josef gave a final concert in Vienna before travelling to Warsaw to give a season of concerts. A cerebral attack during the playing of his unpublished potpourri *Musikalisches Feuilleton* on 1 June resulted in his collapse at the podium, and he was carried off unconscious. He was brought back to Vienna on 17 July and died there five days later. His wife vehemently refused an autopsy and it can only be presumed that Josef died from the bursting of a brain tumour.

From 1856 Josef began a systematic and significant extension of the Strauss Orchestra's concert repertory by

7. *Josef Strauss*

including the sometimes 'futuristic' music of contemporary operatic composers, especially that of Richard Wagner. As early as March 1853, Johann Strauss (ii) had been the first in Vienna to feature extracts from Wagner's operas in his concerts, presenting music from *Tannhäuser* and *Lohengrin*, long before the operas' respective Viennese premières. Now Josef made a point of introducing extracts from *Tristan und Isolde*, *Das Rheingold* and *Die Meistersinger von Nürnberg*, even before the works' world premières. Wagner himself attended a concert of Josef's arrangements of music from *Tristan und Isolde* in 1861, and later expressed his approval. It was Josef, too, who conducted the first Viennese performance of Liszt's tone-poem *Mazeppa* in 1856.

Josef married his childhood sweetheart, Karoline Josefa Pruckmayer (1831–1900), on 8 June 1857, and their only child, Karoline Anna (1858–1919), was born the following March. His wedding present to his wife, the inspired concert waltz *Perlen der Liebe* op.39, notable for its Wagnerian influences, is remarkable for its conception and power, surpassing anything brother Johann had yet created. It was, moreover, early evidence of Josef's superior craftsmanship and indicated his future development as a more profound and cultivated musician. A great many of his melodies are cast in minor keys, imbuing them with a melancholic charm which differentiates them from the music of his father and brothers. The unpublished and now lost romance *An die Hoffnung* (1865) drew from Johann an insight into the very nature of Josef's Muse (undated note [5/6 May 1894] to Eduard Strauss):

> As far as sensitivity is concerned, Josef's An die Hoffnung is a pearl of the highest order. His whole being – his melancholy lies within it. What are Mascagni, Leoncavallo, Smareglia, compared to this simple, natural expression of feeling. One does not always have to have studied counterpoint in order to write a piece of music that speaks to the heart. Genius can work on the heart and mind by simpler means, and then more is achieved than the musical mathematician can do by using all his craft.

While Josef Strauss's strength lay principally in imbuing the slower dance forms, like the waltz (e.g. opp.178, 184, 222, 232, 235, 249, 254, 258, 275, 277 and 279) and the polka-mazurka (e.g. opp.73, 129, 166, 183, 215, 229 and 270) with heart-touching melodies and inspired orchestrations, when occasion demanded this 'Schubert of the ballroom' could also be just as ebullient as his brothers and produced a string of breezy quick polkas (e.g. opp.76, 127, 161, 193, 230, 240, 253 and 271). His marches, like those by his brothers, are more sprightly and dance-like than martial and have much to commend them.

He left some 300 original dances and marches and more than 500 unpublished arrangements of music by other composers, including Mendelssohn, Schumann, Beethoven, Liszt and Wagner. (Virtually all these arrangements were later burnt by Eduard Strauss, along with those made by himself and Johann Strauss (i).) With Josef Strauss, more than with any other member of his family, one is left to surmise the direction in which his music might have developed had he not been shackled by the commercial constraints of writing popular dance music. In 1869 Josef notified his wife: 'As I do not want to practise the trade of a beer-fiddler for ever, I am turning to other kinds of composition', while the *Morgen-Post* (24 July 1870), in its obituary for the composer, noted that 'he died before he could realize the most precious ambition of his life – the composition of a grand romantic opera'. The fate of an operetta Josef allegedly wrote has never been established.

WORKS

published in Vienna in year of first performance, unless otherwise stated; dances and marches first published for piano solo and titles shown as on cover of first piano edition, most also published for violin and piano and for orchestra

(4) Eduard Strauss (i) (*b* Vienna, 15 March 1835; *d* Vienna, 28 Dec 1916). Composer, conductor andviolinist, youngest son of (1) Johann Strauss (i). After primary school, he attended the Vienna Akademische Gymnasium (1846–52). A gifted linguist in classical and modern languages, he planned a future with the Austrian consular service, but subsequently withdrew his candidature from the Oriental Academy and resigned himself to the inevitable. 'Just as Josef had let himself be swayed, so Johann was able to influence me, too, into following in his footsteps', Eduard wrote in his family biography (*Erinnerungen*, Vienna, 1906). Alongside studies in musical theory (under Gottfried Preyer), violin (Franz Amon) and piano, he also received instruction in the harp (Antonio Zamara). He made his début on 11 February 1855 with the Strauss Orchestra, featured as one of two harpists in the first public performance of brother (2) Johann's waltz *Glossen* op.163, but self-confessed nervousness later robbed him of a post as harpist with a German court-theatre. Encouraged by Johann, Eduard made his début as ball-music conductor with the Strauss Orchestra in the Sofienbad-Saal on 5 February 1861. After his first appearance as a conductor of concerts in the Wintergarten of the Dianabad-Saal on 6 April of the following year, the Viennese theatrical journal *Der Zwischen-Akt* (7 February 1862) noted:

> Eduard Strauss, who involuntarily recalls Strauss Father in his demeanour, was greeted with thunderous applause upon his appearance at the side of his brother [Johann], and presented with rare agility and self-confidence all the waltzes composed during this season by Johann Strauss. His directing proved that we have in him a conductor of equal rank. Long live the Strauss trinity!

Eduard's arrival in the family music business was timely. When Josef hurriedly left Vienna in 1862 to relieve the apparently ailing Johann in Pavlovsk, he could leave the Strauss Orchestra in Eduard's capable hands. Yet, for reasons which are unclear, Eduard was not a success when he conducted the first half of the Pavlovsk season in 1865, and he received no return engagement. A bitter disagreement with his brothers in autumn 1869 over the choice of winter venue for the Strauss Orchestra's concerts almost led Eduard to resign and withdraw into private life; the issue was only resolved through the intervention of mother Anna Strauss and the drafting of a contract by Josef, defining the business relationships between the brothers. With Josef Strauss's death and Johann's increasing preoccupation with stage composition, direction of the Strauss Orchestra passed to Eduard. It remained in his sole charge until 13 February 1901, when he disbanded it in New York after a three-month tour of North America comprising 229 concerts and balls in 132 towns and necessitating journeys along thousands of kilometres of railway as well as 20 days of sea travel. A martinet with his musicians, he later calculated that in 23 years of touring with his orchestra he visited '840 towns in two continents and gave concerts at 14 exhibitions'. Eduard made three visits to London (1885, 1895 and 1897) and played before Queen Victoria at Buckingham Palace and Windsor Castle. Travels further afield took him to America (1890 and 1901) and Russia (1894), while plans for Tchaikovsky to conduct the Strauss Orchestra in Vienna apparently only foundered upon the Russian composer's death in 1893.

Vienna's musical life witnessed an innovation on 13 March 1870 when 'Josef and Eduard Strauss, with the assistance of Johann Strauss' (as the advertisement read) organized their first Sunday afternoon concert in the Goldene Saal of the recently-opened Musikverein building, the new home of the Gesellschaft der Musikfreunde. There had been many voices raised against the appearance of the Strauss brothers in the Musikverein, for it was felt that the playing of dance music in such surroundings was a 'desecration' of the house. Despite this, the concert was oversubscribed and the widespread recognition of its artistic excellence led to the Strauss Orchestra giving regular Sunday concerts in the hall. Under Eduard, these musical events took place every Sunday afternoon from October to March or April and soon established themselves as a 'tradition' that was to continue for 30 years. A typical programme would present Strauss family orchestral compositions (including the first performance of many pieces by Johann based on themes from his latest stage works) alongside more serious fare by composers including Bizet, Flotow, Grieg, Kretschmer, Liszt, Mascagni, Mendelssohn, Mozart, Paderewski, Rossini, Rubinstein,

8. Eduard Strauss during his first London visit: caricature by Linley Sambourne from 'Punch' (20 June 1885)

Schumann, Tchaikovsky, Thomas, Vieuxtemps, Wagner and Weber. In addition, Eduard made some 200 orchestral transcriptions of music by other composers, the majority of these arrangements being performed at these concerts in the Musikverein.

Eduard held the title of *k.k. Hofballmusik-Direktor* from 1872 until 1901. After retiring from public life in March 1901 he maintained a critical eye on the Viennese musical scene, and even published a detailed list of orchestral material in the Strauss Orchestra's archive (*Concert-Repertoire der bestandenen Kapelle des Eduard Strauss*, Vienna, 1901). Embittered by alienation from his family and by his eldest son's much-publicized bankruptcy, in October 1907 he destroyed the Strauss Orchestra's musical archive in acts of artistic desecration. His own transcriptions of music from the operatic and symphonic repertories were also among the casualties of these fires. After several bouts of illness, he died from a heart attack on 28 December 1916. He left a wife, Maria Magdalena (née Klenkhart, 1840–1921) and two sons, (5) Johann Maria Eduard (1866–1939) and Josef Eduard Anna (a garage proprietor, 1868–1940).

Eduard's first compositions appeared from Carl Haslinger's publishing house in spring 1863, when his elder brothers were already universally recognized as the two leading writers of dance music. In consequence, from the outset his music was unjustly compared with his brothers', and by the time his compositional gifts were fully developed his dance pieces went unacknowledged because of the abundance of masterpieces by Johann and Josef. Eduard sometimes had difficulty finding publishers for his compositions, particularly during his later years, and a great many works remained unprinted. It was hardly an act of brotherly love when, on 1 April 1892, Johann warned his own publisher, Fritz Simrock, against issuing Eduard's music: 'Unfortunately, little can be done with his compositions. ... His compositions are not bad – but nobody buys them. If they were bought, then he'd not play me again. He plays me – because he needs me. That's how things are'.

9. *Eduard Strauss, c1890*

As a performing musician, 'stylish Edi' (as the Viennese dubbed him) had to yield hardly anything to Johann; as a composer, however, he remained in the shadow of his two brothers, even though many of his compositions, especially those dating from the 1870s and 80s, compared most favourably with those by Johann and Josef. He registered his first success in 1869 with the quick polka *Bahn frei!* op.45, a dance form he was to stamp with his own genius, such as in opp.70, 73, 86, 100, 108, 112, 132 and 168. His waltzes, too, with their imaginative use of countermelody, bear his unmistakable fingerprint (opp.75, 79, 101, 116, 126, 150, 161 and 200), the finest exuding a spirited optimism rarely heard in his brothers' waltzes. In common with Johann and Josef, Eduard orchestrated his own dance compositions. If pressed for time, all three brothers added coded instructions for their copyists, ensuring the resultant orchestrations were precisely as they had been conceived.

WORKS

published in Vienna in year of first performance, unless otherwise stated; dances and marches first published for piano solo and titles shown as on cover of first piano edition, most also published for violin and piano and for orchestra

principal MS sources: A-Wgm, Wn, Wph, Wst, Wweinmann, Wiener Konzerthausgesellschaft; for complete arrangement and MS and details, see Weinmann (1967)

Works of doubtful origin: Liebesknospen, W, op.168 [bis] (?Kassel, 1879); Boccaccio-Ma [on themes from Suppê's operetta], ?1879/80 (St Petersburg and Moscow, ?1879/80) [attrib. E. Strauss]

(5) Johann (Maria Eduard) Strauss (iii) (*b* Vienna, 16 Feb 1866; *d* Berlin-Schöneberg, 9 Jan 1939). Composer, conductor and violinist, eldest son of (4) Eduard Strauss (i). He was known variously as Johann Strauss (iii), Johann Strauss grandson and Johann Strauss junior. From the age of six he received instruction in the piano and violin, later studying musical theory under Professor Karl Nawratil. Upon matriculating (1884) from the Vienna Schottengymnasium, he studied law at Vienna University. In 1890 he entered the service of the Austrian Government and, after five years as an accounts official in the Ministry of Education and Instruction, was promoted to the position of chief. But, as he recalled in 1921:

> My father … decided that I should enter the government service. … But I had music in my blood, and I longed to get away from the prose of the public functionary. It was my paternal uncle, Johann, who especially understood my bent for music. He supervised my efforts as a composer, he even let me transcribe his own orchestral compositions for piano, and he encouraged my musical studies in every way.

While still employed by the ministry, his first and only operetta, *Katze und Maus* (1898), was produced. Though not a success, it provided the spur for him to embark upon a full-time musical career the following year. He made his conducting début with his own orchestra of 60 musicians at a masked ball in the Somossy Orfeum in Budapest (17 February 1900), for which he wrote and dedicated his *Budapester-Polka* op.26. Between May and October 1900 he consolidated the success of his début with a five-month tour through Germany and Holland with 42 of his players. His first appearance in Vienna, again directing his own orchestra, followed on 3 November that year at a festival concert in the Sofienbad-Saal in aid of the Lanner-Strauss Father Memorial Fund. From 1901 to 1906 he directed the music for the annual Hofball and Ball bei Hof at the Imperial Court in Vienna, though circumstances were to conspire against his receiving the title of *k.k. Hofballmusik-Direktor*. During this period he was also engaged for most of the élite balls of the annual Vienna Carnival. Misfortune dogged his early concert tours and in 1904 he was accused of bankruptcy through negligence. He was convicted in November 1906; the next year he moved with his family to Berlin, which became his operational base for the remainder of his life. To avoid conscription in Germany, he relocated to Vienna in October 1916, shortly before the death of his father, returning to Berlin in May 1918. With his musicians he undertook extensive tours of Europe until the outbreak of World War I, whereupon he disbanded his orchestra and thereafter appeared mainly as guest conductor. He claimed to have conducted 187 orchestras in Germany alone between 1921 and 1925, made two tours of America

(1934 and 1937) and visited Great Britain in 1902, 1927, 1928 and 1931. He never wavered in his belief in the waltz as the ideal dance, and was convinced that the popularity of jazz, which he abhorred, was a passing phase. In 1909, by which time he had been a recording artist for some seven years, he was invited by the National Phonograph Company to act as supervisor and conductor in the making of German selections of Edison Records at the Berlin recording department of the company; as such he acted in a similar capacity to that of Victor Herbert in America. His recording career, especially on cylinders, was prolific and, spanning some 30 years, was by no means confined to his own family's music. Regrettably, he recorded only four of his own compositions: the waltzes *Gruss aus Wien* op.24 and *Dem Muthigen gehört die Welt* op.25, the march *Mit vereinten Kräften* op.29 and *Im Galopp* op.34. He made his final concert appearance on 26 December 1938, conducting the Dresden Philharmonic and died in Berlin on 9 January 1939 while preparing further touring plans. He was the only musician of the Strauss dynasty to be decorated by the British royal family, having in 1903 been made a member of the Royal Victorian Order by King Edward VII (for whose coronation with Queen Alexandra in 1902 he wrote his *Krönungs-Walzer* op.40). He left a wife, Maria Emilie Karoline (née Hofer, 1867–1939), a son, Johann Eduard Maria (1895–1972), and two daughters, Maria Pauline Anna (1900–86) and Angelica Maria Pauline (1901–79).

More noted as an interpreter of his family's works, Johann Strauss (iii) nevertheless composed about 70 dances and marches, only 26 of which were published. (The existence of his op.40 is misleading: opp.11–23 remained unallocated.) Unlike his forebears, he was unskilled in instrumentation and relied, in this respect, upon the composer and military musician Adolf Ischpold. Johann's waltzes (for example, opp.1, 25, 30, 33, 38 and 40) particularly reflect the more 'modern' style and orchestrations of 'Silver Age' composers like Franz Lehár, while his galops and quick polkas such as opp.6, 27, and 34 reveal that he inherited his own father's verve and panache.

WORKS

printed works published in Vienna in year of first performance, unless otherwise stated; dances and marches first published for piano solo and titles shown as on cover of first piano edition, most also published for full and reduced orchestra

Stage: Katze und Maus (Operette, 3, F. Gross and V. Léon, after E. Scribe: *Bataille de dames*), Vienna, An der Wien, 23 Dec 1898 (1899) [opp.1–9 based on melodies from the operetta issued separately]

Waltzes: Sylvianen-Walzer, op.1, 1898; Leonie-Walzer, op.2, 1898; Gruss aus Wien (Salut de vienne), op.24, 1900 (Leipzig, 1900); Dem Muthigen gehört die Welt (La chance aux audacieux), op.25, 1900 (Leipzig, 1900); Unter den Linden (Sous les tilleuls), op.30, 1900 (Leipzig, 1900); Die Schlittschuhläuferin (La patineuse), op.31, 1901 (Leipzig, 1901); Wiener Weisen (Airs Viennois), op.32, 1901 (Leipzig, 1901); Mariana Valse, op.33, 1901 (Leipzig, 1901); In der Blütezeit (La floraison), op.36, 1902 (Leipzig, ?1902); Dichterliebe (Dichterminne, Amour du poëte), op.38, 1903 (Leipzig, 1903); Wilhelminen-Walzer, op.39, 1901 (Leipzig, ?1902); Krönungs-Walzer (Couronnement), op.40, 1902 (Leipzig, 1902)

Polkas, galops and mazurkas: Comme il faut, polka française, op.3, ?1898 (1898); Empire, Polka-mazurka, op.5, ?1898 (1898); Schlau-Schlau, Polka schnell, op.6, 1899 (1898); Budapester-Polka, op.26, 1900 (Leipzig, 1900); Frisch durch's Leben (A travers la vie), Galop, op.27, 1900 (Leipzig, 1900); Rosige Laune (De bonne humeur), Mazurka, op.28, 1900 (Leipzig, 1900); Im Galopp (Au Galop), Galop, op.34, 1901 (Leipzig, 1901); Ludmilla-Mazurka, op.35, ?1901 (Leipzig, ?1901); Mit freudigen Herzen (De coeur joyeux), Polka, op.37, ?1902 (Leipzig, ?1902)

Marches: Dragoner-Marsch, op.7, 1898; Mit vereinten Kräften (Union fait la force), op.29, 1900 (Leipzig, 1900)

Other works: Katze und Maus-Quadrille, op.8, ?1898 (1898); Rococo-Gavotte, op.4, ?1898 (1898); Musette, op.9, 1899

Unpub. MSS: Lob der Heimat (J. Weinheber), Walzer, male chorus, 1936

Unpubd. and lost works: Ball-Express, Polka schnell, 1901; Burschenblut, Polka schnell, 1901; Faschingsgrüsse, Walzer, 1901; Heitere Stunden, Polka-mazurka, 1901; Jubiläumstänze, Walzer, 1901; Letztes Läuten, Polka schnell, 1901; Neueste Depesche, polka française, 1901; Redactions-Geheimnisse, Walzer, 1901; Concordia-Album, Walzer, 1902; Fest-Marsch, 1902; Investitions-Galop, 1902; Prufungsgefühle, Polka schnell, 1902; Unter den Arcaden, Walzer, 1902; Von der Donau bis [zur] Oder, Walzer, 1902; Ausgleichsklänge, Walzer, 1903; Beim Wetter-häuschen, Walzer, 1903; Froh durch das Leben, Polka schnell [?op.27], 1903; Reporter-Polka-schnell, 1903; Ein Strauss von Strauss, potpourri, 1904; Elektra, Walzer, 1904; Feuilleton, polka française, 1904; Rathausballtänze, Walzer, 1904; Dichterträume, Walzer, 1905; Im Rathauskeller, Walzer, 1905; Walzer, 1905 [for J. Strauss (iii)'s concert academy in the Sofiensaal]; Walzer, 1905 [for the academy and ball of the 'Treue'-Verein]; Feuilleton, Walzer, 1905; Operetten-Revue, Quadrille, 1906; Paragraph 19, Polka schnell, 1906; Stadtgespräche, Walzer, 1906; Gruss an Wien, Walzer, 1921

(6) Eduard (Leopold Maria) Strauss (ii) (*b* Vienna, 24 March 1910; *d* Vienna, 6 April 1969). Conductor; grandson of (4) Eduard (i) and nephew of (5) Johann (iii). He learnt the piano, horn and singing, privately and at the Vienna Music Academy. He was an accompanist at the Auer-Weissgerber private singing school in Vienna, then in 1939 enlisted for military service. From 1946 to 1956 he worked as a teacher and répétiteur in Alfred Jerger's opera class at the Vienna Conservatory, where he met his future wife, the Polish-born soprano Elisabeth Pontes (*b* 1919). He made his public conducting début in Vienna in 1949, although, not being a violinist, he conducted with a baton. His good looks, self-effacing manner and the elegance he brought to his interpretations of music by the Strauss family and composers such as Mozart and Schubert won him great popularity. International tours took him to Manila, Seoul, Moscow, Cairo, Paris, London, Athens, Gothenburg and Warsaw. Of greatest significance were the six tours of Japan he made between 1956 and 1967 with the Tokyo SO, which helped spread the popularity of western classical and light-classical music in that country. In 1966 he became founder-conductor of the Vienna Johann Strauss Orchestra, with which he made a highly successful tour of Canada and the USA. His final public engagement was on 19 January 1969 at the Namur Festival, Belgium. He died suddenly in Vienna on Easter Sunday of that year. He left a rich heritage of recordings with numerous orchestras, by which to assess his stylish interpretations of his family's music (for example, *Johann Strauss Première*, Philips, 1961; *Eduard Strauss Conducts the Unknown Johann Strauss*, Turnabout, 1969). His only son, Dr Eduard Strauss (*b* 1955), sang with the renowned Wiener Männergesang-verein for several years and is a judge in Vienna.

PETER KEMP

Strauss, Isaac (*b* Strasbourg, 2 June 1806; *d* Paris, 9 Aug 1888). French conductor, composer and violinist. He was already an accomplished violinist in 1826 when he entered the Paris Conservatoire. In 1828 he was a co-founder of the Société des Concerts du Conservatoire and shortly thereafter began a 15-year engagement as violinist at the Théâtre Italien. He became known as a composer of dance music and conductor of instrumental ensembles at court and noble functions, and in 1852 he replaced Musard as music director of the court balls; he held this post until 1870 and then became director of the opera balls until 1872. He also conducted the spa orchestra in

Vichy (1843–63), where his luxurious villa was used as a residence by the emperor and empress in the summers of 1861 and 1862. In his later years he was a generous benefactor to old and needy musicians. His large art and archaeological collection (he was something of an expert, and was on the Commission de l'art ancien at the Expositions universelles of 1867 and 1878) is in the Salle Strauss of the Musée des Thermes (Cluny), Paris.

Strauss's vast output of waltzes, polkas, galops and quadrilles achieved considerable popularity in his day. Some of the works bear titles identical with those of pieces by Johann Strauss (i), and the omission of Isaac's first name from the title-pages of piano editions caused some of his works, such as the set of waltzes *Le diamant*, to be falsely attributed to the Viennese Strauss.

MAX SCHÖNHERR/CORMAC NEWARK

Strauss, Richard (Georg) (*b* Munich, 11 June 1864; *d* Garmisch-Partenkirchen, 8 Sept 1949). German composer and conductor. He emerged soon after the deaths of Wagner and Brahms as the most important living German composer. During an artistic career which spanned nearly eight decades, he composed in virtually all musical genres, but became best known for his tone poems (which were composed during the closing years of the 19th century) and his operas (from the early decades of the 20th). Coming of age as a composer at a time when the duality of bourgeois and artist had become increasingly problematic, Strauss negotiated the worlds of art and society with a remarkable combination of candour and irony. Averse to the metaphysics of Wagner and indifferent to Mahler's philosophical intentions in music, Strauss exploited instead the paradoxes, inconsistencies and potential profundities to be found in modern, everyday life. The new possibilities he envisioned for music were exemplified in the eclecticism of the opera *Der Rosenkavalier*, in which the juxtaposition of contemporary with intentionally anachronistic elements creates a stylistic pluralism that adumbrates subsequent experimentation by composers of the later 20th century.

1. CHILDHOOD AND EARLY CAREER, 1864–85. Strauss was the first of two children born to Franz Strauss (1822–1905), principal horn player in the Munich court orchestra, and Josephine Pschorr Strauss (1837–1910), daughter of Georg Pschorr, a wealthy Munich brewer. Franz Strauss was a superb musician (the 'Joachim of the horn', according to Hans von Bülow) whose brilliance was equalled by his dogged tenacity. These characteristics took him from lowly illegitimacy to the rank of professor at the Königliche Musikschule in 1871, and to that of *Kammermusiker* of the Bavarian court two years later. The same dual hallmarks of genius and diligence were to leave their imprint on the musical personality of his son.

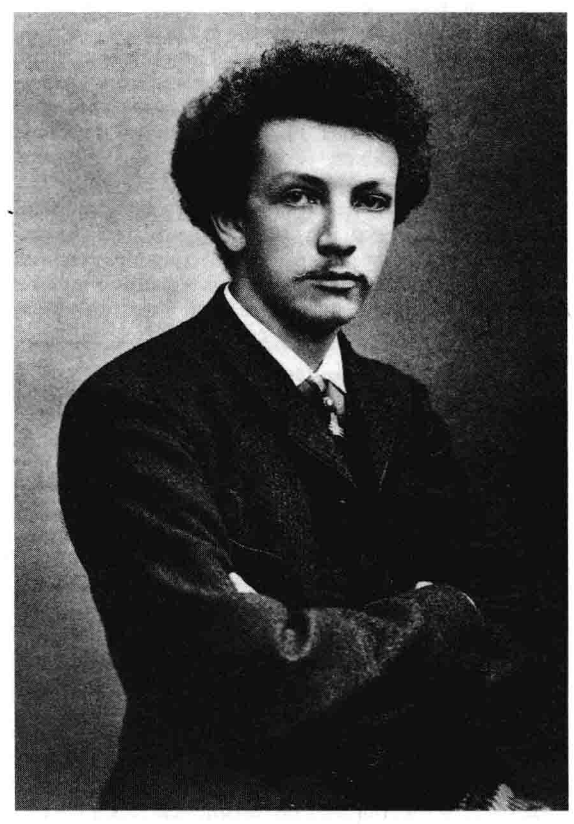
Though often stereotyped as a successor to Wagner (Bülow dubbed him 'Richard III', believing that Wagner could have no direct successor), Strauss had artistic roots markedly different from those of his predecessor. If anything, in his bourgeois upbringing and classical training, with instrumental music-making central to domestic life, he was closer to Wagner's nemesis, Mendelssohn. The Strauss family lived in the heart of Munich, and Richard was able to capitalize on all that a great city had to offer. Moreover, again unlike Wagner, he was musically precocious. He began piano lessons at the age of four with August Tombo (harpist in the court orchestra), composed his first works at the age of six, took up the violin at the age of eight under his cousin Benno Walter (leader of the court orchestra) and at 11 began five years of compositional study with Friedrich Wilhelm Meyer.

Yet the most important musical influence on the young Strauss was his arch-conservative father, who brought him up on Haydn, Mozart, Beethoven and Schubert. As late as the early 1880s Franz was still supervising his son's compositions, making comments and criticisms. The second most important youthful influence was that of Ludwig Thuille (1861–1907), who was to become a prominent composer, theorist and member of the Munich School. The orphaned Thuille was treated as one of the family in the Strauss home, and Richard's surviving letters to Thuille of the late 1870s present something of a childhood diary, including reports on composing, music lessons and the works of other composers.

Strauss's earliest compositions consisted mostly of lieder, piano pieces and chamber music. From them we can infer that though his teacher, Meyer, may have been unexceptional, he nonetheless gave the young composer a thorough grounding in harmony, classical phraseology and form. Towards the end of the 1870s Strauss demonstrated an increasing interest in orchestral music, probably linked to the fact that his father had taken over the 'Wilde Gung'l'. This amateur orchestra, which Franz directed from 1875 to 1896, helped introduce Richard to the world of symphonic composition: he attended rehearsals and himself joined the ensemble in 1882 as a violinist. Through the Wilde Gung'l he learnt orchestration on a practical level, his father leading the way, and he wrote some of his first orchestral pieces for the group. His early orchestral works included marches, concert overtures and ultimately two symphonies, in D minor (1880) and F minor (1884), but his best remembered works from this period are the pieces for 13 woodwind (the Serenade of 1881 and Suite of 1884) and the concertos for violin (1880–82) and horn (1882–3).

In 1882 he graduated from the Ludwigs-Gymnasium and, in accordance with his father's wishes, entered the University of Munich, though only for the winter of 1882–3. As brief as his enrolment may have been, it marked the awakening of his intellectual curiosity, for what he studied of Shakespeare, art history, philosophy and aesthetics was to affect his musical growth over the next decade. He soon became interested in Schopenhauer, whose writings he discussed at length with Arthur Seidl and with his lifelong friend Friedrich Rösch. He also began to make a name for himself in 1882 with some important premières outside Munich (the Serenade and the Violin Concerto). Strauss left for Dresden, then Berlin, in December 1883. In the bustling Prussian metropolis he

attended concerts and theatre, and met influential people who would help guide his future. Letters to his family and to Thuille document his activities and impressions of Berlin musical life.



Of all the musicians he observed in Berlin, Bülow made the greatest impression – as a pianist, whose 'phrasing, touch and execution' he admired, but even more so as a conductor, whose probing interpretations captivated him. From Bülow he gained a preoccupation with Brahms that would last the next few years. Also, while on tour in Berlin, Bülow's Meiningen orchestra performed Strauss's Serenade, and the conductor soon commissioned another woodwind piece for his orchestra. This, the Suite in B♭, marked Strauss's début as a conductor, for in November 1884, when the Meiningen orchestra toured Munich, Bülow included the Suite in the programme of a special matinée concert, informing Strauss that he would be directing the ensemble without a rehearsal.

By now Strauss was maturing rapidly as an artist, and his fame spread quickly. His Second Symphony had received its first performance in the USA earlier in 1884, and its first European performance took place in Cologne the next year, which was also the year in which Bülow presented the First Horn Concerto for the first time in Meiningen. Even more important to Strauss's career was his appointment, again in 1885, as Bülow's conducting assistant in Meiningen – his first professional post and a position that took him away from family and friends in Munich. The timing was ideal, for his musical independence from his father had evolved steadily since the early 1880s. The university had opened his eyes to Schopenhauer, and before that his ears had been opened to Wagner (a composer of whom his father strongly disapproved), whose music increasingly fascinated him. In 1878 he attended performances of *Die Walküre* and *Siegfried* in Munich, and by 1879 he had heard the entire *Ring* as well as *Tristan* (he studied the score in detail in 1880) and *Die Meistersinger*. And of course he went to Bayreuth to hear his father play in the first production of *Parsifal* in 1882. The negative opinions he voiced regarding Wagner at this time must be evaluated within the context of their conservative recipients, namely his father and Thuille.

2. The tone poet, 1885–98. Strauss's period in Meiningen as Hofmusikdirektor lasted only from October 1885 to April 1886, but it profoundly affected the rest of his life as composer and conductor. Apprenticed to Bülow, he learnt conducting from one of Europe's finest practitioners; he later openly credited Bülow for teaching him 'the art of interpretation'. Beyond his own conducting duties, which included directing the local choral society, he attended all Bülow's rehearsals with score and pencil in hand. The inexperienced 21-year-old composer learnt quickly, and in December 1885 took full charge of the orchestra in the wake of Bülow's sudden resignation. Among the highlights of his Meiningen tenure were his public début as a soloist in Mozart's C minor Piano Concerto, for which he wrote his own cadenzas, and the opportunity to help prepare the orchestra for the first performance of Brahms's Fourth Symphony, with the composer conducting. He conducted his Symphony in F minor for Brahms, who reportedly advised: 'Your symphony contains too much playing about with themes. This piling up of many themes based on a triad, which differ from one another only in rhythm, has no value'. Though Strauss claimed to have taken the master's admonition to heart, this technique, for better or worse, remained a substantive component of his compositional style.

Meiningen represented another important moment in Strauss's career as a composer, for in 1885 came his so-called conversion to the 'music of the future' through his acquaintance with Alexander Ritter (1833–96), an outspoken proponent of the ideals of Wagner and Liszt. Married to Wagner's niece, Ritter was both a composer and a violinist in the Meiningen orchestra, and Strauss would later credit his friend for making him a Wagnerian, though it is unlikely that Ritter alone caused such a dramatic turnaround in the younger composer. Strauss was already growing away musically from his father, who disliked Brahms as much as Wagner, and growing towards both these composers. What he called his 'Brahmsschwärmerei' ('Brahms adoration') overlapped significantly with his increasing fascination with the aura of Bayreuth, and his *Wandrers Sturmlied* (1884) and *Burleske* (1885–6) are strongly indebted to Brahms, though the latter work 'burlesques' Wagner as well.

Contrary to Strauss's memoirs, Ritter did not introduce the young composer to the writings of Schopenhauer, though he surely sharpened his interest. Ritter's success in expanding Strauss's knowledge of Wagner's and Hausegger's writings was the logical consequence of the composer's emerging personal style. Ritter, in short, offered Strauss – who already knew Wagner's music – an aesthetic focus. His more important (and less recognized) contribution to Strauss's development was the introduction to Liszt, especially the symphonic poems. Strauss

1. Richard Strauss, aged 24

proclaimed the slogan 'New ideas must seek new forms' to be the 'basic principle of Liszt's symphonic works', and he credited Ritter for helping him realize this central tenet of the 'music of the future'. From then on he viewed abstract sonata form as little more than 'a hollow shell' filled with empty phrases. After he left Meiningen for a post as third conductor at the Munich Hofoper, his friendship with Ritter grew and intensified. Indeed, in Munich, from 1886 to 1889, Strauss and Rösch, occasionally with Thuille and Anton Seidl, met regularly in the evenings 'to exchange noble ideas and to listen to the teachings of the Lisztian Ritter', who had moved to Munich in September 1886.

Before taking up his Munich post the month before Ritter's arrival, Strauss spent several weeks touring Italy, and in a letter to his mother he described various sites. In the left margin he sketched 'tonal impressions' that he would use in his 'first hesitant step' into the realm of the tone poem, *Aus Italien* (1886). From Italy he returned to Munich, where he concentrated on this new orchestral work for most of the summer. In early August he travelled with Ritter to Bayreuth, to visit the grave of the recently deceased Liszt and to hear *Tristan* and *Parsifal*. Thereafter he was ready to take up his Munich duties. Now 22, he was brash and talented, and this combination of traits complicated his life considerably during the three years he served in Munich. On paper, the post was a step up, and he was able to return to a richer cultural centre as well. But he had operated with autonomy in Meiningen, whereas Munich required him to fit into a hierarchy that often rewarded seniority over talent. Moreover, after the death of Ludwig II, in June 1886, the opera house no longer enjoyed the same level of royal support. Worse yet, Hermann Levi, first conductor at the Hofoper, was often ill, which put the detested Franz Fischer in charge. Still worse, the Intendant, Karl Perfall, was hostile both to Strauss's music and to his 'Bülowian' conducting. Strauss readily admitted that because he insisted on his own tempos, his taking the baton at short notice made things difficult for singers and musicians, among them his father at first horn. Franz advised patience and moderation to his often hot-headed son, who was bored with a repertory that included Boieldieu, Auber and Donizetti.

Less preoccupied with conducting duties, Strauss spent more time thinking about music and aesthetics, and his relationship with Ritter deepened. Their friendship was complex, and one should not infer that the overbearing Ritter exerted absolute influence. His idiosyncratic fusion of Catholicism, Schopenhauer, Liszt and Wagner was surely alien to the agnostic Strauss, who probably found Ritter's religio-mystical views on the ethical properties of music hard to swallow. But they remained friends throughout the 1880s, and Ritter continued to catalyse Strauss's thoughts on music and philosophy (mostly Schopenhauer), thoughts which in 1887 found their way into the beginnings of the libretto for his first opera, *Guntram* (1892–3). There were more practical ramifications as well, for Strauss seriously began to reconsider his approach to musical form. Convinced of an artist's duty to create a 'new form for every new subject', he tried to address this problem in *Macbeth* (1888), for if *Aus Italien* had been a 'first step' toward programme music, *Macbeth* (though it was not performed until after *Don Juan*, 1888, and *Tod und Verklärung*, 1889) was his first fully fledged tone poem. *Don Juan* followed some eight months later.

This early Munich period also saw the composition of 17 lieder (opp.15, 17 and 19) and some important premières, including those of *Aus Italien* in 1887 and the Violin Sonata in 1888. By the autumn of 1887 Strauss had secured numerous conducting engagements outside Munich, for example in Berlin, Dresden and Leipzig, where he first met Mahler. That year he met too another person who became central to his life: his future wife, Pauline de Ahna. The daughter of a major general, she had studied singing at the Munich Musikschule, but soon switched to private lessons with Strauss, and in 1889 followed him to Weimar, where he was appointed Kapellmeister to the Grand Duke of Saxe-Weimar-Eisenach. Before beginning his Weimar duties in the autumn, he worked as musical assistant at Bayreuth, where he developed and maintained a close relationship with Cosima Wagner. The major event early in his Weimar tenure – one that established him as a leading composer of his day – was the première of *Don Juan*. The work's provocative subject matter and musical brilliance earned him international recognition as a modernist, and that reputation was only enhanced with the premières of the *Burleske* and *Tod und Verklärung* within a year. His renown as a conductor grew rapidly too. He had become a staunch advocate of the symphonic poems of Liszt and, with the support of Cosima, worked tirelessly to make Weimar a significant centre for Wagner. His crowning glory was an uncut production of *Tristan* in 1892.

All this feverish activity as composer and conductor left Strauss exhausted, and by the end of the 1891–2 season he had become gravely ill. His engagement to conduct that summer in Bayreuth was cancelled, and he spent the following winter convalescing in Greece and Egypt. But he was resilient, and turned the experience into a miniature *Bildungsreise*, for it was during this time of solitary journey that he deepened his study of philosophy and aesthetics. His travel diaries detail an immersion in, among others, Schopenhauer and Nietzsche, a preoccupation that informed his work on *Guntram*, which was nearing completion. These readings inspired other potential operatic ideas as well: a *Don Juan*, *Das erhabene Leid der Könige*, *Der Reichstag zu Mainz* and an opera based on the Till Eulenspiegel legend.

A rested Strauss returned to his Weimar duties in the autumn of 1893 with a completed *Guntram* scheduled for a première there the next May. This final season in Weimar saw important changes in his personal life. A dispute over the ending of *Guntram*, and his post-Egypt rejection of musical metaphysics, chilled relations with Ritter. Soon afterwards he lost another father figure, Bülow, who died in February 1894. The next month, during rehearsals for *Guntram*, Strauss was officially notified that he had been appointed Kapellmeister in Munich. That move may have helped prompt him to propose marriage to Pauline de Ahna, and they were wed on 10 September. Pauline sang the role of Freihild at the first performance of *Guntram*, which received reviews ranging from lukewarm to mildly favourable. The Munich première proved less equivocal: in the wake of its failure, future performances were cancelled, despite initial promises to the contrary, and for the first time Strauss had to deal head-on with strong conservative elements in the Bavarian capital.

Despite this setback Strauss continued to make a name for himself as both composer and conductor. Before

beginning his Munich duties, he finally conducted in Bayreuth (*Tannhäuser*, with Pauline singing Elisabeth); he then assumed responsibility for the major Wagner operas in Munich. Moreover, he was invited to conduct concerts with the Berlin PO during the 1894–5 season, and thereafter broadened his conducting engagements to various European countries, including Russia. Meanwhile he was steadily composing tone poems during this period: *Till Eulenspiegel*, *Also sprach Zarathustra*, *Don Quixote* and *Ein Heldenleben* were all written by 1898, when he signed a contract as conductor with the Berlin Hofoper. These post-*Guntram* tone poems reveal a composer capable of making poetic content and formal design coalesce with great brilliance.

3. THE OPERA COMPOSER, 1898–1916. Independent of Ritter, Bülow, his father and, most importantly, Munich, Strauss confidently left for Berlin with his wife and their one-year-old son Franz. The busy capital of the German empire offered an ideal cultural atmosphere in which the composer could explore new artistic directions. His early tone poems, such as *Don Juan* and *Tod und Verklärung*, were already firmly part of the German repertory, he was in constant demand as a guest conductor, and his appointment as conductor at the Hofoper was one of the most prestigious in the country. In his first season alone he conducted 25 operas in over 71 performances, including an ambitious *Ring* cycle. But his acknowledged excellence as an opera conductor was not yet matched by any comparable achievement as a composer in that genre. Stung by the failure of *Guntram*, he threw himself into a second stage project, a satirical one-act *Singgedicht* to pour scorn on a Munich that had rejected the earlier work.

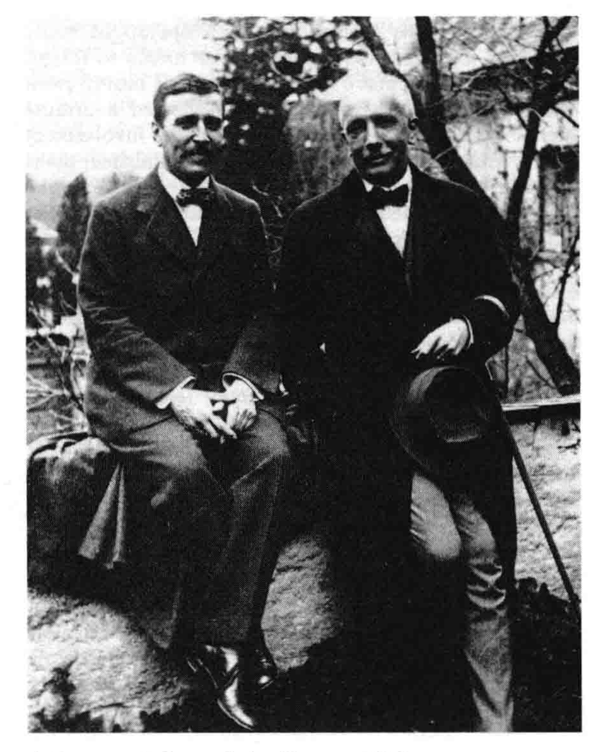
Around the time he was composing this second opera, *Feuersnot* (1900–01), Strauss began working on behalf of composers' rights, and in 1903 he helped establish the first society protecting the copyrights of German composers (the Genossenschaft Deutscher Tonsetzer), which became a model for future societies. His extensive professional activity beyond his Berlin opera duties is difficult to fathom. In 1901 he was elected president of the Allgemeiner Deutscher Musikverein, and he took over the conducting of the Berliner Tonkünstlerverein, which toured Europe. Both posts allowed him to champion the music of his contemporaries, including Mahler, and his work as editor of the book series *Die Musik* gave him yet another platform for furthering the music of his day. By now all-Strauss concerts were becoming increasingly popular; the first was in Vienna in 1901, and two years later a major Strauss festival took place in London (June 1903). Months after that a Heidelberg Strauss festival was capped by the presentation of an honorary doctorate, celebrated by the first performance of *Taillefer* (1903), a large-scale work for soloists, chorus and orchestra.

During an earlier trip to England (May 1902) Strauss had begun work on the *Symphonia domestica*, which was finished the next year shortly before his first North American tour (1904) that included stops in New York, Boston, Pittsburgh, Cleveland and Chicago. He conducted the première at Carnegie Hall, and there were also lieder recitals featuring him and his wife. All the while he was working on a piece that would establish him as the leading German opera composer of his time. With the colourful, chromatic *Salome* he found a new, modernist voice for the stage, one that resonated throughout a Europe preoccupied with the image of the sensual femme fatale. Within a year of its 1905 Dresden première, this *succès de scandale* had been performed in six German cities as well as Graz, Prague and Milan, and its fame quickly spread throughout Europe and the USA.

Given Strauss's busy conducting schedule, the summer offered him the only time for serious, extended creative work, and he regularly spent his summers between 1890 and 1908 composing at the cool mountain villa of Pauline's parents in Marquarstein, Bavaria. *Salome* royalties augmented his income considerably and helped pay for his own villa in Garmisch, where he composed from *Elektra* onwards. This next opera marked the beginning of his artistic association with Hugo von Hofmannsthal, whom he had first met in Berlin in 1899. Having seen

2. Richard Strauss with his wife, the soprano Pauline de Ahna, and their son Franz

Reinhardt's riveting production of Hofmannsthal's *Elektra* in the autumn of 1905, Strauss was convinced the play would make a compelling opera. Not entirely sure he should compose consecutive tragedies, he nonetheless gave in to Hofmannsthal's pleading and vigorously began composing *Elektra* in the summer of 1906. As he had with Oscar Wilde's *Salome*, he set the play to music, which was finished in 1908 and given its première in 1909 as part of a Strauss opera festival in Dresden (fig.3). That year his Berlin duties were augmented when he succeeded Weingartner as conductor of the Berlin court orchestra.



Elektra failed to outshine her flashier sister, but confirmed Strauss's pre-eminence among German opera composers. By the time the piece was performed, he was already working on his first real collaboration with Hofmannsthal, which soon exceeded his other operas in popularity: *Der Rosenkavalier* (1909–10). Its 1911 première, again in Dresden under Ernst Schuch, would prove to be his greatest operatic success. Within days there were performances in other major German cities, Vienna saw the work within three months, and in 1913 it was staged in London and New York. Once more Strauss was already on to his next operatic project, convinced that it should mark a return to tragedy. A dutiful Hofmannsthal supplied him with a scenario for *Der steinere Herz*, a sketch that would ultimately find its way into *Die Frau ohne Schatten* (1914–17). But the poet remained preoccupied with the stylized world of the 17th and 18th centuries, especially the work of Molière, which had partly inspired the *Rosenkavalier* libretto. The immediate result was *Ariadne auf Naxos* (1911–12), a theatrical hybrid combining spoken theatre – a German adaptation of Molière's *Le bourgeois gentilhomme* (*Der Bürger als Edelmann*) with incidental music – and opera. The work, first performed in Stuttgart in 1912, fell short of critical acclaim and was revised to greater success, four years later, when Strauss and Hofmannsthal replaced the play with a lively operatic prologue.

The *Ariadne* project proved to be far more time-consuming than either collaborator had imagined; they had thought of it as a stepping-stone to their next major work, *Die Frau ohne Schatten*. Strauss described this as his 'last Romantic opera' and rightly so. Conceived in peacetime, composed during World War I and first performed after the Treaty of Versailles, the grandiose, metaphysical *Frau ohne Schatten* stands as a magnificent epitaph to late Romantic music. Hofmannsthal entered military service during the European conflict, and work on the opera was often interrupted, much to Strauss's annoyance. After the war, in 1919, the composer left Berlin to become co-director, with Franz Schalk, of the newly renamed Vienna Staatsoper. His appointment was marked by the première of *Die Frau ohne Schatten*; its unenthusiastic reception, in the wake of military defeat, may well have reflected a society's fatigue with the pre-war era.

4. World War I, Vienna and the Weimar era. Hofmannsthal savoured the geographical distance between himself and his collaborator, and thus had misgivings about Strauss's move to the Austrian capital after World War I. Many Viennese journalists feared the composer might exploit his new position for the performance of his own stage works; moreover, his extensive periods away from Vienna caused friction between him and Schalk. But Strauss enjoyed Viennese musical life. He

4. Hugo von Hofmannsthal and Strauss, c1915

attracted some of Europe's finest singers, reinvigorated the opera repertory with fresh productions of Mozart, and conducted new works by Pfitzner, Schreker, Zemlinsky, Weingartner and others. His love for Mozart reinforced his resolve to help establish an annual music festival in Salzburg, and with the help of Reinhardt, Schalk, Alfred Roller and Hofmannsthal this annual summer event was launched in 1920.

Shortly after arriving in Vienna he began work on his two-act ballet *Schlagobers*, which had its première in the spring of 1924, a period of hyperinflation and therefore not a felicitous moment for dancing pralines and pastries. And while the facile image of a successful composer out of touch with his time has proved irresistible for some commentators, it presents an erroneous view of a musician acutely aware of the business and politics of contemporary culture. Strauss was convinced that his next opera should leave behind post-Wagnerian metaphysics and move towards modern domestic comedy. Hofmannsthal was aghast, and the composer went his own way, writing the text for *Intermezzo* (first performance, 4 November 1924) himself. This fairly successful autobiographical marital comedy, informed by contemporary cinematic techniques, would influence later *Zeitopern* by Hindemith, Krenek and Schoenberg.

The year of the *Intermezzo* première began happily enough, with the marriage of his son Franz to Alice von Grab, daughter of a wealthy Viennese industrialist with strong musical connections; the fact that she was Jewish was to create unforeseen problems only a decade later. The 60-year-old composer was also regaled that summer with a host of *Strauss-Tage* in Germany and throughout Europe, but his working relationship with Schalk had deteriorated seriously. Schalk resented having to undertake the day-to-day work of directing the opera house while Strauss seemed to bask in the international spotlight, and Schalk's daily involvement with operations easily gave him the upper hand. Strauss was forced to resign, and the world première of *Intermezzo* was moved from Vienna to Dresden, which had not hosted a Strauss première since *Rosenkavalier*. Yet Strauss's involvement with Viennese musical life was hardly diminished; plans to build his winter home along the eastern edge of the Belvedere continued, in 1924, on schedule. Though the mansion was built at his own expense, he received the property (on loan for 60 years) from the city of Vienna in exchange for, among other things, the *Rosenkavalier* autograph score. By now he could finance his composing with freelance conducting and with royalties from published compositions. During the concert season, when he was not touring, he and his family lived in Vienna; summer months were spent in Garmisch.

The Schalk episode notwithstanding, Strauss's love for Vienna remained steadfast, and he continued there as a guest opera conductor. He also composed two left-hand piano works (*Parergon zur Symphonia Domestica*, 1925, and *Panathenäenzug*, 1927) for the Viennese pianist Paul Wittgenstein, a work for male choir (*Die Tageszeiten*, 1928) dedicated to the Vienna Schubertbund and a work entitled *Austria* (1929) for male choir and orchestra, as well as arranging Mozart's *Idomeneo* for the Vienna Staatsoper in 1930. But his main preoccupation after *Intermezzo* was *Die ägyptische Helena* (1923–7), the last completed collaboration with Hofmannsthal. Strauss, who never forgot the *Guntram* débâcle, felt insecure as

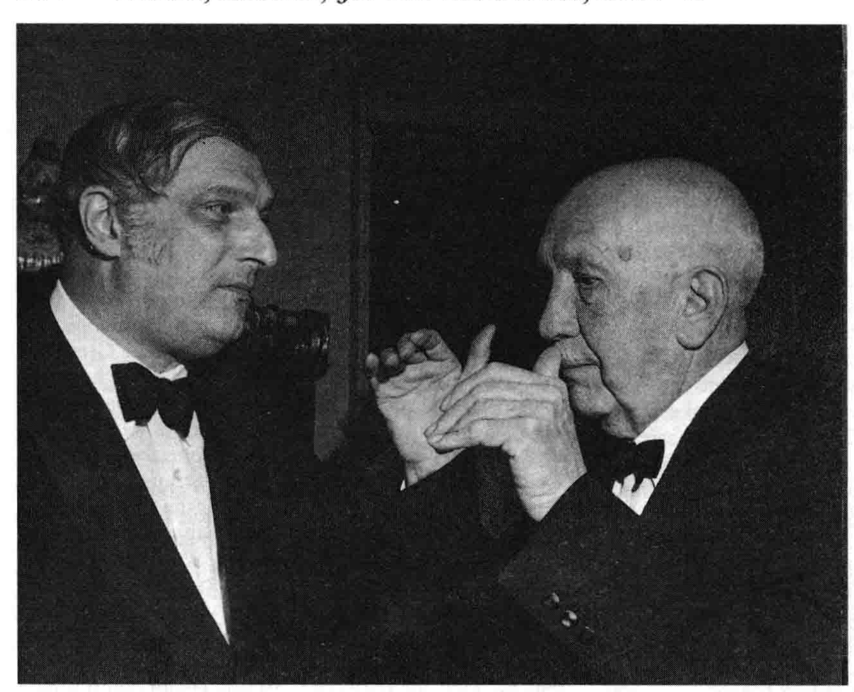
5. Richard Strauss: drawing by Hugo Bottinger, pen and ink, 1916

librettist, and had looked forward to a renewed collaboration with Hofmannsthal, the first since World War I. *Die ägyptische Helena* had its première in Dresden under Fritz Busch in 1928, but though Hofmannsthal claimed it as his favourite of their works, it failed to gain a foothold in the repertory. Their next project, *Arabella* (1929–32), came far closer to the realm of operetta and is Strauss's best loved stage work of the 1930s. On 15 July 1929, shortly after putting the final touches to the text of the first act, Hofmannsthal suffered a fatal stroke, leaving acts 2 and 3 complete but in far from final form. Strauss was too distraught to attend the funeral, but sent a moving condolence letter to the widow: 'This genius, this great poet, this sensitive collaborator, this kind friend, this unique talent! No musician ever found such a helper and supporter. No one will ever replace him for me or the world of music!'

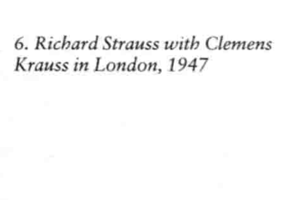
5. THE LATE STRAUSS, 1930–49. Though the 1930s was Strauss's most prolific decade as an opera composer, this was also a time of personal, professional and political crisis. It began with him bereft of his collaborator, and work on *Arabella*, not surprisingly, progressed slowly; the score was not completed until the autumn of 1932. By then he had already met someone he believed a worthy successor: Stefan Zweig, the Austrian novelist and biographer. However, events surrounding the *Arabella* première (1933) signalled grim political realities that would ultimately force Zweig out of the picture. Hitler had become German chancellor, and Busch, the opera's co-dedicatee, who had been chosen to conduct the première, was forced out of his Dresden post; the opera was

conducted instead by Clemens Krauss. During the late 1920s Strauss's negative feelings regarding the National Socialists were known only to his close friends and colleagues, and later he could not imagine, despite their political success, that they would impede his career, especially given the fact that in the autumn of 1933 he was appointed president of the Reichsmusikkammer. By the late 1920s and early 30s, artists of various political viewpoints had become disillusioned with the Weimar government's ineptitude in cultural affairs, and in 1933–4, before the realities of Kristallnacht, it is not difficult to conceive how some, including Strauss, could have thought the Reichsmusikkammer might improve musical life. One positive consequence of Strauss's influence came early in his post as president, when he was finally able to secure full copyright protection for all German composers – something he had not achieved during the Weimar period.

It has always been difficult to gain a clear understanding of Strauss during this period; our picture of him has been obscured either by uncritical rationalizing and omission on the one hand or by simplistic accusation on the other. He was surely no political hero during the period of National Socialism, but neither was he a Nazi sympathizer or anti-Semite. He was a composer who, until 1933, had always been able to put his personal and professional life above politics. The Toscanini episode serves as an unfortunate case in point. Shortly after the deaths, in 1930, of Cosima and Siegfried Wagner, Strauss tried to repair decades of bad feelings between himself and Bayreuth. By replacing Toscanini, who had resigned in protest from the Wagner festival in 1933, Strauss saw an opportunity to make a gesture of goodwill towards the Wagner family, yet in doing so he clearly chose to ignore the fact that this played right into the hands of the National Socialists, who were eagerly seeking international legitimacy. Indeed, the more he tried to ignore political events around him, the more politics seemed to invade his world, a world he felt to be removed from the rules of the regime: refusing to call Hitler 'der Führer', for instance, was not so much an act of civil disobedience as an expression of artistic ego.



During the early 1930s he focussed his attention on composing Zweig's libretto *Die schweigsame Frau*, but as he neared completion and began thinking about future projects, he refused to accept that a Jew could no longer be his collaborator. The composer's reaction to Nazi anti-Semitism is revealing, for he dwelt not so much on its global evil but on how it affected his career. An impassioned letter to Zweig that insulted the Nazi regime was intercepted by the Gestapo, and as a result of this naive gesture Strauss was forced to resign the official post he had held for nearly two years. *Die schweigsame Frau*, first performed in Dresden under Karl Böhm in 1935, was banned after four performances. But Strauss did not sever his relationship with the Reich, and in various ways – by conducting his *Olympische Hymne* in 1936, composing the *Japanische Festmusik* in 1940 and cultivating relationships with specific Nazi officials – he tried to stay in the good graces of the government. Without such influence in high places, the potential for the persecution of his Jewish daughter-in-law and grandsons (officially classified as 'grade-one half-breeds') was indeed great. Their protection became an increasing obsession for the composer after the *Schweigsame Frau* scandal.



It was now clear to him that he needed to look for another librettist; Zweig had suggested, among others, his friend Joseph Gregor, a Viennese theatre historian who fancied himself a librettist. Gregor was not a Hofmannsthal, nor even a Zweig, but he was all Strauss had during a time when, in his 70s, he preferred composing opera to searching for yet another collaborator. Zweig, moreover, promised to help Gregor behind the scenes, and Strauss reluctantly agreed to take him on. The Strauss–Gregor collaboration was a unique working relationship, where the composer assumed almost total artistic control. Having learnt much from Hofmannsthal, he could be blunt and outright insulting to Gregor in order to achieve the required results: sometimes he would rewrite passages of text himself, and he never hesitated to seek outside advice, principally that of Krauss, who worked with him on his final opera, *Capriccio*.

Gregor, who wrote three texts for Strauss, ranks next to Hofmannsthal in libretto output for the composer. The first Gregor opera was based on a subject suggested by Zweig: the end of the Thirty Years War in 1648. This pacifist work, *Friedenstag*, though completed in 1936, was not performed until 1938, by which time Germany was preparing for world war; once the war had started, performances were curtailed. Shortly after finishing the final sketches for the opera, Strauss began composing a cello concerto, his first foray into this genre since the horn concerto of 1883; he never completed it. The subtitle to the planned work reflects his feelings in the wake of the *Schweigsame Frau* affair: 'Struggle of the artistic spirit [solo cello] against pseudo-heroism, resignation and melancholy [orchestra]'. In the same sketchbook, drafts for two pieces ultimately not included in the *Drei Männerchöre* (1935) also suggest his despair and frustation with the Nazi regime. In both instances we see him as an artist internalizing social forces.

The one-act *Friedenstag* was planned to form a double bill with *Daphne* (1936–7), Gregor's only original libretto. This 'bucolic tragedy' was the ninth and last Strauss opera to have its première in Dresden and was dedicated to Böhm, who conducted. But the two operas went their separate ways, and *Daphne*, with its stirring transformation scene at the end, became one of Strauss's best-known late operas. Strauss now felt his tragic vein depleted, and he was reminded of a mythological comedy that Hofmannsthal had sketched shortly before the collaboration on *Die ägyptische Helena*. He asked Gregor to forge a 'cheerful mythology' from this fragment, but the result was a work far more serious than originally intended. Indeed, these were hardly cheerful times. During work on the new opera, *Die Liebe der Danae* (1938–40), Strauss's daughter-in-law was placed under house arrest in Garmisch, and Strauss appealed to Heinz Tietjen, the Berlin Intendant, who had high political connections, to help ensure her and his grandsons' safety.

Danae was scheduled for a 1944 première in Salzburg, but cancelled after a dress rehearsal by an order from Goebbels to close all theatres in preparation for total war. In the meantime Strauss composed his final opera, *Capriccio* (1940–41), which had its première in Munich in 1942. By then he and his extended family had been allowed to move back to their Vienna house; Alice and her children were under the unofficial protection of the Viennese Gauleiter Baldur von Schirach. But Vienna proved increasingly unsafe, and Richard and Pauline

6. Richard Strauss with Clemens Krauss in London, 1947

returned to Garmisch in June 1943, leaving Franz, his wife and their children behind. The composer and his wife returned a year later for a festive week of music celebrating Strauss's 80th birthday, 'unofficially' celebrated in the former Austrian capital where, months earlier, the Gestapo had abducted the composer's son and daughter-in-law from their Vienna residence, imprisoning them for two nights. Fame and humiliation became increasingly sharp juxtapositions for Strauss as the war progressed. In 1944, the most that he could hope was for a safe return to Garmisch, where his daughter-in-law was now under house arrest, as she was to remain until the end of the war. He withdrew increasingly from society, re-reading, among other things, the writings of Wagner and the works of Goethe. The destruction of Goethe's house in Weimar, and of the opera houses of Dresden, Munich and Vienna – monuments of his Europe – brought him to utter despair; his *Metamorphosen* (1945) is a moving testament to his resignation. Throughout his career he spoke of 'liberation through work', and his late compositional activity, as well as the writings of various artistic manifestos – plans for rebuilding post-war German cultural life – brought him out of depression from time to time.

Allied forces arrived in Garmisch in late April 1945, and Strauss's villa was declared 'off limits' by musically sympathetic military officers who had visited him. One of them was the American oboist John de Lancie, who inspired the Oboe Concerto of 1945. With food and fuel shortages, the coming winter looked grim for the elderly composer and his wife. Moreover, there was no stabilized currency, and Strauss's accounts and future royalties had been frozen. Forced to leave their family behind, they went to Switzerland in October 1945, staying in a hotel in Baden, near Zürich, where they were befriended by the Swiss music critic and the composer's future biographer Willi Schuh. The sale of sketchbooks and manuscripts provided loans and some income; nonetheless, Strauss's health declined steadily. In October 1947 a three-week trip to London, his last foreign tour, offered both hard currency and, more important, a transfusion of sorts for the ailing composer (fig.6). He heard excerpts from his operas, tone poems and a complete performance of *Elektra* for the BBC, and conducted *Don Juan*, the *Burleske*, waltzes from *Der Rosenkavalier* and the *Symphonia domestica*.

Shortly after his return to Switzerland he completed the *Duett-Concertino* (1947) for clarinet, bassoon and strings; he was also in the midst of extensive sketching for a chamber opera, *Des Esels Schatten*, though this was never finished. His main compositional efforts during his final years were four orchestral songs (*Im Abendrot*, *Frühling*, *Beim Schlafengehen* and *September*) completed between May and September 1948. He had also orchestrated his song *Ruhe meine Seele* in June of that year – the month he was cleared by a de-Nazification tribunal in Munich. In December he underwent bladder surgery and was in hospital for many weeks. His health rapidly worsened. He returned to Garmisch from Switzerland in May 1949, and on 10 June he conducted in public for the last time: the end of Act 2 of *Der Rosenkavalier* at the Prinzregententheater in Munich. He suffered a heart attack on 15 August and died of kidney failure shortly after 2 p.m. on 8 September. The final trio of *Der Rosenkavalier* was conducted by Georg Solti at a memorial service at the Ostfriedhof in Munich. Strauss's wife died eight months later.

6. THE COMPOSER. Strauss's compositional career was as long as it was prolific, beginning when he was six and not ending until months before his death at the age of 85. When not composing, his favourite pastime was reading or, especially when on tour, playing the South German card game Skat. He always kept his cards close to his chest, for he was a man of puzzling contradictions: aloof and phlegmatic in life, extroverted and sanguine in art. Averse to the Romantic posture of the artist set apart

from worldly life, he cultivated the image of a composer who treated composition as everyday work, as a way of earning a living. But however true this may have been on one level, it was no less a pose, a persona so real to others that he could disappear behind it and gain the seclusion necessary for creative work. In short, no-one was more aware of the disjunction between man and artist than Strauss himself, who revelled in conducting his most expressive musical passages with minimal body gestures and a face devoid of emotion.

At some level, he recognised the inability of contemporary art to maintain any unified mode of expression, and from *Der Rosenkavalier* onwards he relished creating moments of grandeur only to undercut them, sometimes in the most jarring fashion. Unlike his contemporary Mahler or the younger Schoenberg, who both held to the 19th-century notion of music as a transcendental, metaphysical phenomenon, Strauss faced the problem of modernity straight on, and he did it in a typically dialectical way, using a Wagnerian musical language to discredit a metaphysical philosophy that gave us that very language. Music, he concluded, could be nothing more than music. His attraction to Nietzsche stemmed from a desire to debunk the Schopenhauerian notion of the 'denial of the Will' through music; Nietzsche provided the necessary apparatus for his joyful agnosticism.

In an essay written shortly before his death, Strauss lamented the fact that this aspect of modernity – the recognition of an unbreachable gap between the individual and the collective (Adorno's subject-object dichotomy) – went unnoticed in his works. Implicit in this remark was his realization that for a younger generation of composers a new view of modernism had emerged: one that emphasized technical progress, whereby musical style was viewed as evolving necessarily towards atonality. This Schoenbergian ideology, with its firm German-Romantic roots, was alien to Strauss, who recognised a profound disunity in modern life and saw no reason for music to be any different. He treated musical style in an ahistorical, often critical fashion, which prefigures trends of the late 20th century. Adorno and his followers preached the 'aesthetic immorality' of continuing to compose tonal music, which meant that Strauss, deemed guilty of musical faults, was the more easily condemned also for political ones.

Music historians often look for inner unity in a composer's output, and in the broader connections between that output and the age. The extensive Straussian repertory, however, which shows a composer equally at ease in the concert hall, recital hall, ballet, cinema and opera house, is resistant to cultural biographers in this regard, especially to those clinging to notions of music as an autonomous, transcendent art. Strauss once suggested that his body of work was one 'bridged by contrasts', and indeed there are hardly two temporally adjacent works that continue in the same mode, tragic or comic. *Ein Heldenleben* is preceded by the anti-heroic *Don Quixote*; the hyper-symbolic *Die Frau ohne Schatten* is followed by the light domestic comedy *Intermezzo*. But in exploring these contrasts one finds intriguing connections: the two tone poems probe and criticize heroism in its various guises, and the two operas explore domestic relationships on metaphysical as well as mundane levels. If there is an important consistency in Strauss's oeuvre, it is in the desire to suggest the profundities and ambiguities in everyday life, even in the apparently banal. The sublime final trio of *Der Rosenkavalier* is, after all, based on a trivial waltz tune heard earlier in the opera.

Contrasts notwithstanding, there is a coherent shape to Strauss's compositional output, which begins with a focus on instrumental music: solo piano and chamber music at first, then orchestral music by the 1880s. At the turn of the century, after an intense exploration of the tone poem, Strauss moves on to the stage, and opera remains his principal preoccupation over the remaining decades. But after *Capriccio* (1940–41), the elderly Strauss bade farewell to the theatre and returned to the genres of his youth, such as the wind serenade and the concerto. There were also, of course, the abundant lieder interwoven throughout his career, from the naive youthful pieces to the exalted last orchestral songs. The earthbound composer wrote music that could soar, especially when catalysed by compelling textual or visual images, for he was a literary or pictorial composer in the sense that he required extra-musical images to charge his imagination or challenge his intellect to creativity.

7. Instrumental works. Strauss's early period of composition, roughly from 1870 to the mid-1880s may be divided at the year 1880. The instrumental works from the 1870s, many of which remain unpublished, are mostly small-scale: pieces for solo piano, contrapuntal studies, chamber music. These works, which take us from Strauss's early childhood to his mid-teen years, are remarkably skilful, but reveal more the influence of his arch-conservative father than any artistic originality. The First Symphony (1880) was a major step forward and evinces a rapidly increasing interest in composing orchestral music; a less interesting piece from that year was the String Quartet in A. The two works stood at the end of Strauss's studies with Meyer, whose approach to counterpoint and form was rudimentary and straightforward. Nevertheless, Meyer had given Strauss a strong orthodox foundation, albeit one with which the young composer became increasingly dissatisfied. He did not produce another symphony for four years; meanwhile he composed two piano works: the op.5 Sonata and the *Klavierstücke* op.3. Beyond the obvious references to Beethoven's Fifth Symphony in the first movement of op.5, these works, both from 1881, betray a clear homage to the early Romantic generation, especially Mendelssohn. In the same year Strauss produced his major success to date, the Serenade op.7. On hearing this work Bülow, unimpressed with the piano works, was finally convinced that the 17-year-old was far more than a mere talent.

Strauss's early works featuring a solo instrument were nearly always written with a friend or family member in mind: the op.8 Violin Concerto (1880–82) for Benno Walter, the op.6 Cello Sonata (1883) for Hans Wilhan, a friend and principal cellist of the Munich court orchestra, the Horn Concerto op.11, of course, for his father. This last piece occupies a solid position in the horn repertory and also exhibits a loosening of Meyer's firm formal grip, for, as opposed to what happens in the Violin Concerto, the three movements proceed without interruption. A year later Strauss reverted to a formal clarity reminiscent of his First Symphony with the composition of his Second, though the latter work shows a significant advance in harmonic richness, orchestration and counterpoint. 1884 also saw the wonderfully atmospheric *Stimmungsbilder*

as well as another work for woodwind: the Suite in B♭, commissioned by Bülow.

Around this time began the 'Brahmsschwärmerei': an obvious fruit is the Piano Quartet in C minor, strongly influenced by Brahms's piano quartets in C minor and G minor. The end of this Brahmsian episode, as well as what is usually defined as Strauss's early period, is marked by the *Burleske* in D minor for piano and orchestra. Written for Bülow, who deemed the work unplayable, it was eventually dedicated to Eugène d'Albert, who gave the first performance in 1886. In this piece we first witness Strauss the fledgling modernist, for it is one of the earliest pieces to use the historical canon as a source for parody. Fully aware of the Brahms-Wagner polemic, Strauss delights in burlesquing both Brahms (the D minor and B♭ major piano concertos) and Wagner (*Tristan* and *Die Walküre*) in remarkable juxtapositions. He was developing artistically with great rapidity, and confessed to feeling 'trapped' in a steadily escalating antithesis between poetic content and formal structure. *Aus Italien* (1886) he described as a 'first step toward independence', even though, unlike the tone poems to follow, it is divided into four discrete movements. The first, 'Auf der Campagna', is the closest to Liszt in construction; the second, 'Im Roms Ruinen', shows the clearest affinity to Brahms; and the third, 'Am Strande von Sorrent', represents Strauss's first serious attempt at musical pictorialism. The controversial fourth movement, 'Neapolisches Volksleben', was based, according to Strauss, on a Neapolitan folktune that turned out to be none other than the 1880 popular tune *Funiculì, funiculà*, which commemorated the construction of the funicular on Vesuvius.

Macbeth (1888), which he described as 'a completely new path', was not found without detours. Indeed, the piece went through more revisions than any of his other symphonic works, and these revisions, concerned primarily with the development and recapitulation, suggest how seriously he was still struggling with the conflict between narrative content and musical structure. New path or not, *Macbeth* failed to find a firm place in the concert repertory, because it lacked the thematic cogency and convincing pacing of musical events so evident in the two subsequent works. And despite revisions to the orchestration, in an attempt to restrain inner voices and highlight principal themes, *Macbeth* still falls short of *Don Juan* and *Tod und Verklärung* in sonic clarity.

By now Strauss was composing with unprecedented speed: *Macbeth* was completed in January–February 1888, followed by *Don Juan* only eight months later. But the public first heard *Don Juan* in the autumn of 1889; the première of *Macbeth* followed a year later. So it was *Don Juan*, not *Macbeth*, that firmly established Strauss as the brash, young German modernist. In *Macbeth* Strauss struggled with the demands of sonata form and the requirements of the story, while in *Don Juan* – which elegantly merges rondo and sonata principles – narrative and structural strategies came into effortless union. This second tone poem, with its provocative subject matter, dazzling orchestration, sharply etched themes, novel structure and taut pacing, earned Strauss his international reputation as a symphonic composer. Here too he found his voice as a tone poet, the music being flagrantly pictorial, humorous and altogether irreverent. The aesthetics of Wagner and Liszt may have inspired him to embrace the extra-musical, but he refused to carry their torch for music as a sacred entity; the libertine Don (and Strauss with him) simply thumbs his nose at the world.

Cosima Wagner, Strauss admirer and self-proclaimed custodian of her late husband's ideals, sharply criticized both the subject matter of *Don Juan* and its explicit expression. Counselling Strauss against superficial elements and evocative themes, Cosima urged him to seek 'eternal motives' that could be perceived at manifold levels and in various manifestations. Strauss's response was polite: 'I think I have understood [you] correctly, and I look forward to producing evidence next time we meet, in the form of my third symphonic work [*Tod und Verklärung*] … that I have perhaps already made a significant advance, even in choice of subject'. The subject is indeed more elevated, but it is doubtful whether Cosima's advice affected his artistic views in any serious way. The most metaphysical of his tone poems, *Tod und Verklärung* (1888–9) is based not on a literary text but on a narrative of the composer's own conception: a dying artist, obsessed by an artistic Ideal, is transfigured at death to recognize his Ideal in eternity. A poem by Ritter published in the score postdates the composition, though the musical theme for the Ideal may have been inspired by one from Ritter's symphonic waltz *Olafs Hochzeitsreigen*. In *Tod und Verklärung* death is less the issue than transfiguration, a lifelong fascination for Strauss (with its abundant musical possibilities), one that manifests itself from *Rosenkavalier* through to *Metamorphosen*.

The musical subdivisions of *Tod und Verklärung* are clear, though their relationship to its modified sonata form is less so. The work has a quiet, syncopated introduction ('breathing irregularly'), then an agitated exposition ('racked by terrible pain'), followed by an episodic developmental space: dreams of childhood, youthful passions. What follows is the principal theme of the work, that of the artistic Ideal. The restatement of this lofty melody in the extended coda is what Strauss termed the 'point of culmination', and it is indeed one of the most exquisite moments in all his symphonic works: even his arch-conservative father was moved. *Tod und Verklärung* ends the feverish tone-poem activity of the late 1880s, and Strauss was not to compose another major symphonic work for six years, during which time he was preoccupied with composing his first opera, *Guntram*. Its failure, after a string of successes, taught him much. Consciously or not, he realized the need to explore further the problem of narrative in a purely symphonic medium.

Most of the tone poems after this six-year hiatus are significantly longer (*Ein Heldenleben* is nearly three times the length of *Don Juan*), and the size of the orchestra increases as well (fig.7), as does the composer's pleasure in graphic depiction. But Strauss had not entirely got opera out of his system. Shortly after the *Guntram* première he decided to compose a one-act opera *Till Eulenspiegel bei den Schildbürgern*, though he never got beyond an incomplete text draft. Why he scrapped the opera for a tone poem is not clear, but judging from his programme notes, the symphonic work is based on a different scenario: 'Once upon a time there was a knavish fool named Till Eulenspiegel. He was a wicked goblin up to new tricks'. Till rides on horseback through the market, mocks religion (disguised as a cleric), flirts with women, engages in academic double talk with his philistine audience, and by the end finds himself on the scaffold, soon to be hanged. Strauss did not call *Till* a tone poem

7. *Opening of 'Ein Heldenleben', from the autograph fair copy, begun 2 August 1898*

but rather a 'Rondeau Form for Large Orchestra'. Richard Specht suggested this might well have been the first prank, given that the only connection with the old French *forme fixe* is in the spelling. Strauss later described the structure as being an 'expansion of rondo form through poetic content', and cited Beethoven's Eighth Symphony as his model. Given the libertine qualities of young Till, as well as the episodic nature of the work, a rondo would seem quite appropriate. But, as in *Don Juan*, the form is hardly conventional: the sense of rondo is achieved mostly by the return of Till's two themes to articulate his various adventures. Completed in May 1895, the compact *Till Eulenspiegel* was introduced with great success six months later and remains Strauss's most often performed orchestral piece. That he had learnt much about orchestral detail and nuance during the six years since *Tod und Verklärung* is evinced by his brilliant use of the ratchet when Till rides through the market, or by the piercing D clarinet when he whistles in the face of death.

Strauss was so taken by the subject matter that he considered, yet again, composing a *Till* opera, but he ultimately turned his attention to *Also sprach Zarathustra*, the first concrete manifestation of his rejection of Schopenhauerian metaphysics. His interest in Nietzsche had blossomed as early as the end of the *Guntram* project, when the philosopher had helped affirm his agnosticism as well as his lifelong belief in the individual's power to change the world around him, controlling his destiny without promise of a hereafter. Strauss originally subtitled the work 'symphonic optimism in fin-de-siècle form, dedicated to the 20th century'. Later he substituted 'freely after Nietzsche', a description that aptly suggests his liberal treatment of the book's prologue and eight of its 80 subsections: 'Of the Backworldsmen', 'Of Great Yearning', 'Of Joys and Passions', 'Funeral Song', 'Of Science', 'The Convalescent', 'The Dance Song' and 'The Night Wanderer's Song'. If there is some paratextual thread connecting these, Strauss's letters and sketches offer few, if any, clues. Quite probably he chose those sections that appealed most to his musical imagination; many of them refer to song or dance. However, one idea unifies the work and plays a musical-structural role, that of conflict between nature (C major) and humanity (B major). The similar preoccupation in Mahler is hardly

coincidental, for Mahler set Zarathustra's 'Drunken Song of Midnight' in his Third Symphony in the same year, and was to revisit this conflict between finite humanity and infinite nature at greater length in *Das Lied von der Erde* (1908–9). But unlike Mahler, Strauss depicts a humanity not in search of eternity, but rather struggling to transcend religious superstition. *Also sprach Zarathustra* was first performed, to great acclaim, in 1896; by now a Strauss première had become an international event.

Though the earliest idea for *Don Quixote* occurred to Strauss within months of the *Zarathustra* première, he did not begin composing the new work in earnest until the spring of the following year. At the time he was also considering another tone poem, ultimately named *Ein Heldenleben*, for which *Don Quixote* would serve as a comic reverse side of the coin. It makes a return to the satirical world of *Till Eulenspiegel* and, once again, the subtitle suggests not so much genre as form or procedure: 'fantastic variations on a theme of knightly character for large orchestra'. The question of genre remains elusive, for the work – which features both cello and viola in solo roles – is a conglomeration of tone poem, theme and variations, and concerto. Strauss had already written a work for cello and orchestra, the *Romanze* of 1883, but a more obvious earlier precedent was Berlioz's *Harold en Italie*. *Don Quixote* features an introduction, ten variations and a coda, offering, respectively, a portrait of the anti-hero and his faithful Sancho Panza, their ten misadventures and the death of the Don. Once again Strauss chose selections from a major literary work, and, in the tradition of *Don Juan* and *Till Eulenspiegel*, *Don Quixote* proceeds episodically, though these episodes are now more self-contained: as each 'chapter' unfolds, so does a new variation. Moreover, this variation form incorporates nuances of the rondo principle found in the two preceding works. Indeed, what is varied is not so much themes as musical contexts, to make a musical analogy of the characters in their different incidents. The work had its first performance in March 1898. The reviews were mixed, more so than those of the other recent tone poems. Strauss had now reached a new level in his ability to create concrete sonic images through novel instrumental combinations and juxtapositions: bleating winds and brass to represent sheep, the wind machine for the aerial journey, snap pizzicatos to evoke the water-logged adventurers who have just fallen out of their 'enchanted boat'. Some critics accused Strauss of competing with Cervantes rather than interpreting him; others recognized an increasing aesthetic conflict in his music between technical industry and loftier inspiration, between Strauss the artisan and Strauss the artist. *Don Quixote* could have reawakened Cosima Wagner's original misgivings about *Don Juan*.

Strauss always considered *Don Quixote* and *Ein Heldenleben* as paired works, and suggested they be performed together; the first musical ideas for *Heldenleben* emerged while he was working on *Quixote*. This early *Heldenleben* sketch relates to the end of the piece and is labelled: 'longing for peace after the struggle with the world, refuge in solitude: the Idyll'. The parallel with *Quixote* is obvious. Cervantes offered Strauss the necessary material with which to explore the anti-hero, but for his hero Strauss looked to himself: his love for Pauline, his inner and outer struggles. The six sections of the work – the hero, his adversaries, his life's companion, his deeds of war, his works of peace, his withdrawal from the world – do not go beyond this fundamental idea. Some commentators have seen the work as comprising six continuous sections, but the general contours of sonata form seem more appropriate to Strauss's plan of expository material (hero, adversaries, beloved), developmental space (struggle) and recapitulation (rejecting war, seeking solace in domestic love).

Ein Heldenleben remains one of Strauss's most controversial works, mainly because its surface elements have been overemphasized. Various critics see the work as a flagrant instance of Strauss's artistic egotism, but a deeper interpretation reveals the issue of autobiography to be far more complex. *Ein Heldenleben* treats two important subjects familiar from earlier works: the Nietzschean struggle between the individual and his outer and inner worlds, and the profundity of domestic love. Essential to this latter preoccupation was his wife Pauline, for the almost dizzying recollection of themes from previous tone poems, opera and lieder concerns mostly love themes related to her as the hero's partner. This effect of culmination has a broader context as well, for *Ein Heldenleben* marks the end of Strauss's 19th-century tone poems and reflects a composer at the height of his creative powers. The première took place in March 1899.

At the threshold of a new century, Strauss had accepted a new post of unprecedented stature in Berlin, as conductor of the Hofoper. More important than the career change, he decided to dedicate himself to composing opera, though he made at least seven later endeavours in the symphonic realm, five of which never saw completion. In 1899 he briefly toyed with the idea of a tone poem to be called *Frühling*; early the next year he sketched a scenario for a symphonic *Künstlertragödie*. Shortly after completing *Salome* he planned *Vier Frauengestalten der National Gallery*, the intended subjects being Veronese's *Sleeping Girl*, Hogarth's *The Shrimp Girl*, Reynolds's *Heads of Angels* and Romney's portrait of Lady Hamilton. During the mid-1920s came a mooted *Trigon: Sinfonia zu drei Themen*. The fifth of these unrealized projects, *Die Donau* (1941–2), progressed the furthest: over 400 bars of short score survive. The two major symphonic works that were seen to completion, the *Symphonia domestica* (1902–3) and *Eine Alpensinfonie* (1911–15), have been somewhat overshadowed by the operas. And though neither is designated as tone poem in either title or subtitle, both draw on the tone poems' subject matter.

The *Symphonia domestica* inspired at first even more controversy than *Ein Heldenleben*: the composer's self-stylization as hero was distasteful enough, but to cast into the symphonic medium the quotidian world of family life was worse still. A principal focus of *Heldenleben*, however, was domestic love, which makes the autobiographical gesture of *Symphonia domestica* a logical extension. Originally titled *Mein Heim: ein sinfonisches Selbst- und Familienporträt*, the work was always referred to by Strauss as a symphony or symphonic poem, and there are indeed four sections that correspond loosely to symphonic movements: introduction (presentation of major characters and their themes), scherzando (child at play, his parents' happiness), cradle song and Adagio (child is put to bed, thereafter a parental love scene), and finale in the form of a double fugue (a new day begins with quarrelling and happy reconciliation).

Strauss insisted that no programme be published in connection with the first performance and on various occasions tried to distance himself from the work's detailed programmatic ideas, the most famous instance being a letter to Romain Rolland in which he declared that 'the programme is nothing but a pretext for the purely musical expression and development of my emotions, and not a simple *musical description* of concrete everyday musical facts'. He was probably placating Rolland, who was bewildered by a programme he felt diminished an otherwise beautiful work. But Strauss's original scenario and sketchbook annotations demonstrate that the *Symphonia domestica* is a novel celebration of the everyday, where Strauss sought to explore the pleasures and complexities of ordinary life. As he himself asked: 'What could be more serious than married life? Marriage is the most profound event in life and the spiritual joy of such a union is heightened by the arrival of a child. [Married] life naturally has its humour, which I also injected into this work in order to enliven it'. As with *Heldenleben*, the *Symphonia domestica* is not pure autobiography, but rather an idealized portrait of domestic love informed by personal experience. Pure autobiography would hardly have been as attractive, for during the genesis of *Domestica* his marriage was on shaky ground; for a while he and his wife were separated and even contemplated divorce. In a sense, then, the work was a gesture of reconciliation, a reaffirmation of a bond that had been threatened.

Strauss's last major symphonic work represents an extension of his preoccupation with Nietzsche during the 1890s, and indeed the earliest known sketches can be traced to about 1902. Mahler's death in 1911 reawakened his interest in the project, and in his diary he wrote:

> The death of this aspiring, idealistic, energetic artist [is] a grave loss ... Mahler, the Jew, could achieve elevation in Christianity. As an old man the hero Wagner returned to it under the influence of Schopenhauer. It is clear to me that the German nation will achieve new creative energy only by liberating itself from Christianity ... I shall call my alpine symphony: *Der Antichrist*, since it represents: moral purification through one's own strength, liberation through work, worship of eternal, magnificent nature.

This original choice of title was no doubt inspired by Nietzsche's 1888 essay *Der Antichrist*, which was published in 1895, the year before Strauss's *Also sprach Zarathustra*.

As in *Zarathustra*, Strauss does not portray the finite individual, jealous of eternal Nature, but rather one who celebrates, who is inspired to great deeds by his natural environment. In an unpublished diary entry (November 1915) on the *Alpensinfonie*, he stresses that both Judaism and Christianity – in short, metaphysics – are unhealthy and unproductive; they are incapable of embracing Nature as a primary, life-affirming source. Yet as Nietzschean as all this sounds, he did not in the event choose *Antichrist* as his model; instead, he turned to the alpine landscape that surrounded his home in Garmisch. The ascent and descent from an alpine mountain serve as a metaphor for the exaltation of nature. *Zarathustra* and the *Alpensinfonie* both begin at sunrise, and in the later work the composer specified 23 tableaux on a 24-hour journey: 'Night', 'Sunrise', 'Ascent', 'Entry into the Forest', 'Wandering by the Brook', 'By the Waterfall', 'Apparition', 'On the Flowering Meadows', 'On the Pastures', 'Through the Thicket and Briar', 'On the Glacier', 'Dangerous Moment', 'On the Summit', 'Vision', 'Mists Arrive', 'The Sun Gradually Darkens', 'Elegy', 'Calm before the Storm', 'Tempest and Storm', 'Descent', 'Sunset', 'Echo' and 'Night'. Despite its philosophical roots *Eine Alpensinfonie* is outwardly unphilosophical, proclaiming with startling beauty the glories of the natural world. It is unparallelled in Strauss's symphonic output both in terms of duration (50 minutes) and size (requiring over 140 players, including offstage brass). Critical reaction after the October 1915 première was mixed; some went as far as to describe it negatively as 'cinema music', a remarkable claim given that film was still a new medium.

It is significant that the *Alpensinfonie* is the achievement of a project that had begun around the turn of the century, for after *Salome* Strauss had lost interest in composing purely orchestral music. Beyond ballets, incidental music and some occasional works, such as the various fanfares, *Festliches Präludium* (1913) and *Japanische Festmusik* (1940), he composed very little instrumental music until the 1940s. In 1924 he was commissioned to write a concertante piece by the pianist Paul Wittgenstein, who had lost his right arm during the war. Shortly before he began work, Strauss's son suffered a severe illness, and the *Parergon zur Symphonia domestica* (1925) was dedicated to his recovery; it is based on Franz's theme from the *Symphonia domestica*. Of all the composers Wittgenstein commissioned, Strauss was the only one asked to write a second piece, and two years later he produced the *Panathenäenzug*. The subtitle, 'Symphonic Etude in the Form of a Passacaglia', refers to the repeated bass pattern above which are 18 continuous variations, framed by an introduction and finale. The neglect of both works, which explore a vast array of colours in both piano and orchestra, is partly due to the difficult technical challenges for the soloist.

In 1938 Strauss was asked to compose music for a documentary film on Munich, and though both music and film were completed the following year, the Nazi regime forbade the film's release. The musical material for the film score had been drawn from *Feuersnot*, a fitting idea since that opera had been set in Munich of old. Despite the ban, Strauss went ahead and published the music under the title *München: ein Gelegenheitswalzer* (1939); after Munich was bombed in the war the work was expanded with a new subtitle, *ein Gedächtniswalzer* (1945). By now Strauss had almost stopped composing, claiming that after *Capriccio* his career had come to a close; what followed were mere 'wrist exercises'. Yet among these exercises are some of his finest instrumental compositions, returning to the classic genres of his youth. His two late woodwind pieces, subtitled 'From the Workshop of an Invalid' (1943) and 'The Happy Workshop' (1944–5), exemplify opposing forces of resignation and hope, a dichotomy interwoven in so many works composed around the end of his life. The Second Horn Concerto (1942) and Oboe Concerto (1945) are very much part of the modern repertory, and the delightful *Duett-Concertino* (1947) for solo clarinet and bassoon with string orchestra has increased in popularity. But the most profound instrumental work from this late period is *Metamorphosen* (1945), subtitled 'a study for 23 strings'. There has been confusion regarding the genesis of this dark, brooding work, said by some to have been inspired by the destruction of Munich. Recent research has convincingly shown that the source was Goethe, more specifically his poem 'Niemand wird sich selber kennen'.

Rather than mourning the destruction of an opera house, *Metamorphosen* seeks to probe the cause of war itself, which stems from humanity's bestial nature. In short, Strauss inverts classic metamorphosis (where through self-knowledge the human subject becomes divine), realizing instead humanity's dangerous potential to indulge the basest animal instincts. In this context, the Beethoven 'Eroica' quotation towards the end is painfully ironic. It has even been referred to (by Alan Jefferson) as 'possibly the saddest piece of music ever written'.

8. Lieder and choral music. Strauss's career as a composer of lieder spans the later decades of the 19th century and the early decades of the 20th, a time when the lied underwent important transformation. His more than 200 songs reflect these changes, from the early lieder firmly in the German Romantic tradition to the later orchestral *Gesänge*, which show the influence of opera. Nonetheless, most were composed before the turn of the century, during which period separate phases may be distinguished. The youthful songs of the 1860s and 70s are grounded in an early 19th-century style, whether strophic or through-composed and ballad-like. These were written mainly for family soirées, and many were dedicated to the composer's aunt, Johanna Pschorr.

1885 marked a significant breakthrough for Strauss as a composer of lieder. During this first year of independence from his family he wrote his op.10 songs, works that reveal unprecedented musical maturity and include several mainstays of the recital repertory (e.g. *Zueignung*, *Allerseelen*). From now until 1891, when he became preoccupied with completing *Guntram*, he produced a lieder opus every year (opp.15, 17, 19, 21 and 22). The texts are all by lesser-known poets who flourished around the middle of the 19th century: Herrmann von Gilm, Adolf Friedrich von Schack and Felix Dahn. Strauss did not so much need poems of high literary quality as texts with striking expressive images or situations that could ignite his imagination. There was another vital catalyst as well: Pauline. Indeed, the three-year lull after 1891 was broken by the important op.27 (*Ruhe, meine Seele!*, *Cäcilie*, *Heimliche Aufforderung* and *Morgen!*), written in celebration of their marriage. Richard and Pauline performed lieder recitals all over the world, and their programming readily demonstrates that, unlike other composers, Strauss usually did not intend a particular opus to be performed as a unit.

The post-1891 lieder suggest a greater interest in contemporary poets, such as Karl Henckel, John Henry Mackay, Otto Julius Bierbaum and Richard Dehmel, and beyond the numerous love songs of the 1890s (*Traum durch die Dämmerung*, *Ich trage meine Minne*, *Ich liebe dich*) were songs of social criticism, such as *Der Arbeitsmann* and *Das Lied des Steinklöpfers*. Near the turn of the century Strauss's literary interests embraced earlier poets, including Rückert, Goethe and Heine, and he also composed some orchestral songs (generally labelled *Gesänge*) that adumbrate his interest in opera: the 14-minute *Notturno* (1899) could have been a model for any number of his future operatic monologues. More evidence for that connection is the fact that, shortly after his second opera, *Feuersnot* (1901), he seems to have lost interest in lieder composition, though Pauline's retirement from singing in 1906 no doubt contributed.

His return to the lied in 1918 brought him into a very different postwar world, where Romantic song had become something of an anachronism. Among his works from that year was a collection of songs very much in the cynical spirit of the time, *Die Krämerspiegel* (1918), which is the only legitimate song cycle he wrote, using biting, satirical texts by his contemporary Alfred Kerr, highly critical of the music-publishing industry. But during these postwar years he again became equally interested in the works of earlier poets. Shortly after *Krämerspiegel* he composed his op.67, which includes three songs of Ophelia and three from Goethe's *West-östlicher Divan*. All these, with their coloratura, reflect his experience as an opera composer, experience even more evident in the *Drei Hymnen* (1921) of Hölderlin for voice and orchestra.

Strauss occasionally orchestrated his piano lieder, generally writing arrangements for specific performances. In 1897 four songs were orchestrated for a concert with his wife in Brussels; a few years later three more were arranged for a performance in Berlin. Other singers (such as Elisabeth Schumann) inspired him to orchestrate; for her he arranged five songs in 1918, as well as the newly composed *Brentano Lieder* op.68. He continued to orchestrate songs off and on until 1948, when he arranged *Ruhe, meine Seele!* from his wedding songs. At that time he was also composing what was later to be called his *Vier letzte Lieder*; it has been suggested that the earlier song might well have been intended as part of this orchestral group, which sets poems by Hermann Hesse and Eichendorff. Whatever his original intention, these autumnal, luminescent late songs, which contemplate the meaning of death, are among Strauss's finest works in any genre.

His significant choral output remains the least-known part of his repertory, much of the neglect due either to the requirements of vast musical forces or, in the case of the *a cappella* music, extreme technical difficulty. The *Wanderers Sturmlied* (1884), on a text by Goethe, belongs in the category of large-scale works. Scored for six-part chorus and orchestra, it was inspired in part by Brahms's six-part *Gesang der Parzen*, a connection noted by Hanslick in a review of 1892, where he lauded aspects of the work but ultimately judged it inferior to its model. The work also reveals the importance of Wagner's growing influence during Strauss's 'Brahmschwärmerei', for the ending betrays distinct echoes of *Parsifal*. 13 years separate this work from his next choral undertaking, the *Zwei Gesänge* for mixed chorus *a cappella*, followed two years later by two sets of folksong-inspired men's choruses, the *Zwei* and *Drei Männerchöre*.

Strauss returned to the large-scale with *Taillefer* (1903). Scored for an orchestra of over 140 players, a mammoth chorus and soloists, this 15-minute work is only rarely heard, as is the *Bardengesang* for male voices and orchestra, composed only two years later. One of the most impressive of his *a cappella* pieces is the *Deutsche Motette* of 1913. Based on a Rückert text, this work, with its extended range and intricate chromatic part-writing, is one of his most difficult, and requires a professional ensemble of the highest skill. The bombastic *Olympische Hymne* (1934) is famous for its association with the 1936 games in Berlin, but around this time Strauss was composing his lesser known but far better *Drei Männerchöre* as a conscious antidote. These brief and rarely heard *a cappella* works, again to texts by Rückert, reject heroic bombast and address themes of peace and nature.

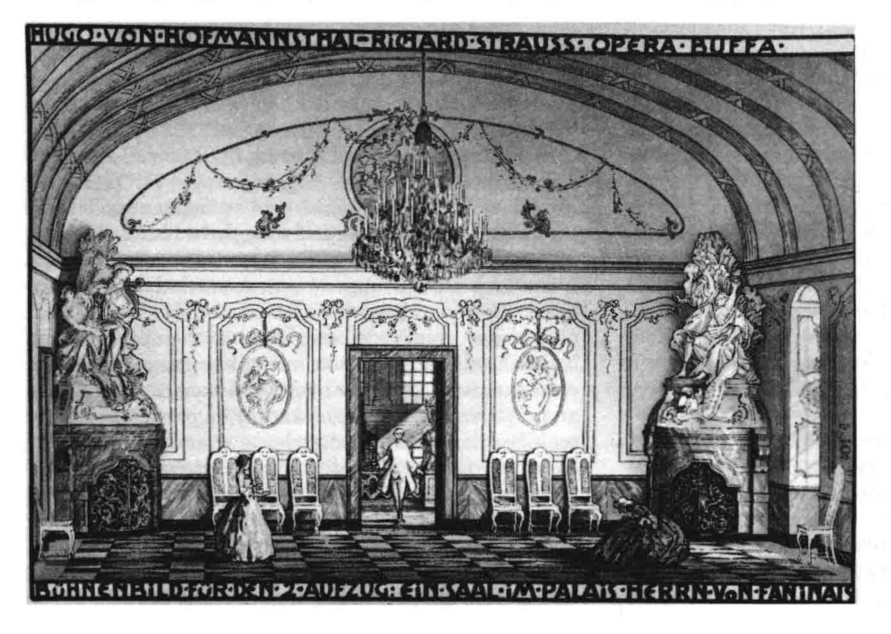
9. MUSIC FOR THE STAGE. Strauss considered his operas to be his major contribution to the 20th century, and from *Salome* to *Capriccio* he averaged a new opera every two to three years. The two operatic ventures that predate *Salome*, however, were less than successful. Encouraged by Ritter, he began sketching his own libretto for *Guntram* in late 1887, and the work, both its text and music, is unthinkable without the legacy of Wagner. But it is no mere copy of Wagner: Wagnerian literary and musical styles from various periods, from *Tannhäuser* to *Parsifal*, are often interlaced in critical fashion, and the work as a whole has a distinctly un-Wagnerian quality. Indeed the ending, where Guntram seeks redemption by abandoning his fraternal order and his art, can be read as an abandonment of Wagnerian metaphysics. That is certainly how Ritter interpreted it and, as a result, his intense friendship with Strauss was damaged irreparably. If the reception at the work's Weimar première in 1894 was lukewarm, the more important Munich première during the next season was an outright failure. Strauss was dismayed by the negative reaction of the musicians, the vehemence of the press and the duplicity of the Munich Hofoper management. This experience of the strong conservative elements in the Bavarian capital is central to an understanding of his later development, for it rekindled a dormant love-hate relationship with the city of his birth, a relationship that endured to the end. But the setback made him recognize that he was no librettist, see the danger of getting too near the Wagnerian shadow and realize the harshness of Munich's philistinism, which would serve as the subject for his next opera, *Feuersnot*.

This one-act work, too, is unthinkable without Wagner, especially in its clever and numerous tongue-in-cheek musical quotations; but now Strauss is engaged in the Eulenspiegel-like world of satire as he pokes fun at the citizens of medieval Munich, a setting owing much to *Die Meistersinger*. His librettist was Ernst von Wolzogen, a satirical playwright and later founder of the Berlin Überbrettl cabaret, who based his text on the Flemish legend *The Extinguished Fire of Audenaarde*, in which a young man is rejected and humiliated by the woman he tries to woo. The hero tells his woes to a magician, who extinguishes all fire in the town: only when the object of the young man's affection is herself humiliated can fire be restored. Strauss and Wolzogen moved the setting to Munich and the magician, not seen in the operatic version, became a thinly disguised Wagner, and the young man, his apprentice, an even more thinly disguised Strauss. 'When love is united with the magic of genius', Wolzogen remarked, 'even the most annoying philistine must see the light'. Seldom performed outside Germany, this fascinating work features waltzes parodied in a manner that foreshadows *Der Rosenkavalier*, and it requires a chorus of great technical skill, especially in the difficult children's parts. It had its première in Dresden on 21 November 1901 and, given the bizarre sexual content (much of it unstageable), had trouble with the censors from the very beginning.

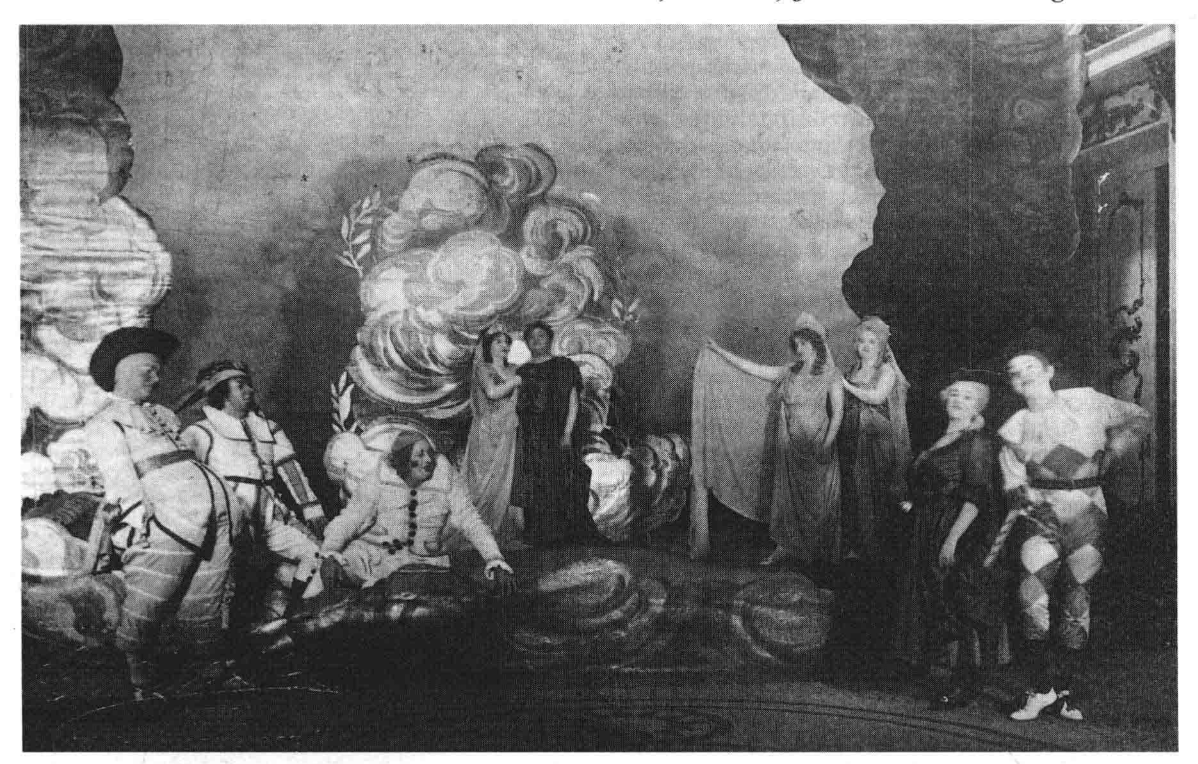
Censorship and scandal were the norm for innovatory art at the turn of the century, and Strauss's next opera, *Salome*, with its unsettling blend of oriental exoticism and sexual depravity, would not disappoint. Lust, incest, decapitation and necrophilia joined with sinuous chromaticism and dazzling orchestration to create a work that provoked simultaneous fascination and revulsion. Strauss became interested in the Wilde play as early as 1902, and seeing Gertrude Eysoldt in Max Reinhardt's Berlin production a year later strengthened his resolve. Dissatisfied with a German versified version of the text, he decided to set the play directly, in Hedwig Lachmann's translation, making his own cuts and alterations (fig.8). Above all he was impressed by the text's contrasting images as well as its symmetry: Herod, Jochanaan, the Jews; Salome's three seduction songs with Herod's three persuasive speeches; Salome's ostinato 'Ich will den Kopf des Jochanaan!'; and, of course, her erotic Dance of the Seven Veils. Salome's disturbing final monologue, where she becomes increasingly detached from the outer world, is one of the great culminating scenes in opera. Strauss remarked that it was easy to say after the fact that Wilde's play was 'crying out for music': 'That [music] had to be discovered'.

In the autumn of 1905 Strauss once again saw Eysoldt in Berlin in a Reinhardt production, this time of Hugo von Hofmannsthal's *Elektra*, a Freudian interpretation of Sophocles' tragedy. He was rivetted by its use of gesture, the concentration of action and the steadily rising tension towards Electra's dance after her father's murder has been avenged. He was immediately struck by the musical possibilities and contacted Hofmannsthal for permission to use the text. Numerous parallels have been drawn between *Salome* and *Elektra*: both works feature a strong female protagonist consumed by an *idée fixe*, both culminate in dance and both heroines are finally undone by their neurotic fixations. Those similarities caused Strauss, who preferred contrasting adjacent operas, to hesitate momentarily, and it took a determined Hofmannsthal to keep him on course. If *Elektra* is performed less often than *Salome*, it is because it contains Strauss's most difficult soprano role. The singer is on stage for every scene save the first, and she must do constant battle with a tumultuous orchestra, which proudly displays an ardent young composer's skill in handling leitmotifs. The opera is arch-shaped, the keystone being the central confrontation between Electra and Clytemnestra, which is the tensest scene in any Strauss work and certainly the most daring in terms of its hyperchromatic harmonic language. Years later Strauss was embarrassed that much of the singing was 'handicapped by instrumental polyphony', and he later suggested – tongue firmly in cheek – that it should be conducted like Mendelssohn, as 'fairy music'.

But it was the world of Mozart, not Mendelssohn, that inspired his next opera, *Der Rosenkavalier* (1909–10), set in 18th-century Vienna. This was his first true collaboration with Hofmannsthal, and though the libretto bears an intentional resemblance to Da Ponte's *Le nozze di Figaro* it conflates a wide range of sources, including Beaumarchais, Molière, Hogarth and even *Die Meistersinger*. It also unites comic elements with themes of profound seriousness. Strauss chose a musical language beyond the chromaticism of *Salome* and the dissonance of *Elektra*, and, as a result, *Der Rosenkavalier* represents a critical multilayering of musical styles – referring to Mozart, Johann Strauss and Verdi – and a modernist preoccupation with the dilemma of history. It is an opera about time and transformation on multiple levels. In its very opening lines ('What you were, what you are – that nobody knows, that no-one can explain'), Octavian transforms the verb 'to be' from the past to the present tense. In Act 1 Baron



sagt. Ah! ich will ihn jetzt küssen . . . Aber warum siehst du mich nicht an, Jochanaan? Deine Augen, die so schrecklich waren, so voller Wuth und Verachtung, sind jetzt geschlossen. Warum sind sie geschlossen? Öffne doch deine Augen! Erhebe deine Lider, Jochanaan! Warum siehst du mich nicht an? Hast du Angst vor mir, Jochanaan, dass du mich nicht ansehen willst? . . . Und deine Zunge, ~~die wie eine rothe, giftsprühende Schlange war, sie bewegt sich nicht mehr~~, sie spricht kein Wort, Jochanaan, diese Scharlachnatter, die ihren Geifer auf mich spie. Es ist seltsam, nicht? Wie kommt es, dass die rothe Natter sich nicht mehr rührt? . . . ~~Du wolltest mich nicht haben, Jochanaan! Du wiesest mich von dir.~~ Du sprachst böse Worte gegen mich, ~~Du benahmst dich gegen mich wie gegen eine Hure, wie gegen ein geiles Weib~~, gegen mich, Salome, die Tochter der Herodias, Prinzessin von Judäa! Nun wohl, ich lebe noch, aber du bist tot, und dein Kopf gehört mir. Ich kann mit ihm thun, was ich will. Ich kann ihn den Hunden vorwerfen und den Vögeln der Luft. Was die Hunde übrig lassen, sollen die Vögel der Luft verzehren . . . Ah! Jochanaan, Jochanaan, ~~du warst der Mann, den ich allein von allen Männern liebte! Alle anderen Männer waren mir verhasst.~~ Doch du warst schön! Dein Leib war eine Elfenbeinsäule auf silbernen Füssen.



8. Opening from Strauss's working copy of Oscar Wilde's 'Salome' (1896), translated by H. Lachmann, with illustrations by Aubrey Beardsley

Ochs boasts that he is 'Jupiter blessed with a thousand forms', but it is Octavian who takes on various transformations throughout the opera: as the Marschallin's adolescent lover, as her chambermaid, as a rose cavalier and, by the end, as a wiser young man.

To Hofmannsthal the miracle of life is that an old love can die, while a new one can arise from its ashes; yet in this transformation, which requires us to forget, we still preserve our essence. How is it that – in the same body – we are what we once were, now are and will become? This great mystery of life is, in one way or another, a theme that permeates much of Hofmannsthal's work. The Marschallin ponders this enigma in her poignant monologue ending Act 1, one of the opera's great moments in both score and libretto. Beyond the monologue, the delightfully anachronistic 19th-century waltzes, the magical presentation of the rose in Act 2 and the sublime final trio of Act 3 constitute some of Strauss's best-loved music. Yet the popularity of excerpts, independent of the whole, has overshadowed the theatrical brilliance and modernity of the work. Strauss, the lover of parody, pastiche and contrasts, had found his ideal librettist.

9. Design by Alfred Roller for Act 2 (the reception hall of Faninal's town house) of Strauss's 'Der Rosenkavalier', Hofoper, Dresden, 1911; it was obligatory for any theatre performing the opera to follow Roller's published stage and costume designs (Berlin: Fürstner, 1910)

10. Final scene from the revised version of Strauss's 'Ariadne auf Naxos', Hofoper, Vienna, 1916, with Maria Jeritza as Ariadne (background) and Selma Kurz as Zerbinetta

Ariadne auf Naxos (1911–12, rev. 1916), like *Der Rosenkavalier*, is a remarkably modern theatrical piece which, in its historicism, exploits an established canon as a source of parody. The opera forges a new relationship between composer, performer and audience, for without the audience's knowledge of tradition, parody cannot function. If in *Rosenkavalier* Strauss alludes to the style of other composers, *Ariadne* quotes specific musical works: Harlequin's song ('Lieben, Hassen, Hoffen, Zagen') is based on the opening theme of Mozart's A major Piano Sonata K331, and the melody of the Nymphs' trio ('Töne, töne, süsse Stimme') comes from Schubert's *Wiegenlied* ('Schlafe, schlafe, holder, süsser Knabe'). Although Zerbinetta's famous coloratura aria makes no direct quotations, Strauss's letters to Hofmannsthal make it clear from the outset that he looked to Bellini, Donizetti and others as stylistic models.

The opera within the opera juxtaposes the worlds of *opera seria* and *commedia dell'arte*, and the vivacious prologue of the revised version presents a behind-the-scenes view of the operatic stage. The work's mix and fragmentation of elements (e.g. the everyday world of the Prologue against the loftier Opera) foreshadows opera that other composers were to write in the 1920s: it offers a complex amalgam of contrasting literary and musical styles that, at face value, appear to undermine its coherence. In the hands of lesser artists, uniting these jarring contrasts might have proved an impossible task. But Strauss's penchant for accommodating the trivial alongside the exalted made him the ideal match for Hofmannsthal, whose chief aim in *Ariadne* was to 'build on contrasts, to discover, above these contrasts, the harmony of the whole'. *Ariadne* continues Hofmannsthal's preoccupation with the mystery of transformation: through Ariadne's love, Bacchus is transfigured, and Ariadne, who had longed for death in the wake of Theseus's departure, is herself transformed by embracing Bacchus and life.

Strauss's incidental music for the Molière play of the first version of *Ariadne* was not wasted, for it was used in a revised adaptation of the play that included pantomime and dance, though it is heard most often in the form of an orchestral suite. Gesture and dance were two modes of artistic expression of central importance to both Strauss and his collaborator. Indeed, Hofmannsthal's very first letter to the composer (11 November 1900) concerned a possible ballet scenario: at the time Strauss was already at work on a ballet of his own, *Kythere*, though it was never finished. Thus it was probably inevitable that Hofmannsthal, who viewed gesture as the purest form of communication, would ultimately approach Strauss with another ballet proposal, first *Orest und die Furien* (which Strauss rejected in 1912) and then *Josephslegende* (1912–14). The Joseph project, which included the significant collaboration of Hofmannsthal's friend Harry Graf Kessler, was planned for Diaghilev's Ballets Russes, with Nizhinsky in the title role and choreography by Fokine. By the time of the staging Nizhinsky had fallen out with the company, and the Paris première of 1914 featured Leonid Massine as Joseph. The exotic, oriental extravagance of the score recalls *Salome*, as does the erotic conflict between the chaste Joseph and the seductress Potiphar's Wife. The score, which incorporates material from Strauss's unfinished *Kythere*, foreshadows some of the more exotic moments in *Die Frau ohne Schatten*, especially in its timbral qualities, with the use of harp, celesta and first violins in three parts.

Serious work on *Die Frau ohne Schatten* began in the same year, 1914. In its dense orchestration, rich polyphony and intricate symbolism, this is Strauss's most complex stage work yet in many ways also his most personal. Though the subject concerns the shadowless Empress's search for humanity, the subplot of the Dyer, his wife and their troubled marriage touched Strauss more deeply than any other aspect of the story. His own marriage was troubled during this time, and Hofmannsthal hinted at this domestic friction when he suggested that the Dyer's wife could be modelled 'in all discretion' after Strauss's. Significantly, the 'symphonic fantasy' derived from the opera in 1946 presents themes related primarily to this aspect of the plot. *Die Frau ohne Schatten* is as difficult to cast as it is to stage, for it requires an ensemble of strong singers and is both complex and expensive to produce. But after the composer's death this work, always among his favourites, finally earned its deserved international acclaim.

Die Frau ohne Schatten was followed by three ballet projects: the unfortunate *Schlagobers* (1921–2), the Couperin *Tanzsuite* (1923, only choreographed as part of *Verklungene Feste* in 1941) and a reworking of Beethoven's *Die Ruinen von Athen* (1924).

Strauss seems to have wearied of late Romanticism. 'Let us resolve', he wrote to Hofmannsthal as early as 1916, 'that *Die Frau ohne Schatten* will be the last Romantic opera. Hopefully you will have a fine, happy idea that will definitely help set me out on the new road'. But Strauss was to go that road alone, to *Intermezzo* (1918–23), a comedy that again featured his wife Pauline as model for the leading female role. The work was based on an incident that occurred when Pauline mistakenly accused her husband of philandering while on tour. Strauss called his work a 'bourgeois comedy with symphonic interludes' and firmly believed that he had established a new operatic genre (*Spieloper*) for the 20th century, so much so that he felt compelled to write a preface to the score. The innovatory aspects of the work lay in its realistic, contemporary subject matter, in its separation of conversational and lyrical impulses (by putting the latter in the interludes), and in its quasi-cinematic dramaturgy (13 short scenes in just two acts). Opinions among contemporary critics were mixed, but most praised the delightful interludes, which became so popular that Strauss published four of them in a concert arrangement nine years after the opera's première.

The two-act *Die ägyptische Helena* (1923–7) completes Strauss's trilogy of marriage operas and, in doing so, returns to the more elevated world of Greek myth. But the composer, encouraged by his comic *Intermezzo* and feeling destined to become, in his own words, the 'Offenbach of the 20th century', this time sought not tragedy but mythological operetta, and Hofmannsthal, eager to lure him away from Wagnerian 'erotic screaming', was all in favour. Especially in its densely symbolic second act, however, the work was to prove far removed from *La belle Hélène*. Indeed, it explores many important themes central to *Ariadne* and *Die Frau ohne Schatten*: memory, marital fidelity and the restoration of trust. Hofmannsthal considered *Helena* to be his finest libretto and, though it has been ridiculed by many commentators, it remains underrated. Moreover, as in *Die Frau ohne Schatten*, Strauss renders complicated myth on a powerful human level. The work was composed during his Vienna period, and he had specific Staatsoper singers in mind, such as Maria Jeritza, though she did not in fact sing the title role at the première. The second act was revised for a revival in Salzburg in 1933, but the work has never become part of the basic repertory.

11. Costume design by Alfred Roller for the Dyer (Barak) in Strauss's 'Die Frau ohne Schatten', Staatsoper, Vienna, 1919

Strauss and Hofmannsthal's final collaboration, *Arabella* (1929–32), was a different matter. *Helena* had failed to satisfy Strauss's desire for lightness: he believed he still had within him another Viennese comedy, without the 'mistakes and longueurs' of *Der Rosenkavalier*, which he nonetheless considered his high-water mark. *Arabella* marks a return to Vienna, but to the Vienna of the 1860s, the 'Ringstrasse period' when the Austrian capital experienced its final upsurge. In constructing his libretto, Hofmannsthal returned to two earlier works: an unfinished play, *Der Fiaker als Graf*, and a short story, *Lucidor*. The play provided setting and atmosphere (especially the Fiaker ball), but the essence of the story came from *Lucidor* which, however, focussed attention more on

Arabella's younger sister than on Arabella herself. Strauss sensed this problem in the first libretto draft and asked that the title character be given a soliloquy to close Act 1. Hofmannsthal's solution ('Mein Elemer') delighted the composer, who immediately sent a telegram of congratulations to his librettist. But the telegram remained unopened. Hofmannsthal had suffered a fatal stroke the day it arrived.

Work on *Arabella* then progressed slowly, and the stunned composer felt artistically isolated, even disorientated. Though Act 1 was in good shape, Acts 2 and 3 were doubtless to have been further refined, and Strauss could not bring himself to alter what he considered Hofmannsthal's 'final bequest'. Dramaturgical problems in Act 2 notwithstanding, Strauss created an opera of compelling lyricism and poignancy. The Arabella-Zdenka duet of Act 1, infused with the flavour of Hungarian folk music, is one of Strauss's finest. Act 2 features another memorable Hungarian duet, for Arabella and Mandryka, as well as some remarkable coloratura from the Fiakermilli. But the greatest moment of all is the final scene of the work, which opens with a downward sweep in the orchestra in a gesture recalling the song *Allerseelen* (1885). Arabella descends the staircase to offer a glass of pure water to her betrothed, a 'Hungarian custom' invented by Hofmannsthal, just as the 'Viennese tradition' of the silver rose had been his device. Yet, despite her gesture of submission, Arabella is a woman fully in control of her surroundings throughout the work, 'an entirely modern character', according to Hofmannsthal. Indeed, in the final line of the opera she informs Mandryka that she can only be herself: 'Nimm mich wie ich bin'.

As with so many of Strauss's collaborations with Hofmannsthal, *Arabella* changed as it was being made, and though not without its humorous moments, it is not the light comedy he intended. Indeed, his only work in the true *buffa* tradition was his next, *Die schweigsame Frau* (1933–4). And where *Arabella* was composed during some of Strauss's darkest personal moments, this next project found him at his brightest. Not since *Der Rosenkavalier* had he shown such unbridled enthusiasm for an operatic project, and he declared Zweig's libretto, based on Ben Jonson's *The Silent Woman* (1609), a 'born comic opera ... more suitable for music than even *Figaro* and the *Barber of Seville*'. However, the text's closest affinity is to Donizetti's *Don Pasquale*. Both Don Pasquale and Morosus, the leading male figure in *Die schweigsame Frau*, are crotchety old bachelors upon whom friends and relatives play abundant good-natured tricks. There are numerous and amusing allusions to Italian operas, in both words and music, throughout a work that contains some of Strauss's lightest music for the stage. Indeed, the consistent parlando style, with only rare moments of lyricism, has made this opera, especially for non-German-speaking audiences, somewhat tedious. Strauss nonetheless was delighted with the result and always considered it one of his finest stage comedies.

Zweig, unable to work again with Strauss, proved true to his promise to help Gregor in writing the libretto for the composer's next opera, *Friedenstag* (1935–6): the idea was his, and he offered advice right up to the final revision. *Friedenstag*, Strauss's first one-act opera since *Elektra*, occupies a unique place in his output. Inspired chiefly by the female voice, Strauss now found himself writing mostly for male singers, and he no doubt drew on his earlier experience of composing for men's choruses. The music of *Friedenstag* is dark and brooding, lacking the warmth of his other operas; the only exception is the role of Marie, the wife of the steadfast Commandant and the only solo soprano in the opera. Ironic allusions to the march, in a distinctly Mahlerian guise, suggest the distance between Strauss and his military material, for what had attracted him to the libretto was its hope of peace between opposing German forces. After the two rival commandants embrace, Strauss composed an extended C major choral finale, a conscious allusion to the end of *Fidelio*. With its paucity of stage action and extensive choral treatment, the work is perhaps as much a scenic cantata as an opera, and its rare performances have usually been in concert form.

Daphne (1936–7), its intended partner, marks a return to a theme dear to Strauss's heart, that of transformation. Unlike the Empress in *Die Frau ohne Schatten*, who desires humanity, the nature-worshipping Daphne disdains it, and by the end of the opera she is transformed into a laurel tree. The flaws in the unwieldy first version of the libretto were immediately clear to Strauss: with its lack of focus, human conflict and sense of shape, it failed to suggest felicitous musical possibilities. But after extensive revision and outside advice from Zweig, Krauss and others, a usable libretto was crafted. Even Gregor's beloved final chorus was scrapped, for Strauss was far more interested in the process of transformation than in a stiff choral finale. The splendid music he wrote for this scene develops into a miniature tone poem with wordless vocal obbligato, combining a seemingly effortless interweaving of returning motifs with skilful harmonic pacing. The enchanting orchestral sound is at once rich and refined – a hallmark of Strauss's late period.

The roots of his next opera, *Die Liebe der Danae* (1938–40), reach back to 1920, when, after the tortuous *Frau ohne Schatten*, Strauss wanted to write a lighter, more cheerful work. Hofmannsthal had responded with a scenario, *Danae oder Vernunftheirat*, that conflated two myths, Danae's visitation by Jupiter in the guise of golden rain and the legend of Midas's golden touch. As much as Strauss admired many details of the sketch, there were too many insurmountable dramaturgical problems, and he became increasingly preoccupied with his own *Intermezzo*. Hofmannsthal's next offering to Strauss was to be a 'light mythology' based on an entirely different source, *Die ägyptische Helena*. *Danae* was soon forgotten. But by 1936 the Thirty Years War and Greek tragedy had taken their toll on Strauss, who asked Gregor to work up the Hofmannsthal sketch, even though Gregor had earlier shown the composer a *Danae* scenario of his own. The fragile satire of Hofmannsthal's draft was beyond Gregor's grasp, whose job was further complicated by the very dramaturgical problems that had vexed Strauss in 1920. After long, diligent work, and much outside assistance, a libretto was finally forged.

With its numerous transformations and sizable vocal demands on a large singing cast, *Die Liebe der Danae* is a challenge to stage and cast, and therefore rarely performed. The title role was written for Krauss's wife, Viorica Ursuleac, and there are ample instances of the quiet, sustained high-range singing that made her famous. The role of Jupiter is a tour de force among Strauss's baritone roles, for not only is the range rather high (certain sections are routinely transposed) but the music

12. Final page of the autograph score of 'Capriccio', dated 3 August 1941

demands great vocal agility, especially in the final 'Maia Erzählung', one of Strauss's best baritone monologues. Despite the work's various contributors – Gregor, Zweig, Krauss, Wallerstein – one detects the spirit of Hofmannsthal in its broad themes. Not unlike *Die ägyptische Helena*, the opera focusses on marriage, fidelity and memory. Moreover, neither opera turned out to be the mythological operetta that was first envisioned. In the end Danae chooses love over money and power; Jupiter renounces earthly things and, after blessing the union of Danae and Midas, he returns to Olympus. In 1944 an aged, resigned Strauss strongly identified with his Jupiter, and after the dress rehearsal, on August 16, he even suggested that the 'sovereign gods of Olympus' should have called him up as well.

Though he often referred to *Danae* as his last opera, his final completed work for the stage was a 'Conversation Piece for Music', *Capriccio* (1940–41) – a work that was intended neither for the regular opera house nor for the normal opera audience. Inspired by a libretto (Casti's *Prima la musica, dopo le parole*) that Zweig had come across in the 1930s, the work is an extended one-act debate about words and music. The issue of textual audibility became an increasing preoccupation for Strauss throughout his operatic career, and from *Elektra* to *Daphne* he had come a long way in his self-described 'struggle' for balance between singers and orchestra. Those two works call for orchestras of similar size, but the latter – emphasizing clarity, lyricism and transparency – is far from the turbulent sonic realm of the former. Important milestones along the way in this evolution include *Ariadne*, *Intermezzo* and *Die schweigsame Frau*.

Set during the time of the Querelle des Bouffons, *Capriccio* is rich in both historical allusions and self-references: we hear quotations from Gluck, Piccinni and Rameau, textual references to Metastasio, Pascal and Ronsard and self-borrowings from *Ariadne*, *Daphne* and *Die Krämerspiegel*. Moreover, the characters are all allegorical: Flamand (music), Olivier (words), La Roche (stage direction), Clairon (acting) and the Count and Countess (patrons). The title-page suggests that the libretto was a collaboration between Strauss and Krauss, but there were other unmentioned ingredients in the final recipe: Zweig, who rediscovered the Casti text, Gregor, who tried and failed to carry it out, and Hans Swarovsky, who found the Ronsard sonnet on which the work centres. Not unlike Act 3 of *Die Meistersinger*, where we witness the genesis of Walther's Prize Song, *Capriccio* also offers a view of compositional process. First the Count reads the sonnet alone; then it is read by its 'author', Olivier,

while Flamand improvises at the keyboard; finally Flamand sings it to the Countess. The last of the 13 scenes marks the sonnet's final destination in its upward journey from prosaic baritonal readings through a musical setting sung by a tenor to Strauss's favourite medium, the soprano voice. But before we arrive there we must get through the pivotal ninth scene, which Strauss labels 'Fuge (Diskussion über das Thema: Wort oder Ton)'. The centrepiece of this scene is La Roche's monologue, where he asks, and Strauss with him: 'Where is the [modern] masterpiece that speaks to the hearts of people, in which their souls are seen reflected? Where is it? I cannot discover it, although I keep searching. They make fun of the old and create nothing new'. An extended orchestral introduction (the 'moonlight music') brings us to the last scene, where the Countess must finally choose between poet and composer. To make up her mind she sings through the sonnet one last time. Whom will she choose? Strauss's final curtain seems to leave the question open. Yet this final scene, one of his great soprano monologues, radiates with some of his finest composition, proclaiming clearly that it is not words but music that reigns supreme.

WORKS

Works are given the no. assigned them in Franz Trenner: *Richard Strauss: Werkverzeichnis* (Munich, 1993, 3/1999) (TrV)

OPERAS

TrV	*op.*

BRYAN GILLIAM (text, work-list), CHARLES YOUMANS (bibliography)

Stravaganza (It.: 'extravagance', 'fantastic eccentricity'). A term for a piece in no specific form involving melodic, harmonic, rhythmic or other features of an extraordinary kind. It appears adjectivally by the end of the 16th century in works such as Giovanni de Macque's *Consonanze stravaganti* for organ (HAM, no.174) which exhibit harmonic mannerisms, similar to those employed by Gesualdo, that became part of the *stylus phantasticus* of the Baroque period. The word occasionally appears as a title in 17th- and 18th-century violin music: Carlo Farina's *Capriccio stravagante* (1627), a taxing virtuoso piece for violin and strings including the imitation of birds and animals, was extremely influential; and a *Stravagance* by the elder Matteis from the late 17th century is characterized by wide leaps across the strings. On the other hand, Vivaldi's set of concertos called *La stravaganza* (op.4) is more remarkable for its musical originality than for extravagant features of technique or musical style. Carlo Tessarini probably adopted the title from Vivaldi for his

own op.4 of 1736–7. A cantata by Benedetto Marcello, *Stravaganze d'amore* (excerpt in C. Parrish, ed.: *A Treasury of Early Music*, New York, 1958, no.49), is a musical and textual satire on the genre as amusing as the same composer's *Teatro alla moda*. Roger North was highly critical of many features adopted in the genre (see J. Wilson, ed.: *Roger North on Music*, London, 1959, pp.129–31). Although it must be admitted that in pursuing novelty composers sometimes achieved effects that were merely awkwardly unconvincing, the value of these experiments in discovering new expressive resources was not altogether negligible.

MICHAEL TILMOUTH

Stravinsky, Fyodor Ignat'yevich (*b* Rechitskiy, Minsk province, 8/20 June 1843; *d* St Petersburg, 21 Nov/4 Dec 1902). Russian bass of Polish descent, father of IGOR STRAVINSKY. He attended the *gimnaziya* (grammar school) at Nezhin, and then studied law. While a student, he sang with great success in public concerts and eventually decided to make a career as a singer. He entered the St Petersburg Conservatory in 1869, where, from September 1871, he studied with Camillo Everardi. In 1873, the year in which he graduated, Stravinsky's performance as Don Basilio in a student production of *Il barbiere di Siviglia* attracted the attention of the critics. He was engaged to sing at the opera theatre in Kiev and made his public début as Count Rodolpho in *La sonnambula* on 22 August/3 September 1873. He remained in Kiev until 1876, when he became one of the principal basses at the Mariinsky Theatre in St Petersburg, appearing there regularly until the year of his death. Stravinsky possessed a many-sided dramatic talent, and played both serious and comic roles with great mastery. He made a total of 1235 appearances in 64 different roles. He was particularly successful in Russian opera, being noted for his portrayals of Holofernes in Serov's *Judith*, the Miller in Dargomïzhsky's *Rusalka*, Rangoni and Varlaam in *Boris Godunov* (Rimsky-Korsakov wrote the drinking scene in *Sadko* especially for Stravinsky after seeing him as Varlaam or, as some writers claim, as Skula in Borodin's *Prince Igor*), Golova in Rimsky-Korsakov's *May Night* and Panas in his *Christmas Eve*, and Andrey Dubrovsky in Nápravník's *Dubrovsky*. Stasov considered that in the role of Farlaf (in Glinka's *Ruslan and Lyudmila*) Stravinsky was the 'worthy successor to Osip Petrov'. Tchaikovsky was a great admirer of Stravinsky, and asked that he should play the comparatively small part of Orlik in his opera *Mazepa*, since this part in particular required a 'good artist'. Stravinsky sang in three other Tchaikovsky premières, creating the roles of His Highness in *Vakula the Smith*, Dunois in *The Maid of Orleans* and Mamïrov in *The Enchantress*.

An intelligent and inspired performer, Stravinsky scorned the purely routine and superficial approach to his art and made a thorough psychological study of each character he portrayed, jotting down ideas for his interpretation in a notebook which he always carried. He took an interest in every aspect of stagecraft, and was an authority on make-up and costume design. Although his voice was said to be not intrinsically beautiful, especially in his last years, it was powerful and of a wide range (over two octaves). He strove to achieve evenness of tone, flexibility and variety of colour, so that he could use his voice to both musical and dramatic ends with equal success. He was an excellent concert singer; ballads such as Glinka's *Nochnoy smotr* ('The Night Review') and Musorgsky's *Polkovodets* ('The Field Marshal') were ideally suited to his histrionic gifts. Chaliapin acknowledged Stravinsky's supremacy in the 1890s, and learnt much from him. Stravinsky was a bibliophile whose library numbered over 7000 volumes, and a collector of pictures. His son alleged that he had an uncontrollable temper, and was a somewhat distant and unpredictable parent. But Igor had no doubts about his father's 'brilliant' dramatic gifts as an actor and his 'virtuosic' singing, commenting on the 'nobility' of his interpretations. For most of his last year he was semi-paralysed, and he died from cancer of the spine.

JENNIFER SPENCER/EDWARD GARDEN

Stravinsky, Igor (Fyodorovich) (*b* Oranienbaum [now Lomonosov], nr St Petersburg, 5/17 June 1882; *d* New York, 6 April 1971). Russian composer, later of French (1934) and American (1945) nationality. One of the most widely performed and influential composers of the 20th century, he remains also one of its most multi-faceted. A study of his work automatically touches on almost every important tendency in the century's music, from the neo-nationalism of the early ballets, through the more abrasive, experimental nationalism of the World War I years, the neo-classicism of the period 1920–51 and the studies of old music which underlay the proto-serial works of the 1950s, to the highly personal interpretation of serial method in his final decade. To some extent the mobile geography of his life is reflected in his work, with its complex patterns of influence and allusion. In another sense, however, he never lost contact with his Russian origins and, even after he ceased to compose with recognizably Russian materials or in a perceptibly Slavonic idiom, his music maintained an unbroken continuity of technique and thought.

1. BACKGROUND AND EARLY YEARS, 1882–1905. Stravinsky was in Russian terms a nobleman; his parents were 'dvoryanine' or, as we might say, gentry. His mother, Anna Kholodovskaya, was one of four daughters of a high-ranking official in the Ministry of Estates in Kiev, a respectable if dull man who educated his daughters in the correct, somewhat prim manner of the provincial 19th century. Anna grew up a good domestic singer and fluent pianist, a well-organized if strait-laced wife and mother.

1. Igor Stravinsky in the family flat at Kryukov Canal 66, St Petersburg, 1898

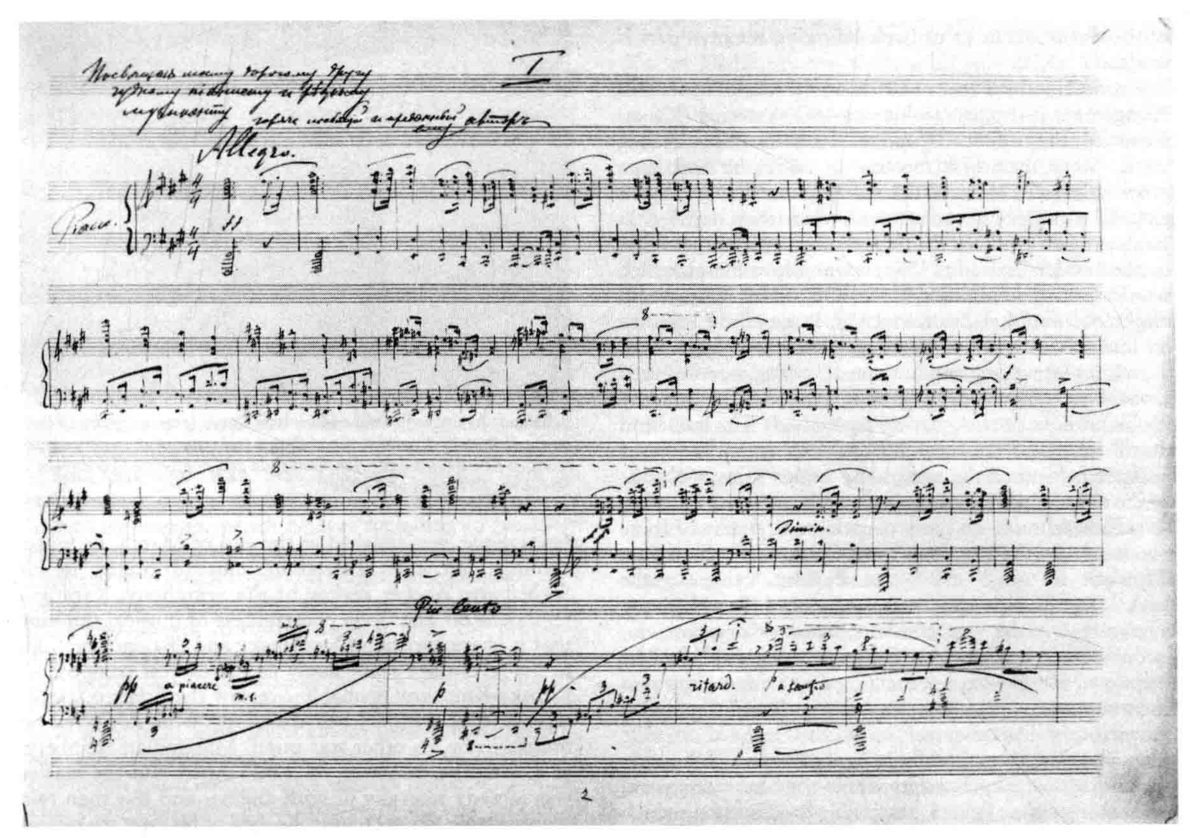
Her husband, FYODOR IGNAT′YEVICH STRAVINSKY, whom she married in Kiev (against her widowed mother's wishes) in 1874 when she was still only 19 and he 30, descended from a long line of Polish grandees, senators and landowners. But since the partition of Poland in the 1790s the Stravinskys had come down in the world, lost their lands and gradually migrated southwards into a remote region of what is now south-eastern Belarus′. Fyodor's father, Ignaty, was a working agronomist of vaguely disreputable habits, a womanizer (according to his composer grandson) who eventually left and divorced his Russian wife, and a bad businessman who bequeathed to his youngest son little beyond a determination not to let his own family life disintegrate in the same way.

If there was music in Ignaty Stravinsky's house it was provided by his wife, Aleksandra Skorokhodova, who had an attractive singing voice. But it was probably never a strikingly musical household, and it was only gradually that, while studying law in the mid-1860s in Odessa, Kiev and (when money started running out) Nezhin, Fyodor discovered a talent for singing. Eventually he won a scholarship to the Conservatory in St Petersburg, and in 1876 he made his début at the Mariinsky Theatre (as Mephistopheles in Gounod's *Faust*). By the time his and Anna's third son, Igor, was born (at the nearby Baltic summer resort of Oranienbaum) in 1882, Fyodor had taken the Russian operatic world by storm and was being widely discussed as the finest bass-baritone of his generation.

Music was thus a part of the working environment in the large second-floor flat on the Kryukov Canal, a stone's throw from the Mariinsky, which was to be Igor's home for the next 27 years. Fyodor sang not only repertory parts but also new roles, some written for him, like the Mayor in Rimsky-Korsakov's *May Night*. Leading lights of the St Petersburg operatic world came and went in the Kryukov flat. Fyodor knew not only Rimsky-Korsakov but also Borodin and Musorgsky, as well as prominent music journalists like Nikolay Findeyzen, and conductors like Nápravník. Fyodor also accumulated a large library, partly a bibliophile's collection, partly a working archive of scores and other materials relating to the parts he was studying. Igor inherited his mother's fluency as a piano sight-reader and had access to his father's scores: the Russian repertory, of course (including figures such as Dargomïzhsky and Serov), Mozart, Rossini, Meyerbeer, Gounod, Bizet, Verdi, Boito and the Wagner of *Rienzi* and *Lohengrin*, among many others. A photograph of Igor in his mid-teens shows him at his desk surrounded by the icons of a musical passion, including montages of portraits of the great composers and a low relief of Beethoven. His early enthusiasm for Wagner is attested by a surviving notebook from 1896 with an entry on *Parsifal*: '1877 – wrote text, 1879 – composed opera in rough, 1882 – orchestrated whole of *Parsifal*', with a drawing of 'Bayreuth' in the form of a castle, and information about the dates of composition of *Tristan*. Whether or not Igor attended any Wagner in his youth, he must often in his teens have witnessed his father's performances in a wide range of other operas from the comfort of a family box. He certainly went to the 50th anniversary performance of Glinka's *Ruslan and Lyudmila* in November 1892 (with his father as Farlaf), possibly even to the première production of Tchaikovsky's *Sleeping Beauty* almost three years before that; and ballet matinées must have been a fairly common treat.

Nothing survives, however, of any compositions of his own before 1898, and there was in all probability no talk of a musical career until at least that stage. Early piano lessons with a certain Aleksandra Snetkova were probably no more than a normal part of an upper middle-class domestic education, since Igor (like his brothers) was educated by governesses at home until he was 11. Teenage summer-holiday letters to his parents are more about the books he has read, the plays he has acted in and the sketches he has drawn than about music-making. But then music may already have become a touchy subject by the time he was 17; and it is transparent that Igor constructed his letters home, loving as they are, specifically to gratify his parents' expectations.

In the 1890s the family began to spend long summer holidays with Kholodovsky aunts and uncles on their



estates in trans-Volgan Samara (Pavlovka) and Ukraine, and after the death of Igor's eldest brother, Roman, in 1897 Fyodor and Anna summered routinely at one Ukrainian estate (Pechisky), where the adored Roman was buried, while Igor and (sometimes) his younger brother, Gury, preferred the other, Ustilug (in Volhynia), where there were lively female cousins and a less funereal atmosphere. This entailed long rail journeys for the boys, for which they were required to account in meticulous detail, and it also meant regular and painstaking health bulletins from Ustilug. Stravinsky's lifelong obsession with illness, medicine and doctors doubtless sprang from this source. And it was not wholly unjustified, since tuberculosis was endemic in the Kholodovskys, and Igor and his surviving older brother Yury were both sufferers (to the extent that Igor spent the summers of 1903–4 with his Samaran aunt and uncle at Pavlovka, talking about music – of which they were passionate amateurs – and drinking huge quantities of koumiss, the Tartar fermented mare's milk, which was supposed to be good for the lungs). Like most well-to-do Russians, the Stravinskys also visited German spas and Swiss mountain resorts. Such holidays were traditional and, in some ritualistic sense, precautionary. But in 1902, Fyodor fell terminally ill with cancer, and the German trip that summer was no holiday and certainly no precaution, but a desperate, ultimately unavailing quest for treatment (which included the new Röntgen method). Igor, however, was able to put it to another use.

2. TOWARDS 'THE FIREBIRD', 1902–09. Stravinsky had left school (Gurevich's Gymnasium) the year before and entered St Petersburg University as a law student that autumn. His real wish, however, was to study music. Two years before that (in December 1899) he had acquired a new and more high-powered piano teacher, a pupil of Anton Rubinstein called Leokadiya Kashperova. Now, in November 1901, he started private lessons in harmony and counterpoint with Fedir Akimenko, a newly graduated student of Rimsky-Korsakov; and three months later Akimenko was replaced by the more sympathetic Vasily Kalafaty, also a former Rimsky pupil. There is some evidence that these theory lessons were a *quid pro quo* for Igor's agreeing to study law, which in Tsarist Russia was the normal (and reasonably foolproof) route to an eventual sinecure in the civil service. At the law faculty Stravinsky met and befriended Vladimir Rimsky-Korsakov, the composer's youngest son, and a keen violinist. And it was probably at his suggestion that, in Germany in August 1902, Igor made an excursion from Bad Wildungen to Heidelberg, where the Rimsky-Korsakovs were ensconced for the summer, bearing with him a portfolio of short pieces which may or may not have included the only two works (apart from the fragmentary Tarantella of 1898) which survive from this period: the little piano Scherzo in G minor, and the Pushkin song, *Tucha* ('The Storm'). Rimsky-Korsakov, who was not given to extravagant praise at the best of times, is unlikely to have been wildly impressed by these gauche miniatures or others like them. But equally he must have been struck by something about them, since he did not (as he is supposed to have done in other cases) simply advise Igor to stick to the law. Instead he insisted that he continue his theory lessons, and agreed to oversee his composition work in due course himself. Significantly, he advised him against entering the Conservatory, sensing that in such an environment the 20-year-old composer would merely be discouraged by his own lack of training.

By the following summer, Stravinsky was at work on his first major task for Rimsky-Korsakov, a sumptuous four-movement Piano Sonata in F♯ minor in the manner of Glazunov (another Rimsky-Korsakov pupil) and Tchaikovsky. In August he travelled from Pavlovka to Krapachukha, in the Valdye Hills to the south-east of St Petersburg, where the Rimsky-Korsakovs were staying that year. Rimsky-Korsakov gave him instruction in sonata writing, and set him orchestration exercises based on his own recently completed opera, *Pan Voyevoda*. Back in St Petersburg, Stravinsky completed the first two movements of the sonata, then broke off to compose a cantata for performance at Rimsky's house on his 60th birthday in March 1904; the cantata was duly performed under the composer's direction, and was described by Rimsky in his diary as 'not bad', but the music has not survived. After completing the sonata at Pavlovka that following summer, Stravinsky soon embarked on his next assignment, a large-scale symphony, which, like the sonata, cultivated good practice in terms of conventional models, the obvious models being again Glazunov and Tchaikovsky. The first draft of the 40-minute Symphony in E♭ came more rapidly than the sonata, and was finished in September 1905.

Stravinsky had been continuing his law studies and living at home on the Kryukov Canal. It was not a comfortable time. Anna had been overwhelmed by her husband's death late in 1902 (according to her great-niece, she kept a photograph of Fyodor in his coffin by her bed for the rest of her life); and she may have resented Rimsky-Korsakov's influence on her son, and its tendency to draw him further into the idea of a musical career. She certainly resented Yury's marriage in January 1904, and cordially detested her new daughter-in-law. On one occasion, Igor fled to Yury's house and stayed there for some days before crawling home to the Kryukov flat. He was also frequently at the Rimsky-Korsakovs', either for his weekly lesson (after which he would usually stay to dinner), or for the regular musical soirées which, early in 1905, crystallized into a formal *jour fixe* every Wednesday, and which his brother Gury, who was developing into a fine baritone, often attended as well. There were also concerts at the so-called Assembly of the Nobility (now the Philharmonic), especially the ever more stereotyped Russian Symphony Concerts, a regular series devoted exclusively to Russian music, founded by the publisher Mitrofan Belyayev, which Rimsky-Korsakov would attend with favoured pupils, often also sitting in on rehearsals. More repertory based were the concerts of the Russian Musical Society, and (from 1903) the enterprising Ziloti concerts, which introduced new music from the West (Strauss, Elgar, Debussy, Mahler) and were by far the best played. Stravinsky would also sometimes go to the Mariinsky with his teacher, but only ever to opera (Rimsky-Korsakov and his entire circle despised ballet). Rimsky-Korsakov himself was writing mainly operas at the time, and his own premières were red-letter days for all his pupils. Stravinsky went to *Pan Voyevoda* (in the Conservatory) in October 1904, and *The Legend of the Invisible City of Kitezh*, another score on which he himself had worked, at the Mariinsky in February 1907.

It was at Rimsky-Korsakov's Wednesdays that Stravinsky had his own first performances. After the cantata, the

2. Autograph MS of the beginning of Stravinsky's Piano Sonata in F♯ minor, composed 1903–4 (RUS-Mcm)

Piano Sonata was played by its dedicatee Nikolay Richter in February 1905; and Stravinsky himself from time to time performed short piano pieces and comic songs, none of which has survived. There was also much musical discussion, of works heard at the soirées or at concerts or the opera. But the atmosphere, though in a sense open and stimulating, was aesthetically cramped. New music was discussed, but habitually questioned, and there was a self-congratulatory air to the conversation, dominated by Rimsky-Korsakov's own dry, cynical conservatism, as relentlessly recorded by the diarist of these gatherings, Vasiliy Yastrebtsev. They all also from time to time attended the sole 'alternative' musical venture of these years in St Petersburg, the Evenings of Contemporary Music, an irregular and somewhat ramshackle series of chamber concerts which had started in 1902 and prided itself on breaking the conventional mould of classical concerts in the city. The Evenings were certainly the nearest approach at that time to the modern contemporary music concert, though their programmes were more heterogeneous than strictly ground-breaking, with a scattering of newish French and German works alongside the inevitable rag-bag of Russian pieces old and new. Nevertheless Stravinsky remembered them as the most intellectually stimulating musical events of the time (though he misremembered what pieces of his own they included: only his *Pastorale* and the first of the Gorodetsky songs, *Vesna* ('Spring'), were done before he left St Petersburg in 1910). Here he will have met for the first time the raffish set, which included the founders of the concerts, Alfred Nurok, Walter Nouvel (amateur composers, associates of Sergey Diaghilev on the art magazine *Mir iskusstva*, and aesthetes with a reliable passion for the new and strange), and the critic Vyacheslav Karatïgin. Rimsky-Korsakov hated the evenings, partly because they escaped his influence, partly because they stood for everything he disliked: amateurishness, pluralism, contempt (however stumbling) for the rules. As for Stravinsky, nothing illustrates his own lack of rebelliousness at this time than the fact that, in his mid-20s, he scarcely figured in a local contemporary music series that would have embraced even an incompetent proto-modernist with open arms.

Russia in 1905 had experienced the first serious tremors of the earthquake which, 12 years later, would destroy the country of Stravinsky's youth. The previous year, the Tsar had embarked on a damaging war with Japan, and 1905 opened with a series of lightning industrial strikes in St Petersburg which culminated in Bloody Sunday (9/22 January), when a peaceful deputation of workers and a crowd of bystanders were fired on in the Palace Square and more than 100 were killed. Like most members of his class, Stravinsky would have been broadly on the workers' side. But there is no sign that he was in any way involved, unlike the firmly liberal Rimsky-Korsakov, who was summarily dismissed from his post after publishing open letters in support of the striking students and advocating the liberalization of the Conservatory establishment. For Stravinsky, the most damaging consequence of these events may have been that the closure of the university in spring 1905 meant he could not take his law finals. His certificates (dated April 1906) show that he never graduated, but merely audited his courses and received a half-course diploma. But whether this was a consequence

of the disturbances or of backsliding on his own part is unclear.

A more notable event of 1905, on the face of it, was his engagement in August to his cousin Yekaterina (Katya) Nosenko, the orphaned younger daughter of his Ustilug uncle. Since their first meeting in 1890, he had been growing steadily closer to this softly spoken but intelligent girl, 17 months his senior; and when they married in January 1906 (without the dispensation necessary for first cousins under Orthodox law), it was a love-match which would survive debilitating illness and, on his side, candid duplicities until her death in 1939. It may have been (as he later claimed) as a wedding present to Katya that, during the late spring and summer at Ustilug, he composed a vocal-orchestral setting of three erotic early poems by Pushkin under the title *Favn' i pastushka* ('The Faun and the Shepherdess'). Meanwhile he had embarked on a radical revision of the symphony under Rimsky-Korsakov's close scrutiny. And it must have been Rimsky-Korsakov who set up the semi-private dry runs of these two works by the Imperial Court Orchestra under Hugo Wahrlich in April 1907 (the Pushkin cycle on the 14th/27th, the two middle movements of the symphony on the 16th/29th), just as it was Rimsky-Korsakov who in due course arranged for the cycle to be published by Belyayev. Stravinsky later claimed (in *Memories and Commentaries*, 59) that his teacher found the work 'suspiciously "Debussy-ist"'. But this is hard to take seriously, since its main influences are Russian (Tchaikovsky and Musorgsky), and its whole-tone harmonies and tritonal melodic figures standard Russianisms which reflect Rimsky-Korsakov's own contemporary usage. Rimsky-Korsakov does seem to have been disturbed by the Gorodetsky song *Vesna*, which Stravinsky wrote in May or June 1907, and which was sung at a Wednesday at the end of October, along with the little *Pastorale*. But this was mainly because he detested what he regarded as the pseudo-symbolism of the poem, as well as finding the start of the song, the first of many bell imitations in Stravinsky, 'frenetic and harmonically senseless' (see Yastrebtsev's diary entry for 30 December 1907/12 January 1908). The static musette harmony of the *Pastorale* he (or Yastrebtsev) found merely strange. Certainly the main importance of these three vocal works is that they show Stravinsky beginning to make his way, however uncertainly, against the Rimsky-Korsakov tide and, in the *Pastorale* at least, achieving a cool, decorative poise which modestly anticipates the radical thinker of four or five years later.

Meanwhile, having at last completed the revision of the symphony, Stravinsky embarked in July 1907 on a more personal orchestral project, a large-scale scherzo based on a programme derived from Maeterlinck's *La vie des abeilles*. Here he began to explore more freely, and without academic constraint, the 'fantastic' qualities in Rimsky-Korsakov's late magical operas, with their glittering orchestration and spicy harmony based on an eight-note scale of alternating tones and semitones (*see* OCTATONIC). There were more opportunities to test his ear for such things. In January 1908 his Symphony in E♭ and *The Faun and the Shepherdess* were performed together in a public concert under Wahrlich, and Stravinsky picked up his first ever press notices, which were largely, if not ecstatically, favourable. By the time the Maeterlinck piece, *Fantasticheskoye skertso* or *Scherzo fantastique*, was finished at the end of March, he was a coming man in St Petersburg musical circles. In his *Stolichnaya pochta* review of the symphony, Karatïgin remarked on 'the lively cheerfulness of musical thinking that is characteristic of Stravinsky and distinguishes him to his advantage from many of the newest composers'. Rimsky-Korsakov probably oversaw the *Scherzo fantastique* and he certainly heard excerpts from it, played on the piano by his other star pupil, Maximilian Steinberg, at a domestic gathering on 12/25 April. But the master was already mortally ill with angina, and less than two months later, on 8/21 June, he died at his country retreat at Lyubensk.

3. Stravinsky (extreme left) and his wife Katya (extreme right) at the home of Rimsky-Korsakov (seated next to Stravinsky), together with Rimsky-Korsakov's daughter Nadezhda and her fiancé Maximilian Steinberg, St Petersburg, 1908

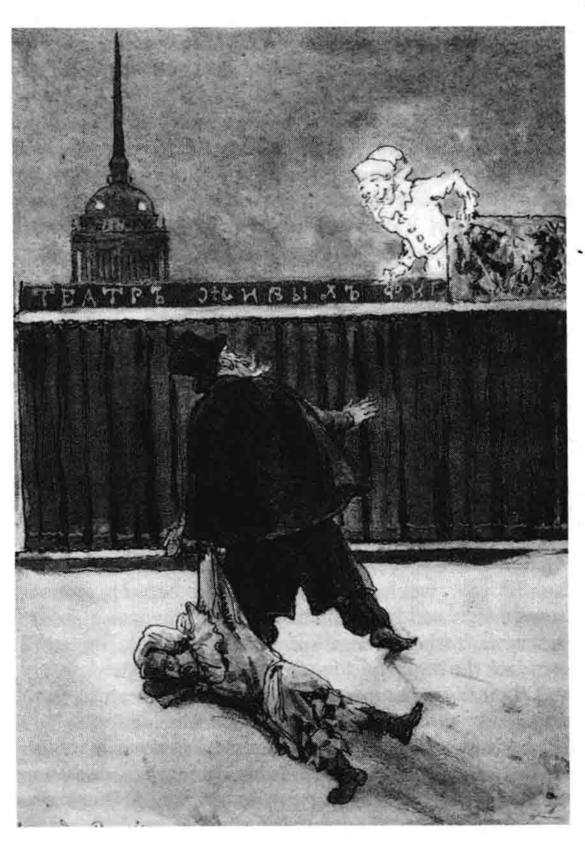
Stravinsky was shattered by his teacher's death. He travelled from Ustilug to St Petersburg (a two-and-a-half day rail journey) for the funeral. Before leaving, he had completed and dispatched to Lyubensk a new, more compact and refined orchestral scherzo called *Feyerverk* ('Fireworks') – a wedding present for Steinberg and Rimsky-Korsakov's daughter Nadezhda, who had married a few days before her father's death. Now, on his return to Ustilug, he rapidly composed a funeral tribute which he hoped would be performed in one of the memorial concerts that autumn and winter. His letters of the time to the Rimsky-Korsakov family express positive despair at the thought that, amid all the diplomacy and politics surrounding such occasions, his work would be overlooked; the sense of impending rejection is almost tangible. Meanwhile he, Katya and their baby son moved into a new house he had designed on the Nosenko estate at Ustilug, and there he completed a set of four piano studies (begun in May), indebted not to any music of the St Petersburg circle, but to the Moscow composer Skryabin.

At this point, Stravinsky had no fewer than three orchestral works awaiting performance. Ziloti had already seen the *Scherzo fantastique*, had successfully lobbied the house of Jürgenson to publish it, and eventually conducted its première in January 1909. The previous week the *Pogrebal'naya pesn'* ('Funeral Song') had at last been presented in a Russian Symphony Concert in Rimsky-Korsakov's memory, conducted by Felix Blumenfeld. Since all the performance materials subsequently vanished, we can judge its character only from reviews. Several critics praised its orchestration, while some regretted that, though often beautiful, it was less

tragic in tone than they would have expected: 'the author makes successful play with orchestral colours', one wrote, 'but in itself the piece preserves an impression of artificiality, and is in no way an "outcry of the heart"' (N. Bernstein, *Peterburgskaya gazeta*). If we add to these accounts the common view of the *Scherzo fantastique* as dazzling but insubstantial, we can already sense the local wind blowing against Stravinsky's emerging musical personality. The no less brilliantly ephemeral *Fireworks*, with its subtle fusion of tonal and octatonic harmonies, had to wait another year for its public performance, again under Ziloti, in January 1910. But it was almost certainly tried out at some time in early 1909, perhaps with the Conservatory orchestra, since Stravinsky revised the orchestration extensively in the summer of 1909. But if he himself was dissatisfied with his efforts in this case, others were more impressed.

The first sign was that Diaghilev invited him to contribute a pair of orchestrations to Mikhail Fokine's ballet *Chopiniana*, which he was including in his 1909 Paris season under the new title *Les Sylphides*. Stravinsky had been sketching an opera on Hans Christian Andersen's tale *The Emperor and the Nightingale*, with a libretto by his friend Stepan Mitusov, since at least the previous autumn. But he hastily put this work to one side, and completed the Chopin arrangements well in time for the Paris première at the start of June. Meanwhile Ziloti must have seen, or at least heard about, these pieces, since he too now commissioned a pair of arrangements, of Beethoven's and Musorgsky's settings of the Song of the Flea from *Faust*, for a 'Goethe in Music' concert in St Petersburg in November 1909. That gave Stravinsky time to write the first act of *Solovey* ('The Nightingale') during the summer. He then orchestrated the Musorgsky song and was probably just about to start on the Beethoven when a telegram arrived at Ustilug which was to change his life and with it the whole course of 20th-century music.

The ballet element of Diaghilev's 1909 season, though brilliantly successful as dance and design, had been criticized by the Paris press for its lack of any comparable musical novelty. Diaghilev now proposed to answer this criticism by commissioning, among other works, a ballet on the most typically, exotically Russian fairy tale he or his collaborators could think of, *Zhar'-ptitsa* ('The Firebird'). The process by which this commission eventually reached the largely untried Stravinsky is still obscure (it certainly came by way of Diaghilev's resident composer, Nikolay Tcherepnin, and Lyadov, and possibly also Stravinsky's old counterpoint teacher Akimenko). Diaghilev's telegram, indeed, was no more than a sounding-out, and the commission was probably only confirmed in early December. By that time Stravinsky had already sketched some music, and may even have had musical discussions with Fokine about the relationship between the music and the action, though the essential details of the staging were probably in place by the time he came on the scene.



3. The early Diaghilev ballets, 1910–14. Igor and Katya, now with two children, had been living for a year in a flat in the Angliysky Prospekt, and it was here, between December 1909 and early May 1910, that the bulk of *The Firebird* was composed. In February the composer broke off for long enough to make arrangements of Grieg's piano piece *Kobold* op.71 no.3 for a charity ball in which a young dance protégé of Diaghilev's called Vaclav Nizhinsky was making his solo début. The piano score of *The Firebird* was then completed on 21 March/3 April, the orchestral score on 5/18 May, and the 45-minute ballet had its first performance in the Russian season at the Opéra in Paris on 25 June.

The spectacular success of this first of a long line of Diaghilev ballet commissions barely disguises now the fact that the music was both derivative and to some extent formulaic. It was true that, at orchestral rehearsals, Stravinsky had to explain the music to the bewildered players, and that, at the first rehearsal, the sonorities were so unexpected that dancers missed their entrances. But this was mainly because of the actual orchestration, in which a huge force was handled with the same wizardry and dexterity that had already been seen in St Petersburg as masks for a lack of musical substance. As music drama, *The Firebird* broke little new ground. The scenario, cobbled together by a committee of Diaghilev's collaborators with Fokine at their head, was an old-fashioned sequence of dances linked by *pas d'action*, much like *Coppélia* or *Swan Lake*. As for the music, Stravinsky had borrowed the old Rimsky-Korsakov idea of depicting evil or magic in structured chromatics, good or human in diatonics or folksong. His Firebird cavorts to flickering, Skryabinesque harmonies and gasping rhythmic phrases, while the human princesses dance to music which Glazunov himself would not have disowned, and the hero Prince Ivan and his bride are portrayed in Borodinesque settings of 'authentic' folk tunes. The demon Kashchey's dance is infectiously rhythmic; but its phrasing is routine. Of course, Stravinsky's mastery of these varied resources was and remains astonishing (and not only in view of his limited experience). But it might not have portended any outstanding innovative genius.

The success, all the same, was sensational. Overnight Stravinsky became a household name. Socially he was lionized. He was befriended by the Parisian great and good, by Diaghilev's aristocratic backers, by composers like Debussy, Ravel and Satie, by writers like Claudel, Proust, Gide and D'Annunzio, and even by the venerable Sarah Bernhardt. It was all very different from the provincial St Petersburg of his experience, with its coteries of Rimsky-Korsakov hangers-on and its so-called 'Contemporaries' evenings. The whole point of the Ballets Russes was that it was a fusion of art forms, and through it Stravinsky was automatically brought into contact with intellectual and aesthetic spheres not restricted by the academicisms and petty politics of a dying musical tradition. He in turn was accepted (including by the Parisian critics) as an equal in this sophisticated and vigorous milieu. In the *Nouvelle Revue Française*, Henri Ghéon called *The Firebird* 'the most exquisite marvel of equilibrium we have ever imagined between sounds, movements and forms'. The fact that this was a general aesthetic, rather than a specifically musical, judgement was, for the moment, of secondary importance.

Whether or not because of his sudden leap to fame, Stravinsky decided to stay for the time being in the West with his family. He spent the remaining summer months in Brittany, composing the two curious Verlaine songs op.9 for his brother Gury (his first ever settings of a foreign language), and tinkering with a new idea for a ballet on a prehistoric subject which he and the painter Nikolay Roerich had already discussed in the spring. But

by the time they had all moved in early September to Lausanne (where Katya was to have their third child), he was at work on some completely new pieces for piano and orchestra which soon, perhaps at Diaghilev's behest, became the basis for a whole ballet about the Russian fairground puppet Petrushka. The exact chronology of this change remains controversial. Diaghilev probably manoeuvred Stravinsky into a collaboration with Alexandre Benois (with whom he was making up a recent quarrel) in order to upstage the difficult and arrogant Fokine, who was still, at this point, involved in the new prehistoric ballet – a project, moreover, from which Diaghilev was being excluded. The *Petrushka* subject had certainly been devised, and a good deal of the music written, by the time Benois was directly involved in mid-December 1910. Soon afterwards, Stravinsky paid a flying visit to St Petersburg, and the scenario was worked out in detail. He then returned to Beaulieu, in the south of France, where the family was wintering, and there composed much of the rest of the score. But the extraordinary ending, in which the ghost of the murdered puppet appears above the showman's booth and makes a rude gesture at him, only replaced the original idea of a carnival ending at the last minute. Stravinsky thought up and composed this conclusion in May in Rome, where the company was performing and rehearsing for the Paris season. *Petrushka* finally received its first performance conducted by Pierre Monteux, with choreography by (ironically) Fokine, designs by Benois (fig.4), and the incomparable Nizhinsky in the title role, at the Théâtre du Châtelet on 13 June 1911.

4. Sketch by Alexandre Benois for the final scene of Stravinsky's 'Petrushka', Ballets Russes at the Théâtre du Châtelet, Paris, 1911

With the Parisian public *Petrushka* was as great a success as *The Firebird*, and with musician colleagues like Debussy and Schmitt still greater, though the press, wary as ever of challenges to its *idées reçues*, was more guarded. Once again, it was the integration of elements – music, dance and design – that dazzled balletomanes. But the real source of the work's power was the music. Debussy was fascinated by the 'sonorous magic' of the conjuring-trick scene, where the puppets come to life 'by a spell of which . . . you seem to be the sole inventor' (letter of 10 April 1912). But there was also a certain boldness, an aggressive self-confidence, which he could also not but envy: 'neither caution, nor pretension', as he wrote to Robert Godet (18 December 1911). 'It's childlike and untamed. Yet the execution is extremely delicate'.

This time Stravinsky went straight to Ustilug after the performances, and there began once more to think about the Roerich ballet. But there was still no detailed scenario. This was eventually thrashed out on a visit to Princess Tenisheva's estate at Talashkino (near Smolensk), where Roerich was at work on the interior painting of the chapel. Meanwhile, Stravinsky marked time by setting a series of poems by Konstantin Bal'mont: first a pair of miniatures for voice and piano, *Nezabudochka tsvetochek'* ('The Forget-Me-Not') and *Golub'* ('The Dove'), which can be seen as studies for certain melodic treatments in the ballet, then secondly a choral-orchestral setting of the symbolist poem *Zvezdolikiy* ('Star-Face', but usually known as 'The King of the Stars'). This strange work, distinguished by astonishing chordal sonorities, was finished in short score by the end of September (the full score had to wait until the following summer). Only then, still in Ustilug, did Stravinsky start work on *Vesna svyashchennaya* ('The Rite of Spring'), as the prehistoric ballet would eventually be called. Intensive work continued at Clarens, on Lake Geneva, where the family was once again spending the winter. By the end of February 1912 the first part was complete in orchestral score, and Stravinsky seems still to have been unworried by the need to finish in time for the Paris season. The subsequent postponement until 1913 probably had more to do with Diaghilev's intention to have the ballet choreographed not by the detested (and in any case overworked) Fokine, but by Nizhinsky, who was fully occupied with Debussy's *L'après-midi d'un faune* for the 1912 season, and as yet too inexperienced to be trusted with the hugely complex new work.

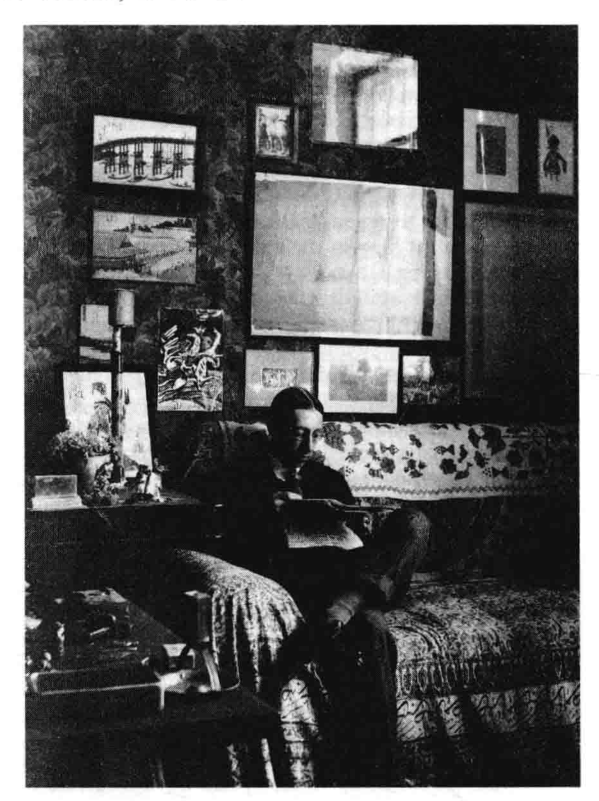
At all events, Stravinsky eased up. In the summer, at Ustilug, he completed the full score of *The King of the Stars*; he made an excursion with Diaghilev to Bayreuth, where he saw *Die Meistersinger* and probably *Parsifal* (an experience he certainly found less disagreeable than he later pretended in his autobiography); and late in October he made a brief visit to St Petersburg – his last, as it would transpire, for almost exactly half a century. *The Rite of Spring* was eventually composed to the end at Clarens in November, after which he went to Berlin for the Ballets Russes season, met Schoenberg and attended a performance of *Pierrot Lunaire* (12 December). In January 1913 he completed the exquisite *Three Japanese Lyrics*, whose instrumentation for small mixed ensemble perhaps shows the passing influence of Schoenberg's masterpiece. In February he was in London with the company, his first visit to Britain (though *The Firebird* had preceded him the previous June). In March, at Clarens, he added the

part two introduction to *The Rite of Spring* and worked with Ravel on the score of Musorgsky's *Khovanshchina*, which Diaghilev was putting on in June and for which, in particular, Stravinsky was providing the final chorus Musorgsky had never written. The momentous first performance of *The Rite*, conducted by Monteux and with Maria Piltz as the Chosen One who must sacrifice her life in order to renew the fertility of the soil, at last took place on 29 May in the new Théâtre des Champs-Elysées in Paris (fig.5).

The riot which attended the première has been much chronicled. It was a typically Parisian affair, targeted as much at Nizhinsky (whose choreography of Debussy's *Jeux* two weeks earlier had been disliked) and even at the theatre's manager, Gabriel Astruc, as at the music, which in fact was largely inaudible. The open, cinema-like design of the new theatre tended to encourage a certain social fractiousness, as perhaps did the hot weather and the presence of a less-than-committed touristic element in the audience. The open dress rehearsal the previous day had passed off without incident before an audience that was actually more typical for the Ballets Russes: a mixture of society – *le tout Paris* – and seriously interested musicians, balletomanes, artists and literati.

Yet the music might well have merited a riot. Certainly it was to remain the most notoriously violent score of a time when huge, noisy orchestras and harsh dissonance were more or less commonplace appurtenances of the new music. The primitive imagery of Russian symbolism, of the kind exploited by Roerich, had always carried a certain revolutionary tone, a note of challenge to ossified social structures. But behind all the racket, behind the wilfully discordant harmonies and convulsive metric irregularities lay a genuinely innovatory kind of musical thinking whose point would not become clear until Stravinsky himself began to deconstruct it in subsequent works. Already *Petrushka* had begun to isolate and manipulate fragments of folk melodies (including tradesmen's cries and factory songs), and to combine them in variable patterns which tended to dissolve regular harmony and metre. *The Rite of Spring* merely intensified these procedures by transferring them to a situation where disruption within a fixed, immobile context was actually part of the plot. Both scores make heavy use of ostinato patterns, and both take the idea of a variable-length melodic figure or cell as the determinant of metre. But whereas in *Petrushka* these changing metres are mostly incidents within a prevailing regularity, in *The Rite* they take over the entire rhythmic structure, and even invade the regular ostinato patterns in the form of thrown accents, often drastically emphasized. Because *The Rite* is also more polyphonic than *Petrushka*, there is at the same time a conflicting accentual relationship of the different lines (which is why Stravinsky sometimes found it hard to know where to put the barlines – a problem reflected in the many changes the score underwent in different editions down the years).

Harmonically both works use the idea of modal 'fields'. In *Petrushka* such fields are defined either by the conventional mode of the folksongs, or by the octatonic scale, particularly as articulated by triads an augmented fourth apart, for instance the C major/F♯ major superimposition, which serves as the 'Petrushka' motif, and which Stravinsky explores (and perhaps discovered) as a white-note/black-note separation of the pianist's hands. Octatony is also important in *The Rite of Spring* (along with



5. Maria Piltz (third from left) as the Chosen One with Russian tribal elders from the first production of Stravinsky's ballet 'The Rite of Spring', Ballets Russes at Théâtre des Champs-Elysées, Paris, 29 May 1913: costume designs by Nikolay Roerich

other, less rational chromatic modes); but here there is a consistent opposition between the melody – often Dorian-mode folksong fragments – and the remainder of the harmonic field, which typically sets up chromatic interferences with it. Stravinsky engineers these interferences by joining together Dorian tunes a diminished or augmented octave (major 7th or minor 9th) apart, as on the very first page. At other times, such intervals serve as constructs in their own right, derived from – or defining – the harmonic field, as in the 'Spring Auguries' or the 'Sacrifical Dance'. They seem a natural expression of the harsh and terrible events the ballet enacts. Yet, curiously, Stravinsky never lost his taste for such chords. What one might call the mistuned octave remained for him an emblematic sonority regardless of dramatic or narrative context, and usually, in fact, without violent or barbaric connotations.

Five days after the première, Stravinsky was admitted to hospital with acute enteritis, which soon emerged as full-blown typhoid fever. He stayed in the Villa Borghese nursing home for more than five weeks, missing all six performances of *Khovanshchina* (only the last two or three of which, however, included his final chorus), the last three of *The Rite* and its ensuing London première (11 July). Instead, he went straight back to Ustilug in mid-July, and there embarked, in collaboration with Stepan Mitusov, on a completion of *The Nightingale*, to a fat commission from the newly formed Moscow Free Theatre. It was to be their last summer at the family home. Yet Stravinsky may already have begun to sense that Russia was finished as far as he was concerned artistically. His first two ballets, performed in suite form in both St Petersburg and Moscow, had been greeted by a distinctly mixed press and a deafening silence on the part of his own closest friends (notably the Rimsky-Korsakovs and Steinberg); and now Andrey Rimsky-Korsakov, Vladimir's older brother and recently an even closer friend of Stravinsky's, had published a poisonous review of *The Rite of Spring* in *Russkaya Molva*. The fact that it was apparently partly motivated by fury at Stravinsky's role in the *Khovanshchina* reworking, which had superseded their father's version, will hardly have eased the pain it caused. Paris, by contrast, made handsome amends for its hooliganish first reaction to *The Rite* when Monteux conducted two separate concert performances in the Casino in April 1914, and after the first of these, on 5 April, Stravinsky was mobbed by delirious admirers.

So when the Free Theatre collapsed in May 1914, leaving Diaghilev with the world première of *The Nightingale* (spectacularly designed by Benois) in Paris later that month, the composer was not greatly disturbed, though he lost money because of the charge. More worrying was his wife's health. In January, after the birth of their fourth child, she had had a severe attack of tuberculosis, which had necessitated a move to Leysin, high in the Alps east of Lake Geneva. And it was here that Stravinsky completed *The Nightingale*, somehow managing to paper over the development his style had undergone since 1909. The change of scene from the forest to the Chinese Imperial court does to some extent justify the drastic contrast between the leafy, moonlit textures of the pre-*Firebird* first act and the brittle artifice of the Draughts Chorus and the Chinese March, and above all the subtly dissonant colourings of the scene with Death. Here at Leysin Stravinsky was visited by Jean Cocteau, who hoped, vainly, to secure his collaboration on a theatre project about the biblical David. The only, oblique, outcome of these discussions may have been the tiny string quartet pieces written that summer. But meanwhile sickness was gripping Europe itself. In July, Stravinsky made a hasty visit to Ustilug and Kiev to consult lawyers about his Ukrainian property, and to collect materials he needed for the ballet he was now planning to write about a Russian peasant wedding. It was the last time he set foot on Ukrainian soil.

6. Igor Stravinsky in his study at Ustilug, 1913

4. EXILE IN SWITZERLAND, 1914–20. At first, exile seems not to have interfered much with his composing. Though openly and ferociously anti-German, he kept politics well clear of his music. Instead he inhabited a kind of private Russian land of the spirit, working simultaneously on his ballet, a musical setting of authentic wedding ritual texts, and on a number of tiny songs and choruses (*Pribautki*, the *Kolïbel'nïye* or *Berceuses du chat*, the *Podblyudnïye*), related to it in method and material. It was the start of a period of quiet but excited stylistic evolution, comparatively unhindered by travel or major performances. When war broke out in August 1914, the Stravinskys were summering in the village of Salvan, in the Valais. Later they moved back to Clarens, then again back to the mountains at Château d'Oex, from where, in February 1915, the composer made a two-week excursion to Rome to attend the Italian première of *Petrushka*, discuss Diaghilev's new idea of a danced Mass and play him the draft of the first scene of the wedding ballet, *Svadebka* ('The Wedding'). In Rome he also met some of the Futurists, including Marinetti and the sculptor Boccioni; he saw more of them in Milan in April and heard a demonstration of Luigi Russolo's noise machines. Back in Switzerland, the family at last took a lease on a house at

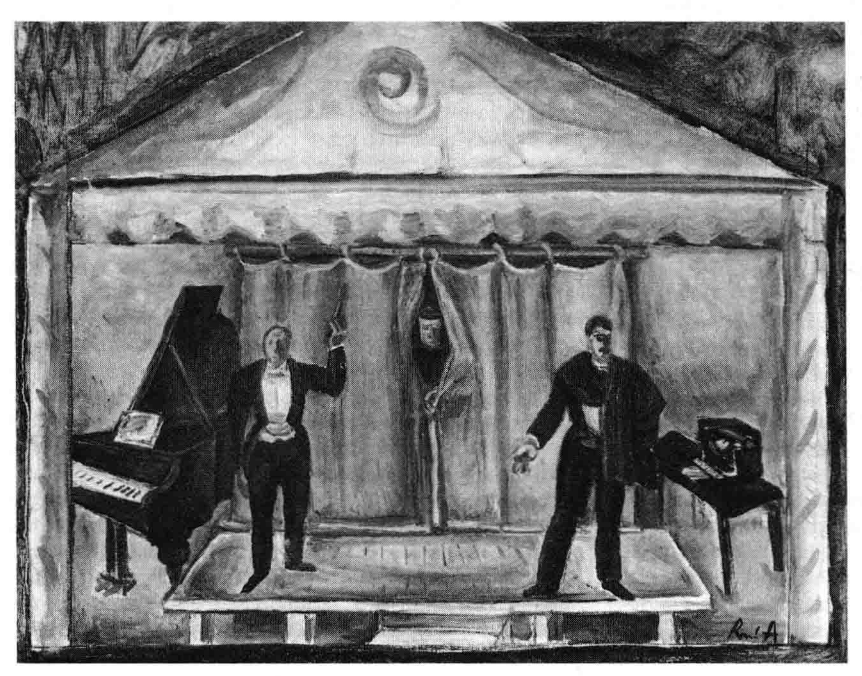
Morges, just outside Lausanne – the first settled tenancy of their married life. They were to stay in Morges (at two different addresses) until 1920. Here Stravinsky became friendly with a group of Swiss-French writers and artists dedicated to a specifically Vaudois, locale-conscious art that would be, in Louis Lavanchy's words, 'audaciously original and candidly unrefined' (*Essais critiques 1925–1935*, Lausanne, 1939): a vision which, to some extent, reflected his own current ethnic preoccupations, though he may have been less interested in their politics, which were pro-French interventionist. Among these writers, the novelist C.F. Ramuz became a frequent guest at the Stravinsky house, the Villa Rogivue, and as Stravinsky's compositions on Russian texts began to emerge, he took on the task of translating them into French. This led naturally and logically to their collaboration on an original theatre piece, *Histoire du soldat*, a work which clearly reflects the politicized local aspirations of the Vaudois movement.

For the first year or so of the war, Stravinsky worked away at his little songs and choruses, with their tight distillation of the cellular and harmonic field techniques of *The Rite of Spring*, and at *The Wedding*, which was to be an austere ritual in the same mould, but without the spectacular trappings, the fake prehistory, the noise for its own sake and the dense piling-up of counterpoints. The sacrifice here would be vibrant and sociable, not violent or bloodthirsty. The Russian texts, taken from the 19th-century collections of Kireyevsky (and, for the choruses and songs, Sakharov and Afanas′yev) were a crucial part of the new idiom. Stravinsky was experimenting with an idea he later claimed to have extracted from Russian folk verse of a moveable accent, which could be played off against the natural accents of speech, as well as against the musical metre, to make yet an extra rhythmic tier, somewhat like the stresses superimposed on the regular patterns of *The Rite*, but less arbitrary. As for sonority, some concept of the village band seems to lie behind the choices of ensemble. The original version of *The Wedding*, essentially completed in 1917, was scored for a large mixed band of about 40, with only a small string group, much wind, and a battery of percussion and twangy plucked and struck strings, including cimbalom (an instrument Stravinsky became obsessed with after hearing and buying one in Geneva in 1915), harps, piano and harpsichord. There is some echo of this sound-world in the dance piece *Bayka pro lisu, petukha, kota da barana* ('The Fable of the Fox, the Cock, the Tomcat and the Ram'), better known by its French title, *Renard*, which Stravinsky wrote in 1915–16 and sold to the Princesse de Polignac. This, too, is based on Afanas′yev, and seems designed to recreate a type of rustic travelling theatre, with singers and dancers who take a hat round at the end, and a squeaky, clattery band of 15, again including cimbalom. In fact *Renard* remains the key to Stravinsky's wartime quest for an idealized folk modernism, since *The Wedding* was to be drastically altered in sonority, if not substance, by the time it reached the stage in 1923.

Not all the wartime pieces reflect the same quest. Early on (1914–15), Stravinsky also wrote a set of easy piano-duet pieces based on conventional models: a march, a waltz, a polka. A little later he added another set of five (this time with an easy seconda part) based on various national stereotypes. Stravinsky went to Spain with the Ballets Russes in June 1916, and may have been inspired

7. Igor Stravinsky and Ernest Ansermet

to write the 'Española' in the *Cinq pièces faciles*, as well as the more disjointed Spanish parody in the study he wrote for pianola – a growing enthusiasm of his – the following year. But the notable feature of these miniatures is their technical resemblance to the Russian songs, even though their material and atmosphere are quite different. They showed how procedures evolved in one stylistic context could readily be adapted to another; in this sense they are prophetic beyond their own musical substance.



Apart from the Polignac commission, none of these works earned Stravinsky any money, and as the war dragged on his circumstances deteriorated. The pianola study was dedicated to a rich Chilean called Eugenia Errazuriz, a patroness of Picasso whom Stravinsky had met in Spain. In 1917 he extracted from his Andersen opera a ballet to be called *Pesnya solov′ya* ('The Song of the Nightingale') for Diaghilev. But Diaghilev was a slow payer, and though the two men struck a detailed contract that summer, which included payment for rights in the still unfinished *Wedding*, the problems persisted and led in 1919 to a massive and nearly terminal quarrel between them. It was also in 1917 (January) that the Paris Opéra staged a ballet adaptation of the *Scherzo fantastique*, a production Stravinsky later claimed (mendaciously) not to have been involved in; in fact he would have conducted it had he not fallen ill just before. Soon revolution in Russia would cut him off finally from any hoped-for income from that quarter. In April, a month after the Tsar's abdication, Stravinsky was with Diaghilev's company in Rome. It was there that he met Picasso for the first time and, for the first night of the season, made his curious transcription of the 'Song of the Volga Boatmen' to be played as a national anthem. *Fireworks* was staged

as a light show designed by the Futurist painter, Giacomo Balla, but *The Song of the Nightingale*, though ready, was not done. That summer his old German nurse, Bertha Essert, died in Morges, followed swiftly to the grave by his younger brother Gury, who died of typhoid fever at the front in Romania at the end of July. The Bolshevik revolution in October/November merely set the seal on a year of fragmentation and disintegration.

Under these wretched conditions, the idea, hatched early in 1918, that he and Ramuz should write a theatre piece that could tour around and be cheap to perform, with two or three actors, a couple of musicians and a portable stage, may initially have had an economic motive. But if so, it failed dismally. When *Histoire du soldat* was finally staged in Lausanne in September 1918 (with eight musicians, including a conductor, Ernest Ansermet, two dancers and three speakers; fig.8), it went ahead only thanks to substantial patronage from the Winterthur tea millionaire, Werner Reinhart, and all subsequent performances were cancelled because of the Spanish flu epidemic. Artistically, too, the piece has always had its detractors. The text after Afanas′yev (much wordier in the 1918 version), about the soldier who sells the Devil his violin in return for worldly wealth and a good marriage, has with some justice been seen as moralizing and over-literary. But for Stravinsky the work was important because it enabled him to take stock of apparently unrelated recent tendencies. His score, which could avoid direct concern with the words (since they are never sung), brings together Russian dances of extreme subtlety with modern parodies: a Lutheran chorale, a march, a waltz, a tango and a ragtime (one of several such pieces he worked on at this time). The economy and instrumental brilliance of the writing are throughout astonishing. But the absolute artistic precision which had characterized the recent Russian settings is to some extent dissipated by Ramuz's text, especially as spoken by the narrator, a homely version of an alienation device Stravinsky was to use, and regret, again.

Meanwhile the war had ended, and Stravinsky's circumstances still hardly improved. His in-laws, the Belyankins, a family nearly as large as his own, descended on Morges from Russia and moved in. To try to capitalize on an existing copyright score, he made a new suite of *The Firebird* for reduced orchestra and sold it, illicitly as it turned out, to his new London publisher, J. & W. Chester. He again took up *The Wedding* and started rescoring it for a small but esoteric ensemble of harmonium, two cimbaloms, pianola and percussion. At the same time he wrote a new set of Russian songs with a piano accompaniment that at times recalls the cimbalom (an instrument that does indeed figure in an unpublished version of one of the songs). He also wrote up the *Piano-Rag-Music* for Artur Rubinstein, in return for a cash gift of a year before (already, of course, long since spent). Financially the situation was temporarily saved, in the summer of 1919, by a donation from a group of philanthropic New York women, and by a commission from the Flonzaley String Quartet which became the little *Concertino* of 1920. Artistically it was transformed by a proposal from Diaghilev which smoothly ignored both their contractual quarrel and the unfinished masterpiece that was aggravating it, and sent Stravinsky off in a completely new direction that was to have quite unforeseen consequences for them both.

Diaghilev probably saw his suggestion (in early September 1919) that Stravinsky arrange some Pergolesi pieces he and Leonid Massine had unearthed in the Naples Conservatory as simply a device for bringing Stravinsky back into the Ballets Russes fold until *The Wedding* was ready. He expected another work along the lines of Tommasini's *Good-Humoured Ladies*, based on sonatas by Scarlatti, or Respighi's arrangements of Rossini in *La boutique fantasque*. But Stravinsky, after initial doubts, was taken with the material – not all of it actually by Pergolesi – and was tinkering with it creatively. Meanwhile Diaghilev at last staged *The Song of the Nightingale*, with choreography by Massine and designs by Matisse,

8. Sketch by René Auberjonois for the staging of Stravinsky's 'Histoire du soldat', Lausanne, 1918

at the Opéra in February 1920 (Ansermet had conducted its concert première to a hostile audience in Geneva two months before). This was Stravinsky's first Ballets Russes première, apart from the non-danced *Fireworks*, since the opera itself in 1914. But his true return to the Paris stage was certainly with the 'Pergolesi' ballet, *Pulcinella*, which the company mounted at the Opéra (with Ansermet conducting) on 15 May. Like *Petrushka*, this was one of those rare theatre works which cohere in all their ingredients: Picasso's sparkling neo-*commedia* designs, Massine's choreography and scenario (based on 18th-century examples he had discovered in Naples), and the wonderful dancing with Massine himself in the title role and Karsavina as Pimpinella – everything proclaimed the restoration of the Russian ballet to full form, and in a completely new type of work, with no hint of nostalgia for the old days of leaping Polovtsians or sinuous Sheherazades (even if those old works were still in the company's repertory). Though some questioned the ethics of Stravinsky's recompositions, with their added harmonies, metric displacements and spicy orchestrations, few denied the infectious wit and charm of the result. Reynaldo Hahn, himself a doubter, had to admit (in *Excelsior*) that 'M. Stravinsky has never given proof of greater talent than in *Pulcinella*, nor of a surer taste in audacity.'

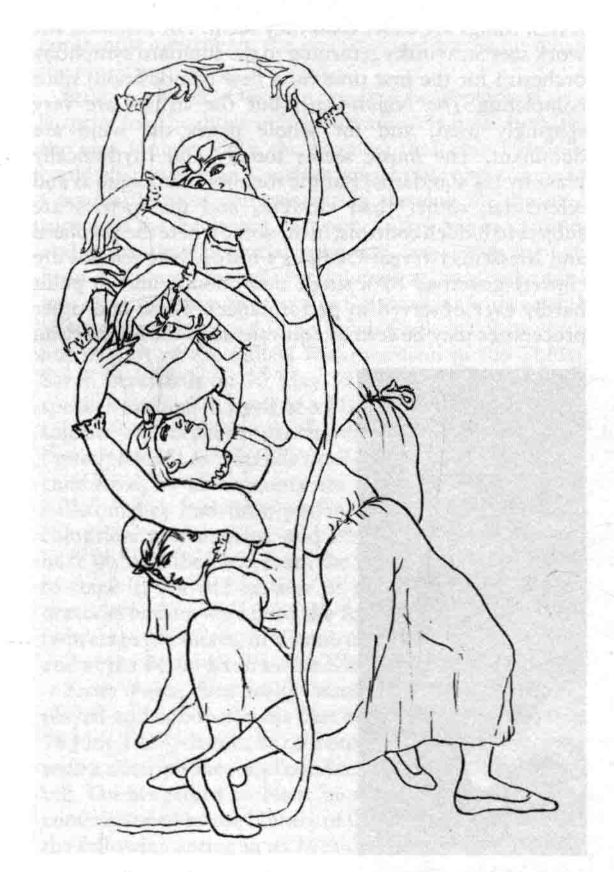
One wonders what Hahn would have said if he had known the work which Stravinsky was at that very moment starting to compile from scattered sketches of the past two years, a piece for large wind ensemble which preserved in an almost classical way the most radical principles of his wartime vocal works. The *Symphonies d'instruments à vent*, begun probably in May 1920, is a score which brings to a pitch of intensity the metrical and chord-voicing treatments so typical of those works. Indeed its distillation of a ritualistic Slavonic solemnity is so powerful that Richard Taruskin has plausibly argued (*Notes*, xlix, 1992–3, pp.1617–21) that it is actually an instrumental stylization of a *panikhida* or Orthodox funeral service. Study of the sketches and variant scores shows also the extent to which empirical testing – the process which Stravinsky later called 'grubbing about' – lies behind these slow progressions and winding cantilenas. Even allowing for the fact that most of the sketch material of the *Symphonies* was not new, and that the *Pulcinella* material was not original, it remains scarcely credible that these two works can have come from the same pen in the same year.

5. France: the beginnings of neo-classicism, 1920–25. In June 1920 the Stravinskys finally moved from Switzerland to France. They spent the summer at the Breton fishing village of Carantec, where the *Symphonies d'instruments à vent* and the *Concertino* were largely composed, then moved in the autumn into the house of the couturier, Gabrielle ('Coco') Chanel (a close friend of Diaghilev's patroness, Misia Sert), in the outer Paris suburb of Garches. Here Stravinsky probably worked on a revision of *The Rite of Spring*, which Diaghilev was reviving in December in a new choreography by Massine, then composed the tiny piano pieces of *Les cinq doigts*. In February 1921 the Pleyel piano company gave him a studio in their Paris factory in the rue Rochechouart, and here he worked on the pianola part of *The Wedding*, for a time even envisaging rewriting the entire score for four pianolas. The Pleyel arrangement would later lead to contracts for the transcription of large numbers of his other works for this short-lived instrument, and the studio would survive as his Paris address until 1933, long after the commercial defeat of the mechanical piano by electrical gramophone recording. Meanwhile he and his family moved in May 1921 to Biarritz, where there was an established colony of white Russian émigrés. This was partly, as usual, for Katya's health, but may also have been for Igor's emotional convenience, since Paris at once meant love affairs: first, probably, with Coco Chanel herself, then with the Russian cabaret dancer Zhenya Nikitina, and finally with Vera Sudeykina, the wife of Diaghilev's former stage designer Sergey Sudeykin, who had recently arrived in Paris via Tiflis, and whom Stravinsky had met at the Chauve-Souris cabaret in February 1921. By July he and Vera were passionately in love; the following spring she abandoned her husband, and from then on the composer led a more or less openly double life apparently with his wife's complicity, though it should be said that the despotic Igor probably gave her little choice and may have led her to feel that without her acquiescence he would leave her and their young family for good.

But it was in Biarritz with his family that he chiefly found the peace and security he always needed for his work. The first major new project, probably dreamt up in discussion with Diaghilev and his new secretary, a 17-year-old Russian poet by the name of Boris Kokhno, was for a short opera called *Mavra*, based on an ironic verse story by Pushkin about a girl in 1830s St Petersburg who tricks her mother into employing a handsome young hussar in drag as the family cook. Stravinsky had been in Spain with Diaghilev at Easter 1921, and in London with him in June, where he heard Eugene Goossens conduct *The Rite of Spring* brilliantly and Serge Koussevitzky conduct the world première of the *Symphonies d'instruments à vent* atrociously (both performances in the Queen's Hall). But *Mavra* was consciously designed as a refutation of this old neo-nationalist Russian style. They had been talking about Tchaikovsky, of whose *Sleeping Beauty* Diaghilev was planning a major revival for London that autumn and for which Stravinsky was to make some necessary orchestrations. And it may be that in discussing the merits of Tchaikovsky (whose music was routinely despised by thinking Parisians of the day, but adored by Diaghilev and his friends) they found themselves considering the whole question of Russian style and of what might be a musical equivalent of Pushkin's mock-banal poem, much of which is taken up with heavy sarcasm at the expense of Romantic self-consciousness about art and technique. Now Stravinsky and Kokhno conceived the idea of a work which would similarly turn the fashionable Russianism of the pre-war Ballets Russes on its head. It would reject the pallid verism and outworn folksiness of The Five, and replace it with a classical Russianism, referring to Tchaikovsky and Glinka, and cast in an old-fashioned form of set numbers and recitatives, tonal rather than modal (at least by allusion), and with standard oompah accompaniments as in the old ballads still unblushingly purveyed by émigré cabarets like the Chauve-Souris.

Mavra, written the following winter (1921–2) and regarded from the first by Stravinsky as one of his best works, has to others often seemed barely to survive the weight of artistic polemic placed on its shoulders. In its style-consciousness, its insistence that (to paraphrase

9. Igor Stravinsky: portrait by Pablo Picasso, December 1920



Taruskin) the telling is more interesting than the tale, it must be regarded as the start of that peculiarly Stravinskian neo-classicism in which decisions about style and language are as much a part of the argument as decisions about material and form. In his own mind, this issue was tied up with a certain kind of formalism. Form *was* content; art was a question of order, and to achieve this the artist must stand back, observe his material coolly and objectively, reject the passionate self-promotion of the Romantic composer (as well as, he was soon adding, of the Romantic performer). Little of this was understood by the work's first Paris audience in June 1922, who were not helped, admittedly, by the fact that *Renard*, which seemed to be the sort of work Stravinsky was now discarding, had had its première less than three weeks before, and would later run with *Mavra* on the same bill. The opera's polemics, in as much as they were noticed at all, struck Parisians as hopelessly esoteric, and no doubt this was to some extent Stravinsky's intention in choosing the (to Parisians) largely unknown Pushkin and Glinka, along with the 'vulgar' Tchaikovsky, as his models.

He next embarked on an instrumental work which, because its models are more openly those of the high-classical German tradition, and because Stravinsky set out his formalist ideas about it in an article published (in English) in the Brooklyn journal *The Arts* (January 1924) soon after its first performance, has been more generally regarded as the start of neo-classicism in his music. With its dry wind sonorities, its highly self-conscious adoption of 'classical' forms and procedures (sonata, variation, fugue), and its sprightly divertimento tone, the *Octet* readily assumed the role of Stravinsky's answer to Cocteau's demand, in *Le coq et l'arlequin*, for 'une musique sur la terre, une musique de tous les jours'. And when the composer himself conducted the first performance in the unlikely surroundings of the Opéra in October 1923, he was anticipating a new career which itself would bear all the hallmarks of an accommodation to the great tradition. Stravinsky had occasionally conducted performances of his own works (the first time ever seems to have been in one of Ansermet's concerts in Montreux in April 1914, when he conducted the scherzo from his Symphony in E♭), but never before a first performance and never yet a whole concert; this happened for the first time a month after the *Octet* première at a Wiéner concert in the Salle des Agriculteurs. Nor had he appeared in public as a solo pianist, except in chamber concerts in Switzerland. He was now, however, writing a Piano Concerto which in the end he would not only première (in May 1924) but also embargo for five years thereafter.

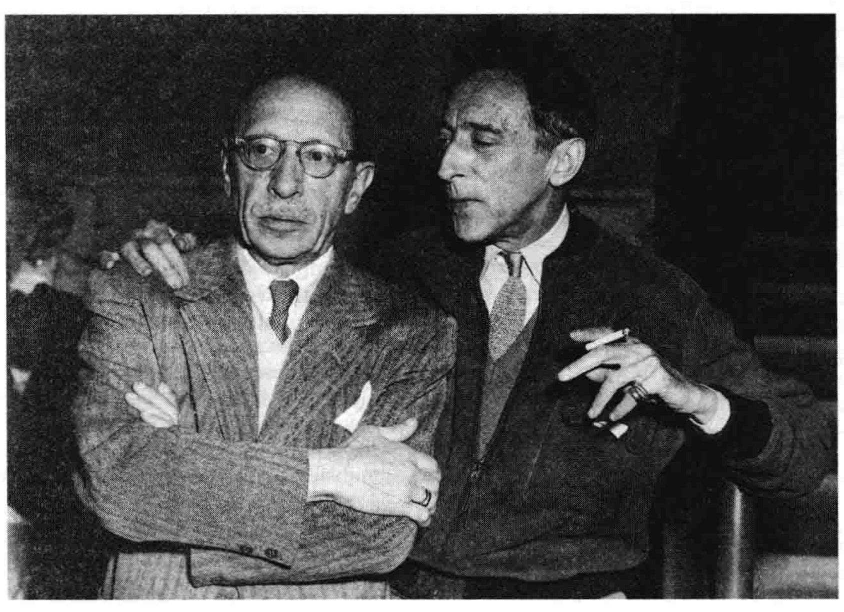
Thus the music in which Stravinsky claimed to expunge the interpreter, a music that pretended to be dry, mechanical and objective, became the basis of his own career as an interpreter.

Meanwhile, *The Wedding* had itself at last reached the stage in Paris in May 1923 in a form which also seemed curiously to co-opt this most ethnically Russian of all his works into a neo-classical sound-world, with its four pianos (actually two double pianos in the first production) and mainly unpitched percussion, together with a constructivist choreography by Nizhinsky's sister Bronislava. This was one of several 'catching-up' premières of Stravinsky stage works during these years in Paris, including also the 1922 *Renard*. In April 1924 the French capital for the first time saw *Histoire du soldat*, having previously heard only the various suites (but this production had been preceded by one in Frankfurt in June 1923, revived at the Weimar Bauhaus exhibition in August, a performance Stravinsky had attended). The continued appearance of such works as novelties hardly made it any easier for baffled audiences and critics to make sense of the new direction in his music of the 1920s, while for him it was a significant motivation for new work that it kept him several steps ahead of his chic, novelty-hunting Parisian audience.

In September 1924, the Stravinsky family (now including Igor's mother, who had arrived from Petrograd in 1922) moved from Biarritz to an expensive house in Nice.

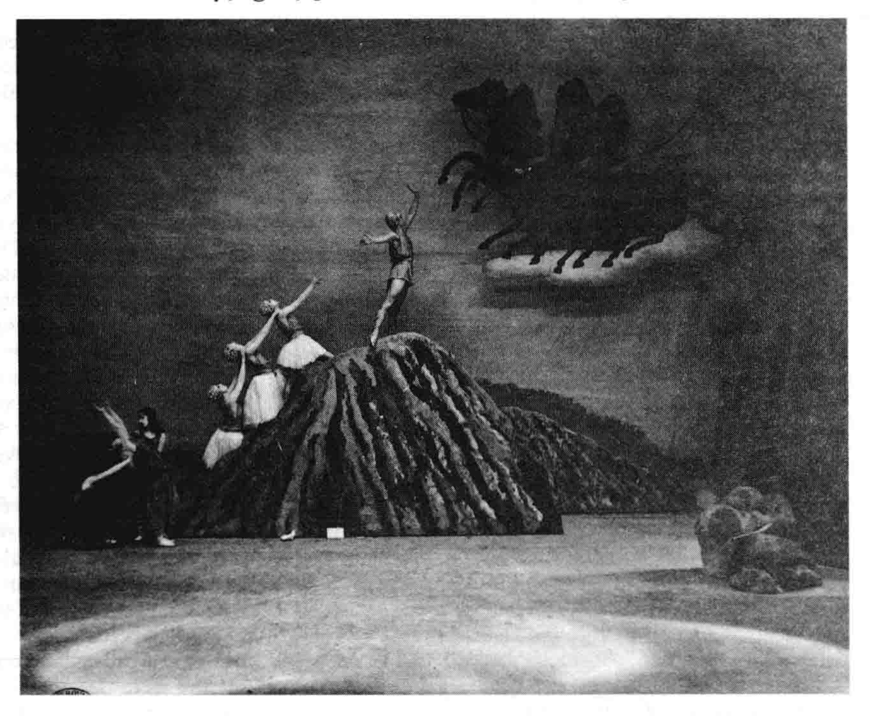
10. Design by Natal'ya Goncharova, based on the choreography by Bronislava Nizhinska, for Stravinsky's 'The Wedding', Théâtre Gaîté Lyrique, 13 June 1923: pen and black ink heightened with white ink (Victoria and Albert Museum, London)

By now, what was to be his lifestyle for many years had been established. He would divide his time about equally between Nice, on the one hand, and Paris and foreign tours on the other. On the latter Vera would usually accompany him, though sometimes (presumably under domestic pressure) Vera would go back to Paris and the composer would meet up, usually in Switzerland where Katya had relations, with one or more members of his family. In Paris he would mainly work on his pianola transcriptions, though some composition was also certainly done there. Life in Paris would be sociable, gregarious, rich in concert-, theatre- and cinema-going. On tour he would either conduct or play (rarely both in the same concert) nearly always his own music. His voluminous correspondence with concert agents is a whole vast sub-literature in his archive, revealing him to have been an indefatigable and often disagreeable negotiator who could command high fees for concert appearances and who, conscious of his uniqueness, feared no competition. Opinions differed as to his skill as a performer in the 1920s and 30s, but he was certainly good enough to present with reasonable clarity music which, for most conductors, offered a formidable aesthetic challenge (though recordings suggest that the trickier pieces, like *The Rite of Spring* and *Histoire du soldat*, may have been out of his reach technically at this period). On the rostrum he was incredibly vital, athletic, almost balletic, a physical embodiment of his music. In general, musicians respected him and worked well for him, even though there is evidence that his ear in rehearsal was less acute than in composition. As a pianist too he embodied his music. Critics sometimes grumbled about his dry, *meccanico* style. And, like a machine, he could be fallible. He himself claimed that he lacked 'a performer's memory'. But his most famous example of forgetfulness, in the slow movement of the Piano Concerto at its first performance, may be apocryphal, since Prokofiev, who was present, told Myaskovsky (in a letter of 1 June 1924) that Stravinsky had been nervous and had the score on a stool beside him, but 'there were no incidents'.



After the concerto, he worked on two solo piano pieces, the Sonata and the *Serenade in A* (a title not so much ironic as suggestive of Stravinsky's way of looking at tonality, in terms of starting-points and focuses). After completing the Sonata, in October 1924, he set off on two ground-breaking tours: to Warsaw, his first visit for ten years to territory formerly part of Tsarist Russia; and, early in 1925, to the USA, where he appeared in New York, Boston, Philadelphia, Cleveland, Chicago and Cincinnati, and signed his first recording contract (with Brunswick). In New York he recorded two discs of his 'easy pieces' for piano – not quite his first recordings, however, since an incomplete disc had been cut of the *Octet* in Paris after the première. The *Serenade*, written in 1925, was intended as material for recording under this contract. But no such discs were ever issued, mainly because the acoustic techniques still used by Brunswick were about to be superseded by electrical ones. Stravinsky's own first electrical recordings three years later (of excerpts from *Petrushka*, *The Firebird* and *Pulcinella*) would be with Columbia, in London and Paris.

6. Return to the theatre, 1925–34. After playing his Sonata for the first time in public at the ISCM Festival in Venice in September 1925 (two months after the public première by Felix Petyrek at Donaueschingen), Stravinsky



embarked on what was to prove his biggest new work since *The Firebird*. In hindsight, we can sense something doctrinaire about the series of instrumental pieces he had composed after *Mavra*, some need to demonstrate how cool, objective and style-conscious he could be. Boris Asaf'yev, the Soviet author of one of the first and best studies of Stravinsky's music, called this 'the synthetic instrumental style of contemporary urbanism'. But *Oedipus rex*, though it shares the style-centred approach of its immediate predecessors, is essentially red-blooded, a theatrical masterpiece by one of the greatest stage composers of his day. There is contemporary evidence for Stravinsky's later assertion that its impulse was partly religious. He had recently been on exceptionally good terms with Cocteau, who had himself been undergoing a somewhat confused religious reconversion through the agency of the Catholic philosopher Jacques Maritain; Stravinsky himself did not meet Maritain until June 1926, but he had read his *Art et scolastique* (1920), with its neo-Thomist plea for order as an aesthetic goal and for artists to return to the medieval ideals of humble, anonymous artisanship. Back in Nice in September 1925, Stravinsky was telling everyone about a miracle in Venice, when an abscess on his right index finger had inexplicably vanished just as he was sitting down to play the Sonata. A few months later, at Easter 1926, he returned formally to the Orthodox communion, to which his parents had always paid lip-service but without any particular commitment or regularity.

Stravinsky told Cocteau (letter of 11 October 1925) that he had wanted for some time to write 'an opera in Latin on the subject of a tragedy of the ancient world, with which everyone would be familiar'. The idea was for a monumental, lapidary work of profound seriousness, but in some sense distanced from the audience in much the same way as an austere sacred ritual. Cocteau had some experience of this genre. He had made a modernized French version of Sophocles's *Antigone*; and more recently he had written *Orphée*, a modish, witty predecessor to his famous film of that name. *Orphée* unmistakably lies behind Cocteau's scenic ideas for *Oedipus rex*, as can be seen from a comparison of the prefaces and design sketches in the two publications. But the play's boulevardier witticisms were emphatically not required. For Stravinsky, stylistic ambivalence was not a joke but a way of thinking and feeling. *Oedipus rex* would refer to the past, just as *Mavra* had done, but its models would be of the profoundest and weightiest: Handel, Gluck, Verdi. Sophocles would be glimpsed through the prism of opera since 1600, but he would not be crudely operatized. The characters would mostly be like statues, masked, immobile except for their heads and arms, helpless playthings of the gods, their plight intensified by a kind of music associated with a theatre whose *dramatis personae* are all too mobile, and whose disasters are nothing if not self-motivated.

Stravinsky divided the action into a series of self-contained scenas, linked by narrations for a speaker in evening dress, a kind of self-important museum-guide whose task is to 'remind' the audience of the story as they go along (the device is pure Cocteau, but Stravinsky, who later denounced it, seems to have accepted it without demur at the time). Within these scenas are arias, ensembles and choruses, planned semi-formally, as in the scenes of a Verdi opera. Apart from Oedipus himself and, peripherally, the Messenger, no character appears in more than one scene; but Oedipus's own downfall is superbly charted, from the self-confident embellishments of his vocal lines early on to the stark, unadorned B minor arpeggio of his final phrase 'Lux facta est'. Throughout, the work shows astonishing control of resources, and everywhere there is meticulous planning; yet on many levels, things are other than they seem. For instance, the work sees Stravinsky returning to the standard symphony orchestra for the first time (in a new composition) since completing *The Nightingale*; but the strings are very sparingly used, and for whole pages the wind are dominant. The music seems tonally and rhythmically plain by his standards. But the tonality is ambiguous and referential, rather than clearcut, and the metrics are subject to hidden controls; in the scene where the Shepherd and Messenger reveal Oedipus's history, the tempos are entirely governed by a single metronomic unit (a point hardly ever observed in performance). These and other procedures may be seen as equivalents to the Sophoclean

11. Stravinsky in conversation with Jean Cocteau

12. Closing scene of Stravinsky's 'Apollo' ('Apollon musagète'), Théâtre Sarah Bernhardt, Paris, 12 June 1928, choreography by Georges Balanchine, designs by André Bauchant, with Serge Lifar as Apollo

concept of dramatic irony. But they are also aspects of Stravinsky's own classicism: modern formalisms that constantly interrogate the conventional forms on which the music appears to be based.

From early on, *Oedipus rex* had been planned as a surprise for Diaghilev in his 20th anniversary season. But the idea foundered on the problem that only Diaghilev could efficiently plan a performance by his own company. Cocteau fluttered enthusiastically through the drawing-rooms of the Faubourg, but only succeeded in irritating and misreading potential sponsors. Stravinsky kept his head down until the score was complete, by which time it was effectively too late to stage the work, as had certainly always been his intention. So it was given in concert form but as part of the Ballets Russes season in the Théâtre Sarah Bernhardt on 30 May 1927, with the chorus and speaker onstage in front of a black drop-curtain, and the soloists and orchestra in the theatre's long narrow pit ('mon pissoir', as Diaghilev called it). Stravinsky himself conducted, by all accounts not well. Unsurprisingly, the balletomanes had little patience with this earnest and colourless presentation, and Diaghilev himself seems to have disliked the piece from the first. He never attempted to stage it, nor did he tour or revive it, and the opera-oratorio had to wait until the following February for its twin stage premières, in Vienna under Franz Schalk (23rd) and at the Berlin Kroll under Klemperer (25th).

From Paris, Stravinsky went to London, where he played and conducted his first ever broadcast concert on 19 June 1927 – it was, he told reporters, his first encounter with a microphone – and conducted a Ballets Russes triple bill. On his return to Nice, he started work on a ballet commissioned by the Library of Congress for performance the following spring in its Music Room, which was being adapted as a small theatre. Stravinsky was told there would be room for 20 musicians and three or four dancers, and he seems at once to have envisaged a serene and statuesque ballet about Apollo, the chief of the Muses, scored only for strings. Work on the score continued at Echarvines, near Talloires on the Lac d'Annecy, where he installed his family for the latter part of the summer (after Katya had suffered an attack of pleurisy in the stifling Nice heat). In October he conducted his 1919 *Firebird* suite at the gala opening of the new Salle Pleyel in Paris. Then he worked more or less uninterruptedly on *Apollon musagète*, as he planned to call it (the eventual simplified title of *Apollo* was Diaghilev's), until it was completed in January 1928.

By this time, Diaghilev was himself in hot pursuit of the new work, which Stravinsky had persuaded him was being designed as a vehicle for his (Diaghilev's) latest flame, Serge Lifar. The Washington production, which duly went ahead on 27 April with choreography by the former Ballets Russes dancer Adolf Bolm (who also danced the title role), was too remote to arouse more than passing concern in Europe. But the Paris production on 12 June was a major event, not least because it was Diaghilev's first new Stravinsky ballet for five years. The choreographer was Georges Balanchine, another recent Diaghilev recruit who had arrived from Leningrad and succeeded Nizhinska as the company's ballet-master three years before. Stravinsky later described this collaboration as one of the most satisfying in his artistic life; but it was not an exceptionally close one, since Stravinsky was away on tour for much of that spring, and Balanchine was left free to evolve his ideas of an abstract, non-anecdotal choreography, no doubt on the basis of the composer's suggestions, but in large measure free of his interference.

Apollo must have startled a Paris audience that still, in spite of everything, thought of Stravinsky as the composer of *The Rite of Spring* (which he had himself conducted for the first time in France at a Salle Pleyel concert only four months before). Here all violence, abrasiveness and even dramatic insistence are stilled, and instead the work coolly and mellifluously depicts the birth and apotheosis of the god of formal perfection in music that is like some

18th-century *ballet de cour* filtered through Adam and Delibes. Yet several critics saw it rightly as a defining moment in Stravinsky's recent work. Boris de Schloezer detected in it a spirit of purity and renunciation, and predicted that the composer's next work would be a Mass, while for Henry Prunières (*ReM*, ix/7–11, 1928, pp.287–8), *Apollo* was a flawless masterpiece that revealed Stravinsky's classicism to be 'no longer, as of late, an attitude, [but rather] a response to an intimate need of the mind and heart'. Stravinsky's own mouthpiece of these years, the composer Arthur Lourié, referred to the music's 'struggle against the charm and temptation of aesthetic fetishism', and suggested that Stravinsky's long-cultivated anti-individualism had now brought him 'towards the spiritual, aiming thereby at the long-lost unity of the moral and the aesthetic' ('A propos de l'Apollon d'Igor Strawinsky', *Musique*, i, 1928, p.118). Lourié, admittedly, was engaged in a far-reaching polemic setting up Stravinsky as the antithesis to Schoenberg, who had conducted the world première of his Suite op.29, in Paris in December 1927, alongside *Pierrot lunaire* and other works (Stravinsky himself had not attended these concerts). 'Stravinsky's art', Lourié argued somewhat fancifully in his article 'Neogothic and Neoclassic' (H1927–8), 'is a reaction against Schoenberg's aesthetics'. Implicitly attacking serialism for 'seeking to control the element of emotion and evoke a purified and obedient material', he added that Stravinsky had himself escaped from the apparently comparable prison of neo-classicism, and was now writing music that was 'polymethodic'.

This description certainly seems borne out by Stravinsky's next ballet, *Le baiser de la fée*, a remarkably inventive montage of pieces by or in the style of Tchaikovsky, set to a scenario (after Hans Christian Andersen) strongly redolent of romantic story ballets like *Giselle* or *Swan Lake*. The work was commissioned by Ida Rubinstein for performance by her new ballet company in Paris in the autumn of 1928, though the idea and the actual choice of some of the Tchaikovsky piano pieces and songs came from Benois, who was also to be responsible for designing the production. But even Benois, one of Stravinsky's oldest collaborators, must have been astonished at the fertility of the treatments, so much more abstracted and varied than those of *Pulcinella* and so alert to the 'freshness, inventiveness, ingenuity, and vigour' which Stravinsky had himself proclaimed as Tchaikovskian characteristics in his open letter to Diaghilev at the time of *The Sleeping Beauty* in 1921. Like *Apollo*, *Le baiser de la fée*was substantially composed at Echarvines, where the family summered once again in 1928. But this was for a première in November, and it seems possible that Stravinsky had at first envisaged a more straightforward set of arrangements and only decided on a more compositional treatment at a relatively late stage.

His perennial problem in such cases was his increasing commitment to concert work, which he undertook (whatever *ad hoc* pretexts he may from time to time have mentioned to newspaper interviewers) largely for financial reasons, to support his large, still dependent and often ailing family and his own high and complicated standard of living. A few days before the première of *Le baiser*, he conducted the new Orchestre Symphonique de Paris in two concerts of his own music, and these were only the first of several Paris appearances that year culminating in the final (as it turned out) Diaghilev season in May 1929, for which he conducted the new Lifar production of *Renard*. There were concerts in Scheveningen, Zürich and Dresden; he went three times to London in May and June 1929, the second visit being the occasion of his last (virtually wordless) encounter with Diaghilev, who died in August having, it seems, not forgiven him for the 'treachery' of working for Rubinstein. Between the two London trips, he played his Piano Concerto under Klemperer in Berlin. This was by no means a heavy programme by his standards. In addition that season he recorded both *The Firebird* and *The Rite of Spring* for Columbia in Paris (having recorded *Petrushka* in London for them in June 1928).

It may have been out of weariness with the concerto, still essentially his only concert item as a player, that he embarked in December 1928 on a new and stylistically very different three-movement concerto which he eventually called *Capriccio*. Here the model (according to Stravinsky himself) is the bravura of Weber's piano sonatas, though in fact the piano idiom of the *Capriccio* often suggests the cimbalom, an instrument prominent in *Renard*, which he conducted that May. For the third year running, they spent the summer at Echarvines, and most of the new concerto was written there (in reverse movement-order) between July and September 1929. He himself gave the première with the Orchestre Symphonique de Paris under Ansermet in the Salle Pleyel on 6 December. Six days later he signed a contract with the Boston SO, of which Koussevitzky was now musical director, for a symphony in honour of the orchestra's 50th anniversary season (1930–31).

Some four years earlier, he had toyed with the idea of a symphony before abandoning it in favour of *Oedipus rex*. Once again what was presumably thought of initially as an orchestral work now began to take shape in choral terms. That Christmas he jotted down part of the Vulgate text of Psalm xxxix; and soon he was writing a symphony that was not just choral but severely, even ritualistically, sacred. Aspects of the *Symphonie de psaumes* suggest a sacral neo-classicism: notably the fugal second movement and the long-breathed tonalities of the finale, in which the regular periods already characteristic of *Oedipus* and *Apollo* acquire a still loftier quality of timelessness and weightlessness. The sense of cadence, so crucial in the finale, is a firmly neo-classical trait. But there is also a powerful strain of Russian atavism in the language. This is his first work since the *Octet* to make significant use of the octatonic scale, and the kind of usage is reminiscent of still earlier works, those of specifically Russian parentage. Stravinsky claimed, in fact, that he originally sketched the first movement to Slavonic words, and there is oblique support for this in the verbal accentuations of the finale (on 'Laudate Dominum'), which shift arbitrarily between syllables as they do in the works to Russian texts. Even the chant shapes of the voice parts sometimes hint at the litany-like repetitions of *The Wedding* or the *Symphonies d'instruments à vent* and the sonorities are similarly dominated by the wind and the piano duo, with the strings represented only by cellos and basses.

As usual, work on the symphony was delayed by concert tours, which included a mid-February visit to Bucharest, where he played the *Capriccio* and met three queens: Marie of Romania and her daughters, and the Queens of Greece and Yugoslavia, with whom he and Vera had tea. In Prague on the way home he met the

quarter-tone composer Alois Hába, but told reporters than 'I recognize only half-tones as the basis of music' (*Prager Presse*, 23 February). Work on the symphony proceeded in March (starting, as in the case of the *Capriccio*, with the finale), and continued in June in Paris, where Pleyel had set him up in a studio in the new Salle Pleyel building. It was completed in a villa at Charavines-les-Bains on the Lac de Paladru, not far from Grenoble, where the Stravinskys spent the summer of 1930. Koussevitzky had naturally bought the world première as part of the commission; but a delay of a few days to the Boston performance meant that the actual première took place in Brussels on 13 December under Ansermet (the Boston performance was on the 19th). Meanwhile Otto Klemperer, who had been keenly bidding for the European première, may have lost it in the end because of political difficulties which led in early November 1930 to the announcement of the closure of the Kroll. Stravinsky, who was in Berlin at the time, heard Klemperer's world première of Schoenberg's *Begleitungsmusik* (6 November), then a few days later ostentatiously attended Klemperer's *Histoire du soldat* and took a bow with him amid tumultuous applause. He told Berlin reporters that he was astonished at the Kroll's closure. 'In no other city', he told *Tempo* (12 November), 'have I and my works met with such interest and understanding as in Berlin, and for that I have above all to thank Otto Klemperer and the Kroll Opera'.

Stravinsky arrived in Brussels in December from an exhausting German concert tour which had had, nevertheless, one creative outcome. In Wiesbaden at the end of October, at the house of his German publisher Willy Strecker (of Schotts), he had met the violinist Samuel Dushkin, for whom Strecker wanted him to write a concerto. And the two men hit it off so well that in the next two years Stravinsky composed for Dushkin not only the concerto, but also a large-scale violin-piano duo, the *Duo concertant*, and a series of recital arrangements, including the important *Suite italienne* (based on pieces from *Pulcinella*, the second violin suite Stravinsky had derived from that work). By the end of 1932 they had established a touring duo, with the object of giving concerts in towns which lacked orchestras or the resources (or stomach) to include Stravinsky in their subscription programmes. Meanwhile the showy yet lyrical Violin Concerto, with its suggestion of a baroque concertante style and its crisp tonal harmonies emblematized by the famous triple-stopped chord which starts each of the four movements and which Dushkin initially told the composer could not be played, was completed in September 1931 and first performed by him with Stravinsky conducting the (reputedly very unreliable) Berlin RO in the old Philharmonie on 20 October.

By this time Stravinsky was generally regarded as above reproach by the German press, who in fact took him far more seriously than their Parisian or (especially) Anglo-Saxon colleagues. But voices were beginning to be raised against what Fritz Stege called the 'desecration of Bach . . . which, beneath the make-up of French civilization, reveals clearly enough the savagery of half-Asiatic instincts' (*ZfM*, Jg.98, 1931, p.1061, quoted in Evans, R1998, p.92). It was an ominous sign of growing xenophobia amid the worsening economic ruins of post-crash, pre-Nazi Germany. When Dushkin and Stravinsky played the *Duo concertant* in a Berlin radio studio a year later (28 October 1932), the response was more muted since only the more serious critics would bother to review a broadcast. The subtle change of emphasis, from concertante neo-baroque to a cool and highly abstracted sonata style escaped notice in Berlin. But Stravinsky's later memory that the duo was inspired by his friend Charles-Albert Cingria's *Pétrarque* was mistaken, since that book only came out in December 1932. On reading it that December, he put aside the Concerto for two solo pianos, which he had been sketching, and drafted a setting of Petrarch's 'Dialogue between Joy and Reason', of which Cingria includes a French translation. This was his first setting of a French text since the Verlaine songs of 1910. But within a month this too was displaced by (and later to some extent incorporated in) a large theatre piece, commissioned once again by Ida Rubinstein, to a text by André Gide about the Greek fertility goddess Persephone. Here the new pastoral spirit in Stravinsky's music would reach its fulfilment.

13. Igor Stravinsky, Ostend, 18 November 1931

The first meeting with Gide took place at Wiesbaden, where Stravinsky was again in mid-tour, at the end of January 1933. On the very same day Hitler became Chancellor of Germany, and a few days later a photographer friend of Stravinsky's, Eric Schall, was attacked by Nazi thugs as he walked away from a Munich restaurant with the composer and Vera Sudeykina. It seems possible that Stravinsky himself had been mistaken for a Jew. But this was not his main anxiety where Hitler was concerned (he soon provided Strecker with a detailed statement of his Polish-Russian ancestry). The fact was that in the past few years the greater part of his concert income had come from Germany. But now the booking of foreign artists and the performance of modern music were, at least

theoretically, coming under official scrutiny, and in any case economic conditions were such that few organizations could any longer afford even a fraction of his fee. With Dushkin, a Jew, the situation seemed even more serious. And so it proved. Stravinsky's Munich recital with his duo partner in February 1933 was to be his last German concert appearance of any kind for more than three years, and with that single exception (a Baden-Baden performance of the Concerto for two solo pianos with his son Soulima in April 1936), his last public appearance in Germany until 1951.

Stravinsky's essentially pragmatic attitude to the Nazi regime may repel, but it is not direct evidence of sympathy. Though anti-Semitic, like many Russians of his class, he neither advocated nor supported violent or political measures against Jews, and in fact his partnership with Dushkin and high-profile support of Klemperer suggest that the prejudice was to some extent stereotyped and unrelated to individuals. Unlike Wagner, he seems never to have behaved with condescension, or indeed in any noticeably specific way, towards Jewish friends; his frequent and nauseating anti-Semitic remarks come mainly in letters to fellow anti-Semites like Benois, Diaghilev or Reinhart. On the other hand he disliked the Nazis because they brought chaos to his working routine and undermined his income, which aggravated his sense of insecurity as an exile (it was probably for this reason that, in June 1934, he at last took French citizenship). He would certainly nevertheless have gone on performing in Nazi Germany if he had been engaged. He did in fact record his *Jeu de cartes* in Berlin in February 1938, apparently without qualms, and he objected vigorously to his inclusion in the Düsseldorf *Entartete Musik* exhibition the following May on the revealing grounds that it did not reflect the actual standing of his music in Germany (and because it represented him as a Jew).

His attitude to the Fascists in Italy was another matter. Precisely at the time of the Nazi takeover (and possibly even because of the chaos it threatened), he was professing extravagant admiration for Mussolini in newspaper interviews. 'To me', he told the *Tribuna*, 'he is the *one man who counts* in the whole world. . .. He is the saviour of Italy and – let us hope – of Europe' (quoted in Sachs, G1987, p.168). He was received by the Duce in Rome that very February, less than three weeks after the Munich incident, and eight months later sent him greetings on his 50th birthday. Yet he knew all about the dark side of Fascism; he knew, for instance, that Cingria had been arrested in Rome on a trumped-up charge in October 1926 and locked up in the Regina Coeli for two months without trial. Later, he knew as much as anyone else about Italian atrocities in Abyssinia in 1936, in which year he sent Mussolini the second volume of his autobiography and expressed anxiety at the absence of any acknowledgement. But by this time the yearning for order and strong government overrode all other considerations.

The desire for order is perhaps the only serious link between Stravinsky's political attitudes and his work. If neo-classicism is an indication of reactionary tendencies, *Perséphone* shares them. But as a specific allegory of ordered seasonal rotation, it can be taken either way. Gide himself was at the time a communist fellow-traveller, and his Homeric play about Persephone's willing descent into Hades to succour 'a people without hope, pale, unquiet and sorrowful' has been seen as a Christianized left-wing tract. But Stravinsky in any case from the start ignored most of Gide's ideas about the work, and effectively ridiculed his graphic concept of the kind of music his words should evoke. For the composer, the text was to be absorbed into the music exactly as in his Russian and Latin works. This, of course, did not please Gide, who, after a run-through at Ida Rubinstein's late in January 1934, fled to Sicily and took no further part in preparations for the production.

This most hybrid of all Stravinsky's works, a mixture of solo and choral singing, *mélodrame*, dance and pantomime, opened at the Opéra on 30 April 1934, with Ida Rubinstein herself in the mimed and spoken title role, and the composer conducting. Though the press treated it with respect, many aspects of the work puzzled its audience. The smooth, almost tensionless third-based harmonies of the first tableau brought to an extreme the composer's apparent retreat from the conventional idea of modernism; and if the later tableaux have more edge,

14. Igor Stravinsky with his son Soulima and Samuel Dushkin

they can also seem more diffuse. Perhaps because of the text, the allusions are French or quasi-French: Gluck, Berlioz, even Liszt, to the point where one might almost detect a conscious accommodation with Gallic culture, with the admiring world of Nadia Boulanger (at whose apartment *Perséphone* had a preview performance a day or two before the première), or that of the poet Paul Valéry, who praised the work's 'divine detachment' in a letter to the composer. The Stravinskys had been living in Paris that winter (after two years in a house in the small town of Voreppe, near Grenoble), and in October 1934 they settled permanently in a spacious, and expensive, apartment in the rue du Faubourg St-Honoré. The composer's Parisianization reached its height just over a year later, when he ran unsuccessfully (and somewhat humiliatingly) for the Académie *fauteuil* left vacant by Paul Dukas's death in 1935. Thereafter, for that and other reasons, it began to decline.

7. Last years in France: towards America, 1934–9. This brief but intense pan-Gallic phase is marked, curiously, by literary and didactic work. His autobiography, *Chroniques de ma vie*, which came out in two volumes in 1935 and 1936 (ghost-written by Diaghilev's old associate, Walter Nouvel), is a decidedly French piece of literary posturing, rich in tributes and bouquets, silent on important but touchy aspects of his life, and well larded with wordy digressions on aesthetics, in which all his work is seen flatly as the product of a single formalist impulse. The book is often remarkably inaccurate, even about some recent matters. Also in 1935, he introduced the first performance of his Concerto for two solo pianos in the Salle Gaveau (21 November) with an extended talk about the new work and the three movements from *Petrushka* (in the arrangement made for Artur Rubinstein in 1921), which Soulima was playing on the same programme. Then that winter he participated for the first time in a formal composition class, run by Nadia Boulanger at the Ecole Normale de Musique. Finally, in 1939, came the course of lectures subsequently published in the forties as *La poétique musicale*, given at Harvard but in French and essentially a late product of this Gallic phase. They too were ghost-written, by Roland-Manuel and Pierre Souvtchinsky.

To a certain extent all this verbalizing was no more than the product of cultural, and occasionally financial, pressure. Except possibly in the *Poétique* there is no overwhelming sense that Stravinsky has anything to say that demands to be said in words, and even there much of the content is derivative, from Valéry, Maritain, Roland-Manuel himself and other critics in the formalist tradition. The most original parts of the 'course' are those which describe the accidental, serendipitous nature of creative work, a concept very much borne out by the composer's own sketches, and by what we know of his working methods, which always hinged on the discovery or 'invention' of sounds at the keyboard. At the end of the *Poétique*, this idea takes the form of the composer as an almost unconscious, semi-automatic channel of communication between 'our fellow man . . . and the Supreme Being', an idea which Stravinsky later famously re-expressed when he wrote (*Expositions and Developments*, 148) that 'I am the vessel through which *Le Sacre* passed'. But by that time (the late 1950s), such remarks have to be seen as part of a growing tendency, already noticeable in the 1930s, to dissociate himself from his background and to foster the image of his early work as somehow sprung spontaneously from nowhere.

Oddly enough, the purely instrumental works of the five years after *Perséphone* are, at first glance, the most conventionally 'process'-based he ever wrote. The two-piano concerto – severe, formal, technically worked out, with its powerful final variations and fugue; the 'Dumbarton Oaks' concerto, a dazzling re-creation of the baroque concerto grosso; and the *Symphony in C*, with its large-scale sonata first movement, its (nearly) standard Beethovenian orchestra and its general affectation of good symphonic manners: these works reflect, in their different ways, Stravinsky's arrival as a 'modern master' whose work had become respectable in mixed company and had lost some of its power to terrify. Both 'Dumbarton Oaks' and the symphony, along with the ballet *Jeu de cartes* (a curiously conventional work, for all its musical brilliance) were American commissions, as were *Apollo* and the *Symphonie de psaumes* before them. They might seem to belong in the well-upholstered concert halls and salons of that last bastion of the private patron, where the composer himself was soon to join them.

His first foray of the 1930s into the USA was early in 1935, when he embarked on his second concert tour of the country, this time a coast-to-coast affair in which he either conducted or accompanied Dushkin in (among other cities) New York, Boston, San Francisco, Los Angeles (where he visited Hollywood studios), Minneapolis, Chicago, St Louis, Fort Worth, and Washington DC. The following year he paid his first visit to South America, spending seven weeks from April to June conducting in Buenos Aires, Montevideo and Rio de Janeiro. Meanwhile he had been commissioned by Lincoln Kirstein to write a work for the American Ballet company that he and Balanchine (now working in New York) had set up in 1935. At the end of 1936 he left France on his third American tour, which began, however, in Toronto in January 1937. Again this was coast-to-coast, and again it combined orchestral concerts and duo recitals with Dushkin, ending in New York with his conducting the première of the Kirstein commission, *Jeu de cartes*, at the Metropolitan on 27 April. It was on this tour that he made the first sketches for what was to become the *Symphony in C*, though whether this was prompted by any hint of a commission is unclear. He also completed the short *Praeludium* for jazz ensemble. But his next work was not the symphony, but a direct commission from Mrs Robert Woods Bliss, of Dumbarton Oaks in Washington DC, for a chamber orchestra piece to celebrate her 30th wedding anniversary in 1938.

The *Concerto in E♭*, known as 'Dumbarton Oaks', was the last work Stravinsky composed wholly in Europe. Much of the first movement was written at Annemasse, at the foot of the French Alps near Geneva, where he and his family spent part of the summer of 1937 in the desperate hope that the mountain air would help Katya's lungs. But as usual Stravinsky seems to have been able to detach himself completely, while composing, from his emotional and nervous environment, and the E♭ Concerto is one of his most poised and meticulous pieces of writing. The obvious reference to Bach at the start was evidently suggested by the commission, which stipulated a work of 'Brandenburg Concerto dimensions'. But gradually the music departs from Baroque models and though the final movement remains superficially 'busy', its imagery

becomes fragmentary and kaleidoscopic, in which sense it looks forward to certain much later scores of the American years. It would be interesting to know whether any of this material was originally conceived for the *Symphony in C* which, as eventually written, is in a similar spirit; but evidence is lacking.

Stravinsky returned to the symphony in the autumn of 1938 and completed its first movement the following April. But in the meantime his domestic life had disintegrated. In November 1938 his elder daughter, Lyudmila, who had married the poet and journalist Yuri Mandelstamm in 1935 and had a daughter (Catherine, known as 'Kitty') in 1937, but whose tuberculosis had advanced with frightening rapidity thereafter, died at the age of 29. Then, less than four months later, Katya herself finally succumbed to a quarter-century of exhausting illness. The double bereavement became triple in June, when Stravinsky's 84-year-old mother died. He himself, together with two of his three surviving children, was treated for tuberculosis at the sanatorium of Sancellemoz, in Haute Savoie, where Katya had spent much of her last four years. It was here that he completed both the first and second movements of the symphony, and here that he worked on his Charles Eliot Norton lectures for Harvard the following winter, occasionally visited by the actual author of the lecture texts, Roland-Manuel. In September, three weeks after the outbreak of war, he sailed for the fourth time to the USA, alone.

8. USA: THE LATE NEO-CLASSICAL WORKS, 1939–51. The six Harvard lectures were delivered, in French, in the New Lecture Hall (now the Lowell Lecture Hall) in two groups of three: October–November 1939 and March–April 1940 respectively; in addition, Stravinsky also held twice-weekly composition seminars with selected students. In between he conducted concerts on both the East and West Coasts. In January, Vera Sudeykina arrived from Europe, and the couple were married in Bedford, Massachusetts, in March. Later, in the summer of 1940, they went to Mexico specifically in order to re-enter as part of the immigrant quota, filing as they did so for US citizenship (which eventually came through in 1945). Yet another concert tour followed in the winter of 1940–41, including the first performance of the *Symphony in C* (finally completed in April), by the Chicago SO conducted by the composer, in Chicago on 7 November. Soon afterwards they bought a house in West Hollywood, and they moved into it in the spring of 1941.

This was Stravinsky's second emigration. But in many respects it was profoundly, even disturbingly, different from the first. Although by now an experienced American traveller and far from unfamiliar with American ways, he had few friends on the West Coast, spoke only primitive English, and was settling in a region with, at that time, little of the sophistication of 1920s Paris or even pre-1920s Switzerland. In their early Californian years, the Stravinskys moved largely in émigré circles. As late as 1948, Robert Craft has noted, 'the language, friends, and habits of the home were almost exclusively Russian . . . and so were the doctors, cooks, gardeners, dressmakers' (V. Stravinsky and Craft, F1978, p.355). Their circle included musicians like Szigeti, Rubinstein and Rachmaninoff, Mahler's widow, Alma, and her husband, Franz Werfel, Thomas Mann, the Russian painter Eugene Berman, but hardly any Americans. Money was inevitably short, and although Stravinsky eked out his income with conducting engagements, these were inevitably limited by repertory (his own music being often regarded as dauntingly modern) and by the huge distances between cities. Royalties from Europe largely dried up, and were not adequately replaced by American ones, since the USA was not a signatory to the Berne copyright convention. In effect, Stravinsky was thrown into the market-place in order to survive; and the market-place was not of the kind with which he was familiar.

The problem is reflected in various early brushes with the American publicity machine, but also in his own music of the time. The butchery of his *Rite of Spring* score in the 1940 Disney film *Fantasia* (at which he seems not to have protested at the time) is a famous but not isolated example of the former. Examples of the latter are the *Tango* for piano (1940), which was intended as a vocal work to be supplied with a commercial lyric; the *Circus Polka*, written at the end of 1941 for a ballet of circus elephants, and actually performed in April 1942 in a band arrangement by David Raksin; the short biblical cantata *Babel* (1944), part of a composite work called *Genesis* for which Schoenberg supplied the prelude; the *Scherzo à la russe* written for a broadcast by the Paul Whiteman Band in September 1944; and the *Scènes de ballet*, a 15-minute dance-revue composed for a Broadway show that same year, and doubtless performed there without much regard for textual rectitude (for all the well-known legend that Stravinsky refused to countenance changes). Even several of the works that have come down to us as well-dressed concert scores are supposed to have begun as film music, though documentation on this is so far lacking. Stravinsky claimed, for instance, that the second movement of the *Ode*, composed in 1943 as a memorial to Koussevitzky's wife Natalie, had been planned as music for the Stevenson film of *Jane Eyre*; that the *Symphony in Three Movements*, whose sketches show it to have been composed at various times between 1942 and 1945, includes music written for *The Song of Bernadette*; and that the *Four Norwegian Moods*, a work originally prompted by the Nazi invasion of Norway, was likewise 'aborted film music'.

Admittedly the aborting argues that there were strict limits to the concessions Stravinsky would make to the needs of commerce. Much of the above music suggests a new willingness to write to order; some of the works may accept audience appeal as a criterion of style in a way that would have been inconceivable for the Stravinsky of *The Wedding* or *Mavra*. But all are written to high technical and artistic standards, as if 'pot-boiler' had been taken as simply one more typological category for the neo-classical card index. The way, for instance, in which *Scènes de ballet* avoids, even while it mimics, the vulgarity of the Broadway show is an intriguing illustration of the found object serving as basis for a symbolic discourse that retains its aesthetic autonomy.

Taken as a whole the wartime works are an unusually mixed lot. The popular parodies stand out from the one or two works, such as *Danses concertantes* (a concert piece, not a ballet), or the outer movements of *Ode*, which broadly continue the manner of the 1930s concert pieces in a breezier spirit. But there is also a third strand, represented by the outer movements of the *Symphony in Three Movements*, the two Mass movements (Kyrie and Gloria) written at the end of 1944 some years before the rest of that work, and even the amiable Sonata for two

pianos (completed in February 1944), which in one way or another hark back to the composer's Russian past. The symphony thrillingly revives the so-called Scythian, or Dionysian, elements which had been the most famous thing about the early ballets; it was his most 'Stravinskian' work for almost 30 years. No less interestingly, the Mass (eventually completed in 1948) seems to have been a product of a renewed religious consciousness – similar, no doubt, to the one of 18 or 19 years before – itself presumably in some way related to the sense of remote exile. He suddenly wanted to write an austere liturgical work (but for the Catholic rather than the Orthodox rite, since the latter forbids musical instruments in its services). This sent him back to his own earlier ritual music, especially the *Symphonies d'instruments à vent* and *The Wedding*. But it also sent him farther back, to a much earlier church music: to plainsong, fauxbourdon, troping and antiphony. The severity of the Mass is thus by implication linked to a certain archaism of sound and technique, in which respect it looks not only backward but also forward in Stravinsky's own work.

After the end of the war, he wrote two short concertos which, so to speak, sum up his main public styles of the time. The *Ebony Concerto*, written at the end of 1945 for the saxophonist and clarinettist Woody Herman, is to the 'pot-boiling' aspect what the *Concerto in D*, written in 1946 to a commission from Paul Sacher in Basle, is to conventional neo-classicism. Even some of the material is, *mutatis mutandis*, the same. Nor is it at all clear that the conventional piece is superior to the pot-boiler, in its way an immaculate, stylized portrait of the balletic precision of big-band playing, with its five saxophones and five trumpets. But the real stylistic challenge came with Stravinsky's next two works (not counting the already part-composed Mass). Both were major theatre pieces, his first since before the war. And both, on the face of it, implied a kind of *summa* – the master bowing out with classical, large-scale masterpieces in the genre he had dominated since bursting on the scene almost 40 years before.

The ballet, *Orpheus*, was another Kirstein commission, this time for Ballet Society (the forerunner of the New York City Ballet), and it was expressly intended as a pair for *Apollo*, though the two were not initially produced together. In fact the subject was suggested by Balanchine, whose staging of *Apollo* was the touchstone for Kirstein's company. And this time composer and choreographer worked closely together, evolving the details of the scenario and the style of presentation 'with Ovid and a classical dictionary in hand', as Stravinsky recalled in *Themes and Conclusions* (p.52). The obvious difference between the two works is that, in *Orpheus*, there is an inescapable minimum of narrative substance, where *Apollo* was hardly more than a series of ritual actions, like *The Rite of Spring*. But Balanchine, who was in general uncomfortable with narrative, leant happily towards a highly statuesque, ritualized handling of the Orpheus legend, and in this way the new ballet seemed to become just the kind of work Stravinsky's admirers (who in the past he had rarely bothered to placate) expected him to compose.

In fact *Orpheus*, written for a slightly enlarged Haydn symphony orchestra, is a less predictable score than it may seem. Though based, like other Stravinsky ballets, on a stereotyped series of 'classical' dances, it complicates the issue in surprising ways. Most suggestive are the slow framing movements, the introduction, three interludes, and apotheosis, whose severely hieratic tone (intensified by imitative counterpoint, including canon) lends the action a mysterious, repressed quality – the character of a liturgy enacted beyond the iconostasis. Musically, too, it implies a more austere, less conventionalized attitude that was to have its corollary in later works. Counterpoint is here put to work, sometimes with tense harmonic consequences. Stravinsky himself, who was ambivalent about *Orpheus* in later years, praised those parts of the score 'where a developing harmonic movement and an active bass line relieve the long chain of *ostinati*' – implying a criticism of the more old-style neo-classical bass mechanisms, of which *Orpheus* also has a few. More interestingly, he referred to the work as 'mimed [by which he perhaps meant suppressed] song' (ibid., p.53), which made it inevitable, he felt, that his next work would be an opera.

Orpheus had its first performance at New York City Center on 28 April 1948, with Stravinsky himself conducting. Just over two weeks before, he had conducted the revised version of his *Symphonies d'instruments à vent* in a Town Hall concert by the Chamber Arts Society, a group run by a young Juilliard graduate called Robert Craft. Unusually, Stravinsky had appeared without fee, as he informed his new publisher Ralph Hawkes, to help Craft and to hear how the revision sounded (he had never conducted the work in public in any form before except for the final chorale, which he had arranged without clarinets to go with the *Symphonie de psaumes* in a broadcast concert in 1945). But the explanation concealed an association that was already unique in Stravinsky's life. He and Craft had been corresponding about his music for some time, and they had met in Washington a fortnight or so earlier. In New York, Craft at once became Stravinsky's shadow, spending every day with him and Vera, quietly absorbing his conversation and personality. Later Stravinsky invited him to Los Angeles, and at the end of 1949 Craft moved into the house in West Hollywood as the composer's assistant, musical interpreter, factotum, travelling companion, Boswell, collaborator, friend, quasi-adoptive son, even at times his musical conscience – a position he was to retain, to the incalculable benefit of Stravinsky's music, but to the fury of many of his friends, old and new, whom Craft displaced or otherwise discomfited, until the composer's death in 1971.

This is not the place for a detailed investigation of Craft's role in Stravinsky's domestic life. Certainly it was enormous, and by no means always placid. For the present purposes it can be subsumed under two headings: cultural and compositional. Compositionally, as we shall see, Craft guided Stravinsky into new waters, technically and aesthetically, and it is no exaggeration to say that without his influence the music after 1951 would have been radically different, perhaps (though of course not certainly) much less vital. Culturally, he transformed Stravinsky's thinking. Hitherto, the focus had been Russian and French; now it became Anglo-Saxon. Craft, by his own description a monoglot New Yorker, instinctively pulled Stravinsky towards English and American literature and philosophy, and towards that American view of things in general which had been so signally absent from the Stravinskys' life since their arrival in the country. Out

went the collected Voltaire, in came the complete Henry James. No doubt the transformation was less than total (Craft has said that Stravinsky continued to read Bossuet every day). But it was Craft's practical value as a cultured Anglophone that immediately commended him to the composer, who was at that moment embarking on an English-language opera with a notoriously eccentric and verbally punctilious English poet as librettist.

The idea for *The Rake's Progress* arose from a Hogarth exhibition Stravinsky saw in Chicago in May 1947, and by the time W.H. Auden was co-opted as librettist that autumn, Stravinsky had formed clear ideas of the sort of work he wanted to write. Influences would include Mozart, whose opera scores he requested from Hawkes even before Auden came to Los Angeles for consultations in November 1947. From the start Auden and his co-librettist Chester Kallman understood Stravinsky's need for formal structures, in this case arias and recitatives, strict rhyming and metric schemes, and a high degree of symbolic focus in the narrative. Auden could combine these mechanical functions with the invention of verse of astonishing verbal plasticity and richness. Yet (a crucial virtue in a Stravinsky collaborator) he was apparently untroubled by the composer's sometimes wilful treatment of accent, which was presumably deliberate, since Craft was there to advise him on the correct prosody. On the whole, Auden's rethinking of antique verse forms and patterns is very close to the musical equivalents in Stravinsky's own work, and even the elements of stylization are parallel, which is why the outcome – whatever the work's dramatic or musical shortcomings – is linguistically, in the broadest sense, so harmonious.

The Rake's Progress has been criticized as musically too predictable, too much the grand master's summatory neo-classical masterpiece, with its recipe of arias and recitatives (with harpsichord – though a piano was used in the first production) and its rather obvious Mozartisms, suitably coarsened, since this is Hogarth, by a flavour of *The Beggar's Opera*. It has been argued that Stravinsky was too tolerant of a scenario which, while it certainly dealt with the cyclic theme of death and rebirth so dear to his theatrical heart, imported too much generic and sentimental detail, especially into the scenes with the bearded lady, Baba the Turk, and the somewhat drawn-out final scene in Bedlam. But in performance, the opera is nearly always redeemed by the sheer exuberance and variety of its invention, strongest in the parodies of popular 18th-century music: the Lanterloo chorus, the Ballad Tune, Sellem's Aria, and Ann's lullaby. In any case, the summatory aspect conceals some unexpected new directions which show up if we look at the score in the light of what Stravinsky wrote next. For instance, the intensive refrain forms in the final act clearly anticipate the crucial role played by such forms in works from the *Cantata* to *Threni*, where the refrain idea is organically linked to serial method. Not that there is any trace of serialism in *The Rake's Progress* (unless one counts the mocking canon in 'Since it is not by merit'). But if we wish to argue that Stravinsky's adaptation of the method was as much a process of matching as a desperate quest for modernity, it makes sense to see the opera as at least partly a threshold, however firmly shut the door might at first seem.

9. THE PROTO-SERIAL WORKS, 1951–9. In all, *The Rake's Progress* took Stravinsky more than three years to compose. It was completed in April 1951, and first performed, after much lobbying and infighting, at La Fenice in Venice (in co-production with La Scala, Milan), on 11 September of that year, directed by Carl Ebert. Stravinsky went to Italy to conduct the première, his first visit to Europe since 1939. After Italy, he conducted in Germany, and heard tapes of new or newish music in Cologne and Baden-Baden, including Webern's Variations op.30, and works by Schoenberg, who had died in July. Craft has described how disturbed Stravinsky was at discovering that his recent music did not interest the young European composers. Back in California, he wrote nothing for six months; then, in July 1952 (after a second European trip in May to conduct *Oedipus rex* in Paris), he quickly completed the Cantata, stereotyping its form because he was in a hurry to write his Septet. These two works are usually taken as the starting-point for the serial method which informs everything Stravinsky wrote subsequently.

The catalyst for the Septet seems to have been a series of Schoenberg concerts which Craft himself conducted in Los Angeles in the autumn of 1952. Stravinsky attended the rehearsals as well as the concerts, and was fascinated by the music, especially (improbable as it may seem) the Wind Quintet, the Serenade op.24, and Suite op.29. The Gigue finale of his own Septet (which like op.29 uses a piano as linch-pin between string and wind trios) plainly betrays the influence of Schoenberg's finale. In the Cantata, settings of old English lyrics which connect stylistically with *The Rake's Progress*, there is much pitch-only canon and one item of proto-serialism in the form of a tonal melody ('cantus cancrizans') extended through its own retrograde and inversion forms. No doubt such writing was encouraged by Stravinsky's European trauma. But it is not essentially foreign to his own previous work from the Mass onwards, and might, but for what followed, have been accepted as a late-period intensification of that tendency. The Septet is somewhat different, however, because of its systematic abandonment of overt tonality as it pursues its 16-note row through a polyphonic Passacaglia and Gigue (after a first movement based on the same material but candidly in A major-minor and sonata form). Even here the influence of Schoenberg seems to be largely technical. Linguistically, the hard rhythmic articulations and sharply characterized textures seem light years from op.29's contrapuntal self-communings. And curiously, it is through rhythm that Stravinsky seems to restore a new kind of tonal focus, whereas with Schoenberg atonality in pitch and, metaphorically speaking, atonality in rhythm go hand in hand.

The Septet was eventually performed at Dumbarton Oaks in January 1954. By that time several major theatre projects had come, and in all but one case gone. In May 1953 Stravinsky had met Dylan Thomas in New York and they had discussed an operatic collaboration based on Thomas's idea of a rebirth of language and myth after the near-destruction of humanity in a nuclear war. But the poet had died suddenly in November, just as the Stravinskys were awaiting him in Hollywood. Meanwhile in August Stravinsky agreed to write a new ballet for Kirstein to go with *Apollo* and *Orpheus*. Kirstein was floating another Apollonian subject (having previously contemplated Eliot's *Sweeney Agonistes*), whereas Balanchine had had an idea based on Terpsichore which later evolved into a dance competition 'before the gods . . . as

15. Stravinsky at an orchestra rehearsal, Teatro La Fenice, Venice, 1951

if time called the tune, and the dances which began quite simply in the sixteenth century took fire in the twentieth and exploded' (letter from Kirstein to Stravinsky, 31 August 1953). It was this last idea that led eventually to *Agon*. But first, Stravinsky composed his *Three Songs from William Shakespeare* and *In memoriam Dylan Thomas*, an intensely beautiful setting of 'Do not go gentle into that good night' for tenor and string quartet, framed by solemn dirge canons (reminiscent of Gabrieli) for strings with trombones. Here a chromatic five-note row is used, without note-repetitions, still using a mainly melodic serialism, whose patterns are emphasized for ceremonial or ritualistic effect – a uniquely Stravinskian touch. The first half of *Agon* was then sketched and drafted, ending in December 1954 with the coda to the 'Gaillarde', which seems to be the first music Stravinsky composed using a chromatic 12-note row. Up to this point the work reflects Balanchine's idea of a succession of antique dances inspired by Mersenne, and alternates tonal pieces with free chromatic dances of a concentrated rhythmic, motivic character. At this point, he broke off to fulfil a commission by the Venice Biennale for a 'Passion according to St Mark'. Only when this work, the *Canticum sacrum*, had been completed (in November 1955), bulked out with a transcription of Bach's Chorale Variations on *Vom Himmel hoch* (March 1956) for the same Venice concert in September 1956, did he return to *Agon* and complete it in April 1957.

Agon and the *Canticum sacrum* are often thought of together because both make partial use of 12-note rows, the first Stravinsky works to do so. But only a narrow-minded obsession with the mechanics of serialism could obscure the profound differences between these two works, which are sure evidence, incidentally, that the Stravinsky of *Pulcinella* and the *Symphonies d'instruments à vent* was still alive and kicking hard in his mid-seventies. *Agon*, surely, is an astonishing work for a composer who, not three years before starting it, had supposedly been in the grip of a creative aphasia brought on by a terror of stylistic inadequacy. For this score is nothing if not stylistically fearless. It combines Renaissance dances, recognizable yet utterly rethought in movement, tonality and sonority, with a high-speed stream-of-consciousness chromaticism apparently indebted in manner, though hardly method, to the Boulez of *Structures*. It has a galliard in C major built round a strict canon between harp and mandolin with high flutes and double-bass harmonics, propped up by a thick C

16. Stravinsky in his study, December 1952

major chord for solo viola and cellos which breaks every known rule of instrumental voicing. It has an atonal 'Bransle simple' which opens with a rapid canon for two trumpets, and a nearly atonal 'Bransle gay' with a castanet ostinato. It starts and ends in a Stravinskian C major, and its four sections or sequences are linked by tonally fixed interludes which tick over like a car engine while the dancers take up their new positions. But the dances themselves gradually 'take fire in the twentieth century and explode' (notably in the coda to the 'Pas de deux' and the following duos and trios), to the extent that it was long thought that the stylistic discrepancies were due to the break in composition. We can now see that the changes are a reflection of the original subject idea (not clearly retained in Balanchine's highly abstract choreography), and are perfectly deliberate. In fact this is proved by the smooth jointure between the chromatic trios and the final coda, which reprises the opening 'Pas de quatre' with no sense of disruption or incongruity.

The *Canticum sacrum* is no less eclectic in idiom, and hardly less coherent in effect. But in this case the linking concept is not dramatic but ecclesiastical. Stravinsky hoped the work could be performed in St Mark's, Venice (as in fact happened, after a formal approach to Cardinal Roncalli, the future Pope John XXIII, a month before the première). Whether or not Craft's hint that the five main movements are in some sense analogous to the five domes of the basilica is to be taken literally, there is no mistaking the architectural feel to the design in general. The fifth movement is a nearly exact retrograde of the first, the solo tenor's 'Surge, aquilo' is balanced by the 'Brevis motus cantilenae', and the 'exhortations to the three virtues' – Charity, Hope and Faith – themselves form a central arch or dome for the whole structure. Many incidental details show that Stravinsky was thinking historically about Venice, and acoustically about a large reverberant church (though whether he allowed adequately for the profound and interminable echo of St Mark's itself is a question only those who attended the first performance can answer). The 'Euntes in mundum' and its retrograde have an unmistakably Venetian ring, with their organ versets and their *stile concitato* note-repetitions for quartets of trumpets and trombones. The versets, soft and slow, allow the ensemble echoes to clear

between sections. By contrast the central movements, with their chromatic, sometimes canonic, lines, have a more intimate quality, and the versets suggest a dialogue, or verse and response form. The *Canticum* shares one other new quality with *Agon*, its extreme, even abrupt concision, which (except in the *stile concitato* episodes) largely does away with the varied ostinato repetitions so characteristic of Stravinsky's earlier manners.

In Berlin in early October, three weeks after the *Canticum sacrum* première, Stravinsky suffered a stroke while conducting the *Symphony in C*. Curiously enough, though alarming at the time, it seems not to have demanded any serious reduction in his work-rate, which actually increased thereafter, at least in the sense that his schedule of conducting tours continued to grow for another five or six years (though he conducted less in each concert, while Craft conducted more). Soon after the stroke, he was diagnosed with polycythemia. For the remaining 15 years of his life, health and health-care were to be his main preoccupation outside music, as well as the greatest strain on his exchequer, which explains why he continued to tour and conduct all over the world for long after it can have been medically (to say nothing of artistically) sensible to do so. He simply could not afford to stop. Not until after his concert in Toronto in May 1967, at which he conducted (sitting down, Craft says, for the first time ever) the suite from *Pulcinella*, did he at last decide that the time had come to call a halt.

After the concert première of *Agon*, conducted by Craft in Los Angeles in June 1957 (the stage première followed in New York in early December), Stravinsky returned to Venice; and there in August, in the cellar club of the Hotel Bauer Grünwald, he started work on another sacred work with covert Venetian connections, a setting of texts from the *Lamentations of Jeremiah*. *Threni*, which he completed the following March and conducted in the upper chamber of the Scuola Grande di San Rocco on 23 September 1958, is famous in the Stravinsky literature as his first score entirely based on a 12-note row. It remains, nevertheless, one of his least known works, seldom performed and little recorded, no doubt mainly because of intonational difficulties for the chorus and (especially) the vocal soloists, who sing for much of the time unaccompanied. Though not consistently atonal in the Schoenbergian sense, since Stravinsky seeks out quasi-tonal areas of agreement and consonance between row-forms and different contrapuntal voices, it is intervallically severe, and the harmonic intersections remain, in tonal terms, grammatically arbitrary.

Technically, *Threni* continues to redefine serialism in Stravinsky's own image. The row is still treated linearly, as if it were a folksong or a plainchant. Sometimes it is divided into cells, as in *The Rite of Spring* or *The Wedding*. Sometimes, by contrast, it is used in effect like a complete theme. Many passages are coterminous with (often canonic) statements of the row, and here and there Stravinsky rotates the row, moving its first few notes to the end, without any far-reaching implications. There is, undoubtedly, a certain pedantry in such procedures. But they also suggest some idea of 'litany' as a highly ordered and repetitive phenomenon whose patterning is transparent by its nature. The result is a work of extreme and possibly self-defeating severity: a long work by the standards of late Stravinsky (about 35 minutes), and in colouring exceptionally dark, with clarinets and horns prominent in their lower registers, sarrusophone, trombones and tuba but no trumpets (except for the strangely heraldic flugelhorn solo in the 'Quomodo sedet'), and piano and harp written exclusively in the bass clef until the final section. Not surprisingly, performances have mostly been unsatisfactory. It was at the Paris première, conducted by the composer in a Domaine Musical concert on 14 November 1958, that the work was so badly sung and played that the audience jeered, a failure Stravinsky attributed to poor preparation on the part of Pierre Boulez.

Boulez and Stravinsky had for a time been close in the mid-1950s, and Boulez's influence – or at least that of the tendency of which he was by that time the acknowledged leader – is noticeable in the series of published conversations with Craft which began at the time of *Threni*. This is particularly true of the first volume (*Conversations with Igor Stravinsky*), with its discussions of technical and aesthetic questions, and its famous metro-map drawing of Stravinsky's latest style. The memoir-orientated later volumes retreat somewhat from the regrettably subservient positions of the first, but are still inclined to be apologetic about those earlier (especially neo-classical) works of his most despised by the ferocious avant-gardists of the day. Craft has admitted that the form and in many cases the language of these volumes, which include excerpts from his own diaries and, in the last book, 'interviews' obviously written by him, are his work, but has always maintained that the substance, noted down from replies or remarks made by Stravinsky under all kinds of circumstances, is authentic. Some tendencies in the books obviously reflect Craft's influence, but then so did Stravinsky's own thinking at this time. Two facts are clear: first, that the books are historically very unreliable and inaccurate, especially (though not only) about Stravinsky's Russian life and friendships; secondly, that they are brilliantly vivid, entertaining, and compulsively readable – perhaps the best books of their kind by or about a musician since Berlioz's *Memoirs*.

10. Final years, 1959–71. If the hypermodernist influence on Stravinsky's opinions retreated somewhat after *Conversations*, the effect on his music if anything increased. *Movements* for piano and orchestra, commissioned by a Swiss industrialist called Karl Weber for his pianist wife in March 1958, may be less severe than *Threni* in the hieratic sense, but it is a great deal more hermetic in point of style and technique. Here Stravinsky converts the seemingly inconsequential row rotations of the earlier work into a complex note-generating programme, which involves 'reading off' chords and melodies from a grid made out of rotated row forms stacked on top of one another (a technique partly derived, it seems, from his friend Ernst Krenek's own setting of *Lamentations*). To some extent this method may appear no more than a useful way of spinning notes which can then be processed rhythmically, texturally and in other ways. But that may be to underrate the possible symbolism of such schemes for a mind like Stravinsky's. Nearly all his subsequent works are religious, and nearly all use rotation grids in some more or less esoteric combination with sacred texts.

The obvious major exception is the *Monumentum pro Gesualdo di Venosa*, a free recomposition of a trio of Gesualdo madrigals for a small mixed ensemble of instruments, made in March 1960 two months after the

première in New York of *Movements*. Stravinsky had already made completions of three Gesualdo motets, versions which, despite their somewhat speculative nature, were included by Glenn Watkins in his and Weismann's Gesualdo edition (Hamburg, 1957–67). Vocal music of the Renaissance and pre-Renaissance was another enthusiasm of Craft's whose influence can be detected in Stravinsky's later works. The 'Venetian' works of the 1950s were written in the shadow of various performances by Craft of Monteverdi (including the Vespers), Schütz, the Gabrielis and others; and *Threni*, additionally, after hearing Craft conduct Tallis's Lamentations at the Monday Evening Concerts in Los Angeles. Isaac, Josquin, Machaut and Ockeghem also figured in these concerts. It seems obvious that both the sound of such music and its often intricate canonic and isorhythmic structures were in Stravinsky's mind as he turned to the composition of his last few sacred vocal and choral works.

An example is the 'Prayer' movement of *A Sermon, a Narrative and a Prayer*, completed in January 1961, and first performed in Basle just over a year later under Paul Sacher, who had commissioned it. The setting of Thomas Dekker's 'Oh My God, if it Bee Thy Pleasure' for choir and solo voices accompanied by a tocsin-like combination of gongs, piano, harp and double-bass, has an intensity of feeling which arises audibly from the concentrated polyphony of the writing, but surely also (not so audibly) from the fact that all the actual notes come from a hexachordal rotation grid. The grid operates throughout the work, indeed, providing schematic support (not, one hopes, in any ironical spirit) for St Paul's 'We are saved by hope' in the 'Sermon', and for the account – part-spoken, part-sung – of St Stephen's martyrdom at Paul's hands in the central 'Narrative'.

Stravinsky had by this time already conceived the idea for *The Flood*, and may consciously have used the St Stephen narrative as a study for the more complex narrations he envisaged for the later work, which he was writing for television. By far the most brilliant and varied Stravinsky score after *Agon*, *The Flood* suffered from the diffuseness demanded by the popular medium; it had to be anecdotal, picturesque and graphic – qualities which Stravinsky had long since abandoned in stage ballets. 'The subject of *The Flood*', he remarked during discussions with Balanchine, who was choreographing the production, 'is not the Noah story . . . but Sin' (1963, p.72); and Robert Craft's adaptation of the Chester and York Mystery Plays duly embraces the whole Old and New Testament cosmology from the Fall to the Redemption in a brisk, emblematic 25 minutes, which, for the transmission on 14 June 1962, CBS extended to an hour with the help of an introductory talk about Flood myths, and various interruptions for commercials by the sponsor, Breck Shampoo – surely the apotheosis of targeted marketing. Perhaps luckily, Stravinsky did not see the telecast, as he was in Rome on his way to Hamburg for his 80th birthday celebrations.

However eventful the TV production may have been, the music made few concessions to its popular audience. Although the trappings of post-Webernian serialism are applied with unerring wit, it is a wit that requires musical sophistication for its understanding. To see the joke of an ark being built with sharp serial nails then carried away on a flood of rotating waves (preceded by a flicker of combinatorial lightning), one perhaps needs at least to have heard, if not enjoyed, other, more sombre work in this genre. For any such listener, though, *The Flood* was invigorating proof that in his 80th year Stravinsky had lost none of his creative energy. Though in a sense bitty and short-winded, the music has a centripetal speed which holds it together, from the serial Jacob's ladder of the Prelude through to the so-called 'Prolepsis [foretelling] of Christianity', ending with the same ladder translated into an image of the Redemption. In between, the work falters only during the spoken narrations, which here (as in *Babel* and unlike in *Oedipus rex*) are simply a device for getting through the story, with no oblique or ironic intention. How would Stravinsky and Balanchine have handled such a scenario in a ballet composed for the theatre? One feels that the result would have been more concentrated, more abstract and, probably, simpler.

In fact his next work, *Abraham and Isaac*, gives a clear indication of his late feeling for biblical treatment when external factors did not obtrude. The inspiration for this strangely hermetic masterpiece, for baritone solo and chamber ensemble, seems to have been hearing Isaiah Berlin read biblical Hebrew one day in Oxford in 1961, and by the time Stravinsky made his first visit to Israel at the end of August 1962, the composition was already in hand. Only at this stage was it commissioned. After the Israel trip came the momentous visit to the Soviet Union, in September and October 1962, the first time he had set foot on Russian soil proper since October 1912. It was momentous, of course, psychologically rather than artistically. According to Craft, who accompanied them, the Stravinskys were profoundly moved by the visit, reverting swiftly to an instinctive Russianism and turning a blind eye to the inconveniences and discomforts of Soviet life. 'Their abiding emotion', he recorded in his *Chronicle of a Friendship*, was 'their deep love of, and pride in, everything Russian' (F 1972, enlarged 2/1994, p.317). The composer conducted concerts in Moscow and Leningrad that included *Fireworks*, *Petrushka*, *The Rite of Spring*, *Ode* and *Orpheus*. Craft noted that the chief attraction for the audiences was the composer himself, rather than the music, much of it still unfamiliar and difficult for them. But the playing of *The Rite of Spring* opened Craft's eyes to, and reminded Stravinsky of, aspects of the music's inspirations which had been lost in chromium-plated Western performances: for instance, the dry 'open' bass drum, which 'makes the beginning of the "Danse de la terre" sound like the stampede I.S. says he had in mind'. They met many Soviet musicians, including Shostakovich, Rozhdestvensky, Oistrakh, the pianist Mariya Yudina, as well as Vladimir Rimsky-Korsakov, and of course Stravinsky's own family, his niece Xenia, and her daughter Yelena.

Yet the visit had no consequences. Stravinsky's music was not generally rehabilitated in the USSR for many years afterwards, and he himself seems not to have hankered any more after his homeland. Instead, after concerts in Italy, Venezuela and New York, he returned to Hollywood and resumed work on *Abraham and Isaac*. The score was completed in March 1963, but not performed until Stravinsky again went to Israel and Craft conducted the piece in Jerusalem and Caesarea in August 1964.

The approach here to biblical narrative could hardly be more different from that in *The Flood*. In place of the picture-book treatment, we now have a cool, abstracted

account, by a single voice, tracking syllabically through the text in Hebrew, a language Stravinsky seems to have chosen, not out of deference to the people of the State of Israel (to whom the work was eventually dedicated), but as the ultimate secret sacred language, so secret, in fact, that he himself did not know a word of it and had to be advised by Berlin on the pronunciation and accentuation syllable by syllable. The tone is that of a preacher in the synagogue, lofty but unexcitable, except perhaps at the key passage about 'multiplying thy seed as the stars of heaven'. The texture, essentially decorated monody, varies little; the voice is lightly accompanied almost throughout, and the few moments of thicker chording invariably have an emblematic significance, like the chords framing the episode of the ram in quasi-retrograded rhythm and scoring, which apparently stand for Abraham's obedience and the intervention of God.

Abraham and Isaac was to remain Stravinsky's purest and most 'automatic' use of rotations, a fact which has a bearing on the music not least because the numerology clearly refers to the symbolism of the story. Sometimes this is perfectly audible; more often the listener is aware of a patterning process, in the use of intervals, rhythmic figures or even particular words, by which the 12-minute work is being organized and, so to speak, punctuated; sometimes there are symbolisms which can be uncovered by analysis but scarcely detected in performance. The sense of arcane significations tapering away beyond the vanishing-point of direct apprehension certainly seems an authentic part of the musical experience, and an aspect of the work's subtle fascination. But exactly how such things work is, almost by definition, impossible to observe.

Yet another European tour intervened between this and the next work, a set of orchestral variations which Stravinsky, after the novelist's death on 22 November 1963, subtitled 'Aldous Huxley in memoriam'. But on the very same day that Huxley died there was another, more sensational decease, and Stravinsky broke off work on the Variations to compose a short elegy for President Kennedy (whom he had met at a White House dinner in January 1962). The *Elegy for J.F.K.*, completed in March 1964, movingly sets a short poem specially written by Auden ('When a just man dies') for mezzo-soprano or baritone with three clarinets, the same basic scoring as for the *Berceuses du chat*. Stravinsky then returned to the Variations and completed them in August 1964. Where the *Elegy* lasts about a minute and a half, the Variations are three times as long, but still remarkably compressed and, like *Abraham and Isaac*, somewhat arcane. There are 12 variations, but no evident theme, and effectively it is the serial grid that is 'varied'. Every rotation device is deployed: the serial ladder, the stacked chords, even the simultaneous playing of 12 distinct rotations in isorhythm. But as with *The Flood*, what holds the piece together is not any perception this gives of integration, but the sheer speed and energy of the writing itself (which, of course, Stravinsky may have achieved through his own perception of the grid as a unifying device).

This is by no means an elegiac piece; the dedication postdates the conception, and the music is generally buoyant in feeling. By contrast, the *Introitus* which Stravinsky wrote after the death of T.S. Eliot in January 1965 is actually a short setting of the 'Requiem aeternam', and its imagery includes the tocsin idea already used in *A Sermon, a Narrative and a Prayer*, as well as muffled drums and a solemn rhythmic parlando for the choir (male voices) in imitation of the drums. The tocsin figures serve as versets between sections of the text, like the organ interludes in the *Canticum sacrum*. Since many of these devices turn up in the next work, *Requiem Canticles*, there is a distinct sense of the one as a study for the other, or at least of the two belonging together.

Stravinsky was 84 when he completed the *Requiem Canticles* in August 1966, and perhaps it is fitting that his last substantial work should have been a memorial to somebody he did not know personally (Helen Buchanan Seeger) so that the elegiac tone is objectified and returned to the status of ritual which the recent, minimalist tributes had to some extent abandoned (though the sketchbook is nevertheless what Craft has called, in his 'Afterword' to Arnold Newman's *Bravo Stravinsky*, 'a necrology of friends who died during its composition'). The liturgy is admittedly set mainly as a series of headline texts, all from the Proper of the Requiem Mass; only the 'Libera me' is effectively set in full. Most fragmentary of all is the 'Dies irae', only the title words of which are sung, the rest of the first two verses being set as rhythmic speech like the parlando episodes in the *Introitus*; then follow a verse of 'Tuba mirum', two verses of 'Rex tremendae', and the concluding 'Lacrimosa'. Another aspect of the Eliot tribute which Stravinsky adapts for the *Requiem Canticles* is ostinato repetition, a device he had otherwise hardly used since *The Flood*. This serves a kind of antiphony in the prelude (between the pulsing semiquavers of the tutti strings and the gradually expanding dialogue of the concertante group), and in the orchestral interlude, where woodwind polyphonies alternate with phrases of a vestigial funeral march. The 'Libera me' builds up extraordinary emotional intensity by combining chordal chanting with free rhythmic speech – as it were, the multitude of dead souls shadowing the living. Then in the postlude, Stravinsky ends his final masterpiece, as he had ended that much earlier masterpiece about marriage and procreation, with chiming bells: serial bells, indeed, since the four-part chords played by celesta, tubular bells and vibraphone, are simply play-throughs of the work's two rows, each in simultaneous prime and inversion.

The *Requiem Canticles* was not the last music Stravinsky wrote. Soon afterwards he composed a simple two-part linear setting for soprano and piano of Lear's *The Owl and the Pussy-Cat*. Then later there were fragmentary sketches for an orchestral work and transcriptions of Wolf and Bach. But while his physical decline continued, there was mercifully no creative decline, merely a cessation. In 1969, the household moved to New York, partly to be closer to the increasingly heavy medical care Stravinsky needed, partly because of a family crisis specific to the West Coast. The following year, indeed, he recovered sufficiently to spend part of the summer at Evian, on the French shore of Lake Geneva, and here he was visited by his eldest son Theodore and, from Leningrad, his niece Xenia. In New York the following March there was another brief resurgence of creative energy, apparently without issue, and at the end of that month, as the final act of a life of travel and exile, he and Vera moved yet again, from the Essex House to an apartment on Fifth Avenue. Here, barely a week later, the composer died. The funeral was held in New York three days later. However, the body was not interred, but was instead flown to Venice, where, at Vera's wish, it was

17. Page from the autograph MS of Stravinsky's 'Variations (Aldous Huxley in memoriam)', 1963–4 (US-Wc)

buried on 14 April, amid considerable pomp, on the cemetery island of San Michele, a few yards from the grave of Serge Diaghilev.

11. Posthumous reputation and legacy. Stravinsky's death removed an artist widely regarded, by 1971, as a figure from the past. Concert audiences were seldom confronted with any work of his from the previous quarter-century, and even in theatrical quarters praise of works later than *The Rite of Spring* was a lot easier to come by than performances. Meanwhile, in modern music circles his reputation was in the balance. The late serial works, forbidding to lay audiences, were mostly regarded as irrelevant by orthodox avant-garde musicians, while the opposed radical and experimental tendencies rejected them along with the rest of post-Schoenbergian intellectualism. What Ernst Roth called the 'special and complex relationship between Stravinsky and the age in which he lived' ('In Remembrance of Igor Stravinsky', *Tempo*, no.97, 1971, p.6) was certainly not yet generally understood as a consistent, still less as a continuingly active one.

A few decades on, it is perhaps possible to describe this relationship in more useful terms. Stravinsky's unique artistic trajectory was crucially that of an exile: an exile, moreover, who had been uprooted at the precise moment that he was tapping down most deeply into his native musical soil. And like all productive exiles, he cultivated a flexible and reciprocal association with his changing environment. While consistently producing work which transformed the sensibilities of those who heard it, he himself continuously allowed his own sensibilities to be fed, even transformed, by the music and music-making of others. This is the only plausible explanation of his astonishing ability to absorb other idioms without ever sacrificing the integrity of his own. He himself was well aware of the trait, and made a joke of it. 'I am probably describing a rare form of kleptomania', he told Craft (*Memories and Commentaries*, p.110), who himself remarked (E1992, p.44) that Stravinsky '*wanted* to be influenced'. Perhaps no great composer has ever had the creative confidence to steal with such energy, and with so little fear that his own personality would be submerged or distorted in the process.

This combination of stylistic diversity and artistic unity and integrity seems to be the main source of Stravinsky's undimmed vitality as a creative force. For younger composers of almost every persuasion, his work has continued to offer inspiration and a source of method. And just as he stole without penalty, it seems that the best of his successors can go on plundering him with at least

the hope of impunity. Essentially a pre-postmodern composer, who exploited the diversity and impersonality of the modern age not in any jaded or dissolute spirit but in order to meet its challenges and survive its menaces, he has emerged as the archetypal product of and source for an epoch which now has the doubtful privilege of contemplating those same choices without any comparable threat and at its leisure.

WORKS

excludes some lost and fragmentary works; for details see Goubalt (B1991)

STEPHEN WALSH

Strayhorn, Billy [William; Swee' Pea] (*b* Dayton, OH, 19 Nov 1915, *d* New York, 31 May 1967). American jazz composer, arranger and pianist. He received an extensive training in music as a youth in Hillsborough, North Carolina, and Pittsburgh. In December 1938 he submitted a composition to Duke Ellington, who was so impressed by the young man's talent that three months later he recorded Strayhorn's *Something to Live For* (1939, Bruns.) with the composer as pianist. Four more of Strayhorn's pieces were recorded during 1939. After serving briefly as a pianist in Mercer Ellington's orchestra, Strayhorn joined Duke Ellington's band as associate arranger and second pianist, and for nearly three decades worked in close collaboration with the leader. The two men were so attuned to one another musically, and Strayhorn's work was such a perfect complement to Ellington's, that it is now impossible to establish the exact extent of the former's contribution to Ellington's oeuvre. Their relationship was described in flattering terms by Ellington in his autobiography (1973). Strayhorn collaborated on more than 200 items in Ellington's repertory, including such standards as *Take the 'A' train* (1941, Vic.; one of the band's theme tunes) and *Satin Doll* (1953, Cap.). His ballads, including *Lush Life* (on John Coltrane's album *Lush Life*, 1957–8, Prst.), *Passion Flower* (recorded by Johnny Hodges, 1951, Bb), *Chelsea Bridge* (1941, Vic.) and *Blood Count* (on the album '*. . . and his Mother Called him Bill*', 1967, RCA), are harmonically and structurally among the most sophisticated in jazz. Strayhorn was a technically fluent pianist, and made a notable contribution to several small-group recordings by various of Ellington's sidemen; he also recorded a number of titles in a trio with Ellington.

JOSÉ HOSIASSON

Straziante (It.: 'heartrending'; present participle of *straziare*: 'to torture', 'lacerate'). Azucena has this direction at the words 'il figlio mio' in her Act 2 *racconto* in Verdi's *Il trovatore*.

Streatfeild, Richard Alexander (*b* Edenbridge, 22 June 1866; *d* London, 6 Feb 1919). English music critic and musicologist. Educated at Oundle and Pembroke College, Cambridge, he entered the Department of Printed Books in the British Museum in 1889, and served there until his death. Although he never worked in the Music Room, he was encouraged in his research by Barclay Squire. A gifted amateur tenor, he acted as music critic of the *Daily Graphic* from 1898 to 1902 and contributed regularly to English and foreign journals. Though he was keenly interested in the new music of his time, he was also an ardent Handelian, an enthusiasm partly inspired by his friendship with Samuel Butler, whose literary executor he was, editing the posthumous novel *The Way of all Flesh* (1903) and several of his other books. Streatfeild's book on Handel, though old-fashioned in some respects, is a balanced and penetrating study which is still valuable.

ALEC HYATT KING

Street, Tison (*b* Boston, 20 May 1943). American composer and violinist. He studied the piano with Jules Wolfers and the violin with Einar Hansen. His composition teachers at Harvard (BA 1965, MA 1971) included Leon Kirchner and David Del Tredici. He served as composer-in-residence at the Marlboro Festival (1964–6, 1972), where a performance of his String Quartet (1972) won a Naumberg Recording Award. Other awards include the Prix de Rome (1973), a Guggenheim Fellowship (1981) and commissions from the Koussevitzky Foundation (1975), the New York PO (*Bright Sambas*) and the Boston Ballet (*The Jewel Tree*) among others. He has taught at the University of California, Berkeley (1971–2), Harvard University (1979–83), City College, CUNY (1987), and Boston University (1995–). He served as co-leader of the Boston Ballet Orchestra (1992–7) and maintained an active career as a performer in New York and Boston.

Street's early works, in their pervasive yet free use of serialism, are strongly influenced by his teachers at Harvard. The String Quartet (dedicated to Kirchner) employs two whole-tone hexachords (together incorporating all 12 notes of the chromatic scale) and exhibits canonical and palindromic relationships. The prominent use of major 6ths as a unifying device, however, also vaguely implies tonal organization. The String Quintet (1974), dedicated to Del Tredici, is dominated by serially derived chromatic lines and contrapuntal devices. With the Adagio in E♭ (1977), a work that adopts the harmonic vocabulary of late Beethoven or Strauss and briefly quotes Ockeghem's *Missa 'Mi-mi'*, Street's style took a radical turn. The conservative tendencies of the Adagio provoked disapproval from some audience members at its performance by the New York PO during the festival Horizons '83: A New Romanticism. Later works, including *Bright Sambas* (1993), integrate earlier chromatic tendencies with 19th-century influences.

JAMES CHUTE

Street cries. Calls of vendors in streets and open markets, often involving short melodic motifs. The custom of hawking wares led at a very early date to stereotyped phrases, which became a distinctive part of each hawker's formula as a kind of musical trademark. Modern commercial communication has helped to make this colourful practice all but obsolete, but street cries may still occasionally be heard in large cities, for example in London (ex.1).

Ex.1

Historically, the chief repository of street cries has been the QUODLIBET. From the Middle Ages to the 18th century veritable 'catalogues' of vendors' calls frequently appear among its borrowed materials, thus preserving a kind of music that would otherwise have passed into oblivion. The earliest known examples come from 13th-century motets intended for sophisticated private amusement. One such work in the Montpellier Codex, *On parole/A Paris/Frèse nouvele*, underscores two poems in praise of Paris with an ostinato tenor consisting of a Parisian vendor's cry, 'Frèse nouvele! Muere france!' ('Fresh strawberries! Wild blackberries!'). The same cry also appears along with many others in a 14th-century motet, *Je commence ma chanson/Et je seray/Soules vieux (I-IV)*.

Street cries became especially popular in the art music and theatre of the 15th and 16th centuries. In the *Farce de bien mondaine* Virtue enters hawking a basket of honey cakes with a cry ('Obly, obly, obly') that also appears in the chanson *Vous qui parle/E Molinet* (*I-PAVu* Ald.362), and in the *Farce des cris de Paris* the Fool interrupts two gentlemen's conversation on love with the cry 'Eschaudez, tous chautz eschaudez' ('Cakes, really hot cakes'). Another well-known street cry, 'Beurre frais', became the basis for a basse danse (Attaingnant, 1530). Both Janequin (*Voulez ouir les cris de Paris*, 1550) and Jean Servin (*Fricassée des cris de Paris*, 1578) composed pieces made up entirely of street cries, the authenticity of which is proved by their appearance in other quodlibets (*see* FRICASSÉE). One of these cries, 'Rammonez vo cheminées, jeunes femmes, rammonez' ('Sweep your chimneys, young ladies') appears with obscene connotations in the *Farce du rammoneur de cheminées*.

Street cries in Italian music, like the Italian quodlibet in general (*see* INCATENATURA), still need detailed research. A caccia by Nicola Zacharie, *Cacciando per gustar*, quotes a virtuoso series of market cries advertising oil, mustard, vinegar etc., and such cries were also quoted occasionally in 15th-century *canti carnascialeschi*, as in Lorenzo de' Medici's *Canto di uomini che vendono bericuocoli e confortini*. Isaac's music for this 'Song of the Sweetmeat Sellers' is lost, but a fragment survives in *Donna tu pure invecchi*, an *incatenatura* which has a section composed of market cries. Alessandro Striggio's *Il cicalamento delle donne al bucato* (1567[23]) offers yet another sort of musical representation of public speech, in this case the conversations and exclamations of a group of women gathered around a well (and overheard by a man in hiding).

The German quodlibet of the 16th and early 17th centuries made considerable use of street cries. Matthaeus Le Maistre's *Venite ir lieben Gesellin* (1566) includes 'Brüe heiss, kauff', and Nikolaus Zangius's *Ich will zu land ausreiten* (1597) quotes a fishmonger's cry. Two early 17th-century quodlibets by Melchior Franck, *Nun fanget an* and *Kessel, Multer binden*, quote cries such as 'Kauft gute Milch, ihr Weiben', 'Schöne Schmalz, gute Buttermilch' and 'Kauft gute Schleppehäs', and similar calls appear in quodlibets by Paul Rivander (1615), Andreas Rauch (1627) and Jakob Banwart (1652). German quodlibets also include a number of works devoted entirely to market scenes. Franziscus de Rivulo, for example, musically depicted the Danzig market (1558), Zangius the Cologne market (*Ich ging einmal spazieren*, 1603), and Daniel Friderici the market at Rostock (1622). J.E. Kindermann's *Nürnbergische Quodlibet* appeared in 1655, J.C. Horn's description of the

'Knives, combs or inkhorns': etching by Pierce Tempest after Marcellus Lauron the elder from 'The Cryes of the City of London: Drawne after the Life' (London, 1711)

Leipzig market in 1680 and G.J. Werner's *Der wiennerische Tandlmarkt* in 1750.

Thomas Ravenscroft included many street cries arranged as rounds in his *Pammelia* (1609) and *Melismata* (1611), but the most famous English quodlibets are undoubtedly three fantasias for voices and instruments by Thomas Weelkes, Orlando Gibbons and Richard Dering (*c*1600) that incorporate no fewer than 150 London street cries (Dering also composed a *Country Cries* in the same vein). The cries of the London hawkers were the subject of several sets of engravings, notably those issued by Pierce Tempest in 1711 (see illustration) and the well-known set by Francis Wheatley at the end of the 18th century. Some cries that were used by Handel in his opera *Serse* (Act 2 scene i) may be authentic, at least in part.

Strehler, Giorgio (*b* Barcola, Trieste, 14 Aug 1921; *d* Lugano, 25 Dec 1997). Italian director. He studied at the Accademia di Filodrammatici, Milan, and began his career as an actor in 1940. Three years later he directed his first theatre production and in 1947 was a co-founder, with Paolo Grassi, of the Piccolo Teatro in Milan, which soon became the leading Italian art theatre. Strehler's radical productions and rehearsal methods were major influences on contemporary European staging. His style was one of heightened realism, marrying extreme visual beauty of setting to an often intensely physical acting style. Most of his work in opera and music theatre was at La Scala and the Piccola Scala, the experimental studio he helped found in 1955. He began with *La traviata* in 1947, going on to direct the Italian premières of *The Love for Three Oranges*, *Lulu*, *Aufstieg und Fall der Stadt Mahagony* and Mario Peragallo's *La collina*, as well as the première of J.J. Castro's *Proserpina y el extranjero* (1952). In 1956 Strehler restored much of the original power of *Die Dreigroschenoper* by setting it in the 'Little Italy' district of New York at the turn of the century.

Strehler's international opera career began with *Die Entführung aus dem Serail* (1965, Salzburg Festival), a work to which he frequently returned. The production was noted for its *commedia dell'arte* influences and use of silhouettes. His production of *Simon Boccanegra* (1971, La Scala and elsewhere) placed great emphasis on class and political struggles, while his *Macbeth* (1975, La Scala) steered Verdi's work closely along the lines of Shakespeare's tragedy. Also noteworthy were two further Mozart productions, a dark, serious *Die Zauberflöte* (1974, Salzburg) and a *Figaro* (1973, Versailles and elsewhere). In the 1980s Strehler became increasingly occupied with the specially created Théâtre de l'Europe at the Odéon, Paris, though he was active at La Scala and elsewhere. Strehler's reflections on his work, in a series of conversations with the drama critic Ugo Ronfani, were published as *Io, Strehler* (Milan, 1986).

MIKE ASHMAN/R

Streich (Ger.: 'stroke', 'blow'). In compound words, *Streich-* may mean 'string-' as in Streichquartett or Streichensemble. *Streicher* may mean 'the [musical] strings', but the usual term for the string of an instrument is *Saite*; *see* STRING.

Streich normally means bow only in such contexts as 'stroked with a bow' (*Bogen* is more commonly used than *Streichbogen*), e.g. 'die Geigen mit dem Bogen streichen' ('to stroke the violin with the bow'). Types of bowing (or 'bowstrokes') are *Stricharten*. One may say also: 'das Streichen über dem Griffbrett' ('bowing over the fingerboard').

DAVID D. BOYDEN

Streich, Rita (*b* Barnaul, Siberia, 18 Dec 1920; *d* Vienna, 20 March 1987). German soprano. She studied with Domgraf-Fassbänder, Ivogün and Berger, making her début at Aussig (now Ústí nad Labem) in 1943 as Zerbinetta. From 1946 to 1951 she sang at the Berlin Staatsoper in such roles as Zerlina, Blonde, Gilda, Sophie and Olympia. In 1951 she joined the Berlin Städtische Oper, extending her repertory to include the Queen of Night and Konstanze. She was engaged at the Vienna Staatsoper in 1953 and made her London début with that company at the Royal Festival Hall in 1954 as Zerlina and Susanna. She made her American début at San Francisco in 1957 as Sophie and sang Zerbinetta in the first performance there of *Ariadne auf Naxos* and at her Glyndebourne début in 1958. She also appeared at Salzburg, where she created the title role of Erbse's *Julietta* (1959), Aix-en-Provence and Bayreuth, where she sang the Woodbird (1952). Her clear, bright voice and keen musicianship can be heard in recordings of her Mozart roles, Sophie, Zerbinetta (under Karajan) and Aennchen, and also on her many recordings of lieder, to which she devoted the latter years of her career.

HAROLD ROSENTHAL/ALAN BLYTH

Streichbogen (Ger.). *See* BOW.

Streicher. Austrian firm of piano makers. It was founded in 1802 when the daughter of JOHANN ANDREAS STEIN, Nannette (Maria Anna) Stein Streicher (*b* Augsburg, 2 Jan 1769; *d* Vienna, 16 Jan 1833), began building pianos independently from her brother Matthäus Andreas Stein. Stein's children had carried on their father's firm after his death and moved the firm from Augsburg to Vienna after Nannette's marriage to the pianist, composer and teacher Johann Andreas Streicher (*b* Stuttgart, 13 Dec 1761; *d* Vienna, 25 May 1833) in 1794. Nannette, also a fine pianist, had learnt piano making from her father, and up to 1810 her piano actions were similar to his, being without back checks (*see* PIANOFORTE, §I, 3 and §I, 5). Her business – 'Nannette Streicher née Stein' – flourished, and her husband, a professor of music at Vienna, gave up his job to join her. Weber (in a letter to Johann Gänsbacher, 1813) was far more impressed by the pianos of Streicher and Brodmann than by those of Schanz, Walter, Wachtl and others, and Streicher became the most eminent firm in Vienna. It is thought that Nannette

did the final voicing and regulating throughout her life. Beethoven was friendly with the couple and apparently advised on some aspects of manufacture. Surviving grands are beautifully veneered and usually have four pedals: una corda, bassoon (a yellow silk-padded rail pressed against the strings), pianissimo (a felt inserted between the hammers and strings) and a damper pedal. In 1823 the firm became 'Nannette Streicher geb. Stein und Sohn' when Johann Baptist Streicher (*b* Vienna, 3 Jan 1796; *d* Vienna, 28 March 1871) became a partner. The Viennese action was perfected by the firm, although it built Anglo-German and English actions in increasing numbers as the popularity of the Viennese action waned after the mid-century. In 1825 the firm made a successful down-striking piano action for Hummel, in which the hammer is returned by a spring. J.B. Streicher assumed complete control of the firm after his parents' death, and his son Emil Streicher (*b* Vienna, 24 April 1836; *d* Vienna, 9 Jan 1916) became a partner in 1857 and managed the business for a while after his father's death. The company gave a grand (no.6713), built in 1868, straight strung and with a Viennese action, to Brahms, which he used as his studio instrument until his death. When Emil retired in 1896 the firm ceased. The composer THEODOR STREICHER (1874–1940) was a great-grandson of Johann Andreas Streicher.

MARGARET CRANMER

Streicher, Ludwig (*b* Vienna, 26 June 1920). Austrian double bass player and teacher. Having first studied the violin, Streicher enrolled at the age of 14 as a double bass student at the Vienna Music Academy (now the Hochschule für Musik). His first appointment was as principal cellist at the State Theatre in Kraków. War prevented him taking up a post with the Berlin PO, and he returned to Vienna in 1945, where he joined the Vienna PO and Staatsoper Orchestra, playing co-principal from 1954 to 1973. In 1966 he took up a teaching post at the city's Music Academy, becoming a professor there in 1973. An impressive recording of music by Bottesini, Sperger and Dragonetti launched Streicher's international solo career in 1966. Concertos and other works have been dedicated to him by Fritz Leitermeyer, Gottfried von Einem, Marcel Rubin, Erich Urbanner, Paul Angerer and others, and he has prepared editions of many works for double bass. He has developed his own bow hold that facilitates a particularly rich tone production. He plays a Viennese bass by Gabriel Lemböck of 1842.

RODNEY SLATFORD

Streicher, Theodor (*b* Vienna, 7 June 1874; *d* Wetzelsdorf, nr Graz, 28 May 1940). Austrian composer, son of Emil STREICHER. From 1895 to 1900 he studied counterpoint and composition with Heinrich Schulz-Beuthen, singing with Ferdinand Jäger and the piano and instrumentation with Ferdinand Löwe . His first published works attracted little attention, but his *30 Lieder aus Des Knaben Wunderhorn* (1903) caused him to be acclaimed in some German-speaking quarters as the successor to Wolf. However, his prominence in Austria lasted for only a few years, and after about 1920 his music was seldom performed. His second wife was Edith Thorndike, some of whose poems he set.

WORKS
(*selective list*)

Choral: Mignons Exequien (J.W. von Goethe), chorus, children's chorus, orch (1907), Wandrers Nachtlied (Goethe), male chorus (1908); Szenen und Bilder aus Goethes Faust (1911)
Songs: 30 Lieder aus Des Knaben Wunderhorn (1903); 20 Lieder, 4 Sprüche und Gedichte von Richard Dehmel (1903), pubd together as 24 Lieder (1909); 6 Lieder aus Des Knaben Wunderhorn (1904); 4 Kriegs- und Soldatenlieder (1904); Hafis-Lieder (trans. G.F. Daumer), i–vi (1907–8), Lieder nach Gedichten von Edith Thorndike (1916–19); 12 Lieder (Michelangelo), i–iii (1922); Schaukal-Lieder, i–iii (1929–31); *c*100 others unpubd
Chbr: Str Sextet (1912)

Principal publishers: Breitkopf & Härtel, Recital

RICHARD B. WURSTEN

Streichharmonium (Ger.). *See* SOSTENENTE PIANO, §1.

Streichquartett (Ger.). *See* STRING QUARTET.

Streisand, Barbra (Joan) (*b* Brooklyn, New York, 24 April 1942). American popular singer. Her career began in New York City night clubs in the 1960s. Her dramatic style and appealing voice brought engagements on local television and a role in the 1962 Broadway show *I Can Get It for You Wholesale*. Her appearances on the Ed Sullivan and Judy Garland television shows and in Las Vegas attracted a national audience. In 1964 and 1965 Streisand starred as Fanny Brice in *Funny Girl* on Broadway, a role that established her as a formidable singer, actress and comedian. Her first album, *The Barbra Streisand Album*, won a Grammy award, and her first television special, 'My Name Is Barbra', garnered several Emmy awards. In 1969 Streisand received an Academy Award as Best Actress for her first film, a version of *Funny Girl* (1968). Under the guidance of her manager, Martin Erlichman, Streisand secured additional artistic control over her films, recordings and television specials. In 1983 she embarked on a very personal project, the musical film *Yentl* that she co-wrote, produced and directed, and in which she starred. Her growing interest in film work and her self-professed fear of performing in concert caused her to retreat to the security of the recording studio. Nevertheless, more than 50 successful albums confirm her stature in popular music; many are certified gold or platinum in sales. Her efforts as a composer and lyricist have been of secondary importance, but her song *Evergreen*, with lyrics by Paul Williams, became a classic.

Individuality distinguishes Streisand's style and repertory. Her most successful recordings are ballads, although text characterizations, stemming from her experience as an actress, play an important role in her approach. Streisand's technique of the 1960s reflects a jazz influence

(*Simply Streisand*, 1967); her later albums include soul and gospel inflections (*Live Concert at the Forum*, 1972). She explored soft rock and classical music in the 1970s, but her reputation is based on show tunes, film theme songs, classic pop standards, and adult contemporary pop (*The Way We Were*, *Lazy Afternoon*, *Guilty*, and duets with partners ranging from Donna Summer to Michael Crawford). *The Broadway Album* (1985), her multi-disc retrospective *Just for the Record* (1991), and her acclaimed return to concert stages in 1994 (*Barbra: the Concert*) highlight the later stage of her musical career. Streisand continually uses music to advance social concerns and to offer autobiographical information. Her critics usually cite her selection of material too weak to withstand her overt dramaticism.

Streisand's phrasing is unique; she typically phrases text in places other than at a punctuation point or musical phrase. Her control of dynamics, precise diction, diverse timbral palette and refined microphone technique are also noteworthy. She excels in subtle melodic decoration, and her temporal manoeuvering between metrical units defies transcription. The clarity of her vocal technique and her personalized song interpretations have created a model in popular song.

LINDA POHLY

Streit (Ger.: 'contest'). A term used in Konrad von Würzburg's second *Leich* to describe its form. *See* LAI, §1(i).

Streit, Kurt (Martin) (*b* Itazuke, Japan, 14 Oct 1959). American tenor. After studying with Marilyn Tyler at the University of New Mexico (1980–84), he made his first European appearance at Hamburg in 1987; the relationship with the Hamburg company (1987–91) brought him, *inter alia*, leading roles in a Gluck double bill, *Le cinesi* and *Echo et Narcisse*, which was recorded at Schwetzingen. But it is as a Mozart tenor – light, gentle and romantic of tone, capable of proud utterance – that he swiftly rose to international prominence. He made his Glyndebourne début as Belmonte in 1988, and has been heard and seen to particular advantage as Tamino, a role that has taken him to many of the world's leading stages. Among his other roles are Ramiro (*La Cenerentola*), Ernesto (*Don Pasquale*), Strauss's Flamand and Britten's Lysander and Quint. Streit's recordings include *Die Entführung*, two sets of *Così fan tutte* (under Barenboim and Rattle respectively), *Die Zauberflöte* and *The Yeoman of the Guard*.

MAX LOPPERT

Streitwolf, (Johann Heinrich) Gottlieb (*b* Göttingen, 17 Nov 1779; *d* Göttingen, 14 Feb 1837). German woodwind instrument maker. The illegitimate son of 'Johann Niclas', his mother later married a Streitwolf. He began his musical career as an amateur cellist, and taught and published works for flute, cello, guitar and voice. He also studied theory with Forkel. He began making flutes in 1809, then clarinets, and thus began to establish his reputation as a maker. By 1820 he was employing several assistants and had a close association with the nearby court of Schwarzburg-Sondershausen, where the eminent clarinettist Simon Hermstedt, for whom Spohr wrote his concertos, was bandmaster. From then on Streitwolf began to create experimental models of instruments. His 'chromatisches Basshorn' was an improved ten-key version of the 'english basshorn', then the standard bass brass instrument of the wind band. His bass clarinet in C (1828) extended downwards to written B♭ and was constructed in the shape of a bassoon (which instrument it was intended to replace); it was subsequently awarded a medal by the Hanover 'Gewerbe-Verein' ('trade association') in 1835.

Streitwolf went on to build many innovative woodwind instruments, including a flute with downward range extended to *b*, an english horn with a five-note bass extension, a metal E♭ clarinet with double wall, and a 19-key *Kontrabassklarinette* in the shape of a basset-horn but sounding an octave lower. He built a clarinet with mouthpiece in massive silver, screw-adjustable barrel and a rectangular resonance-hole in the bell, and a bassoon with a unique coil-shaped U-bend in wood on which two keys are mounted. His many other inventions include the 'Durchstechhebel' (pierced-through push-rod) used on the bass clarinet, which was later adapted for the bassoon by Heckel, and an eye at the edge of the key-touch for a string-coupling to another key-lever. For the english horn and bass clarinet he designed an ingenious folding strut device to distance the instrument from the player's body. After Streitwolf's death his younger son Friedrich (1814–92) took over the workshop, but was not as gifted as his father; he appears to have ceased woodwind making after 1861. (*Waterhouse-LangwillI*)

WILLIAM WATERHOUSE

Strene. A square black note with a descending (occasionally ascending) stem on either side. The name and description occur in the 14th-century *Chorister's Lament* (see F. Utley, *Speculum*, xxi, 1946, pp.194–202, esp. 197) and in the preface to Marbeck's *The Booke of Common Praier Noted* (London, 1550). A strene has twice the value of a black breve (i.e. the same note shape without tails). Polyphony notated in only black breves and strenes is found in late 15th- and early to mid-16th-century English sources (e.g. *GB-Lbl* 5665, 17001, 17802–5, Roy.App.58).

PETER WRIGHT

Strenger Satz (Ger.). *See* STRICT COUNTERPOINT.

Strengthfeild, Thomas (*fl* 1657). English composer. His only surviving music is a group of harpsichord suites found in the Elizabeth Rogers Virginal Book (*GB-Lbl* Add.10337; ed. in CEKM, xix (1971)), which is dated 27 February 1656/7. This probably indicates that he was a harpsichord teacher during the Commonwealth, and that Elizabeth Rogers may have been one of his pupils. The style of his short dance movements, one of which has

varied repeats, is typical of much of the keyboard music written in England at the time.

B.A.R. COOPER

Strepitoso (It.: 'noisy', 'loud'). A direction to perform forcefully, found particularly as a qualification to a tempo mark, and somehow including the idea of 'tumbling down'. Liszt's *Tasso* (1849) opens *allegro strepitoso*; Elgar often used it as an expression mark; and the word appears on bravura passages in the virtuoso piano repertory as well as on joyful or confused headlong orchestral tutti passages in the later 19th century. It also appears earlier: the overture to J.-B. Lemoyne's opera *Les prétendus* (1789) is marked *allegro con molto strepito*.

See also TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Strepponi, Giuseppina [Clelia Maria Josepha] (*b* Lodi, 8 Sept 1815; *d* Sant'Agata, nr Busseto, 14 Nov 1897). Italian soprano, second wife of GIUSEPPE VERDI. She was the eldest daughter of Feliciano Strepponi (1797–1832), organist of Monza Cathedral and composer of several operas, of which *Ullà di Bassora* enjoyed some success at La Scala in 1831. She studied the piano and singing at the Milan Conservatory, winning the first prize for bel canto in her final year. She made her début at Adria in Luigi Ricci's *Chiara di Rosembergh* in December 1834; her first triumph was in Rossini's *Matilde di Shabran* in Trieste in spring 1835. In the same year she appeared in Vienna as Adalgisa in *Norma* and as the heroine of *La sonnambula*, which became one of her most famous roles. She often appeared with the tenor Napoleone Moriani and the baritone Giorgio Ronconi. She was now the breadwinner of her family: her unremitting activity, combined with liaisons which resulted in three illegitimate children, considerably shortened her career. During the late 1830s, however, she aroused fanatical enthusiasm; Donizetti wrote his *Adelia* (1841, Rome) for her.

Strepponi made her début at La Scala in 1839. In 1842 she created the role of Abigaille (*Nabucco*), but by then her powers were in decline. Apart from a disastrous season in Palermo in 1845, she thereafter appeared only sporadically (mostly in operas by Verdi) until her retirement in February 1846. In October that year she moved to Paris as a singing teacher. Verdi joined her there the following summer; from then on her history is that of his life-partner, though they were not legally married until 1859. Strepponi was described as having a 'limpid, penetrating, smooth voice, seemly action, a lovely figure; and to Nature's liberal endowments she adds an excellent technique'; her 'deep inner feeling' was also praised. She interpreted Donizetti's Lucia, Bianca in Mercadante's *Il giuramento* and most of Bellini's heroines especially well. She was equally at home in comedy, as Adina in *L'elisir d'amore* and Sandrina in Luigi Ricci's *Un'avventura di Scaramuccia*. Yet the most famous of all the roles she created, Verdi's Abigaille, was probably the one least suited to her vocal means. Although she was highly talented, she never sang outside Italy after 1835.

JULIAN BUDDEN

Stretto (i) (It.: 'narrow', 'tight'; past participle of *stringere*: 'to tighten', 'to compress'). In FUGUE, the procedure of beginning a second statement of the subject before the preceding statement has finished, so that the two overlap (in German the technique is known as *Engführung*). The value of this technique for fugal composition has been recognized since the mid-17th century, when musicians including G.M. Bononcini and Reincken began to advocate its use near the end of a piece as a means of increasing excitement and intensity and thus leading the piece towards a suitable close. Reincken noted further that the composer should feel free to take greater liberties with the subject when composing stretto entries. The FUGUE D'ÉCOLE prescribes stretto as a necessary component, but outside that context the technique is by no means always present in a fugue. A well-known example in which stretto plays a prominent role is the C major Fugue from book 1 of the '48' (ex.1). Sometimes a composer will create what may be called a 'false stretto' by abandoning the first thematic statement after the second statement has begun. This procedure makes the compositional task much easier and can be at the same time of little concern to the listener, who, after hearing the first few notes, tends to supply the rest of the subject mentally. Although most teaching of

Ex.1 J. S. Bach: Das Wohltemperirte Clavier, book 1, fugue 1

fugue recommends that thematic statements not be overlapped in the exposition, this technique, which produces what is sometimes referred to as a 'stretto exposition', is occasionally found. A famous example occurs in the 'Gratias agimus tibi' (and 'Dona nobis pacem') chorus from Bach's B minor Mass, originally the opening chorus of his Cantata no.29.

PAUL WALKER

Stretto (ii) [stretta] (It.). The term is sometimes used, interchangeably with 'stretta', to indicate a faster tempo at the climactic concluding section of a piece; such sections are often headed 'stretto' or 'stretta'. Frescobaldi used the term 'stretto' in the preface to his 1615 volume of toccatas and partitas, and in the same year G.M. Trabaci marked a piece in his *Secondo libro de ricercate* 'verso secundo in battuta stretta'. Brossard (*Dictionaire de musique*, 1703) wrote: '*Stretto* means *serré*, tight, and is very often placed to indicate that one should make the beats tight or short and consequently very fast. So it is the opposite of or contrary to *largo*'. He also implied (article 'Tripla') that 'stretto' was equivalent to *presto*. The use of stretto (in this context the form 'stretta' is usually preferred) is common in Italian opera: examples are the closing section of the Act 2 finale to Mozart's *Le nozze di Figaro* and Violetta's Act 1 aria in Verdi's *La traviata*. The faster closing section of the finale of Beethoven's Fifth Symphony has been referred to as a stretto. Sometimes 'stretto' seems by extension to mean simply a climactic effect, as in the finale of Bartók's Fifth String Quartet, where the tempo of the stretto at bar 781, minim = 150, is actually slower than that of the preceding section, minim = 168. *See also* STRINGENDO.

ROGER BULLIVANT

Stretton, Thomas (*fl* 1530–?1552). English musician. He instructed the children who took part in the Drapers' midsummer pageants of 1541, and may be the 'Streton' who was a clerk at All Hallows, Lombard Street, London, in 1552. A quodlibet by him, *Behold and see how byrds dothe fly*, has been added in manuscript in the British Library copy of the bassus partbook of *XX Songes*, 1530.

BIBLIOGRAPHY

H. Baillie: 'Some Biographical Notes on English Church Musicians, Chiefly Working in London (1485–1569)', *RMARC*, no.2 (1962), 18–57, esp. 53

DAVID GREER

Stricciate (It., from *strecciate*: 'divide', 'untwist'). A direction placed by Vivaldi (*rv* 163) above a group of unslurred repeated demisemiquavers in *allegro* where he wanted 'divided' notes – presumably rapidly played in a measured tremolo (*see* BOW, §II, 2(vi). (In the same work, Vivaldi twice uses the direction *battute* for slower repeated notes.) The effect resembles STILE CONCITATO.

PETER WALLS

Striccius, Wolfgang (*b* Wunstorf, nr Hanover, *c*1555–60; *d* ?Pattensen, nr Hanover, *c*1615). German composer, schoolmaster and public official. The first mention of him in an official position is as Kantor at the district school at Laibach (now Ljubljana) in 1591 or 1592. He had earlier worked as a private tutor to various Austrian professional families, for example at Krems and Emmersdorf. In 1593 at least, he revisited his native Lower Saxony: he had one of his works printed at Uelzen in that year and in the dedication to it, signed from there, he described himself as a notary. He finally returned to Lower Saxony probably in 1596, as a consequence of the Counter-Reformation, which was then becoming more firmly established in Slovenia. He became town clerk and notary at Pattensen and seems also to have worked as a schoolmaster. He had evidently had a good education and must at least have attended a grammar school, for only this could explain his versatility in working as Kantor, schoolmaster, tutor, notary and composer. He may have been a pupil of Andreas Crappius at Hanover, since he dedicated his publication of 1593 to, among others, Crappius and the other teachers at the grammar school at Hanover. He seems to have confined himself almost entirely to the composition of polyphonic songs for small forces, publishing three collections: *Neue teutsche Lieder mit vier Stimmen, mehrer thails ad pares voces* (Nuremberg, 1588); *Das erste Theil newer teutscher Gesenge zu fünff und vier Stimmen* (Uelzen, 1593); and *Neue teutsche Gesenge zu drei Stimmen* (Helmstedt, 1600; lost). The designation of the 1588 book as 'mostly for equal voices' indicates that he wrote at least some of his music for educational purposes. He also produced sociable and humorous songs (some excerpts given as examples in Moser). There is a six-part motet by him in manuscript (*A-Wgm*).

WALTER BLANKENBURG

Strich (Ger.: 'stroke', 'line'). In bowing, *Aufstrich* is up-bow, *Niederstrich* or *Abstrich* is down-bow. But a *Taktstrich* is a bar-line. The *Mensurstrich*, a line drawn between and not through the staves, has been used in many modern editions of medieval and Renaissance music, beginning with those made by Heinrich Besseler in the 1920s; it was invented to minimize interruptions to the rhythmic flow and to avoid ties for syncopated notes. Most editors prefer to use ordinary bar-lines, but the *Mensurstrich* continues to find favour with some. Medieval manuscrsipts written in modal notation sometimes include vertical strokes to call the singer's attention to a change of syllable in the text; these are called *Silbenstriche*. (See F. Ludwig: *Repertorium organorum recentioris et motetorum vetustissimi stili*, i, Halle, 1910, p.49.) *Strich*, in the context of 'Punkt und Strich' ('dot and dash'), refers to the DASH used as an articulation mark or accent in music notation.

See also STREICH and STACCATO.

HOWARD MAYER BROWN/R

Stricker, Augustin Reinhard (*d* after 1720). German composer and singer. In 1702 he joined the Hofkapelle at Berlin as a tenor and violinist. In December 1706 he collaborated with Gottfried Finger and J.B. Volumier on an opera, *Der Sieg der Schönheit über die Helden* (text by J. von Besser), to celebrate the marriage of Crown Prince Friedrich Wilhelm, singing himself the part of Neptune. Two years later he set another opera, *Alexander und Roxanens Heirat* (text again by Besser), on the occasion of the king's third marriage, but Stricker himself never rose above the rank of a simple *Cammermusicant*. He was, however, engaged as Kapellmeister at Cöthen, where he was J.S. Bach's predecessor from 1714 to 1717. In autumn 1717 he went to Neuburg an der Donau to serve, like Finger, the Elector Palatine Carl Philipp. There he wrote parts of two operas, *Crudeltà consuma amore* in 1717 (overture by Finger, Acts 1 and 3 by J. Greber, Act 2 by Stricker) and *L'amicizia in terzo, overo Il Dionigio* in 1718 (overture and ballet music by Finger, Act 1 by a 'Cavaliere Messa', Act 2 by Stricker, Act 3 by J.D. Heinichen). It is not known whether Stricker moved with the court to the new residential seats at Heidelberg in 1718 or Mannheim in 1720; he probably died before 1723. His operatic music and one oratorio are lost; he published six Italian solo cantatas, op.1 (Cöthen, 1715). Several manuscripts of chamber music are extant in Dresden, Herdringen and Rostock. Stricker was a dedicatee of Mattheson's *Das beschützte Orchestre* (1717).

DOROTHEA SCHRÖDER

Strickland [Anderson], **Lily (Theresa)** (*b* Anderson, SC, 28 Jan 1887; *d* Hendersonville, NC, 6 June 1958). American composer. She attended Converse College (1901–4), and in 1905 was offered a scholarship by Frank Damrosch to study at the Institute of Musical Art in New York where her teachers were Albert Mildenberg, William Henry Humiston, Daniel Gregory Mason and Percy Goetschius. She also studied privately with Alfred John Goodrich. Between 1920 and 1929 Strickland lived in India during which time she became fascinated with non-Western music and wrote a number of articles comparing Indian with European idioms.

Some of Strickland's early pieces was influenced by the black music she used to hear on her grandparents' estate. After 1910 she was drawn to Native American music and incorporated some of its melodies in such pieces as *Two Shawnee Indian Dances* (1919) and the operetta *Laughing Star of Zuni* (1946). Her sojourn in India influenced many of her works composed after 1930, notably *The Cosmic Dance of Siva* (1933) and *Oriental and Character Dances*. Strickland composed approximately 400 pieces; in addition to many songs and piano pieces she wrote several operettas, including *Jewel of the Desert* (1933) and a sacred cantata *St John the Beloved* (1930). Her works are cast in a conservative harmonic idiom; many are salon pieces influenced by the works of Charles Cadman and Arthur Farwell.

JOHN GRAZIANO

Strict counterpoint (Fr. *contrepoint sévère*; Ger. *strenger Satz*; It. *contrappunto rigoroso*). Contrasted with free counterpoint, this is a discipline that demands the rigorous application of the principles of consonance and dissonance, as well as of part-writing in general, in the fitting of a polyphonic part or parts to a given melodic line. The given line is called a cantus firmus, and the parts fitted to it are usually referred to as the 'solution'. Among the various branches of this discipline, INVERTIBLE COUNTERPOINT (which involves the interchange of melodic and bass functions between parts) and SPECIES COUNTERPOINT (which teaches the art of counterpoint as a progression from making simple note-against-note settings to composing florid melodic lines to the cantus firmus) have been particularly important in the study of composition.

See also COUNTERPOINT.

□

Stride. A solo jazz piano style that arose after 1910, and especially in the 1920s, in Harlem, New York, and hence sometimes takes the name 'Harlem school'. It is largely derived from ragtime, adapting ragtime's left-hand patterns to form the distinctive 'stride bass' (ex.1). Such

patterns were often varied, however, and in the best performances led to spontaneous and inventive cross-rhythms, polymetres and surprising harmonic effects. The bass represents only one of the increased virtuoso demands of the stride style, which in general called for fast tempos, full use of the piano's range and a wide array of pianistic devices, some from the classical repertory in which many of the Harlem pianists (notably James P. Johnson and Fats Waller) were trained. The style was practised most widely at social gatherings, particularly at Harlem's informal 'rent parties'. Johnson, Waller and Willie 'The Lion' Smith were much recorded, though other leading stride pianists like Luckey Roberts are less well represented on disc, and the apparently influential Abba Labba (Richard McLean) made no recordings. The style exercised great influence on subsequent jazz pianism, Duke Ellington, Art Tatum and Thelonious Monk freely expressing their debt to it. With the resurgence of historical jazz styles in the 1970s, stride piano has once again become commercially viable, attracting a number of highly accomplished specialist performers and an appreciative international audience.

J. BRADFORD ROBINSON

Striegler, Kurt (*b* Dresden, 7 Jan 1886; *d* Wildthurn, nr Landau, 4 Aug 1958). German conductor and composer. He attended the choir school of the Catholic Hofkirche in Dresden from 1896 to 1900, and from 1900 to 1905 he

studied composition with Draeseke and conducting with Kutzschbach at the Dresden Conservatory. In 1905 he was engaged as a solo répétiteur at the Dresden Staatsoper with which he remained associated for 50 years, first as Kapellmeister from 1913, and later deputy director of the opera and Kapellmeister of the state of Saxony. He also taught at the Dresden Conservatory (1905–45), was its artistic director (1933–6) and was artistic director of the opera school (1936–45). In 1950 Striegler moved to Munich, though he remained permanent guest conductor of the Dresden Staatsoper and was made an honorary member in 1955. He worked as a freelance conductor for Bavarian radio in Munich, and was engaged by the Bayreuth Festival in 1951. Striegler composed operas, orchestral and chamber works, as well as songs, choral and organ compositions. Stylistically his music remained rooted in the late Romantic tradition of Strauss and Pfitzner and enjoyed rather limited exposure even in his native Dresden. He is probably best remembered nowadays in a rather negative light, as a result of his steadfast refusal to lend support to his conducting colleague Fritz Busch when Busch was under fire from the Nazis during the first months of the Third Reich.

WORKS
(*selective list*)

Operas: Der Thomaskantor (op, 3, F.A. Geissler), op.37, concert perf., Bautzen, Stadt, 1928; Hand und Herz (2, L. Anzengruber), op.43, Dresden, Staatsoper, 1923; Dagmar (3, R. Bosshart, after T. Storm), op.67, Dresden, Staatsoper, 1927; Die Schmiede (3, W. Staegemann), op.70, Hanover, Städtische Bühnen, 1933; Der Spielmann (Märchenoper, 3, P. Neuhaus), op.85, Coburg, 1949

Choral: Requiem, 4 solo vv, chorus, orch, 1956; Kleine Passion, Bar, chorus, 1958; many shorter works and songs

Syms.: a, 1909; b, 1912; c♯, 1924; c, 1927

Other orch: Ballade, pf, orch, 1906; Vn Conc., 1912; Vc Conc., 1926; Rondo concertante, db, orch, 1958

ECKART SCHWINGER/ERIK LEVI

Striggio [Strigi, Strigia], **Alessandro (i)** (*b* Mantua, *c*1536–7; *d* Mantua, 29 Feb 1592). Italian composer and instrumentalist. He was one of the leading composers of madrigals and stage music in the second half of the 16th century, and a virtuoso performer.

1. LIFE. Born into a prominent Mantuan aristocratic family, Striggio was the illegitimate son of a celebrated soldier; as the only son he was made heir in 1547. The title-pages of his publications refer to him as 'gentilhuomo mantovano', and he evidently enjoyed a social position of some importance since, in 1567, Cosimo I de' Medici, Duke of Florence, sent him as an emissary to the English court for 15 days; during this journey, which also took him to Vienna, Munich and Paris, he broadened his musical experience (as his letters from this period reveal). Later he was created a marquis and was described at his death as 'gran cancelliere' ('head chancellor') of the Gonzaga court at Mantua. He married Virginia Vagnoli of Siena, daughter of a Sienese nobleman and since at least 1567 the recipient of a high salary from Guidobaldo della Rovere, Duke of Urbino; she was admired by contemporaries as a singer and lutenist. They married in secret on about 20 June 1571 in Rimini; this followed her dismissal from the Pesarese Court. The couple had several children, including ALESSANDRO STRIGGIO (ii). The setting of *Amor l'arco* ascribed to 'Sandrino' (an italianized form of Sandrin) in the 1557 edition of Rore's *Quarto libro de madrigali a cinque voci* is probably by Striggio; if so, it was his earliest published work.

Although little is known about Striggio's early life and musical formation, his father's social standing presumably gave him access to musical circles at the Gonzaga court. On 1 March 1559 he entered the service of Cosimo I de' Medici, Duke of Florence, at a comparatively high salary; this may reflect his reputation as a virtuoso on a variety of instruments including the viol and lute, and the *lira da braccio* and its larger relation the *lirone*. During the 1560s Striggio established himself as the principal composer at the Medici court in Florence, effectively ousting Francesco Corteccia as the musician primarily responsible for impressive state occasions, an integral part of court life during Cosimo's later years. The celebrations for the marriage on 25 December 1565 of Joanna of Austria and Cosimo's heir Francesco de' Medici included a performance of d'Ambra's comedy *La cofanaria* with *intermedi* by G.B. Cini; Striggio composed the music for the first, second and fifth *intermedi*, the other three being set by Corteccia. When the first child of this marriage was baptized in S Giovanni in 1568, Striggio provided music for the subsequent celebration; he collaborated with Corteccia and Stefano Rossetto on the *Mascherata di cacciatori*, and composed all six *intermedi* for the performance of L. del Mazzo's comedy *I Fabii*. When the Archduke Karl of Austria visited Florence in 1569, Striggio composed music for the traditional *Mascherata delle bufole* given on 5 May, and for the five *intermedi* presented with G.B. Cini's *La vedova*. Meanwhile, his reputation had evidently travelled beyond the Alps, since a motet for 40 parts was sung at, and presumably commissioned for, the marriage of Duke Albrecht IV of Bavaria in 1568. Striggio's occasional works for the Medici continued with the massive 12-voice *Altr'io che queste spighe*, written for Cosimo I's coronation as Grand Duke of Tuscany in Rome on 5 March 1570.

Little is known of Striggio's activities during the 1570s; although there is a gap in the payment records of the Medici court after 1571, there is no reason to believe that Striggio left Medici service. The cultivation of music at the Medici court declined during Cosimo's last years and under the new Grand Duke Francesco until his marriage to Bianca Cappello in 1579. Letters from the Bavarian court suggest that Striggio's contacts with Munich became closer; in 1574 he made another journey north of the Alps, visiting Austria and Bavaria. It was probably during this period that he became acquainted with Vincenzo Galilei who settled at Florence in 1572; the only source for Striggio's *Fuggi speme mia*, performed during one of the *intermedi* for *La cofanaria* in 1565, is the second edition of Galilei's treatise *Il Fronimo* (1584). In 1577 he took part in the celebrations for the wedding of Pellegrina Cappello and Ulisse Bentivoglio; and for the wedding of the grand duke to Bianca Cappello in 1579 he composed music both for the elaborate entertainment presented in the courtyard of the Palazzo Pitti, and for the anthology

Trionfo di musica di diversi (1579[3]), edited by Massaino and produced in honour of the bride. In the same year he is recorded as *cavaliere*, together with Giulio Caccini and Antonio Pace (i) who were also employed at the Medici court.

In July 1584 Striggio was invited by Alfonso II d'Este to stay at Ferrara for 15 days. According to one of Striggio's letters, the purpose of the visit was to hear the duke's *concerto di donne*, but it is also clear from his correspondence with the Grand Duke Francesco de' Medici at Florence that the latter had commissioned Striggio to set some madrigals in the Ferrarese style – a piece of artistic piracy presumably unknown to Alfonso. Throughout the second half of 1584 and the early months of 1585 Striggio continued to compose music for the Florentine *concerto* on texts sent from Florence. None of the works mentioned in the correspondence survives. Striggio was certainly a frequent visitor to the Este court; both Giustiniani and Tasso mentioned him in connection with Ferrara. In April 1587 he returned to Mantua where he essentially remained until his death. He did not, however, sever his ties with the Medici completely, and in 1586 he composed the first, second and fifth *intermedi* of the six performed with Count Bardi di Vernio's comedy *L'amico fido* during the celebrations for the marriage of Cesare d'Este and Virginia de' Medici in Florence. This seems to have been his last work for a state occasion; he composed no music for the marriage of Christine of Lorraine and Grand Duke Ferdinand I in 1589, although he took part in the celebrations as a performer, as did 'Striggino', probably his son. After Striggio's death from fever at the age of 55, three books of his madrigals were collected and published by Alessandro Striggio (ii), though some of these had already appeared in anthologies. On a memorial plaque in the church of S Maria della Carità, Mantua (dated 1614), Striggio's son described him as *commensali* (table companion) of the duke, Guglielmo Gonzaga.

Striggio's contemporary reputation as a performer seems to have been considerable. Bartoli praised him for his skill on the 'viola' (probably the *lirone*) which 'he plays ... in four voices at one time with such elegance and fullness of tone that he amazes the listeners'. According to the theorist Gerolamo Cardano, Striggio's 'lira' (*lirone*) had 18 strings, and was 'as tall and thick as a man and somewhat wider', while the tuning 'exceeds the range of any man-made instrument and extends higher than any human note'. It was clearly something of a novelty in Florence, and seems to have been first used there around 1560, to accompany singing for the services of the Compagnia dell' Arcangelo Raffaello; Striggio was one of its foremost practitioners. In the 1589 *intermedi* Striggio played not only the *lirone* but also the 'sopranino di viola', probably the descant viol.

2. WORKS. Criticism of Striggio's secular music has concentrated on its conservative aspects, although, as Pirrotta remarked, evaluations based on his comparatively sparse use of dissonance and chromaticism ignore the expressive qualities of his rich melodic and contrapuntal invention. In the music for *intermedi*, the careful fusion of homophony and counterpoint and an adroit handling of textures and spatially separated choirs show his surprisingly flexible approach to an often perfunctory genre. The pieces for larger forces have open textures, frequent antiphonal effects and changes in timbre, while the more modest pieces make greater use of short imitative motifs and other contrapuntal devices. Rhythms are usually incisive and lively and there is often a foretaste of the declamatory style, an important element in Wert's later works. Striggio's music for *intermedi* seems to have been influenced by Rore's early five-voice madrigals, particularly in their use of counterpoint and rhythm.

After the theatre music, *Il cicalamento delle donne al bucato* has received the most critical attention, notably because of the widely held 19th-century opinion that it was a forerunner of opera (see illustration). Apart from the historical *non sequitur* involved, this judgment overemphasizes the novelty of the work, which is clearly related to Ruffo's canzoni and Janequin's chansons but nevertheless influenced the madrigalesque entertainments of Orazio Vecchi and Banchieri. Of the last three books of madrigals only *Il quarto libro* survives complete; these pieces show that Striggio flirted with more modern techniques in his later madrigals. Contemporary commentators associated him with progressive circles at Ferrara rather than Florence, and his own letters (in *I-Fas*; ed. in Butchart, 1990) contain references to pieces in the Ferrarese virtuoso style, probably for two or three voices and basso continuo in the manner of Luzzaschi's *Madrigali ... a uno, e doi, e tre soprani* (1601). There is even evidence that he toyed with monody, since the index to a manuscript collection (*I-Fn* Magl.XIX.66) generally thought to have been written after 1590, ascribes to him *Se più del canto mio l'orribil fiato* for solo voice and basso continuo; although this is one of the pieces partially missing from the collection, it survives in another manuscript (*B-Bc* 704). Einstein's suggestion (*VogelB/E*, suppl., 703) that the anonymous four-voice *Villotte*

Title-page of Striggio's 'Il cicalamento delle donne al bucato' (Venice: Scotto, 1567)

mantovane (Venice, 1583) is by Striggio remains unsupported and is incompatible with the composer's interest in progressive styles at that time.

Striggio seems to have composed little sacred music. The 40-part motet *Ecce beatam lucem*, for four choirs (of eight, ten, sixteen and six voices) and organ continuo may have been the 40-part motet performed in 1568, although the only surviving manuscript copies are dated 1587. This may also be the work referred to in two other contexts: the 40-voice 'canzona' performed for the entry of Cardinal Ippolito d'Este into Florence on 12 July 1561 (though with a different text) and the 'musica a quaranta voci' sent to Duke Guglielmo Gonzaga in August of the same year. Certainly Striggio was active in composing for such large forces during the 1560s; a mass for 40 voices was performed in both Paris and Vienna during his travels around Europe in 1567. For the 1568 Bavarian wedding the voices were accompanied by eight trombones, eight violas, eight flutes, harpsichord and bass lute. In its alternation of soloists and chorus and in its spatially separated choirs, *Ecce beatam lucem* resembles his large dialogue finales written in the 1560s for the Florentine *intermedi*, particularly the fifth *intermedio* for *La vedova* (1569). The *Missa in dominicis diebus*, for *alternatim* performance, is one of a number based on the same 'purified' chant of the S Barbara liturgy written by composers employed in, or closely associated with, the ducal chapel of S Barbara at Mantua, including Gastoldi, Rovigo, Wert and Palestrina. It survives in two manuscript sources dating from between 1580 and 1585 and was later published in *Missae dominicales quinis vocibus diversorum auctorum* (1592[1]). The motets ascribed to Striggio in the second and third volumes of Michael Herrer's *Hortus musicalis* (1609[14], 1609[15]) are contrafacta.

While Striggio was much admired by his contemporaries as a performer, his compositions seem to have brought him more widespread fame and popularity. Secular pieces by him are included in a large number of foreign manuscripts, including the Olkuz manuscript (compiled about 1579, see Perz) and the Lerma Codex. In England his music seems to have been widely appreciated; one of his madrigals was included in Watson's *The First Sett, of Italian Madrigals Englished* (1590[29]), he was much admired by Morley and his music is quoted in works by Weelkes and Farmer. Monte's *Missa 'Nasce la pena mia'* is based on one of his most popular pieces, Lodovico Agostini's *Il nuovo echo* (1583) includes pieces composed 'ad imitatione del S. Aless. Striggio' and Ludovico Balbi parodied *Se da vostri begli occhi* in his *Musicale esercitio* (1589). Monteverdi described him (letter, 28 November 1601) as 'famoso' and he was cited by Giulio Cesare Monteverdi in the Artusi controversy.

IAIN FENLON

Striggio, Alessandro [Alessandrino] **(ii)** (*b* Mantua, ?1573; *d* Venice, 8 June 1630). Italian nobleman, diplomat, librettist and musician, son of ALESSANDRO STRIGGIO (i) and Virginia Vagnoli, a singer and lutenist. He appears as a viol player in the list of musicians who took part in the famous festivities celebrating the wedding of Grand Duke Ferdinando I in Florence in 1589. He subsequently studied law at Mantua in preparation for a diplomatic career in the service of the Gonzaga family. Between 1596 and 1597 he undertook to publish posthumously his father's last three books of five-part madrigals. In June 1611 he became secretary to Duke Vincenzo I and for some years served as ambassador to Milan. First a count, then a marquis, he was elevated to the rank of chancellor in January 1628. During the war over the succession to Vincenzo II he attempted to obtain military and political aid for Mantua in Madrid and in Venice, where he died of the plague.

Striggio's most important link with the musical world was through his collaboration with Monteverdi, for whom he wrote the librettos of *Orfeo* (Mantua, 1607; repr. in A. Solerti: *Gli albori del melodramma*, Milan, 1904/*R*, iii, pp.241–74), probably the ballet *Tirsi e Clori* (1616; in Solerti: op. cit., 285–91) and the lost dramatic cantata *Apollo*. After Monteverdi moved to Venice in 1613 Striggio's position as his patron and closest ally at the Mantuan court is eloquently documented by their correspondence, for the majority of Monteverdi's extant letters are addressed to him. Several of his own letters survive (in *I-MAc*). *Orfeo* was modelled on *Euridice* (1600) by Ottavio Rinuccini, who had altered the received version of the myth to effect a happy ending. Although Striggio's libretto adheres to the original tragic outcome (Orpheus loses his bride forever and is dismembered by the Bacchantes), in Monteverdi's published score (1609) Orpheus is rescued by a *deus ex machina*. This discrepancy may have resulted from the circumstances of the 1607 performances, which did not allow for the use of machinery; but it is also likely that aesthetic considerations prompted Monteverdi to resort to the *lieto fine*. *Orfeo* is in five acts, each having a different formal design centred around its own climax. Although Striggio's verse contains many echoes of Rinuccini's libretto, it is structurally more varied. There are passages in blank verse inviting the flexibility of recitative, others in traditional lyrical forms such as *terza rima* demanding strophic repetition, as well as sections that move between these extremes in novel ways. Interesting as the large-scale formal act-schemes are, however, Striggio's versification is less subtle rhetorically than that of Rinuccini, with whom Monteverdi subsequently collaborated.

Striggio also wrote the texts for *Il trionfo d'onore* and *Il balletto d'sacrifico Ifigenia* (the latter in Solerti: op. cit., 275–83), both set by Marco da Gagliano (the latter as *Il sacrificio d'Ifigenia*) and performed in Mantua in June 1608. He was a member, known as 'Il Ritenuto' ('the reserved one'), of the Accademia degli Invaghiti, which promoted the first production of *Orfeo*.

BARBARA R. HANNING

Strinasacchi [Strina Sacchi], **Regina** (*b* Ostiglia, nr Mantua, 1764; *d* Dresden, 11 June 1839). Italian violinist. She was educated at the Ospedale della Pietà in Venice and probably later studied in Paris. From 1780 to 1783 she travelled through Italy and was admired for her appearance and manners as well as for her playing. In 1784 she scored a great success in Vienna with two concerts. Mozart performed with her at the second of these and composed for the occasion one of his finest sonatas (in B♭, K454). He praised her to his father as 'a very good violinist' who 'has a great deal of taste and feeling in her playing'. Leopold agreed when he heard her in Salzburg late in 1785 and wrote to his daughter (8 December 1785):

> She plays no note without feeling, so even in the symphonies, she always played with expression. No-one can play an adagio with more feeling and more touchingly than she. Her whole heart and soul are in the melody she is playing, and her tone is both beautiful and powerful.

In chamber music also she established a fine reputation, achieving special distinction in Haydn quartets. In 1785 Strinasacchi married Johann Conrad Schlick, a distinguished cellist of the ducal court in Gotha. She joined her husband in the orchestra there, and for the next 25 years the couple made occasional concert tours together. Gerber reported that he visited her in 1801 and found her artistry and charm undiminished. At Gotha she became known also as an expert guitarist. She retired from concert life in 1810; after the death of her husband in 1825, she lived with her son in Dresden.

Although Eitner listed a cello concerto by Strinasacchi in Traeg's catalogue (1799), it is probably not by Regina; there is no other reference to her composing.

CHAPPELL WHITE

Strindberg, (Johan) August (*b* Stockholm, 22 Jan 1849; *d* Stockholm, 14 May 1912). Swedish writer and dramatist. He grew up in a musical household in which his parents and siblings all played instruments. Though he did not play himself, he moved in musical circles and enjoyed the friendship of such musicians as Tor Aulin. He favoured Beethoven, Bach and Chopin, and his experience of their music plays an important part in many of his works; but it was after his 'inferno crisis' (1894–6, during which time he experienced strong feelings of guilt and paranoia) that

his perceptions of music as an art deepened, and that music assumed for him a moral, even religious function. He also studied harmony and developed his own theories about tonality and rhythm. In 1907 he published in the magazine *Idun* a thesis about music theory and notation in which he advocated free tonality and a greater degree of chance and subjectiveness in music (theories which bear a striking resemblance to those of the Second Viennese School).

Strindberg gave careful instructions as to the nature and placing of music in his plays. For *Kronbruden* ('The Crown Bride') he also composed (or arranged) the 'Song of the Neck' and for *Samum* he wrote a bizarre, non-tonal melody. The only opera project Strindberg participated in was *Kronbruden*; the young Ture Rangström approached him for discussions about his setting, and Strindberg sanctioned the omission of the last two acts. His plays have formed the basis of a number of operas including Rorem's *Miss Julie* (1964–5), William Alwyn's *Miss Julie* (1972–7), Aribert Reimann's *Ein Traumspiel* (1965) and *Die Gespenstersonate* (1983) and Lidhom's *Holländarn* (1967) and *Ett drömspel* (1990).

ANDERS WIKLUND

Strindberg, Henrik (*b* Kalmar, 28 March 1954). Swedish composer. At an early age he played the recorder, the violin, the classical and electric guitar, the saxophone and the piano. From 1972 he played in a successful professional rock group, Ragnarök. He studied composition at the Royal College of Music in Stockholm with Bucht, Pär Lindgren, Mellnäs, Sven-David Sandström and Ferneyhough. In 1985 he attended Xenakis's summer course at the Centre Acanthes in Greece, and between 1985 and 1987 he was Sandström's assistant. He took his diploma examination in composition in 1987. As a scholar at IRCAM in Paris (1987–9) he developed two computer software programs – Kontur for generating music and Trigger for algorithmic manipulation of given musical material.

The computer is often used in Strindberg's architecturally sophisticated investigation of polyphonic sounds and rhythmic patterns, as in *I träd* ('Within Trees'), *Etymology*, which has been performed outside Sweden, and *Ursprung/gläntor* ('Origins/Glades'). Of his musical style, consistent from 1985, he says: 'The structure is polyphonic, all the voices have the same material: modal melody built up from a small number of rhythmic elements (1–3 note values). Rhythmic tension comes from the effect of accent. The pulse is present – but indefinable, often rapid – unwilling to be subdivided'. In connection with an artistic and educational 'electric guitar project', Strindberg further developed in his piece *Midsommar* (1986) the formal and rhythmic progression within the Who's rock tune *My Generation*.

ROLF HAGLUND

String (Fr. *corde*; Ger. *Saite*, *Streich-*; It. *corda*). In a musical instrument, a uniform length of any material which is held under tension and which produces a musical note when plucked, struck, bowed or otherwise excited. Many materials may be used: common examples are gut, nylon and related polymers, and metal wire.

1. Acoustic theory. 2. Keyboard instruments. 3. Bowed and plucked string instruments.

1. Acoustic theory. When a string is impulsively excited (as by being plucked or struck) and then allowed to vibrate freely, it produces a large set of frequencies ('overtones' or 'partials') at the same time. The lowest of these frequencies (the 'fundamental') is inversely proportional to the string's length, proportional to the square root of its tension and inversely proportional to the square root of its mass per unit length. As a result, a string is not only capable of being 'tuned' by adjusting the tension, but in many instruments the player can further vary the pitch by 'stopping' with the finger, thus controlling the vibrating length.

In an ideal string the higher overtones are harmonically related; that is, they are whole-number multiples of the fundamental frequency. There are, however, a number of factors that make the overtones of a real string deviate from being perfectly harmonic. An ideal string is assumed to be perfectly flexible, but a real string has some stiffness which resists bending. This produces progressive sharpening of the overtone frequencies relative to the harmonic series. To make a heavy string without excessive bending stiffness, a helically-wrapped construction is often used. To obtain harmonic overtones, the ideal string must have rigidly fixed ends. A real string is fixed (via a bridge) to the soundboard of a musical instrument, which must by definition vibrate. This coupling to the instrument body disturbs the overtone frequencies away from the harmonic series. Any irregularity of the string, due to manufacturing variation, wear or kinks, will disturb the overtone frequencies and cause 'falseness'. Many instruments have strings in groups of two or three tuned to nominal unison or octave pitches. These groups of strings interact to give modified vibration behaviour. In summary, a thin, tight, flexible string will have approximately harmonic overtones, while a heavy, slack or stiff string will be more inharmonic.

The way in which inharmonicity affects the sound of a string is quite different for impulsively excited free vibration (as in a guitar, harp or piano) than for a string which is bowed. In the first case, a perfectly harmonic overtone series endows the sound with a very definite sense of pitch, whereas a severely inharmonic string may approach the sound of a metal bar. By contrast, when a string is continuously bowed the partial frequencies of its vibration (which is, of course, no longer a free vibration) are automatically forced to be harmonic. In that case any inharmonicity of the free overtones manifests itself more subtly, through an effect on the ease and controllability of bowing (*see* ACOUSTICS, §II, 7).

The same factors that disturb the harmonicity of overtone frequencies also introduce 'damping' into the string's vibration, so that following impulsive excitation the motion dies away and eventually ceases. In general, the rate of damping is different for the different overtones. The initial proportions of these different overtones are governed by the position of the plucking or striking point, and the size and hardness of the object doing the plucking or striking, but these relative proportions in the mixture change as the vibration decays. This time-varying mixture of non-harmonic overtone frequencies governs the tone quality of the sound.

2. KEYBOARD INSTRUMENTS. In the West the manufacture of strings has chiefly involved the techniques of the metal worker (for wire drawing) and of the gut string maker. Keyboard instruments mostly use wire strings. Although there is evidence of drawn gold wire as early as the 5th or 6th century BCE in Persia, it seems that the draw plate was not used in medieval Europe until the 10th century, from which time iron wire was available for musical instruments. The wrought iron produced for wire drawing was probably given particular attention at all stages of its handling. Recent analyses have shown the impressive purity that could be attained. The ingots of iron or brass were forged to smaller strips, cut into rods, hammered round and finally drawn down to the sizes required by instrument makers. It is known that trade in drawn wire was highly organized at an early stage, and certain areas acquired a reputation for the quality of their products. In the 18th century, Liège, Cologne, Hamburg, Switzerland and Sweden were particularly esteemed as sources of iron wire; Nuremberg was renowned for its brass wire. The harpsichord or plucked string instrument maker would buy this wire in small coils or wound on wooden bobbins, each marked with its own gauge number.

In practical instruments the strings in the bass cannot be as long as a theoretical doubling of string length would require for an octave drop in frequency: there is always some foreshortening of the scale towards the bass. This is very clear on those plucked string instruments with strings of the same length but tuned to different pitches. It is less obvious, however, that on a harpsichord strings 1·5 metres long in the bass may be about only half of their theoretical length. In order that the strings may reach the desired frequency with a short length, the mass must be increased. It was historically the case that different types of string material were used in the bass if the treble was designed to use iron wire. Thus strings of yellow brass (about 70% copper, 30% zinc alloy) were used in the tenor of iron-scaled instruments, with red brass (about 85% copper, 15% zinc alloy) for the last few notes. The scalings in the bass were designed to match the tensile strengths of the different materials (see O'Brien, C1981 and Wraight, C1997, chap.5). Silver and gold strings were used in a similar way; because of their higher specific gravity and lower elastic modulus they offer an acoustical advantage over brass strings. Piccinini (D1623) described using silver strings on his chitarrone, and there is evidence that gold strings were used on some keyboard instruments in the Medici collection in Florence. The expense no doubt prevented these materials being widely used. Another way of increasing the mass of strings without seriously increasing their stiffness was to twist two strings together. Such strings were used on cisterns and other plucked wire-strung instruments; they might also have been used on virginals. A related idea consists of increasing the twisting in a gut string in order to increase the elasticity and improve the tone in the bass (see Abbot and Segerman, A1974). Some clavichords and fortepianos of the late 18th century have a form of overspun string, consisting of a brass core with spaced winding around it. This was the forerunner of the modern piano's covered strings, which are considerably heavier and have a close-wound overspinning.

Wire drawers identified their wire with gauge numbers, and since the mid-1970s considerable effort has been expended to discover how the numbers of the wire sizes (often marked on harpsichords, virginals and clavichords) can yield information on how old instruments, or copies of them, should be strung. This research has shown that although a variety of wire gauge systems were in use, wire drawn in Nuremberg was pre-eminent until the early 19th century. Old wire samples have confirmed that the Nuremberg gauge sizes were not based on a constant ratio of reduction, but were nevertheless held to fairly close tolerances (see Wraight, C forthcoming). Evidence of gauge numbers is also found on early fortepianos, and it seems that the iron wire used for pianos at the beginning of the 19th century was essentially the same as that for harpsichords and other instruments, albeit much thicker.

As a result of studying the question from the angles of physics, technology and organology, it is now clear that early instrument makers designed their scales to use the string materials to their best advantage. It would no longer be countenanced in most circles to string short-scaled instruments with a *c″* of about 28 cm (intended for 'normal' pitch; i.e. not octave or quint instruments) with iron wire, nor would the strong steel wires developed for pianos be used on harpsichords. Modern makers of old instruments now have access to a range of strings in different materials, wire and gut, with tensile strengths suited to the specific types of scaling. Attention has also been drawn to the importance of the mechanical treatment of metals at the wire-drawing stage, and before that during the reduction of the material from large bars to rods for drawing. Metal wires take their strength from the hardening process of drawing them through progressively smaller holes; only later in the 19th century came the search for a more powerful tone and the requirement for stronger wire. Thus early 19th-century pianos used wires of the same composition as for harpsichords.

3. BOWED AND PLUCKED STRING INSTRUMENTS. The most common materials used for strings for bowed and plucked instruments in Western music have been sheep gut, metal wire and plastic. Other materials have been used in various cultures and time periods around the world; these

have included animal sinews (of water-fowl, in China, sometime between the 7th and 10th centuries CE), gut from young lions (9th-century Arabic source), wolf gut (14th-century English source; *see* FIDDLE, §2), horsehair (the Near East, the Balkans, northern Europe and Central Asia, from the early 15th century onwards), vegetable matter such as bast, hemp, flax, liana (according to ancient writers) and, in the 17th century, coconut, yucca and aloe (see Bachmann).

Surviving early accounts on the making of strings indicate that the methods employed were essentially those still in use today. Of the three earliest of these, all from the 14th century, two (the anonymous *Secretum philosophorum* and Jean de Brie's *Le bon berger*) are concerned solely with the manufacture of gut strings. The third is the Persian-Arabic treatise Kanz al-tuḥāf, which describes how both gut and silk strings are made. According to *Secretum philosophorum*, sheep gut should be soaked for at least 12 hours in water or lye, until all external layers of flesh have been separated from the fibrous intestinal membrane. The cleaned gut is then soaked for two days in a strong lye solution or in red wine, and dried in a linen cloth. Then while they are still damp, two, three or four intestines are twisted together, to make a string of the required strength, which is then laid out to dry. The author gave a final warning that strings should not be stored in too damp or dry a place since excessive dryness or dampness causes them to snap easily.

Somewhat similar instructions appear in the article 'Corde' in Diderot's *Encyclopèdie* (1754). Diderot added that it is the number of guts employed that determines the final diameter of the string, and hence which pitches it can produce. This varies from two, for the smallest mandolin string, to 120 for a double bass (Bonta, 1999). In his time the best gut strings came from Italy, although, with the growing use of the violin family, their manufacture was spreading elsewhere.

According to Mersenne's Law on vibrating strings, the pitch produced by a string is a function of its length, tension, diameter and density. Gut is not a very dense material, and to compensate for this bass strings made from it have to be either very long or very thick (at a given tension). On keyboard instruments and harps length is no object because the strings are not stopped by the fingers and thus do not have to fall easily within the reach of the player's arms. Double-necked lutes such as the theorbo and archlute have a set of long, thin, diapason strings (not stopped by the left hand) to provide the deep bass alongside the normal fretted strings. However, on bowed instruments such as the viol and the violin families, diapason strings are impractical (because of the difference in nature between bowing and plucking) and the bass strings have to be the same length as the treble strings. The bass strings therefore have either to be very thick (which are then slow to speak and tend to produce a thick and woolly sound that is hard to control), or some method must be found to increase their density. Some scholars, string makers and performers argue that gut strings must have been made that could cope with low bass music. Supporting evidence includes the existence of the late-16th-century Italian VIOLA BASTARDA repertory, which employs the whole range of the viol in a highly virtuoso manner, and the notion that the adoption of metalwound strings was by no means standard until the second half of the 18th century, by which time the continuo bass had been in existance for a century and a half. This would imply some or all of the following: that bass violins and viols were of large sizes to give the bass strings extra length; that musicians were accustomed to quite heavy-guage strings; and that there may have been techniques used to increase the density of the gut. Since the last decades of the 20th century there has been growing interest in rediscovering the techniques that must have been used. Experiments with very high-twist roped gut (so-called 'catline'), or with soaking gut in metal solutions ('metal-loading') are producing interesting, if not conclusive results, and every such experiment provokes considerable controversy about its historical validity (see Webber).

The most significant solution to the problem of density, in which metal wire is wound around a core of some material (in modern times, gut, metal or nylon), seems to have been invented in the mid-17th century, probably in Bologna. On 'overspun' ('overwound' or 'wirewound') strings density is increased considerably, thus much reducing the length of string required to produce low notes. This invention was crucial to the development of the bass member of the violin family, as it permitted the cutting down in size of the violone (or bass violin) and its conversion to a violoncello (*see* VIOLONCELLO, §I). It also permitted the addition (reputedly by Sainte-Colombe) of the seventh, *A′* string to the bass viol in France. The earliest known mention of overspun strings is in the fourth edition of John Playford's *Introduction to the Skill of Music* (1664), and the first known use of the term 'violoncello' appeared a year later in G.C. Arresti's Sonate op.4. Some strings were wound with a single strand of metal in a fairly open spiral ('demifilé'); such strings are being manufactured again and are sometimes used for the middle range, as a transitional sound between the reedy pure gut at the treble end of the instrument and the firm, metallic sound of fully overwound strings in the bass.

From the early 18th century all members of the violin family used the same selection of materials for each of its strings. The lowest string (*g* on the violin; *c* on the viola; *C* on the cello) and occasionally its neighbour (*d′*; *g*; *G*) were overspun. For the top two strings of each instrument plain gut continued to be used until the 20th century when overspun strings came to be used on these too (the *e‴* string of the violin being made either of unwound wire or a wire core wound with flat aluminium ribbon). Strings are now usually wound with metal ribbon rather than wire, of aluminium, silver or even gold. In the latter years of the 20th century, strings with nylon or gut cores have been preferred for playing classical music, but for country and folk styles the harder-edged tone of strings with steel cores is often desired. On the modern classical guitar gut strings were made obsolete after the introduction of nylon strings in 1946 (wirewound on the bass strings), which offered greater tension and durability than the traditional material.

GABRIEL WEINREICH, J. WOODHOUSE (1), FRANK HUBBARD/ DENZIL WRAIGHT (2), STEPHEN BONTA, RICHARD PARTRIDGE (3)

Stringari, Antonio [Patavinus, Antonius Stringarius] (*fl* 1505–14). Italian composer. His name indicates that he must have been born in or near Padua, and he probably worked in his native area. Although he is known as the author of only 12 frottolas, all published by Petrucci between 1505 and 1514, Stringari was a highly original composer whose works bear more interest than their small number would suggest.

Among his four works in Petrucci's eighth book of frottolas (1507[4]) are two of particular interest. *Nui siamo segatori*, one of a small group of north-Italian carnival songs, is putatively sung by peasants mowing grass, but has a strong sexual undercurrent. Unusually, the text indicates that the work is to be followed by a dance. *Poi ch'io son in libertade* is an inverted *barzelletta* with a popular tune in its refrain, in this instance 'Scaramella fa la galla', better known from settings by Josquin and Compère. In Stringari's work, the refrain is actually a sequential one, each statement following the stanzas citing a different strophe of *Scaramella*.

Petrucci included seven works of Stringari in his eleventh book of frottolas, three *barzellette*, a poetic madrigal and four sonnets. One *barzelletta*, *Don, don – al foco, al foco*, contains a *ripresa* in dialogue in which all voices sing portions of the text. Another, *Son più matti*, resembles a dance in its nearly homorhythmic, triple-metre setting of a popular text ('There are more madmen in this world than blades of grass in a verdant meadow'). Several other works in this collection are more serious. *Non più saette, Amor* sets a sonnet of Antonio Tebaldeo in almost entirely syllabic fashion. Stringari also sets three Petrarchan sonnets on the death of Laura: *Discolorato hai, Morte*, *Datemi pace, o duri miei pensieri* and *Valle che de' lamenti miei se' piena*. These are extraordinary works with distinct traces of attempts to heighten the meaning of the words through musical means and codas that blossom into unusually melismatic passages. *Non al suo amante più Diana piacque* is a setting of one of Petrarch's four madrigals. Like *Non più saette, Amor*, it is primarily syllabic. Its lower parts are considerably less active than is usual in the frottola and often move homorhythmically with the cantus.

WILLIAM F. PRIZER

String bass. A colloquial term for the DOUBLE BASS.

String drum [lion's roar] (Fr. *tambour à cordes*; Ger. *Löwengebrull*; It. *rugghio di leone*). A membranophone in the form of a friction drum, consisting of a cylindrical or bucket-shaped vessel with one end open and the other closed with a membrane. A length of cord or gut is fastened through a hole in the centre of the membrane; the cord is resined and rubbed with coarse fabric or a glove, producing a passable imitation of a lion's roar. In the past this was always a two-handed operation – one hand held the cord taut, the other gripped and slid up the cord, but in the late 20th century Kolberg produced a mounted model, with the cord held taut, requiring only one hand. In another version of the instrument, the end of the string is loosely secured to a wooden handle to form a whirled friction drum.

The first described string drum was originally known in England as the 'jackdaw'. An instrument of this type, the *bika*, is still used by the Csángó, a Hungarian ethnic group living in Romania; as the *buhai* it is used by others in Romania at Christmas and New Year festivals. In southern Turkey a string drum is used to scare away wild animals. In Germany a whirled friction drum in the form of a child's toy is known as the *Waldteufel*. Similar instruments are known in India, including the *nar hunkarnio* of the Bhil people in Rajasthan and the *baghrā* of Orissa.

Composers have made occasional use of the string drum. Varèse included it as *tambour à corde* in *Hyperprism* (1922–3) and *Ionisation* (1929–31). Alexander Goehr specified 'lion's roar' in his *Romanza* for cello and orchestra (1968). Carl Orff wrote for a whirled friction drum in his score for *Ein Sommernachtstraum* (1917–64). Friedrich Cerha included a *Waldteufel* in *Eine Art Chansons* (1985–7) and *Eine letzte Art Chansons* (1989). A similar effect, but less loud, is created by the Brazilian *cuíca* (*see* DRUM).

The TAMBOURIN DE BÉARN or *tambourin à cordes* of southern France is a box zither.

JAMES BLADES/JAMES HOLLAND

Stringendo (It.: 'drawing tight', 'squeezing'; gerund of *stringere*). A direction to perform with more tension and therefore specifically faster. It is sometimes abbreviated *string*. As a tempo modification it appears frequently in scores of the later 19th century, especially in Liszt, to indicate the development towards some climax. The past participle of the same word is stretto (*see* STRETTO (ii)).

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

String quartet (Fr. *quatuor à cordes*; Ger. *Streichquartett*; It. *quartetto di cordi, quartetto d'archi*). A composition for solo string instruments, usually two violins, viola and cello; it is widely regarded as the supreme form of chamber music.

1. Early development. 2. 1780–1800. 3. 1800–30. 4. 1830–70. 5. 1870–1900. 6. 1900–14. 7. 1915–40. 8. 1940–75. 9. 1975–2000.

1. EARLY DEVELOPMENT. No immediate precursor for the string quartet can be identified. Four-part writing for strings occurs in pieces titled *sonata a quattro* or *concerto a quattro*, in the Italian *sinfonia* and the French *sonate en quatuor* and *ouverture à quatre*, but these works were apparently intended for orchestral performance and may have included keyboard continuo (Alessandro Scarlatti's *Sonate a quattro per due violini, violetta e violoncello senza cembalo*, *c*1715–25, are an isolated exception; with their alternations of ripieno and concertino they resemble the concerto grosso). Closer in spirit and style to the quartet are the south German and Austrian symphonies in four parts, some of which may have been performed without continuo; frequently their style is indistinguishable from one-to-a-part solo ensemble music. With the exception of the accompanied sonata, the quartet was probably the most widely cultivated genre of 'chamber music' between about 1760 and 1800; its history is characterized chiefly by a refinement of what was then called the 'sonata' (as opposed to the 'theatrical' or orchestral) style. In his *Musikalisches Lexikon* (1802), Koch described this as 'more development and finer nuance'.

Quartets were first cultivated in south Germany, Austria and Bohemia, by Asplmayr, Ordonez, Dittersdorf, Vanhal, Starzer, Gassmann, F.X. Richter, Holzbauer, Camerloher, Christian Cannabich and Joseph Haydn. The usual title for such works was 'divertimento', which at the time designated solo instrumental music in general and was compatible with a variety of scorings, styles and character; not until about 1780 did modern titles such as quartet and quintet became common for 'serious' chamber music in the now standard scoring. This change in terminology does not, however, imply that earlier divertimentos were an independent genre of 'light', occasional music or that their scoring was variable. Anecdotal and stylistic evidence shows that at least from the time of Haydn's op.9 (1769–70) early divertimentos were 'serious' works for a solo ensemble, with a cello playing the bass part (Webster, 1974).

Early quartets vary widely in structure and style: Richter's six quartets op.5 (*c*1765–7) are in three movements; Haydn's opp.1 and 2 (probably *c*1757–62) are in five, with minuets in second and fourth place. It is only with Haydn's op.9 (1769–70) that a four-movement scheme was adopted. Textures also vary, from the purely homophonic, often reminiscent of an elaborated trio sonata, to the intensely contrapuntal; polyphony, once thought to have been resurrected by Haydn only in his op.20 (1772), was in fact a fairly regular feature of chamber music during this period (Kirkendale, 1966, 1979). Fugal movements are found in numerous works by Monn, Kraus, Albrechtsberger, Michael Haydn, Wagenseil and Ordonez. Some early quartets, published or disseminated with wind parts, show a close relationship to the symphony; others, such as Haydn's op.1 no.5, represent orchestral works shorn of their additional parts. Nevertheless, Haydn in particular frequently differentiated between a style of writing appropriate to orchestral music and that suited to the quartet. Mozart's earliest quartets, K80 (1770, Lodi) and K155–60 (1772–3, Milan), have little to do with Austrian chamber music traditions, especially as they were practised in conservative Salzburg; they are based on Italian models, Sammartini in particular. The Viennese set K168–73 (1773), on the other hand, is usually said to have been influenced by Haydn's opp.9, 17 and 20; however, fugal finales (K168 and 173), irregular phrase construction and thematic elaboration are common among early 1770s quartets in general (Brown, 1992).

In France the quartet owed its impetus chiefly to the works of Haydn and Boccherini; no French quartet is known to predate the 1766 Chevardière edition of Haydn's op.3 (as *Six simphonies ou Quatuors dialogués*), and only Antonine Laurent Baudron's *Sei quartetti* predates Boccherini's op.2, published (as op.1) by Vénier in 1767. Other early French quartets include those of Jean-Baptiste Davaux, François-Joseph Gossec, Joseph Boulogne de Saint-Georges and Pierre Vachon. These works, closer in spirit to the *galant* Boccherini than to the 'classical' Haydn, are commonly designated *quatuors concertants*, a title found almost universally on the title-pages of contemporaneous Parisian editions. Thematic material, generally songlike and elegant, is shared among the four instruments, often with solos for each in turn; most are in three movements, with a sonata-style first movement, a binary form, *ABA* or minuet second movement, and a rondo, set of variations or minuet to conclude. Two-movement quartets, such as Gossec's op.15 (1772) and all but one of Davaux's op.9 (1779), are also common; four-movement quartets, such as Vachon's (published 1772–82), are rare. Cambini, who moved from Italy to Paris about 1770, was the most prolific French-based composer of quartets; more than 150 of his works were published there between 1773 and 1809. Mozart described Cambini's music as 'quite pretty'; his quartets are characterized by variety in the instrumental solos and richly ornamented cantilenas, as in the F minor quartet op.20 no.6. Later quartets by Saint-Georges

(op.14, 1785) show greater independence of part-writing and an exploitation of both high and low registers; the same is true of Nicholas-Joseph Chartrain's 36 quartets composed between 1781 and 1785.

Elsewhere, quartets were cultivated less intensely. With the exception of G.B. Sammartini, whose 21 quartets include works for three violins and basso or for flute, two violins and basso, most Italian composers wrote their works for publication and performance elsewhere, chiefly London; these include Giordani's op.2 (1773), Capuzzi's op.1 (1780), Giardini's op.23 (1782) and a set of six by Bertoni (*c*1783). The first quartets published in England were C.F. Abel's op.8 (1769); the earliest by a native composer were those of Joseph Gibbs, published in 1778 with a figured bass part, as were quartets by Haydn as late as 1799. Later examples are known by Samuel Wesley, William Shield and John Marsh. Haydn's quartets were especially influential in England: Marsh's quartet of 1795 was written 'in Imitation of the Stile of Haydn's Opera Prima'; while Samuel Webbe jr wrote variations on 'Adeste fidelis' 'after the Manner of Haydn's celebrated Hymn to the Emperor' (op.76 no.3). Both Boccherini and Brunetti were based in Madrid; but whereas Brunetti's 44 quartets were composed chiefly for the Spanish court, Boccherini's almost 100 quartets were widely disseminated and influential. Most of them were published in Paris; some late works were composed for Friedrich Wilhelm II of Prussia, himself a cellist, for whom Boccherini worked (by correspondence from Spain) as chamber composer from 1786. The quartets show a variety of influences, possibly the result of his early travels: Boccherini had lived and worked in Vienna and Paris by 1767 as well as in Italy (where he had been a member of one of the earliest professional string quartets, called the Quartetto Toscano, founded Livorno by Nardini, with Cambini and Manfredi), before his move to Madrid in 1768; characterized in particular by a special concern for sonority, his quartets make frequent use of decorative, concertante textures (especially for the cello), tremolandos and double stops. Most of his early examples are in three movements; from his op.15 (1772) 'quartettinos' in two movements predominate, but there are also works in three and four movements.

2. 1780–1800. The early 1780s were watershed years for the quartet. In 1782 Viotti arrived in Paris, where he introduced the *quatuor brillant*, which largely supplanted the *quatuor concertant*; essentially an accompanied solo, the *quatuor brillant* style, already evident in some works by Sammartini, was characterized by passages of a purely mechanical brilliance and opportunities for concerto-like cadenzas. The influence of the *quatuor brillant* was widespread; even in Vienna during the 1780s and 90s this style was cultivated at times by Paul Wranitzky, Gyrowetz and Krommer (Hickman, 1989).

Haydn's op.33, published the year of Viotti's début in Paris, also marked a new path in quartet composition; described by their composer as written in a 'new and special manner', this probably referred less to clarity of structure and textural balance, already achieved in opp.9, 17 and 20, than to the consistent application of motivic work (*thematische Arbeit*), the reintroduction of a light, popular touch, and the integration of the movements of varying character into a convincing whole. This is most apparent in the finales, which are differentiated from the opening movements by the use of 'simpler texture, more regular phrasing and harmonic rhythm and a greater emphasis on soloistic passages for the various instruments' (Moe, 1975). The quartets are remarkably concise: thematic material is frequently pared to a minimum, accompaniment and melody are often identical, interchangeable or easily transformed from one to the other, and transitional figures and phrases are eliminated almost completely (Rosen, 1971).

Op.33 is also important for its impact on Mozart, who between 1782 and 1785 composed six magnificent quartets; published with a dedication to Haydn, Mozart described them as 'the fruit of long and laborious endeavour'. While similarly characterized by textures conceived as a four-part discourse, Mozart's debt to op.33 lies more in a general approach to quartet style than in specific modellings. The quartets, broader in scale than Haydn's and more heterogeneous, are characterized in particular by their multiplicity of motifs (K428), chromaticism (K465 and 428) and a fusion of strict and *galant* styles (K387 and 464, finales) to intensify both structure and expression, as well as their elaborate, ornamental slow movements (K387, 458). The six quartets were widely disseminated and highly influential; Koch described them as best representing 'the concept of a composition with four obbligato principal voices'.

Haydn's later quartets combine the equal-voice texture, elaborate counterpoint and solo display of his earlier quartets with the motivic work and cyclic integration of op.33. Op.50 (1787) was composed for the cello-loving Friedrich Wilhelm II of Prussia but make few concessions in terms of providing solo passages for that instrument; they are characterized by a broad harmonic palette and an almost single-minded exploitation of thematic transformation, generally avoiding motivically independent, contrasting subjects. The same is true of opp.54–5 (1788) and op.64 (1790), composed for the violinist Johann Tost, which additionally explore virtuoso violin writing (for example in the slow movement of op.54 no.3), including high positions (the 'Lark', op.64 no.5, with its opening melody high on the E string) and concerto-like passage work (op.55 no.1, op.64 no.2); the chromaticism of op.54 no.1 (Allegretto) and op.55 no.3 is reminiscent of Mozart, whose influence has been claimed. Op.64, more intimate in character than than opp.54–5, was performed in London during Haydn's first visit there in 1791–2; opp.71 and 74 ('Apponyi', 1793) were composed before the second journey and presumably intended for the coming season's concerts. Perhaps in response to the relative failure in England of the earlier set, and the need to provide music more outspoken in character for public performance, opp.71 and 74 again favour the brilliant style, with richer, more orchestral sonorities than any previous Haydn quartets and, particularly in op.74, adventurous tonal relationships between movements (and between minuets their trios).

Haydn's last completed set of quartets, op.76 (composed by mid-1797) were written in Vienna; a high point in Haydn's creative output, and in the history of the genre, they were described by Burney as 'full of invention, fire, good taste and new effects'. Among their novel features are the minor-key finales of no.1 in G major and no.3 in C major and the rapid scherzos that replace minuets in nos.1 and 6. The most remarkable of the set, perhaps, is no.6 in E♭, which atypically begins with a set of variations followed by a fugue; its slow movement, entitled 'Fantasia'

has no key signature but is in the distant B major, exploring a wide range of tonalities; and sonata form is withheld for the finale. Only the two quartets op.77 (1799, dedicated to Prince Lobkowitz) and the unfinished op.103 (two movements, by 1803) followed; their publication, in 1802 and 1806 respectively, probably signalled Haydn's inability to sustain creative momentum over the course of a traditional set. Op.77 no.1 is an especially fine work, a model of idiomatic quartet writing; op.77 no.2, with its remarkable, rapt variation-style slow movement, is often regarded as Haydn's supreme quartet.

Other Viennese quartet composers of the 1780s include Dittersdorf, Pleyel, Hoffmeister, Gyrowetz, Vanhal and Wranitzky; many of their works are closer in spirit to the Parisian *quatuor concertant* than to the 'classical' string quartets of Haydn (Hickman, 1989). Mozart's 'Prussian' quartets (K575, 589 and 590) were clearly thought to be in this style; the title-page of Artaria's first edition (1793) describes them as 'konzertante Quartetten' (the prominent cello parts, presumably written to please Friedrich Wilhelm II, who may have commissioned the quartets, were virtually abandoned, however, after the first two movements of K589, and in any case are balanced by comparable solo writing for the viola and second violin). By the 1790s this style gave way to more theatrical quartets, typically in four movements and characterized by bold, almost orchestral gestures as well as pervasive counterpoint and motivic development. Among the most successful were those of Paul Wranitzky, A.E. Förster and in particular Andreas Romberg, whose op.2 was described in a contemporaneous review: 'Among quartets newly published since the death of the immortal Mozart, it would be impossible to find quartets composed with such care [for the purity of the composition] as these' (*AMZ*, 12 May 1802).

3. 1800–30. Beethoven's first set of quartets, op.18 (1798–1800), also belongs to this tradition. Influenced by Haydn and Mozart – Beethoven copied out Haydn's op.20 no.1 in 1793–4 and Mozart's K387 and 464 (the chief influence on op.18 no.5; see Yudkin) about the time he began working on op.18 – the quartets had a difficult genesis; nos.1 and 2 both survive in earlier versions. Expressive contrast is a hallmark of this early set: with its convoluted harmonic scheme, 'La malinconia', the slow introduction to the finale of op.18 no.6, is the most remarkable instance, but most of the slow movements are marked by elaborate textures, complex harmony and intensity of utterance. The quartets were ambiguously received; according to one contemporaneous assessment they 'must be played often and very well, as they are very difficult to perform and not at all popular'.

By 1800, the hegemony of the Viennese 'classical' string quartet was nearly complete; its influence can be seen, for example, in the Hyacinthe Jadin's op.2 no.1 (1796), the slow introduction to which is modelled on Mozart's 'Dissonance' Quartet K465. Jadin's often chromatic quartets, possibly the most important composed in France at the end of the 18th century, foreshadow later developments; they include sets dedicated to Haydn (op.1) and Baillot (op.3). Cambini's last set of quartets (1804), as well as Viotti's, are similarly influenced. Viotti's remarkable *Trois quatuors concertants* (1817) adopt the four-movement form and seriousness typical of the Viennese quartet, but at the same time represent a fusion of the traditional *quatuor concertant* and the *quatuor brillant*: the slow introduction to no.2 includes cadenza-like solos for both the first and second violins and the cello.

While the *quatuor concertant* was largely absorbed by the classical quartet, *quatuors brillants* continued to be written, especially by professional violin virtuosos, among them Pierre Baillot, Rodolphe Kreutzer and Viotti's pupil Pierre Rode; in Vienna this style was cultivated by Ignaz Schuppanzigh. The popularity of *quatuors brillants* was due in no small part to the establishment of professional string quartets, by Baillot in Paris and Schuppanzigh in Vienna, and to the introduction of quartets in public concert programmes. With the exception of London, where public performances had been common since the mid-1770s, quartets in German-speaking Europe and France had been intended chiefly for private performance, 'to serve the private pleasure of the regent or the court', as Koch put it; there is no evidence of public performances of quartets by professional musicians in Paris or Vienna before the 19th century. The *quatuor brillant* went under a variety of names, many of them indicative of their popular style and origin; Baillot's *Airs russes variés* op.20 (1810) is typical.

The wide cultivation of classical quartets about 1800 reflected not only their popularity but also their perceived modernity and social worth. According to an anonymous article in the *AMZ* (16 May 1810, cols.513–25), one of the earliest taxonomies in print to distinguish between the *quatuor concertant* and *quatuor brillant* on the one hand and the classical quartet on the other, competency in quartet performance was impossible for 'old, fossilized ripieno players'; what is more, 'It is impossible to hate someone with whom you have once seriously made music; and those who in some winter season have of their own will freely joined together in playing quartets are good friends for the rest of their lives'. Composers of 'true' quartets included Haydn, Mozart (who also wrote string quintets), Andreas and Bernhard Romberg, G.A. Schneider, Hänsel and Beethoven. Possibly the anonymous writer had in mind the first of Beethoven's middle-period works, the three Razumovsky quartets op.59 (1805–6), which together with the 'Harp' op.74 (1809) and the 'Quartetto serioso' op.95 (1810) exhibit many aspects of the deepening of Beethoven's style inaugurated by the 'Eroica' Symphony. Increase of scale is evident first of all in the vast expansion of the first two movements of op.59 no.1 but also in the slow introductions to op.59 no.3 and op.74 and in the five-part structures of the scherzos in op.59 no.2, op.74 and op.95. Counterpoint plays an increasingly important role in these works. The finale of op.59 no.3 is a fugue, and the first movement introduction, with its initial attack on a diminished seventh built over F♯, is also more motivated by line than harmony. While op.59 no.3 is often seen as more conventional than the others in this set, a strong case has been made for the traditional character of all three quartets (Webster, 1980). The 'Harp', whose nickname derives from the pizzicato effects in the first movement, is in many respects an exploration, not uncommon among Beethoven's works, of textural possibilities, notably in its luxuriant slow movement; it has the only theme and variations finale among his quartets (unless the *Grosse Fuge* is so reckoned). Unlike other middle-period quartets, op.95 is distinguished by the radical compression of its musical material, much of which is reduced to a minimum, as in

the unison opening and the general avoidance of lengthy transitions.

While quartets were traditionally composed in cycles of three or six, opp.74 and 95 are singly conceived works, a pattern that was to prevail throughout the late quartets as well. Commissioned by Prince Nicholas in November 1822, the first of them, op.127, was completed only in February 1825; opp.132 and 130 were composed next, followed by opp.131 and 135 by the end of 1826. Formal variety abounds: opp.127 and 135 are the most traditional, composed in four movements; for opp.130, 131 and 132, however, Beethoven used six-, seven-, and five-movement plans respectively. Sometimes formal schemes are displaced to non-traditional positions within the cycle (the only sonata form movement in op.131 is the finale), or the traditional expressive balance of the various movements is skewed, even by Beethovenian standards (op.130 was originally composed with the *Grosse Fuge* op.133 as its finale, to be replaced by a lighter, shorter movement). Another overtly fugal movement can be found in op.131; polyphonic density, as in the opening Allegro of op.127, is characteristic of the quartets in general. The variety of key successions is also unprecedented: op.130 has six movements in five different keys and op.131 has seven sections with the key scheme c♯–D–(b)–A–E–g♯–c♯. Throughout the late quartets, textures are juxtaposed in kaleidoscopic succession; this is achieved in part by the displacement of instruments from their normal tessitura, as in the finale of op.132. This is especially common in the numerous variation movements, which are a preoccupation of the quartets and other late works, among them the C minor Piano Sonata op.111 and the Ninth Symphony. The late quartets are remarkable above all for the intense and personal nature of their utterance.

Schubert's most important contributions to the genre are approximately contemporary with Beethoven's late quartets. The 11 works completed while he was still in his teens show evidence of struggle and insecurity; the first mature quartet is the uncompleted *Quartettsatz* of 1820, with its characteristically novel tonal and formal structure. The A minor and D minor ('Death and the Maiden') quartets were completed in 1824; the G major followed in 1826. All three exhibit the expanded scale of Beethoven's quartets, incorporating quasi-orchestral gestures, the G major in particular is notable for its tremolando writing; it is also remarkable for its tonal ambiguity, with the major-minor shifts that characterize its outer movements. The influence of the lied is most obvious in the slow movement of the 'Death and the Maiden' quartet (variations on the lied), in the minuet of the A minor (which quotes directly from *Die Götter Griechenlands*) and in the gait and the bleak atmosphere of the slow movement of the G major, redolent of *Winterreise*.

The outstanding quality of Beethoven's quartets notwithstanding, his works did not represent the mainstream quartet composition in the 1820s. In Vienna, the standard was set by the violinist Joseph Mayseder, a member of Schuppanzigh's quartet, and by Peter Hänsel, who composed approximately 55 quartets; earlier important quartets, from the 1800s, were composed by Paul Wranitzky (op.40, 1803) and Antoine Reicha, whose opp. 48–9, 58 and 93–5 were probably composed in Vienna between 1801 and 1808 (although they were not published until later). More significantly, the impetus for string quartet composition had by that time shifted away from Vienna; it is best represented by the works of the Anglo-French composer Georges Onslow, who composed 35 quartets by 1853, Spohr and Fesca. Classical in form but harmonically forward-looking, with bold modulations and extensive chromatic colouring, Fesca's quartets were admired by Weber and Rochlitz (but condemned by Fétis). The violinist Spohr, a devotee of Mozart, composed 34 quartets between 1805 and 1856; at their best, they successfully synthesize the Classical and Romantic styles in a conversational context characterized by formal balance and motivic working; six of them, including opp.11 (1808) and 83 (1830), are of the *quatuor brillant* type, as are several potpourris and variations for violin with string trio accompaniment. By 1830, both Berwald (no.1 in G minor, 1818) and Mendelssohn (three, including opp.12 and 13) had begun composing quartets.

4. 1830–70. That the 19th century was the 'Age of Beethoven', at least as far as instrumental music was concerned, was already perceived by contemporaries and is not merely a construct of 20th-century historians. It does not necessarily follow that, in surveying the history of the string quartet after Beethoven, the works of succeeding generations are to be seen merely as attempts either to measure up to Beethoven's challenge or to sidestep it: this would give the history of the string quartet across the middle of the century the appearance of a panorama of connections and configurations, admittedly enhanced by Mendelssohn and Schumann, but essentially a superficial picture, with everything falling short of Beethoven banished to the periphery. Further, Beethoven's middle-period and late quartets had not yet fully registered their effect.
